New York Herald Tribune

announces the appointment of

WOODWARD & KELLY

London Guarantee & Accident Bldg., Chicago

Fine Arts Building, Detroit

as

WESTERN REPRESENTATIVES

This appointment brings into close association in the national advertising field three powerful market media—The Chicago Daily News, the Cleveland Plain Dealer and the New York Herald Tribune.

Robert H. Flaherty, who has been the Western Representative of the New York Herald Tribune with headquarters in Chicago, has joined the staff at the home office in New York.

DEC 8 1952 LINDELL

Selling Women's Wear and Millinery in PHILADELPHIA

Philadelphia, having the third largest population in the United States, is an important market for the maker of Women's Wear and Millinery.

With over three million people, living in more than 520,000 separate dwellings in Philadelphia, Camden and their vicinity, it offers particularly attractive possibilities to makers of women's wear.

To reach its vast army of feminine buyers and consumers you have at your command the advertising columns of THE EVENING BULLETIN, the newspaper which more than any other has the confidence of the women residing in this market.

Philadelphia has been very prosperous this year and holiday buying of wearing apparel on the part of its women and girls will be quite big.

Send for a free copy of THE BULLETIN ROUTE LIST OF WOMEN'S WEAR DEALERS IN PHILADELPHIA AND CAMDEN. It will be of great help to your salesmen in calling on the trade.

DOMINATE PHILADELPHIA

Create maximum impression at one cost by concentrating in the newspaper "nearly everybody" reads—

The Evening Bulletin.

PHILADELPHIA'S NEWSPAPER

"In Philadelphia nearly everybody reads The Bulletin"

526,796 Copies a Day

Average daily net paid circulation for the six months ending March 31, 1925.

The circulation of the Philadelphia Bulletin is the largest in Philadelphia and is one of the largest in the United States.

Vol. 58 NEW YORK, OCTOBER 10, 1925 No. 20

U. S. Trade Commission to Hear Charges Against A. N. P. A. and 6-Point League

Notice of Hearing on New Citations to Join National Newspaper Organization and Representatives' Group with A. A. A. A., S. N. P. A. and A. P. A. in Restraint of Trade Case.

A PROPOSED amended complaint has been prepared by the Federal Trade Commission, joining the American Newspaper Publishers' Association and the Six Point League, as respondents with three other newspaper and advertising agency organizations now under citation as operating in alleged restraint of trade. The case primarily attacks the established system of advertising agency compensation.

Hearing on the motion to amend is set to be held in Washington Oct. 23. Delays are expected.

The other organizations previously cited and still named in the proposed new complaint are the American Association of Advertising Agencies, the Southern Newspaper Publishers Association', and the American Press Association.

A motion by attorneys for the Southern Newspaper Publishers' Association to dismiss the entire case because of lack of jurisdiction is now pending.

At Washington EDITOR & PUBLISHER was informed by the Federal Trade Commission, this week, that under the new rules of the commission no statement could be made. However, EDITOR & PUBLISHER has obtained for review a copy of the new proposed complaint amendment, wherein charges against the Six Point League and the American Newspaper Publishers' Association are set forth in detail, and the charges made in December, 1924, against the other three associations, and published in full text by EDITOR & PUBLISHER on Jan. 3, 1925, are repeated or amended.

The amendment proposal, as stated in the notice, makes the following allegations in reference to the American Newspaper Publishers' Association:

"(a) In annual convention endorses the activities of the advertising agencies and passes resolutions approving and endorsing the aforesaid agency system of remuneration, opposing any modification or alteration therein, and declaring that the splitting of the standard agency differential directly or indirectly by any agency is immoral and should not be permitted to continue.

"(b) Issues a series of bulletins to its members carrying propaganda against direct advertisers who place, and against newspaper publishers who receive, direct advertising at less than gross rates, and recounting and approving action taken by individuals and organizations for the maintenance of the aforesaid standard trade differential, and agency commission system, mentioning in said bulletins the names of certain direct advertisers.

"(c) Makes, subject to modification by it from time to time, a list of agencies known as agencies recognized by the said American Newspaper Publishers' Association, for the purpose, among other purposes, of aiding in carrying out the aforesaid combination and conspiracy, and for the purpose of limiting to the agencies so recognized, the benefit of the net rates and the standard trade differential.

"(d) Sends its list of recognized agencies to other respondents for their information, use and guidance, and furnishes said list to its members for their use, to the end that the said combination and conspiracy and its objects be carried into effect.

"(e) Co-operates closely with other respondents and their committees for the purpose of maintaining the said standard trade differential and for preventing direct advertising at less than gross rates.

"(f) Co-operates with the agency association in securing information as to direct advertisers and as to said described house agencies, in order that direct advertisers shall not directly or indirectly obtain less than gross rates, and in order that house agencies shall be eliminated from competition.

"(g) Notifies its member newspapers of national advertisers who try to obtain less than gross rates, so that the member newspapers may be induced to refuse to grant less than gross rates and may be induced to adhere to the standard trade differential and to eliminate house agencies from competition.

"(h) Uses other co-operative means to carry out and effectuate said combination and conspiracy and its above-described purposes."

Specific charges against the Six Point League, its officers, committees and members are made as follows:

"(a) Hold frequent meetings with the Newspaper Committee of the respondent agency association; discuss and co-operate with the agency association on the matter of the elimination of rebating from the standard trade differential.

"(b) Passed a resolution that the members of the Six Point League recommend to the newspapers for which they respectively act as special representatives, that such newspapers adhere to the principles of agency recognition established by the respondent American Newspaper Publishers' Association; adopted the necessary steps so that any advertising agency which has not applied for such recognition receives no consideration by the members of the League; employs a Recognition Committee to effect the said results.

"(c) Insist that the advertising agencies, with which members of the said League do business, shall not cut, or rebate from the said standard agency differential in favor of any advertiser.

"(d) Furnish to the agency association a list of the newspapers which they represent, stating the policy followed by each such newspaper as to publishing the advertising of certain named direct advertisers, and as to receive business from a named unrecognized agency and furnish also information concerning agencies known as 'house agencies,' controlled, confidentially or otherwise, by direct advertisers for use by the said agency association in carrying out the activities of the agency association in this paragraph above outlined.

"(e) Have sought and obtained the co-operation of the agency association to the end that the standard trade differential be allowed only to such agencies as are recognized by the newspaper publishers' associations, and that newspapers which refused to grant concessions from the aforesaid gross rates to direct advertisers should receive from the agencies a preference in the placing of national advertising.

"(f) Have assisted the agency association in the preparation of the lists of newspaper publishers hereinbefore in this paragraph described.

"(g) Use other co-operative means to carry out and effectuate said combination and its purposes."

The amended complaint would sum up specific charges against all respondents, as follows:

"The effect of the aforesaid combination and conspiracy and of the acts and things done by the respondents to effectuate same, all as hereinbefore set out, have been and now are as follows:

"(1) To regulate in part the business of national advertisers by constraining them to employ respondent agencies and other agencies, which maintain said standard trade differential as their minimum rate of remuneration for engaging, on behalf of said national advertisers, in the activities and commerce between various States or throughout the United States, * * * and by hindering and preventing said advertisers from themselves engaging in said activities, and from employing agencies charging for said activities less than the standard trade differential; or in the alternative, constraining said national advertisers to pay for direct advertising at aforesaid gross rates and in addition thereto to engage in said activities at their own cost and expense. To lessen, hinder and obstruct the competition in interstate commerce of such national advertisers as do not employ agencies that maintain the standard trade differential.

"(2) To regulate the publication by newspapers of national advertising in inter-state commerce and to restrict such national advertising to newspapers throughout the United States selected and approved by respondents; to constrain newspaper publishers throughout the United States to charge for the publication in interstate commerce of such national advertising at aforesaid gross rates; to hamper and obstruct the circulation, distribution and sale in interstate commerce of those newspapers whose publishers accept and publish the national advertising of direct advertisers and of national advertisers that employ agencies not adhering to the standard trade differential.

"(3) To regulate the business of advertising agencies throughout the United States by preventing them from engaging in their activities in interstate commerce, (as described) except upon terms prescribed by respondents, and by enforcing the standard trade differential as the minimum price for their said activities; hinder, obstruct and substantially lessen competition, and particularly competition in price, among agencies engaged in interstate commerce as aforesaid; to prevent national advertisers, by establishing advertising departments or said described house agencies, from themselves engaging in the activities (described).

"(4) To deprive the public of the benefits of free competition, and particularly of competition in price, between agencies; to enhance the cost of national advertising in newspapers, and thereby to increase the cost of the distribution of goods, wares and merchandise sold in interstate commerce by means, in whole or in part, of national advertising, and thereby to enhance the cost to the public of the goods, wares and merchandise nationally advertised in newspapers."

The amendments to the complaints previously filed against the A. A. A. A., A. P. A. and the S. N. P. A., include a number of legal technicalities, evidently having as their purpose clearer definition of the activities of the respondents. One new clause in paragraph three, of the motion, says: "Respondent agencies are engaged in the activities (described) to the extent of about 90 per centum of the total amount of national advertising done annually in the United States", which statement is added to the original declaration that these agencies act for about $200,000,000 annually.

In paragraph eight, there is new language to describe the alleged unlawful combination and conspiracy, affecting interstate commerce throughout the United States, "entered into with the purpose and intention of regulating, restraining and hindering interstate commerce." The amendment contends that the alleged conspiracy leads to the following effects:

"(1) That direct advertisers be prevented from obtaining national advertising at less than gross rates, and that all national advertisers be constrained to employ respondent agencies for such other agencies as agree uniformly to receive, and actually do receive as their minimum remuneration for their activities in interstate commerce * * * the standard trade differential of 15 per cent.

"(2) That publishers be constrained to charge gross rates, and to refuse to charge less than gross rates, to direct advertisers, and be constrained not to charge less than gross rates to any one except advertising agencies that agree uniformly to receive, and actually do receive, as their minimum remuneration for their activities in interstate commerce * * * the standard trade differential of 15 per cent, and

"(3) That advertising agencies that accept for their remuneration for their activities in interstate commerce (described), less than said standard trade differential, be eliminated from competition, and that the activities in interstate commerce (described) be restricted to, and monopolized by, such advertising agencies as agree uniformly to receive, and actually do receive, said standard trade differential as their minimum remuneration for their said activities."

The two additional respondents are described as follows by the Trade Commission in the proposed amended complaint:

"Respondent The Six Point League is a voluntary unincorporated association of about fifty individuals, partnerships, and corporations comprising the majority and most of the principal concerns engaged, in the City of New York, in commerce between various States and or

SMUDGY AD COPY HIT BY AGENCY GROUP

Cleveland Advertising Club Submits Resolution Asking A. N. P. A. to Determine Methods of Improving Newspaper Appearances

"Hodgepodge and black smudges" in newspaper advertising copy were condemned in a resolution passed last week by the advertising agency division of the Cleveland Advertising Club.

The resolution suggests that the agency relations division of the American Newspaper Publishers Association take up the subject with the American Association of Advertising Agencies for the purpose of determining "the best workable methods whereby the appearance of both local and national advertising in newspapers can be permanently improved."

The resolution follows in full:

"Whereas, orderly arrangement and clean typography are believed by this division to be beneficial to newspapers and advertisers alike, and

"Whereas, hodgepodge and black smudges injure not only the advertiser and the newspaper publishing them, but also injure advertisers occupying adjacent space; and

"Whereas, it is to the interest of both newspapers and professional advertising men and their organizations that printed advertising be good to look at, therefore be it

"Resolved, that this Division suggest to the Agency Relations Division of the American Newspaper Publishers Association that it take up the subject with the American Association of Advertising Agencies for the purpose of determining the best workable methods whereby the appearance of both local and national advertising in newspapers can permanently be improved."

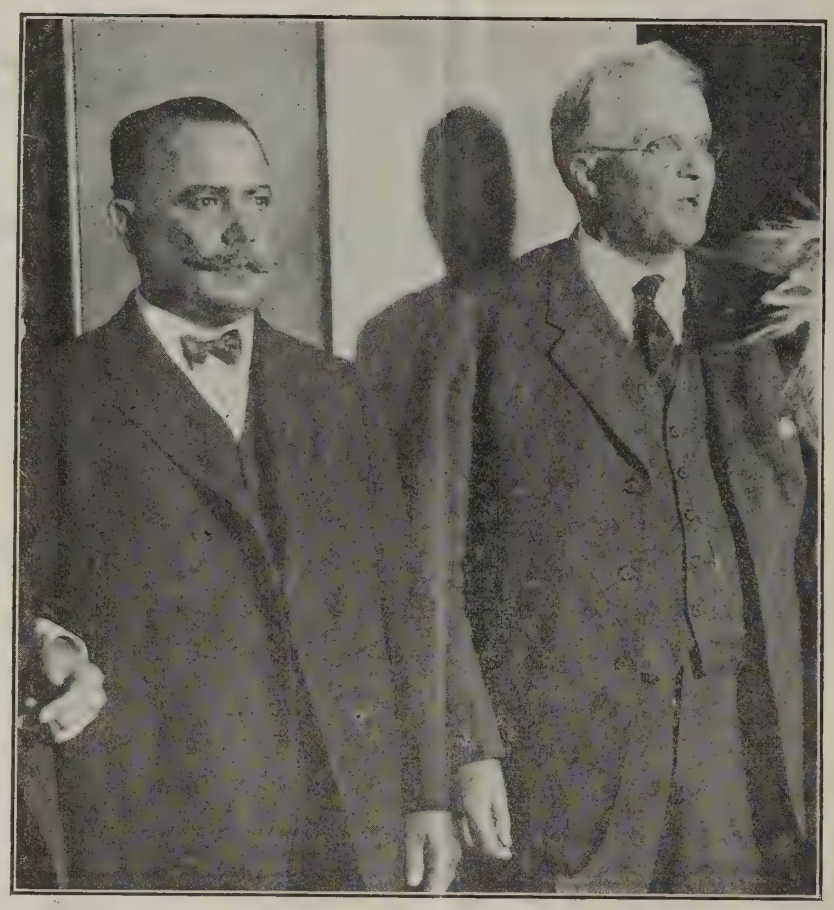
Commenting on the resolution, William Henry Baker, agency division secretary, said:

"Publishers, of course, like to print good looking newspapers. But when the publisher asks the local merchant to clean up his typography and art and eliminate disorderly messes and black smudges, the merchant says, 'Well, I have to do that to compete with other merchants and with many national advertisers.'

"And when the national advertiser or his agent is asked to clean up, he says, 'Well, I have to do that to compete with your smudgy local merchants.'

"So we find everybody tangled up in a vicious circle.

"This division has discussed the subject at length and believes that the fault is not to be laid at the door of any one particular class and hence cannot be wholly corrected by attacking the newspapers, or the advertising agencies or the local merchants, but can be corrected when all of them have sufficiently had their attention called to the abuse and to the advantages to be gained by making newspaper advertising just as attractive in appearance as skill can make it.



"We believe that since newspapers and the big agencies are organized, the best possible place to start would be in a meeting or meetings of your committee with a committee from the A.A.A.A. When such meetings have produced workable suggestions and those suggestions are passed on to the advertising world, then a fair start toward a nation-wide clean-up will have been made, and the rest of the work can be accomplished much more readily than it could possibly be accomplished without the support of the A.N.P.A. and the A.A.A.A."

World Series Well Covered

Press associations this week concentrated on giving evening newspapers speedy breaks on World Series games, started in Pittsburgh. In addition to wire coverage, the United Press and the Associated Press permitted radio broadcasting of their reports.

Heywood Broun, for New York World, wrote a story of the first game in his New York home from radio reports.

CHANDLER ENTERTAINS MEXICAN STATESMAN

Gen. Alvaro Obregon, former president of the Republic of Mexico and Harry Chandler of *Los Angeles Times*, as they appeared together during a visit by Gen. Obregon to Los Angeles recently.

NEWS AND MECHANICAL PRACTICES ON EVENING DAILIES SURVEYED

Average Number of Reporters 9, Desk Men 7, in Cities of 100,000 Replies to Atwood's Questionnaire Show

A COMPOSITE picture of newsroom and mechanical practices on evening newspapers in cities from 85,000 to 150,000 circulation can be drawn from a questionnaire survey recently completed by M. V. Atwood, managing editor of the *Utica* (N. Y.) *Observer Dispatch*.

Questionnaires were sent to 75 managing editors. Forty usable replies were received.

Information was sought on the following subjects: Size of editorial staffs, time linotype machines begin work in the morning, number of linotypes, whether night or an early morning man is employed to get out copy, to what extent morning paper rewrite is depended upon for covering evening events, the time editorial staffs report for work, whether reporters have definite hours assigned, whether editorial shifts are maintained for Sunday papers and whether a Sunday editor is employed, whether certain machines are set aside for news production and whether difficulty is experienced in getting up news copy, and whether a universal copy desk is employed.

The replies show: The average number of inside or desk men is 7 plus. The average number of reporters is 9.7 plus.

The make-up of the inside staff of a paper of 43,000 circulation in a city of 137,000, as given in the questionnaire, Managing editor, associate editor, paragrapher, stenographer, society editor, women's club and organization editor, cartoonist, two men in library and reference room, city editor, two copy readers, telegraph editor, assistant telegraph editor, feature editor, radio operator, sports editor, and correspondence editor. The city reportorial staff 12, with 2 office boys.

In 15 plants it was found the linotypes begin work at 7:30 a. m; in 10 plants at 7 a. m; in 5 at 8 a. m; in one at 8:15; in one at 8:30; in one at 6:30; in one at 7:15; in one at 7:40.

The average number of linotypes is 13. One plant reporting 19 machines said it would increase to 23 soon. One plant reported 8 linotypes and 4 monotypes; in the average these were figured as 12 linotypes. One plant reporting 12 machines said that 2 were usually down; in making the averages, this was figured as 12.

Nine papers reported a night editorial man was employed to get out early copy. Thirty reported that no such man was employed. Of the 9 employing night men, 3 went to work at 6 o'clock in the evening, 1 at 4 o'clock, 1 at 5:30, 1 from 7 to 8, and 1 reporting 3 men had them go to work at 1 a. m., 1:30 and 2. Twenty-nine papers reported that no early man was employed, and 9 replied that such a man was employed. In compiling the figures from the replies, only those papers which said men came to work at 6:30 or earlier were considered. Nine papers, on this basis, said that an early morning man is employed. Four reported that the men started work at 6:30 a. m., one at 5 a. m., and two at 6. a. m.

No tabulation is possible to show to what extent morning papers are used for covering night assignments, as very few newspapers replied in percentages. Only 8 of the 36 replying said that no use was made of the morning papers. Some editors frankly replied that the morning papers were depended upon entirely. Others said very little.

Editorial staffs of 14 papers go to work at 8 o'clock, 8 at 7 o'clock, and 10 at 7:30. One replied from 7 to 7:30, one from 7:30 to 8, one from 8 to 8:30, one from 6:30 to 8:30, one replied desk men at 7, reporters at 7:30, and one replied 7 to 9.

On 30 papers, reporters are expected to do other work after their day's news is written. On 6 papers their duties are supposed to cease when the daily grist is turned in. On 16 papers 8 hours is considered a day's work for a reporter, on three papers 8½ hours, on two papers 9 hours and on 14 papers a reporter has no hours.

Of the 18 papers having Sunday editions, 9 reported that a shift system is employed, 6 reported that the men worked through without shifts, one reported a special staff, two reported shifts dor desk men, and one reported "50-50." Eight papers having Sunday editions employ no Sunday editor as such, while 10 do have a Sunday editor.

On 18 papers certain definite machines are set aside for news and certain others for advertising. On 16 papers machines are used interchangeably.

In reply to the question as to whether papers had difficulty in getting news composition on days when advertising was heavy, 19 replied yes, six replied no, four replied some, two replied not often, and one replied one day a week. Of those who replied no difficulty was experienced, two were papers in which news and advertising were handled on separate machines, and one was on a paper where the machines were used interchangeably. The two reporting "not often" were papers having separate machines for news.

On 20 papers no universal copy desk was employed, and on 18 such a desk is used.

Daily Installs New Radio Equipment

Beginning Oct. 1, the *Kansas City Star* will have in operation a new radio sending station. A 1,000 watt transmitter recently was installed, supplanting the old 500 watt set. Leo Fitzpatrick, "Merry Old Chief" of the Star's station, WDAF for four years, has gone to Detroit to direct the Jewett 5,000 watt station.

FEDERAL TRADE CASE

(*Continued from page 3*)

throughout the United States on behalf of about 1400 newspaper publishers who are engaged in commerce between various States of the United States, all as hereinafter more fully set out. Respondents Joseph F. Finley, F. P. Motz, W. D. Ward, and M. P. Linn, are, respectively, the President, Vice-President, Treasurer and Secretary. Respondents John Budd, H. G. Halsted, A. W. Howland, M. S. Hunton, Geo. R. Katz, W. H. Lawrence, Ralph R. Mulligan, John O'Hara, F. St. J. Richards and Geo. A. Riley are members of the Executive Committee of the said league, together constituting the said Executive Committee. Said committee conducts and administers and aids aforesaid officers in conducting and administering the activities and affairs of said league. The members of said league are more than fifty in number, which number varies from time to time by the dropping out of the old and the addition of new members, so that it is impracticable at any given time to name as parties and bring before the Commission herein each and all the members of said league without manifest inconvenience and delay, wherefore, the officers of said league hereinabove named, as parties respondent individually and as such officers are now here made parties respondent as representing each and all the members of said league.

"Respondent American Newspaper Publishers' Association is a corporation organized under the laws of the State of New York, with its principal office and place of business in the City of New York, in said State, in which various individuals, partnerships and corporations engaged in the publication of newspapers in various cities and towns in all parts of the United States and Canada hold membership. The newspapers published respectively by the members of said association are distributed and sold and circulated by them in the States wherein they are published, and in many instances in neighboring States, and to some extent in other portions of the United States and foreign countries."

Correction

The *Des Moines Register & Tribune-News* omitted the word "Sunday" and wrongly located the word "daily" when stating their circulation figures for August in an EDITOR & PUBLISHER advertisement last week. The figures, which were correct, should have been described as follows: "August Circulation (net paid) Daily, 161,961—Sunday, 132,210."

ANOTHER SUNDAY PAPER ADOPTS TABLOID SIZE

Rochester (N. Y.) Herald Follows Lead of Memphis News-Scimitar and Cleveland Times, Printing 96-Page Edition in Two Sections—50,759 Lines of Advertising in First Issue

ANOTHER Sunday newspaper has adopted the tabloid format. The *Rochester* (N. Y.) *Herald* like the *Memphis News-Scimitar* and the *Cleveland* (O.) *Times,* earlier exponents of the idea, reports that its first tabloid issue on Oct.. 4, pleased the reading and advertising public. The issue, of 96 pages, carried 50,759 lines of business, some was omitted and some declined, and no business was solicited on Saturday, according to the management. The paper sells for 5 cents.

"Tabby" is the pet name which the publishers have applied to the venture and two genial cats with pens in their teeth flank the paper's name on page 1. Below the name is the slogan "Rochester's Sunday Picture Newspaper." The issue was printed in two sections and was first made up for 80 pages on Oct. 1 with a limit of 40,000 lines on advertising. When demand for space swamped tl.is allotment, 8 extra pages were inserted in each section Oct. 3.

Page 1 of the main section carried five pictures, four of which were of local interest, one picture of a wealthy New York woman whose gems had been stolen, and an index of news and features. A coquettish black kitten decorated the middle of the page.. Two news headings appeared at the top of the page referring readers to stories on page 3. Usual practice of tabloid editors has been to flash one news story in 96-point or larger blackface type above the page 1 picture layout. The Herald "Tabby" used a 36-point Caslon Bold head in capitals and lower-case for its first story and placed immediately below it a 30-point head of the same type family. An italic line above the titlehead referred readers to page 38 for a football story of local importance. Captions for pictures followed the latest tabloid styles in putting one, two or three characteristic words in 18-point Caslon Bold capitals and the body of the caption in 7-point leaded old style.

Page 2 caried an excellent feature under an art head, "Tabloid News of the World." the words appearing on a reversed plate between two terrestrial globes. The news pages are five columns wide, with columns 12 ems wide and 210 agate lines deep. Three-point column-rules are used. Advertising appears to the extent of 228 lines on page 2 and not at all on page 3, which is the first display news page.

A streamer-head in 36-point caps and lower case carried a 500-word story in the left-hand column, with two banks of subheading. The first bank is a three-line pyramid in 24-point Bodoni caps and lower case and the second is a four-line hanging indention in 12-point caps and lower case Bodoni. The 24-point size is used in three-line pyramid in four single-column and one-double column head on the same page. Three "shorts" carried two-line slider heads in 14-point of the same type-face and extremely brief items carried 7-point black-face cap heads, presumably set on the same machine with the article. An italic head in 10-point leads a bold-face box-effect story, referring to a speech before the local Ad Club last year in which the speaker prophesied the success of the Herald as a tabloid newspaper in 1939.

Advertising in general follows the clean-looking typographical style of the news pages and is abundant throughout the remaining pages of the news section. Few streamer heads appear in the pages which follow the "show-window."

The editorial page, carrying two 18-em columns and two of the normal 12-em size, is designated by a five-column box head in 30-point Goudy caps and lower case. The mast-head occupies 6¾ inches in one of the wide columns and is followed by an editorial discussion of the Herald's "journalistic advance." The editorial, set in 10-point, sets forth in familiar language the advantages claimed by the tabloid over its rivals of the traditional size, and goes on: "There has been an increasing tendency to make Sunday newspapers enormous in size, and there has been a consequent padding of their columns with much that is either trivial or verbose. A recent test showed that it required 14 hours of steady reading to follow every word that was contained in one issue of a large Sunday newspaper. Such emphasis on size alone tends to a policy of filling the gargantuan space with indiscriminate selections of reading matter. The tabloid newspaper obviates this manifest clumsiness and waste of the ordinary Sunday paper and reduces its pages and their size to the efficient proportions.

"There has been a mistaken idea abroad that the tabloid newspaper was necessarily a cheaply sensational publication, but this idea has only gained currency because of the few tabloids that have adopted a sensational policy. In Europe the tabloid has long been recognized as the better form of newspaper and in London and Continental cities the most dignified and influential papers have long since adopted this form. The Herald will in no wise change its policies nor its high standards of clean, intelligent, constructive journalism, in altering its physical format. Instead, the new Sunday Herald will become a brighter, smarter, and more entertaining paper than ever before."

$750,000

First page of premier new tabloid Sunday.

Half a dozen paragraphs follow the editorial, and a quotation from the Scriptures is set in 10-point light-face italic box at the top of column 2. A clipped editorial and five inches of philosophy in short takes fill column 3; "Who's Who in the Day's News" and retrospective clippings from Rochester papers of 25 and 45 years ago occupy the right-hand column.

Comparatively few pictures were used on the news pages, as present tabloid practices go, and the double truck of the main section, usually sacred to news pictures, was sold to a local motor distributor.

Arrangement of classified advertising is unusual, as appears on the page reproduced in another column.

The largest type heads in the paper appeared on the sport pages, of which there were five. The streamer heads are 48-point Caslon Bold caps and lower case. Other sport page headings follow the 30-point and 24-point styles of the news pages.

A full spread of pictures fills the back page of the first section. The feature is a five column cut of new Rochester buildings which are transforming the city sky-line and another local picture in three columns concerned the Rochester Museum's demonstration of the evolution hypothesis. Three other pictures on the page were syndicated mats of national news events. The page carried a box heading in 30-point Goudy italic and each picture had an 18-point Caslon caption with an unadorned 7-point underline.

Section Two was introduced by a full-page pencil drawing of an old Rochester mansion that has been destroyed to make room for a commercial building. Its caption is five-columns wide 14-point Caslon, with a four-line initial. The second page is devoted to a feature of Rochester people during the "Patriots' War of 1838."

Society is given a big play on the succeeding five pages, and is followed by a "Journey Through the Shops" page, a page of recipes and home and health advice to women, another galaxy of cookery formulas, a page of fashions, and a page of miscellaneous women's features.

The local theatres get pictorial attention on the next four pages, sharing the space with the radio programs and a few syndicated pictures. Music's advertising and comment take two pages, followed by a page of art news. Two magazine pages and a page of comics in black and white come next, followed by the section double-truck, which is patronized by a local realtor.

Ten pages compose the automobile section, which has the usual proportions of manufacturer's publicity, plus some interesting local traffic news. Two pages of text and advertisements tell what's what in radio. Four pages deal with real estate, including a four-column announcement of Florida realty.

"Ninety Years of Rochester History," a serial history of the city, takes a full page and a syndicated page of cross-word puzzles fills the inside back cover. The latter is a full page of pictures, having the same box caption as the back of the first section—"Folks and Things Through the Camera's Eye."

A four-page comic section in regular seven column size was included.

DES MOINES DAILY GOES TO PARIS FOR M. E.

John Evans of A.P. Foreign Staff Joining Evening Capital Oct. 15 —Began on That Paper 20 Years Ago

The *Des Moines* (Ia.) *Capital* has gone to France for a managing editor. John Evans, acting chief of the Associated Press Paris Bureau while Elmer Roberts was with the Caillaux Mission in the United States, will take up his new work Oct. 15.

JOHN EVANS

Mr. Evans in going from Paris to Des Moines is returning to his home town. He broke in on the Capital 20 years ago as a cub at $5 a week shortly after Lafe Young, Jr., general manager of the Capital, just back from the University of Michigan, was taking over the business management of the paper under the direction of his father, former United States Senator Lafayette Young.

When the Associated Press began the expansion and reorganization of its foreign service after the war, Mr. Evans was the first man sent over. As second in command at Paris, under Mr. Roberts, he has been in charge of the news and has covered a number of notable news stories.

Mr. Evans is 42 years old and has seen 11 years' service with the Associated Press.

He was born in Des Moines, married there, and both his children were born there, but the two Mesdemoiselles Evans have spent half their lives in France and have had nearly all of their education in Parisian schools.

His desire to bring the girls back to America before they reach age of marriageability has had much to do with the change in work.

Evans started in life to be a cook. His father was in the restaurant business and sent him to Paris to study Careme Vatel, Dubois, Garlin and other kitchen notables. He was slated to go to St. Petersburg in the French Embassy kitchen, but went home instead, and soon felt the lure of newspaper work.

He joined the *Des Moines Capital,* went to the *Washington Times* for a year, then returned to the Capital to cover the legislature. Later he worked on the *Chicago Inter-Ocean* under Walter Howey, who was at that time night city editor.

Evans left the newspaper field for four years to manage the Des Moines Coliseum, but business reverses caused him to return. He joined the Associated Press Los Angeles bureau, became correspondent, and later news editor of the Western division, assistant of Edgar T. Cutter, then superintendent of the Western division, now in charge of the Central division at Chicago. Before going abroad he served on the New York cable desk.

On the value of foreign service Evans says:

"Foreign service is a sort of post-graduate course in news judgment and news gathering. It might, at first glance, seem to take a man out of the highly specialized, fast work of the domestic field and cause him to be out of touch with the news at home, but, as a matter of fact, it gives him a more detached view of events. It lets him see things in a truer perspective while giving him an intimate knowledge of other peoples, customs and politics. The American view will always be his, but the attitudes of other nations can but serve to moderate intense nationalism and furnish the basis for a more kindly and more sensible decision on the right and wrong of viewpoints."

"SAVE THE POSTAGE"

Thus Toledo Times Advises Prudential Service Bureau

"Save the postage" and invest in newspaper space was the advice written recently by the *Toledo Times* to the Prudential Service Bureau, publicity department of the Prudential Life Insurance Company.

The Times' letter follows:

"For the past few months we have been receiving daily from four to six cents worth of postage stamps from your organization.

"We realize that this is not a vast amount, but if you are sending the same amount of matter to all of the newspapers in the country you are piling up quite a bit of expense daily that we really believe should be reflected back to your policy holders in reduced premiums.

"If you are interested in telling the people of the city of Toledo about the Prudential Life Insurance Company, we believe there is a way to do this that is entirely effective and is not disguised.

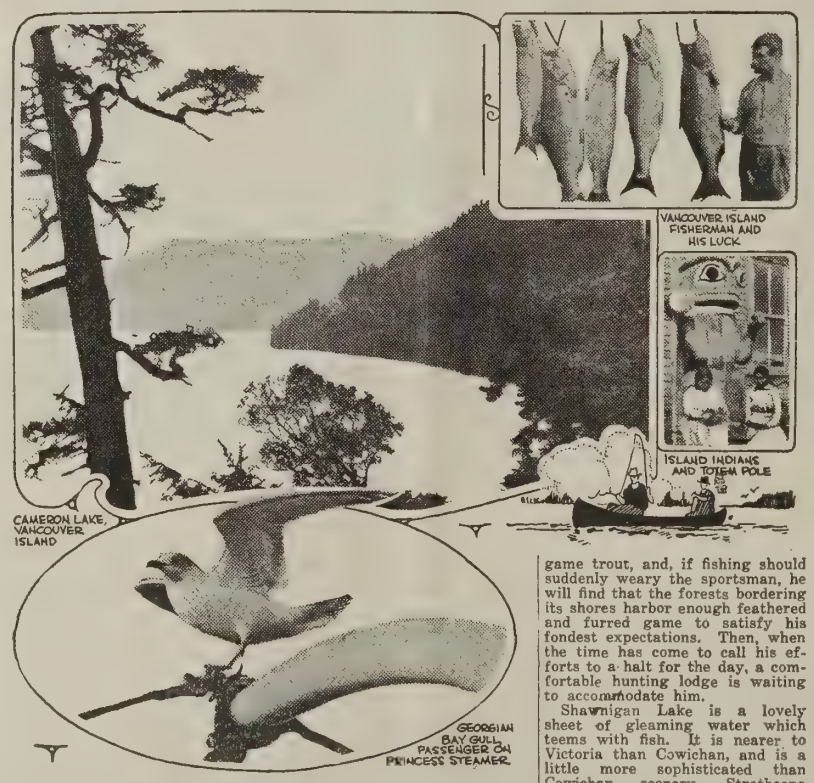
"As you no doubt are aware, Uncle Sam has passed a law that all advertisements should be properly designated. We believe your communications come entirely within this interpretation of the law and for that reason it would be necessary to properly mark them so that the reader might know the author of the statement.

"We do not know how long you intend to send out these daily messages of good cheer and little news, but so far as the Times is concerned we are perfectly willing that you remove our name from your list and thus save the postage that you are spending at the present time on this paper.

"If you will figure up the postage on free publicity we are quite sure that you will be in a position to at least buy small space in some papers that will do you considerably more good than these news stories."

JAMES E. SCRIPPS DEAD

Operation Fatal to Eldest Son of Detroit News Vice-President



James E. Scripps, 22, eldest son of William E. Scripps, vice-president and managing director of the *Detroit News,* and grandson of James E. Scripps, founder of the News, died in Harper Hospital, Detroit, last week following an operation for appendicitis.

For the past several years he had been a regular member of the staff of the News.

The following, all fellow workers on the staff, acted as pall bearers: Malcolm W. Bingay, managing editor, W. S. Gilmore, Fred Gaertner, Jr., A. B. Moody, Clarence D. Brewer, E. Y. Watson, H. W. Patton and George B. Bassett.

GALLANT FISH BITE BEST FOR LADIES, PRESS AGENT INFORMS EDITORS

Vancouver Island Salmon Rise to a Lady's Bait

Guides and fishermen on Vancouver Island like to take visiting ladies out fishing, because they say they bring luck. One Scotchman who operates a launch used for trolling salmon declares it is because the fish are gentlemen in the waters roundabout Campbell River, and so they come up to a lady's bait. At any rate, true it is that an American woman, who goes up to Campbell River each year with her husband, always gets more fish than he does. And a little Canadian girl, who had never fished in her life before, caught an eight pound salmon ten minutes after she started trolling.

Not only is the fishing excellent roundabout Campbell River, but excellent catches are made at almost every spot on Vancouver Island where the spoon or fly drops. And the fishing season lasts practically until November 30. Trout fishing, of course, is best in the rivers and lakes roundabout Cowichan. The waters of Cowichan Lake itself teem with game trout, and, if fishing should suddenly weary the sportsman, he will find that the forests bordering its shores harbor enough feathered and furred game to satisfy his fondest expectations. Then, when the time has come to call his efforts to a halt for the day, a comfortable hunting lodge is waiting to accommodate him.

Shawnigan Lake is a lovely sheet of gleaming water which teems with fish. It is nearer to Victoria than Cowichan, and is a little more sophisticated than Cowichan scenery. Strathcona Lodge, on its edge, makes a good central headquarters for fishermen. Round the lake are dotted summer cottages, each with its tiny boat house, or its canoes pulled up against the shores. While the fishing is not as sporty here as at Campbell River, where the big salmon run, nor even as thrilling as at Cowichan, where the gamey trout disport themselves, it is even better for the vacationist who wants other sport, golf, tennis, and swimming, as well as a bit of fishing.

H. J. CONOVER, of Cleveland, is one of the most persistent of the space-moochers. Of course, like all of them he is an expert on what constitutes "news." The above is a specimen of the sort of stuff that Conover dumps on editor's desks all over the country, week by week. This press agent is making a modest fortune by exploiting newspapers and their readers. He not only asks editors to run his "features," which are pure advertising, but calls upon them to put his name on their mailing lists, so he can show proof of publication to his customers without spending the price of a daily newspaper. What do American editors think of such bunk as Conover gets off in the above three-column grab in the interest of Vancouver Island where fish are said to bite best for the ladies? Dump this specious copy and force these resorts to buy their publicity legitimately from publishers!

R. C. KENNEDY NEW G. M. OF LOUISVILLE DAILIES

Herald-Post Executive, Railroad Man for 30 Years, Assumed Duties Oct. 6 on Opening of New Plant

(*By Telegraph to* EDITOR & PUBLISHER)

LOUISVILLE, Ky., Oct. 7.—R. Campbell Kennedy has been made general manager of the *Louisville Herald-Post,* which recently moved into its new million-dollar newspaper establishment. The new general manager assumed his duties at the formal opening of the new building on Oct. 6.

R. C. KENNEDY

Until Oct. 1 of this year Mr. Kennedy had been assistant general passenger agent in charge of the Western operations of the New York Central Railroad, with headquarters at St. Louis, from which position he resigned to assume general direction of the affairs of the Herald-Post. Mr. Kennedy is 50 years old, was educated and had his early training in Louisville and is a member of a family, which has been prominent in Louisville for half a century. During his railroad career Mr. Kennedy has been stationed at various times in Cincinnati, Huntington, W. Va., and Dallas, Tex. Mr. Kennedy is a brother of Mrs. James B. Brown, wife of the editor and publisher of the Herald-Post and by reason of this relationship and by reason of his former residence in Louisville, has kept in touch with the civil and commercial progress of Louisville, thus better equipping him to assume the important post for which he has been chosen. Mr. Kennedy was at his desk at the opening of the new plant greeting old friends and new.

"Its just like home" he declared, "getting back to Louisville and renewing acquaintance with its splendid people. In giving up railroad work, in which I have been engaged for more than 30 years I was actuated by the belief that there are untold opportunities for the upbuilding and development of these great newspaper properties of the Herald-Post. I am fit and ready for the undertaking. My ideal is to render the utmost in service through these newspapers to our readers and advertisers.

"In this wonderful new home, with every facility and convenience at our command, I have every confidence that this ideal is possible of attainment."

ELIMINATING SHELF-LOAFERS

Nothing Does the Trick Better Than Newspaper Space, Says Agent

"Quick turnover, as accomplished through newspapers, eliminates shelf-loafers from the dealers' stores," was one line from a tribute to newspaper advertising paid this week by Charles C. Green, head of the Charles C. Green Advertising Agency, New York, and president of the Advertising Club of New York.

"The only competitor any product has is the consumer," Mr. Green said. "The consumer either knows about the product or does not know about it. It is up to the advertiser to tell consumers and convince them. Also, to reach them quickly at the least possible cost.

"The answer to that is unquestionably newspaper advertising.

"The speed with which you can reach millions of people over night is not available in any other form of advertising. The results from newspaper advertising are quickly recognized by dealers and newspaper advertising is always local."

ADVERTISING LIGHTING BRITAIN'S TRADE FOG

Firms Investing in Advertising Space Are Serving Present Serious Business Depression, Says C. Harold Vernon, Internationally Known Agency Director—Presented Friendship Token

ENGLAND today is building a huge new monument to the power of advertising, C. Harold Vernon, internationally known advertising man, declared this week in an interview in New York.

In this figurative statement, he was referring to what he said was fact that firms investing in advertising were alone surviving successfully the period of depression through which Britain is now passing.

Mr. Vernon, managing director of C. Vernon & Sons, Ltd., London advertising agency and international vice-president of the Associated Advertising Clubs of the World, is spending several weeks on a business trip to this country.

Coincident with his visit first international plans were laid for the Philadelphia A. A. C. W. convention, June 1926, and arrangements discussed for expansion of the organized advertising movement on the Continent of Europe. While in New York this week, Mr. Vernon was guest of honor at a luncheon given by the Advertising Club of New York at which he was presented a large silver vase as a token of friendship from American advertising men.

"The one bright spot in the terrible depression in England today is the way advertising is meeting the test," Mr. Vernon said. "The only businesses which are booming are those using advertising.

"The industrial position of Great Britain is very bad. Trade is at a lower ebb than I have ever known it to be before. Nearly two million are unemployed.

"This depression is chiefly in the heavy trades—steel, cotton, wool, ship building. British advertising men are seeking some way to improve this situation, possibly through co-operative advertising.

"On the other hand, the big department stores are using more and more advertising space in newspapers. Their earnings are all increasing. Their stock is going up. Their success stands out as a monument to what advertising can do in time of stress.

"Large manufacturers who realize the investment value of advertising in times of depression are also reaping remarkable results at the present time.

The outstanding American advertising success in England backing an American product has been that of Palmolive soap, Mr. Vernon said. As a result of a widespread campaign, Palmolive now ranks third in sales in Great Britain, he declared.

English newspapers do not conduct merchandising departments for the benefit of their advertisers.

"In England it is the advertising agency that offers sales cooperation to clients," Mr. Vernon said. "Personally I should be very jealous to allow the newspapers to take over this service. It is one of the most important departments of my agency."

In some cases the sales service rendered a client overshadows the advertising service rendered, he added.

Little has been done in England toward collecting linage and circulation statistics of British newspapers.

"It is not necessary because the country is so small every market and every paper is well known to advertising agents and advertisers.

"In the United States this condition is impossible because of its vast size and the number and variety of its publications. If an advertiser tells an American agency he wants to launch a campaign in Wyoming, for instance, it is necessary to consult circulation, linage and market data.

"Britain's compactness is an aid to the advertiser, according the visiting British agent.

"A national campaign can be run in England for the cost of a state campaign in the United States," he declared.

"For £1,000 per week every section can be covered. Advertising appropriations of English firms are relatively lower than in the United States, I doubt that there are more than 30 firms spending more than $200,000 a year. In America larger sums apparently are quite common."

Speaking of the organized advertising movement in Britain, Mr. Vernon said:

"The first British advertising convention held at Harrogate last July and attended by more than 1,000 delegates, proved a great impetus to the organized advertising movement in Great Britain.

"The general public, as well as the business leaders, are rapidly being educated in the power of advertising, its necessity, and its general truthfulness.

"District 14 has established a very powerful vigilance committee from which great benefits are now being realized. Overstatement in advertisinug copy is being prevented, as well as fraud and deception.

"We are already making plans for our next British advertising convention to be held at Blackpool, May 1-5, 1926. Hosts of this meeting are to be the Manchester and Liverpool advertising clubs."

Concerning expansion of the organized advertising movement in Europe, Mr. Vernon was very optimistic. A new district was created for the Continent at the Houston convention, he pointed out, and that new district needs help which District 14 of England, of which he is past chairman, is now planning to give on a large scale.

"We mean to organize the European district as District 14 was organized," he declared. "Three years ago there were only two advertising clubs in England. Today there are 40. At present there are only about seven clubs on the Continent, whereas there should be at least 200.

"We hope soon to have that many different clubs working for truth in advertising in France, Belgium, Holland, Switzerland, Italy and Germany. England has derived real benefits from organized advertising as represented by the A. A. C. W., and we want the same benefits distributed to our neighbor nations."

More than 300 delegates from England will attend the 1926 A. A. C. W. convention to be held in Philadelphia next June, Mr. Vernon said. He will be a guest of the Poor Richard Club of Philadelphia next week, where international program plans will be discussed for the first time.

Speaking at the Advertising Club of New York, Mr. Vernon commented on the French debt negotiations.

"America will render Great Britain a great service in making it easy for France to pay," he declared. "The same thing is also true of Italy. France is our nearest market. England must have its export business to live, and if the load of France and other debtor nations is eased by America, Great Britain will benefit."

He also read messages of greeting from prominent advertising men of England addressed to advertising men of America. These greetings were from W. S. Crawford, Sir Charles Higham, Thomas MacDougal, George Scott and John Cheshire.

"The advertising men of America and England are in complete harmony of thought and action," he continued. "I wish that this same state of affairs could also be made to pertain to our respective industrialists.

"American advertising men should persuade American industrialists that they have obligations they owe to industrialists in other countries of the world. I suggest that if the industrialists of the United States should meet the industrialists of Great Britain as we advertising men have met, the result would be accomplishments which would help us all in this time of stress."

Silver vase presented to Mr. Vernon by the Advertising Club of New York, complimenting his well-known fad of flower growing.

Presentation of the silver vase was made by H. H. Charles, former president of the club, on behalf of its nearly 2,000 members. Charles C. Green, club president, presided at the luncheon.

Among those at the speakers' table were: H. R. Swartz, president, Intertype Corporation; Gilbert T. Hodges, Frank A. Munsey Company; Paul Meyer, *Theatre Magazine;* Frederick Hume, former secretary, National Publishers' Association; Francis H. Sisson, vice-president, Guaranty Trust Company; Bernard Lichtenberg, Alexander Hamilton Institute; S. L. "Roxy" Rothafel; T. H. Dehnatel and A. C. Doornbos.

Mr. Vernon is a former president of the Thirty Club of London, a famous advertising society, and a former vice-president of the Publicity Club of London. For three years he was chairman of District 14 of the A. A. C. W., and success of the first British advertising convention held at Harrogate last July was largely because of his efforts. At the Harrogate convention preliminary plans for an international buy-British-goods advertising campaign were announced. Mr. Vernon declined to comment on that drive at the present time. In 1923 he was one of the leaders of the large delegation of British advertising men which attended the Atlantic City convention of the A. A. C. W. and made many friends in this country then.

When Mr. Vernon arrived in New York last week on the Berengaria he was met by a reception committee composed of H. H. Charles, John Clyde Oswald, H. R. Swartz, A. E. MacKinnon, William H. Dodge, P. L. Thompson, Paul Block, Stanley Resor, James O'Shaughnessy, Francis H. Sisson, Paul Meyer and Colver Gordon.

ILLINOIS PRESS ASSOCIATION CONDEMNS PRESS AGENT PROPAGANDA

Called "Greatest Menace to American Newspaper Today" by W. J. Smith, Newly Elected President— Villard Hits "Government in the Dark"

THE press agent evil was branded as "one of the greatest menaces to the American newspaper of today" by W. J. Smith of the *Waukegan Sun*, newly elected president of the Illinois Press Association at the 60th annual convention of that organization at the University of Illinois, Champaign, Oct. 1-3.

W. J. Smith

"Highly paid 'experts' are engaged by various big companies to flood editorial offices with propaganda until the editors are almost helpless in their effort to get good, live news into their papers," Mr. Smith said. He discussed at length the methods of propagandizing the press and declared the Association must take immediate steps to check the flood. Editor & Publisher's campaign against press agents was heartily endorsed.

The association elected H. G. Fell of White Hall, first vice-president; A. L. Bowen, Springfield, second vice-president, and H. L. Williamson, Springfield, executive secretary.

A hint of the cry against free publicity came at the opening session when Albert H. Gravenhorst, editor of the *Effingham Review*, retiring president of the association, declared the practice of showering newspapers with the output of publicity department was taking on the aspect of the "black hand."

Sectional meetings Friday gave intensive study of the various problems of the newspaper. Radio, relationship of the editorial and business offices, syndicated newspaper sections, building up papers, commercial printing shops in conjunction with weeklies and general policies were some of the subjects discussed.

Hershel J. Blazer of the *Aledo Times-Record*, a weekly, was the press agent's only defender and his commendation was confined to the publicity from institutions and projects in which the newspaper as a public servant, has a definite and friendly interest. The University of Illinois, he specified, as the type of service that comes under this head and he praised the institution's publicity department. The association membership agreed in this and E. H. Childress of the *Fairfield Wayne County Press* and A. L. Richmond of the *Mt. Carmel Republican-Register* voiced their appreciation of the service, particularly as it referred to agricultural department's bulletins.

Howe V. Morgan of the *Sparta News-Plaindealer* led the discussion on the upbuilding of the paper, declaring it to be largely a matter of individual attention and dependent in a great measure upon each editor. James F. McClure of the *Carlinville Democrat*, U. S. G. Blakely of the *Plainfield Enterprise*, John Udell of the *Lake Forest Lake Forester* and Homer B. Clemons of the *Blue Island Sun-Standard* contributed suggestions in this symposium.

Problems of the commercial printing plants and cost system operations were introduced by Dr. F. H. Bird, director of the department of research of the United Typothetæ of America, Chicago, followed by Prof. H. T. Scoville of the University of Illinois department of accountancy, Roy Clippinger of the *Carmi Tribune-Times*, Harry Bent of the *Morrison Whiteside-Sentinel* and Hugh M. Walter of the *Oak Parker*.

H. L. Williamson, secretary of the association, discussed "The Problems of the Weekly Newspaper" and in the round table that followed S. P. Preston of the *Gillespie News*, Gerry D. Scott of the *Wyoming Post-Herald*, Harry Bell of the *Whitehall Register-Republican*, John Bailey of the *Stewardson Clipper*, M. F. Walsh of the *Harvard Herald* and Norman Bennett of Marshall, spoke.

O. Lawrence Hawthorne of Omaha, Neb., speaking of "Yesterday and You" at the Thursday night session, gave the publishers a little inspiration aside from their practical problems, reciting a group of his verses on childhood and the home.

"It seems to me there is so much in life, so much in history, in memory, from which we may gain inspiration that far too little time is given to their sentimental grandeur," he said in introducing his poems.

Will V. Tufford, Clinton, Ia., Secretary of the Inland Daily Press Association, paid a high tribute to work and success of the press organizations. His topic was "The Necessity of County, State and National Organization of Newspapers."

"I want to assure you that I believe the publishing business of America has come to its dignified state and profitable place in commercial life because we have county associations, state associations, and national associations." Mr. Tufford said. "First in importance to me is the fact that they have brought publishing to so high a standard that no business is more dignified. Associations have raised the ethics of newspapers to such a high ideal that occupants of pulpits no longer lead as teachers of the people."

Oswald Garrison Villard, editor of *The Nation*, addressing the annual banquet criticized the administration at Washington for "conducting a government in the dark," especially condemning the practice of the reference to "a friend of the President" or "one familiar with the views of the President," or similar subterfuge instead of a direct quotation of the President. "On one occasion, you will remember," he said, "Mr. Coolidge deliberately disavowed a statement he had made the day before criticizing the French ambassador."

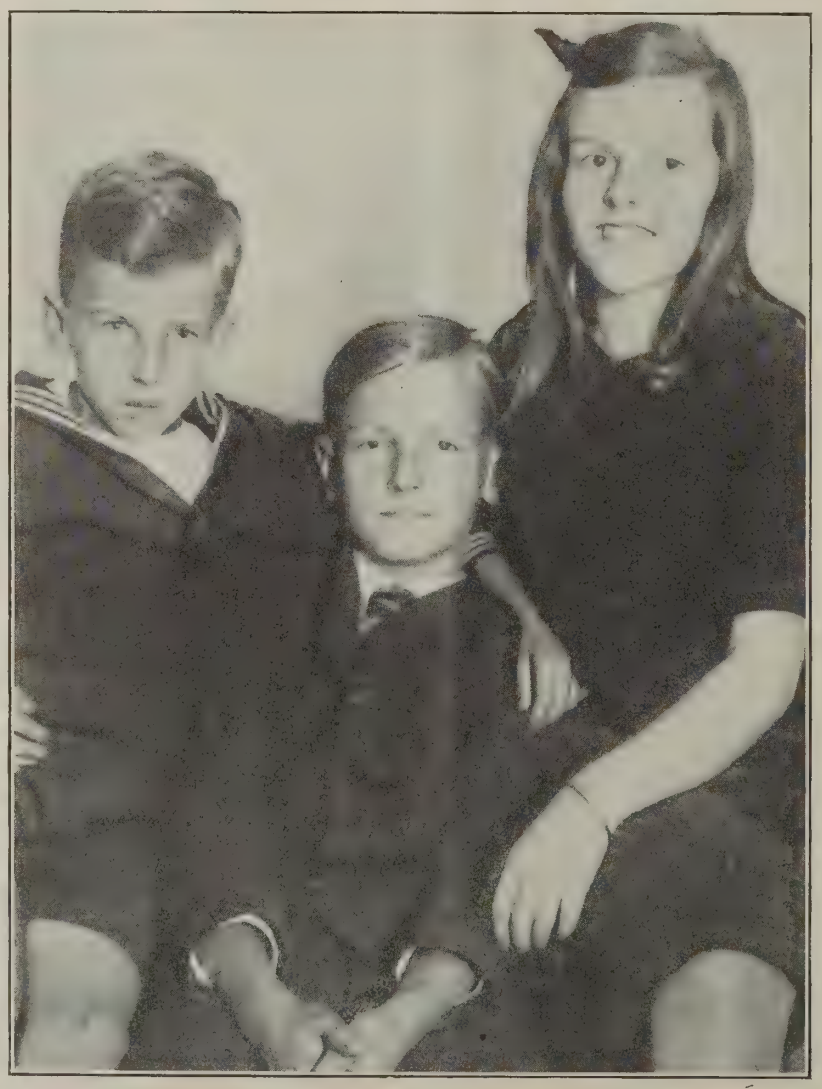
"There has grown up lately a new bondage—to government and government propaganda, which is one of the causes of the public loss of faith in daily and weekly journalism, which the most candid of us admit. We have begun to hedge the President about with something that almost approaches divinity."

Illinois papers which have been using radio to broadcast news bulletins and events advocated continuance and extension of the practice but others decried the radio as a menace to the expansion of the press. A. L. Bowen of Springfield presided at this discussion and leaders in the general talks were W. T. Ballard of La Salle, and Fred R. Jeliff of Galesburg.

The *Aledo Times-Record* won first prize for the best first page in the weekly newspapers contest with the *Carmi Tribune-Times* second. Favorable mention was accorded the *Pike County Republican, Harvard Herald, Chicago Heights Star* and *Crystal Lake Herald*.

The *Moline Daily Dispatch* won the state contest in the dailies group and was ranked third in the national contest.

Special conditions within the association have resulted in the appointment of groups of men to consider the advisability of adopting a sliding scale for payment of dues to the association by the owners of large and small circulation publications and to fix a minimum scale for advertising and circulation rates for Illinois newspapers.



The scale committee includes W. F. Hardy of the *Decatur Herald;* W. J. Sell of the *Grayville Mercury-Independent;* E. H. Childress of the *Fairfield Wayne County Press*. The minimum rate committee includes: James W. Cowley of the *Freeport Journal-Standard;* W. J. Smith of the *Waukegan Sun;* C. R. Denson of the *Minock Dispatch;* Byron Lecrone of the *Effingham Democrat*.

The auditing committee of the association has been named to include H. W. Bailey of the *Princeton Republican;* S. Leigh Call of the *Springfield Illinois State Journal;* John H. Harrison of the *Danville Commercial News*. The resolutions committee numbers S. P. Preston of the *Gillespie News;* J. E. McClure of the *Carlinville Democrat* and L. L. Lindley of the *Granite City Press-Record*.

The *Bemidiji* (Minn.) *Sentinel* won first place in the national community weekly contest conducted by the University of Illinois School of Journalism. The *Centerville* (Mo.) *Observer* was second.

In the front page contest for dailies the *Bloomington* (Ill.) *Pantagraph* was awarded first honors, with the *Janesville* (Wis.) *Gazette* taking second and the *Moline* (Ill.) *Dispatch*, third.

THREE LITTLE BRISBANE THINKERS

Above are the three children of Arthur Brisbane, famous Hearst editorial writer, photographed in Chicago recently. They are, left to right: Hugo, Seward and Sarah.

FAKERY IN FURNITURE ADS CHARGED

Two New York Merchants Ordered to Cease Advertising Wares As of "Grand Rapids" Make by Trade Commission

A "cease and desist" order was handed down Oct. 4 by the Federal Trade Commission, Washington, against Jacques E. Ernest and Norman J. Greenberger, New York furniture merchants, found guilty of false advertising and misrepresentation.

The commission reported that under the trade name of "Grand Rapids Furniture Manufacturers' Association, Inc.," they had "intentionally deceived the purchasing public by advertising extensively that they were the New York branch of an association of Grand Rapids furniture manufacturers."

The commission listed examples of what it branded "false and misleading statements" made by the defendants in newspaper advertising. These excerpts were to the effect that the defendants operated a branch for Grand Rapids factories, and said "We guarantee to and do undersell any other furniture establishment 30 per cent to 50 per cent."

"The respondents," said the commission findings, "advertised sales of furniture at 50 per cent discount, but as a matter of fact they determined how much they wished to obtain for their furniture, then doubled the price and marked by means of tags the price of furniture accordingly. A customer could therefore pay 50 per cent of the price appearing on such tags, yet pay at a higher level than prevalent retail prices for furniture of a like kind and quality.

"It was also found that although 98 per cent of the furniture sold by respondents was made in places other than Grand Rapids, Mich., nevertheless the respondents, by the use of gummed labels, marked each piece and all of the furniture with the name Grand Rapids."

The commission entered an order directing Greenberger and Ernest to "cease and desist" from seven specific practices. They are ordered to drop the Grand Rapids names, confusing them with the Grand Rapids Furniture Manufacturers' Association, an established organization that expends $100,000 a year in advertising Grand Rapids furniture.

BUYING POWER CAN BE SHOWN AGENCIES SAY

Successful Method of Determining Qualitative Value of Circulations Attained, Prof. Starch Declares in First Report of A. A. A. Research Department—Durstine, President

By PHILIP SCHUYLER

FIRST steps have been successfully taken by the Research Department of the American Association of Advertising Agencies towards determining the "buying power" behind circulation figures, it was claimed this week by creators of the department who heralded it as the greatest advertising achievement since formation of the Audit Bureau of Circulations.

"The method of procedure in qualitative circulation analysis has been definitely determined and is highly acceptable," James O'Shaughnessy, association secretary informed EDITOR & PUBLISHER. "We know now that the buying power behind circulation figures can be shown."

Herbert Gardner, association president, endorsed this view.

Mr. O'Shaughnessy indicated a method of procedure would be arrived at to uncover the purchasing power behind newspaper circulations as well as the subscription lists of the magazines.

His statement was made after Prof. Daniel Starch, director of the research department conducted by the A. A. A. A., had reported to the assocation this week the results of his first year's efforts in formulating a qualitative analysis of magazine circulations.

One entire afternoon session of the association's eighth annual convention in New York, Oct. 6 and 7, was given over to Prof. Starch. About 75 members were in attendance. Leaders claimed the Starch report was the year's outstanding accomplishment.

The association elected Roy S. Durstine, of Barton, Durstine, and Osborn, Inc., president to succeed Mr. Gardner. Mr. Durstine moves up after serving one term as vice-president.

Illustrating statistics he had gathered by means of huge charts, Prof. Starch claimed in making his report that all he had accomplished was the uncovering of a successful foundation for future research work.

Circulations of 75 different magazines in four different cities were analyzed. The cities chosen for the experiment were Cambridge, Mass.; New Haven, Conn.; Dallas, Tex., and Madison, Wis. Choice, it was stated, was simply the result of following the line of least resistance.

It was pointed out that each of the four cities selected for the research were college towns, and that these cities had been picked because student help could be employed cheaply in gathering statistics. The cities were upheld, however, as "fairly representative" of the east, north, south and west of the United States.

"We did not wish to go into factory towns," Mr. O'Shaughnessy said in answer to a question, "because incomes fluctuate there. We wanted to investigate in centers where incomes are more stable."

In each of the four cities each one of the 75 magazines were treated separately both in the student canvass and by a mail questionnaire.

Readers of the magazines were divided into three different "income classes," and then subdivided according to occupations, and rentals. The three different classifications were listed as:

Class A: Incomes of $10,000 or more.
Class B: Incomes of $5,000 to $10,000.
Class C: Incomes of $2,000 to $5,000.

For certain magazines it was found necessary to develop a fourth classification to include readers with incomes of from $1,000 to $2,000.

Two questions asked magazine readers in the four cities were phrased somewhat as follows:

How many magazine articles do you read in each issue? Do you read the book from cover to cover, or simply read one or two of thearticles?

Do you read magazine advertisements incidentally or with a purpose?

FOUR LEADERS OF FOUR A'S

Left to right: Roy S. Durstine, of Barton, Durstine & Osborn, Inc., new association president; James O'Shaughnessy, secretary; Prof. Daniel Starch, research director; and Stanley Resor, of J. Walter Thompson, Inc., originator of research department.

The sum total answers to these questions were not divulged.

A reciprocity agreement reached between the association and the magazine publishers provided that the report would not be made public officially until the latter should have a chance to examine and pick possible flaws in it. This privilege was granted, it was said, because of the help the publishers had furnished in collecting the statistics.

In explanation, President Gardner said: "There can be no doubt about the value of Prof. Starch's research report. It proves definitely that a method has been found whereby the quality of circulations may be determined with a satisfactory degree of accuracy. This will prove as signal a service to advertisers as was the formation of the Audit Bureau of Circulations.

"This the first report of the research department however, is, we admit, fragmentary. It would be unfair to the magazine publishers and advertisers alike to make it public at this time."

While association leaders were thus emphatic in their commendation of the research work and announcements were made on the convention floor that farm papers and then newspapers would next be subjected to Prof. Starch's scrutiny, delegates questioned by EDITOR & PUBLISHER were divided in their opinions as to the value of findings presented them behind closed doors.

The A. A. A. A. convention sessions, held in the Roosevelt Hotel, New York, were guarded with unusual care this year. Every precaution was taken to prevent leakage of the research results. Association members, free in their opinions, declined to make known their names when interviewed.

"I think Prof. Starch's research report is a valuable contribution to advertising," one delegate told EDITOR & PUBLISHER.

Another association member permitted himself to be quoted as follows:

"I have placed millions of dollars of advertising business, and I am absolutely confident that possession of the Starch statistics will not influence my opinions in selecting media in the least. It is a case, I think, of research being carried too far.

"The most important fact to my mind that these figures seem to show is that the preponderance of magazine readers are people of 'moderate means.' In other words, the magazines are read more widely and thoroughly by people with incomes of between $2,000 and $5,000 than by the very wealthy."

"Qualitative circulation research is a thoroughly logical step in advertising development," was another opinion offered. "Most assuredly the Starch method will satisfactorily round out the splendid work of the Audit Bureau of Circulations."

"As far as it goes, the research report is a remarkable mass of statistics, decidedly interesting and decidedly illuminating," another delegate declared.

"But the research must be carried much further. Factory towns must be taken into consideration as well as university cities in order to permit establishment of a true law of averages."

Virtually all delegates sought for opinions commented on the expense of the undertaking. The majority declared results were worth the price.

A typewritten statement prepared for the press by James O'Shaughnessy follows in part:

"At our convention this year the big subject is research. We are going further into that subject than has ever been contemplated before.

"Marketing research has been brought to its modern development within our association. The members of this association today are the only business organizations which have carried market research so far along the way. Since advertising operations have grown so large research is becoming a necessity. In the large operations it is regarded now as a vital factor in advertising.

"The distance to which we will go in research work is not now possible to determine. We expect to carry it endlessly forward.

"Advertising in the United States has made greater progress since its service side was ethically organized eight years ago, than it had made in any 50 preceding years.

"In these last eight years under organized direction of the American Association of Advertising Agencies the operations of advertising have been standardized. That has done more to protect the advertiser's dollar than all else preceding in the history of advertising.

"Certainties have been methodically introduced into advertising. It is now true that the manufacturer's money put into advertising under ethical direction, is in a safer investment than in his raw materials. This was conclusively shown in the post war deflation period.

"More money is going into advertising in 1925 than in any previous year the United States has seen. The total appropriations in the field of national advertising handled by the members of the American Association of Advertising Agencies have increased progressively in the last three years. That fact furnishes unanswerable proof of the soundness of proper advertising. In 1924 the total advertising appropriations handled by the ethical agencies was $300,000,000. Each dollar of national advertising represents in round numbers $100 of commerce. Advertising now has enough power in the nation's commerce to exact a national influence for its stabilized sales as well as its progress.

"The work of the advertising agency is to guide and direct the use of these vast sums going into national advertising appropriations. The ethical advertising agencies have been organized effectively for the nationwide study of ever new and multiplying problems in the handling of national advertising."

The idea of the research department was originated two years ago by Mr. Resor. Last year the association appointed Mr. Starch, giving him carte blanche to do what he could in uncovering the dollar power behind cold circulation figures.

THE GREATEST REPORTER

By ROBERT B. SIBLEY

I AM the greatest reporter of them all.

No man has ever equalled my feats of accurate news gathering. No metropolitan star has ever garnered the minute detail I have assembled; no keen political writer or world-famed war correspondent has ever done what I have done; no veteran newspaper man has seen and covered the mass of men, things and events that I have seen and covered.

This is fact. I do not mean to be boastful. I was as expert on my first assignment as on my most recent. No cub stage for me.

No school of journalism counts me among its graduates. I never spent an hour in any classroom.

Yet I have seen all, and faithfully reported. Presidents, kings and princes; paupers, grafters and convicts; prominent citizens, plain citizens, magnates and laborers; great cities decked in splendor, whole states torn and devastated; victory and defeat.

This is all fact. I do not mean to be boastful. The greatest of my works was easy for me. And I have never erred.

I am the greatest reporter of them all.

I am the news camera.

Time-Saving Hunches for City Editors

[Efficiency—That's the Stuff—Prepared Stories for All Occasions Will Save Rewrite Men's Time]

By CHET JOHNSON

TOO much of the rewrite man's time is wasted in the city news room. Half of the stories that are written just before deadline for every edition could be ground out in a few seconds through the use of blank forms. Efficiency, that's the stuff.

Every city editor should have a plentiful supply of the following stories printed, tabbed and handy. All that is necessary is for one of the rewrite men to insert names and addresses:

MEANEST THIEF SOUGHT

The meanest thief in the world was sought by police today. Entering the home of....., at..... street last night, he rifled the toy bank in which little....., aged ....years, had been saving pennies and nickels with which to buy a fire engine when he grew up. The thief entered by prying open a window in the rear of the house.

BRIDE SWALLOWS POISON

Heartbroken because she and her husband had quarreled at the breakfast table, Mrs....., pretty bride of a few months, attempted to end her life this morning by swallowing poison at her home,..... street.

....., the husband, ran to the bathroom when he heard his bride groaning, he said, and found her on the floor, writhing with pain. He notified police and Mrs..... was taken to.....Emergency Hospital, where a reconciliation was effected. She will recover.

MEANEST THIEF SOUGHT

The meanest thief in the world was sought today following the discovery that several poor boxes in St.....'s Church had been looted. The Rev....., pastor of the church, said he had noticed a roughly dressed man in the church, but thought him a stranger in the city seeking spiritual comfort.

OLDEST MASON DIES

....., aged....years and reputed to have been the oldest Mason in the world, died last night at his home,.....street. His health had been failing for several years. Mr..... was a charter member of.....lodge and was grand commander of all Masonic bodies in the state from 18.. to 19... In spite of his advanced years, Mr..... had attended every state meeting of the lodge since coming to this city from ..... in 18...

UNIDENTIFIED BODY FOUND

The body of an unidentified (man) (woman) was found today floating in the (bay) (river) (lake) off the foot of ..... street. Police said the body had been in the water about .....hours and bore no marks of violence. It was found by several boys who were rowing in the vicinity.

MEANEST THIEF SOUGHT

The meanest thief in the world was sought today following the robbery of ....., blind pencil vendor. The thief crept up to....., snatched a few nickels and dimes from his cup and fled. Several passersby, attracted by the blind man's cries, gave chase. They were joined by Patrolman....., who fired several shots, but the thief escaped by running through a vacant lot and scaling a fence.

EARLY MORNING BLAZE

An early morning blaze, believed to have started from a defective flue, routed scores of scantily-clad tenants from the ..... apartments today and, for several minutes, threatened to spread through the entire block. The fire was discovered by Patrolman ....., who turned in an alarm and then ran through the building, assisting many to safety and averting a panic. The fire was quickly extinguished following the prompt arrival of Truck No. ...., which made a fast run. Damage was estimated at $25.

ATTACKED BY THUGS

The police dragnet was thrown out today for three unidentified thugs who attacked and robbed ..... about 3 a. m. in front of his home at ..... street. Mr. ..... said the men sprang from a dark alley. He struggled with them but was overpowered. The thugs took his money, but overlooked a gold watch and valuable papers. Mr. ..... was returning from a "stag" party, he said.

LARGEST STILL SEIZED

One of the largest stills ever seized here was confiscated by Federal prohibition agents early today in a raid on a house at ..... street. Several barrels of mash and ..... gallons of finished product were destroyed. The owner of the still jumped through a window and escaped as the prohibs entered. Dry Chief..... declared the raid was the first of a series directed against a bootleg ring that is supplying the larger share of the present flood of liquor.

MEANEST THIEF SOUGHT

The meanest thief in the world was sought today. When Mrs..... went to get refreshments for guests she was entertaining in her home at ..... street last night, she found that some one had pryed open the rear door and helped himself to 10 gallons of ice cream, 5 gallons of punch and five cakes. Remnants of the feast were scattered over the back yard. Police believe the robbery was the work of small boys living in the neighborhood.

The excitement and worry that often come when the sporting editor fails to show up on the morning after the prize fight also may be averted by a little preparedness. Have half a dozen blank forms available, so that it will be necessary only to insert names to have a very serviceable fight lead prepared in a few seconds. The following form will be found invaluable:

After leading the fighting through every round, ... was robbed of a victory last night when Referee ..... held up the weak right hand of .....

The decision was the rawest Referee ..... ever put over, and that's saying plenty. In the opinion of sport writers at the ringside, ... never had a chance to win after the first bell. Several times he was so weak he had to stagger into clinches or hang on the ropes to keep from falling. He was the most surprised man in the arena when he was awarded the decision.

The fight was a tame affair, at that. Neither fighter showed much. ..... hit low several times, but each time the referee went blind and refused to listen to the protests of ....'s seconds and manager.

But last night's card proves one thing the writer has contended for a long time: If the promoters expect to keep the fight game alive here, they'll have to dig up something better than last night's pathetic sample of stalling and hugging.

The fight by rounds:

Round One—They met in the center of the ring and shook hands. Neither showed any inclination to take the lead. There was a minute of cautious sparring and the crowd howled for action. A few light taps were exchanged. Each fighter waited for an opening. ..... sent a feeeble left to the shoulder and ..... countered with a short left to the head. They were in a clinch at the bell. Round even.

(Pick up other rounds if available or clip from opposition's early editions.)

Telegraph news should not be neglected in the preparedness scheme. A few old, reliable ever-present dispatches should be set up and kept standing on the emergency dumps in the composing room for use in the event of "wire trouble between Chicago and New York" or other regular "unusual" interruptions. The following have been proven absolutely safe, nonlibelous and reliable during the last year, and no doubt will be o. k. for several years more:

WASHINGTON, D. C., Oct. ..—Secretary Weeks today denied reports that he was preparing to resign from the cabinet. Although it was said his health was not of the best, friends of the secretary said he had no intention of resigning now.

TOKYO, Oct. ..—Several thousand inhabitants of villages on the north coast of the islands of Osoakum, Kooji, Sake and Hoojishito were homeless today as the result of violent earthquakes and tidal waves. No lives were lost.

SAN FRANCISCO, Oct. ..—Plans for a $345,000,000.78 bridge across the Golden Gate were made public today by a group of prominent engineers. The project is the 1456th for bridging the bay that has been announced within the last 50 years.

WASHINGTON, Oct. ..—A new plan whereby foreign nations may meet their war obligations to the United States without imperiling their own financial and economic structures, is being considered by Secretary Mellon. Details have not yet reached the stage where they may be made public, it was said.

300 ATTEND AD CLASS

G. Lynn Sumner Opens New York Advertising Club's Selling Course

Nearly 300 attended the first class of the advertising and selling course of the New York Advertising Club, which started Oct. 6. G. Lynn Sumner, former president of the Association of National Advertisers, was the speaker.

"Newspaper advertisements," he said, "are in competition with the greatest news of each day and should be given a news slant. All advertising should be newsy and informative."

He pointed out that the advertising department of Wanamaker's Philadelphia store was run on the principle of a newspaper's local room.

Thirty-seven advertising authorities are scheduled to address the course. Among them will be: Sheldon Coons, advertising director, Gimbel Brothers; D. E. Conybeare, advertising manager, Armstrong Cork Company; William A. Hart, advertising manager, E. I. duPont de Nemours Company; Dr. J. W. Watson, vice-president, J. Walter Thompson Company; Crate Larkin, secretary, Larkin Company, Inc.; and Fred Suhr, art director, George Batten Company.

FORESHADOWED EVENTS

Oct. 12-13—First District, A.A.C.W., annual convention, Springfield, Mass.
Oct. 12-16—American Gas Association, annual convention, Atlantic City, N. J.
Oct. 13-14—Associated Business Papers, Inc., annual convention, Chicago.
Oct. 13-14—Association of Newspaper Advertising Executives, special convention, Chicago.
Oct. 14—Bureau of Advertising, A.N.P.A., committee meeting, Chicago.
Oct. 14-16—Financial Advertisers Assn., fall meeting, Columbus, O.
Oct. 15-16—Audit Bureau of Circulations, annual convention, Chicago.
Oct. 15-16—Agricultural Publishers Association,, annual convention, Chicago.
Oct. 19-21—National Industrial Advertisers Assn., annual convention, Atlantic City.
Oct. 19—New England A.P. Members Assn., annual meeting, Boston.
Oct. 20-21—New York State Circulation Managers Assn., fall meeting, Buffalo.
Oct. 26-28—Insurance Advertising Conference, fall meeting, Boston.

DENVER REPASSES BILL LICENSING NEWSBOYS

Minimum Age for Boys 12 years, Girls 21—Organized Labor Backs Movement—Final Action to Be Taken Oct. 12

(*By Telegraph to* EDITOR & PUBLISHER)

DENVER, Oct. 7.—Fixing a minimum age for newsboys and girls and providing for their licensing and the strict regulation of the sale of newspapers and all periodicals, is provided for in a new newsboy regulatory ordinance unanimously passed on first reading by the Denver city council this week. Final vote on the measure will be taken Oct. 12.

The bill was drafted to replace a former ordinance the legality of which was attacked by the *Denver Post* and which was subsequently declared unconstitutional by the district court.

Organized labor is now taking a hand in the Denver newsboys fight. In talking on the new measure before the council, Frank L. Palmer, editor of the *Colorado Labor Advocate* and spokesman for organized labor, said:

"Organized labor feels that some limit should be placed on the youth of the city going on the streets selling newspapers. You can now see boys and girls of 8 or 9 years of age on the corners and in the alleys having things fixed in their minds and impressed upon their souls which they are obtaining on the streets of the city. We felt that some age limit should be placed in this bill. We submit that 12 years is a reasonable age limit to submit boys to the evils and pitfalls of the city."

The bill limits the age of newsboys to 12 and of newsgirls to a minimum of 21 years.

In addition to this age feature, which was not incorporated in the former measure, the new bill provides for the licensing of news vendors, prohibits the crying of papers and the "obstructing of free passage of persons on the street by news dealers."

All disputes between newsboys of rival papers are to be settled by the Municipal Manager of Safety whose decision is to be final.

Tibbets Buys Kansas Daily

Harlow Tibbets of Longview, Wash., has purchased the *Abilene* (Kan.) *Daily Chronicle*.

A. A. C. W. COMMISSION SIDE-TRACKS POSTAL RATE ACTIVITIES

Refuses to Take Definite Stand at St. Louis Meeting—Woodbridge Opposes Nat'l Business Bureau, Inc. as Separate Group—Finances Discussed

(*By Telegraph to* Editor & Publisher)

ST. LOUIS, Oct. 6.—Differences existing within the National Advertising Commission of the Associated Advertising Clubs of the World as to what should be done by the Commission's legislative committee or by the Associated Clubs on the revision of postal rates were emphasized in a lively debate of two hours, which marked the opening session of the Commission in regular quarterly meeting at Hotel Statler, St. Louis, Monday and Tuesday.

The debate was precipitated by a resolution introduced by Homer J. Buckley, Chicago, chairman of the legislative committee and a representative of the direct mail advertising departmental. The resolution approved and indorsed the work that has been done by various departmentals in seeking an "equitable adjustment of postal rates based on scientific principles."

Mr. Buckley prefaced his resolution with a review of the work of the committee that "for the first time in the history of advertising the conflicting interests are working together."

Everything is harmony, Mr. Buckley declared. R. King Woodbridge, president of the Associated Clubs, the first to speak on Mr. Buckley's resolution, declared that all were not in harmony, according to his impression. Mr. Woodbridge said that he was vitally interested in knowing that any plan suggested was the right one.

George M. Burbach, advertising manager of *St. Louis Post Dispatch,* and vice-chairman of the Commission, said that apparently the newspapers as a group are not entirely in sympathy with the activities of the postal committee.

"If you ask me why, I am not in a position to tell you. Judging from the telegrams I have received there is some opposition to the National Commission going on record in connection with this postal regulation."

Judge E. Allen Frost of Chicago, representing the Poster Advertising Association, pointed out that there was an honest difference of opinion as to what is meant by a "scientific adjustment." He told of paying 24 cents postage to send a copy of the Sunday *Chicago Tribune* to a town in New Hampshire. If the government is in the transportation business and the postal service should be self supporting, such a rate might be all right, he said, but if the extension of trade facilities as performed by the Chicago Tribune, and other papers is considered, the rate is excessive. He felt that the influence of the press in extending these trade facilities should be considered in the making of postal rates.

During the discussion, Mr. Woodbridge defended himself against the charge made by Mr. Buckley that he had done nothing in the way of defining a policy for the Clubs on the postal situation. Mr. Woodbridge said he was willing to do something as the head of the A. A. C. W. when all the interests in the organization are agreed on doing something.

Mr. Buckley was prevailed upon to withdraw his resolution. Then a movement was started to wash the hands of the Commission of the whole postal matter. A resolution was offered to discharge the committee and drop the whole matter, but this was lost by the close vote of 11 to 10.

Mr. Woodbridge said the thing uppermost in his mind was the finance of the Associated Clubs. The Clubs needed money to carry on their work. The Commission agreed to help, and the chairman was authorized to appoint a committee of three to attend the next meeting of the executive committee to assist in financing.

Mr. Woodbridge especially desired the unification of all the activities of the Clubs into one coordinated body. He pointed out the number of self-contained organizations within the Association.

The president said that one of the problems confronting him was the National Better Business Bureau, Inc.

"I do not like the setting up of the National Better Business Bureau, Inc. As a separate organization," said Mr. Woodbridge. "It cannot exist without the moral support of the advertising club organization. We have been raising the revenue, three fourths of our revenue going to the vigilance movement. Now there is a feeling that since it is a separate organization the Associated Clubs can shift for themselves. I do not like that. I do not think it is a good business proposition."

The international aspect was another phase to be considered. Mr. Woodbridge said that Great Britain now had 40 Clubs and that advertising had made tremendous gains over there. He intimated that perhaps they would not be satisfied merely to be known as district No. 14 because of a sense of pride.

The finances of the Association were discussed generally as well as the situation of the organization of the National Better Business Bureau, Inc. Mr. Buckley said that he was not in sympathy with the separation movement, and that the subscription of his firm to the Association had been withheld because of the separation. Carroll H. Sudler, Chicago, representing the Advertising Specialty Association, spoke against the separation movement. Other speakers pointed out that it would be impossible for the National Better Business Bureau, Inc., to raise the necessary funds without the backing of the Associated Clubs. While some thought that the better business bureau movement was the most important feature of the Associated Clubs, others disagreed, feeling that the educational work was of greater value than the "policing" of the Bureaus. Mr. Woodbridge said that he was opposed to one group going out to raise money for the vigilance movement and another for the Associated Clubs.

E. W. Houser of Chicago, president of the American Photo Engravers Association, suggested that the A. A. C. W. would not now be in financial need of it had not given three-fourths of its money to the vigilance movement.

Charles R. Frederickson of Coshocton, O., representative of the Advertising Specialty Association and chairman of the exhibit committee for the Philadelphia A. A. C. W. convention, asked the advice of the commission on three questions:

"1—Shall we permit the name of the person or firm submitting an individual exhibit to appear in connection with such exhibit?" to which the Commission voted yes, which is a radical departure from previous exhibits.

"2—Shall we award ribbons or medals for best exhibits in each of the several divisions of advertising as classified in the National Commission?" the Commission voted no to this for many reasons.

"3—Shall we invite motion exhibits, such for instance miniature replicas of paper making machinery, printing presses, duplicating letter presses, etc.?" the Commission voted approval. This is a new idea in convention exhibits.

The Classified Advertising Managers Association was admitted to membership.

Several changes in the bylaws were discussed, and these will be taken up at the next meeting of the Commission, which will be at some city to be selected later. Mr. Burbach is chairman of the bylaws committee. St. Louis was thanked for its hospitality.

The first business of the Commission was the induction into office of Robert A. Warfel, new executive secretary. He was introduced by W. Frank McClure, Chicago, vice-president of Albert Frank & Co., and chairman of the Commission.

The last business was the adoption of a resolution expressing confidence in president Woodbridge and particularly the work of coordinating the various activities of the clubs.

Members of the Commission were guests of the newspapers of St. Louis at a luncheon on Monday.

Monday evening the members were the guests of the Advertising Club of St. Louis at the club's annual dinner-dance and election of officers.

R. Fullerton Place, retiring president, presided. Short talks were made by Mr. Woodbridge, Mr. McClure and Rev. C. F. Reisner, of Broadway Temple, New York, and president of the Church Advertising Department. Sidney Smith, creator of the "Gumps," delivered a chalk talk.

Joseph Licklider, who had been nominated president of the St. Louis Club, found it impossible to serve, and Norman Lewis of the Chappelow Advertising Company, who was elected first vice-president, is now acting president.

George Stohlman of the Missouri Pacific Railway and George Gayou, Advertising Slide Company were elected vice-presidents; Douglas V. Martin, Jr., publicity manager, *Globe-Democrat,* secretary, and Frank Fuchs, advertising manager, First National Bank, treasurer.

The board of directors of the Association of Newspaper Classified Advertising Managers which met in regular session Oct. 7, elected its first representatives on the National Advertising Commission of the Associated Advertising Clubs of the World. They are Charles W. Nax, *St. Louis Globe-Democrat,* president of the Association, C. L. Perkins, *Chicago Herald-Examiner,* a director, and W. W. Miller, *New York Times.* The Association was admitted to membership in the commission in St. Louis Monday.

The Classified men's program committee for the Philadelphia convention in connection with the meeting of the Associated Clubs was announced as follows: C. C. Armstrong, *Cleveland Press,* chairman; J. H. Butler, *Houston Chronicle;* R. E. Seiler, *Los Angeles Examiner;* Hahhy Gwaltney, *Milwaukee Journal;* W. C. Pruitt, *Wichita Eagle;* Walter Dathe, *Dallas News;* J. H. Fraser, *Hamilton* (Ont.) *Herald;* James A. Doherty, *Providence Journal;* Joseph Kelly, *Dayton* (O.) *News;* and Miss Ella G. Stebig, *Fort Wayne Gazette.* The convention arrangements committee is composed of I. W. Williams, *Philadelphia Public Ledger,* chairman, and H. H. Moehlman, *Baltimore Sun.*

W. W. Murdoch, *Detroit Free Press,* was elected a member of the board of directors to succeed H. G. Barringer, *Indianapolis News,* who has left newspaper work.

The classified association now has a membership of 242, the largest in its history since its meeting in Houston last June. The membership gain is 95.

Mr. Nax presided at the meeting. Others present were: J. H. Butler, vice-president; C. C. Armstrong, treasurer; H. H. Moehlman, C. L. Perkins, O. S. Wespe, *Louisville Courier-Journal,* and John L. Irvin, *New Orleans Item-Tribune.*

SONGS OF THE CRAFT

(*Written Exclusively for* Editor & Publisher)

By Henry Edward Warner

GRAZING

They've turned me out to pasture, boys; they've given me some shears
And farmed me out to flimsy for the balance of my life!
They've given me a sinecure for my declining years,
To keep me free from worry and the nervous strain of strife.
They've got me in an office, in a little two by four
Away from all the racket and the feverish feel of haste,
And no one ever comes there, where I sit behind a door
With a nail file full of flimsy and a dirty pot of paste!

I sit here idly clipping, pasting stocks, assembling briefs;
My snipping shears drag lazily—it is no job for speed!
I clip and paste and parargaph life's pleasures and its griefs,
And fluctuating figures in the wake of human greed.
And as I clip and paste, I dream! . . . There was a day when I
Was called a Star Reporter; . . . I was only just a kid,
But I'd a nose for news that never let a thing get by,
And they used to hang up clippings of the hottest things I did!

And they used to come and pat me on the back; they used to say
Big things that made me tremble with the glory of the game!
Somehow, I never seemed to think that there would come a day
When I'd be sitting smeared with paste, my vaulting spirit tame!
I was the Kid who scooped them on the Barry murder case.
Remember it? My story tipped the cops; they got the guy
And swung him! . . . And I heard my praises sung around the place,
Who sit today with shears and paste, piling the flimsy high!

They've turned me out to pasture! . . . But I dream, and in my dream
I feel the thrill of action, and I smile, because I know
That once I paced the outfit, and across my vision gleam
The glories of some triumph of my Star days, long ago!
And I shall clip, and I shall paste, and I shall hold my way
Till Fate may signal "30," and shall face The-Things-That-Are
With memories to cheer me and to strengthen, from the day
When life loomed large before me, from the day when I was Star!

Penn Publisher's Committee Meets

The executive committee of the Pennsylvania Publishers' Association met at Harrisburg on October 7. From Harrisburg many of them went to Bloomsburg to attend the County Fair. In connection with this the Bloomsburg Rotary Club had a Publishers' Night on Oct. 8, when the Rotarians entertained at dinner a large number of publishers and editors from throughout the state. The speakers were John L. Stewart, of the *Washington Observer* and president of the Association, E. J. Stackpole, of the *Harrisburg Telegraph,* and Edward McKernon, superintendent of the eastern division of the Associated Press.

California Weeklies in Combine

The *Compton* (Cal.) *Tribune* and the *Compton News* have combined to form the *Compton News-Tribune,* which will be issued twice a week. W. H. Coonradt is general manager; C. M. Bigsby, business manager, and C. H. Gilbert, editor.

STONE LAUDS SHOWING OF DUPLEX PLANE

Pilot Goff Entered Ford Reliability Tour Without Preparation and Completed Tour on Time, Head of Press Firm Says

Participation of the Duplex service airplane in the Ford Reliability tour was described in detail by EDITOR & PUBLISHER this week by I. K. Stone, president of the Duplex Printing Press Company.

"E. A. Goff, our pilot, was in Detroit on a business trip the day before the tour started," he said, "having no notion whatever of going into the thing. The ship had been flying for several weeks off and on, taking me occasionally on hurried jaunts where I wanted to save time, and so was neither newly cleaned and adjusted, nor equipped with a new motor, nor especially tuned up. As Mr. Goff was preparing to return to Battle Creek the morning before the tour started, some of the boys wanted to know why he did not stay and enter. He hesitated a little, because he knew the other ships were all new factory ships and some had gone to the extent of having new motors shipped to the field to be put in, so that they would not even have to start with the same motor that had brought them to the field. He communicated with me and we decided to go in.

"Thus, the Duplex ship was the only one in the flight which without preparation and special tuning up went in 'as is' just as it was in daily use. It is interesting then to note that Mr. Goff made the trip with perfect scores, except for one forced landing which caused him to lose his average that day. But he caught the bunch the next day and came in on his schedule at the finish, qualifying a completed tour on time. Because of the fact that he did not make every day exactly on time, his score was not perfect and his name does not go on the trophy.

"To my mind, Mr. Goff's trip under those conditions is a real demonstration of commercial reliability and service. Furthermore, returning late Sunday afternoon, as they did, Mr. Goff returned to Battle Creek and his ship is ready here to go anywhere on call. I think it was the only plane entered which was a commercial plane in commercial service and use."

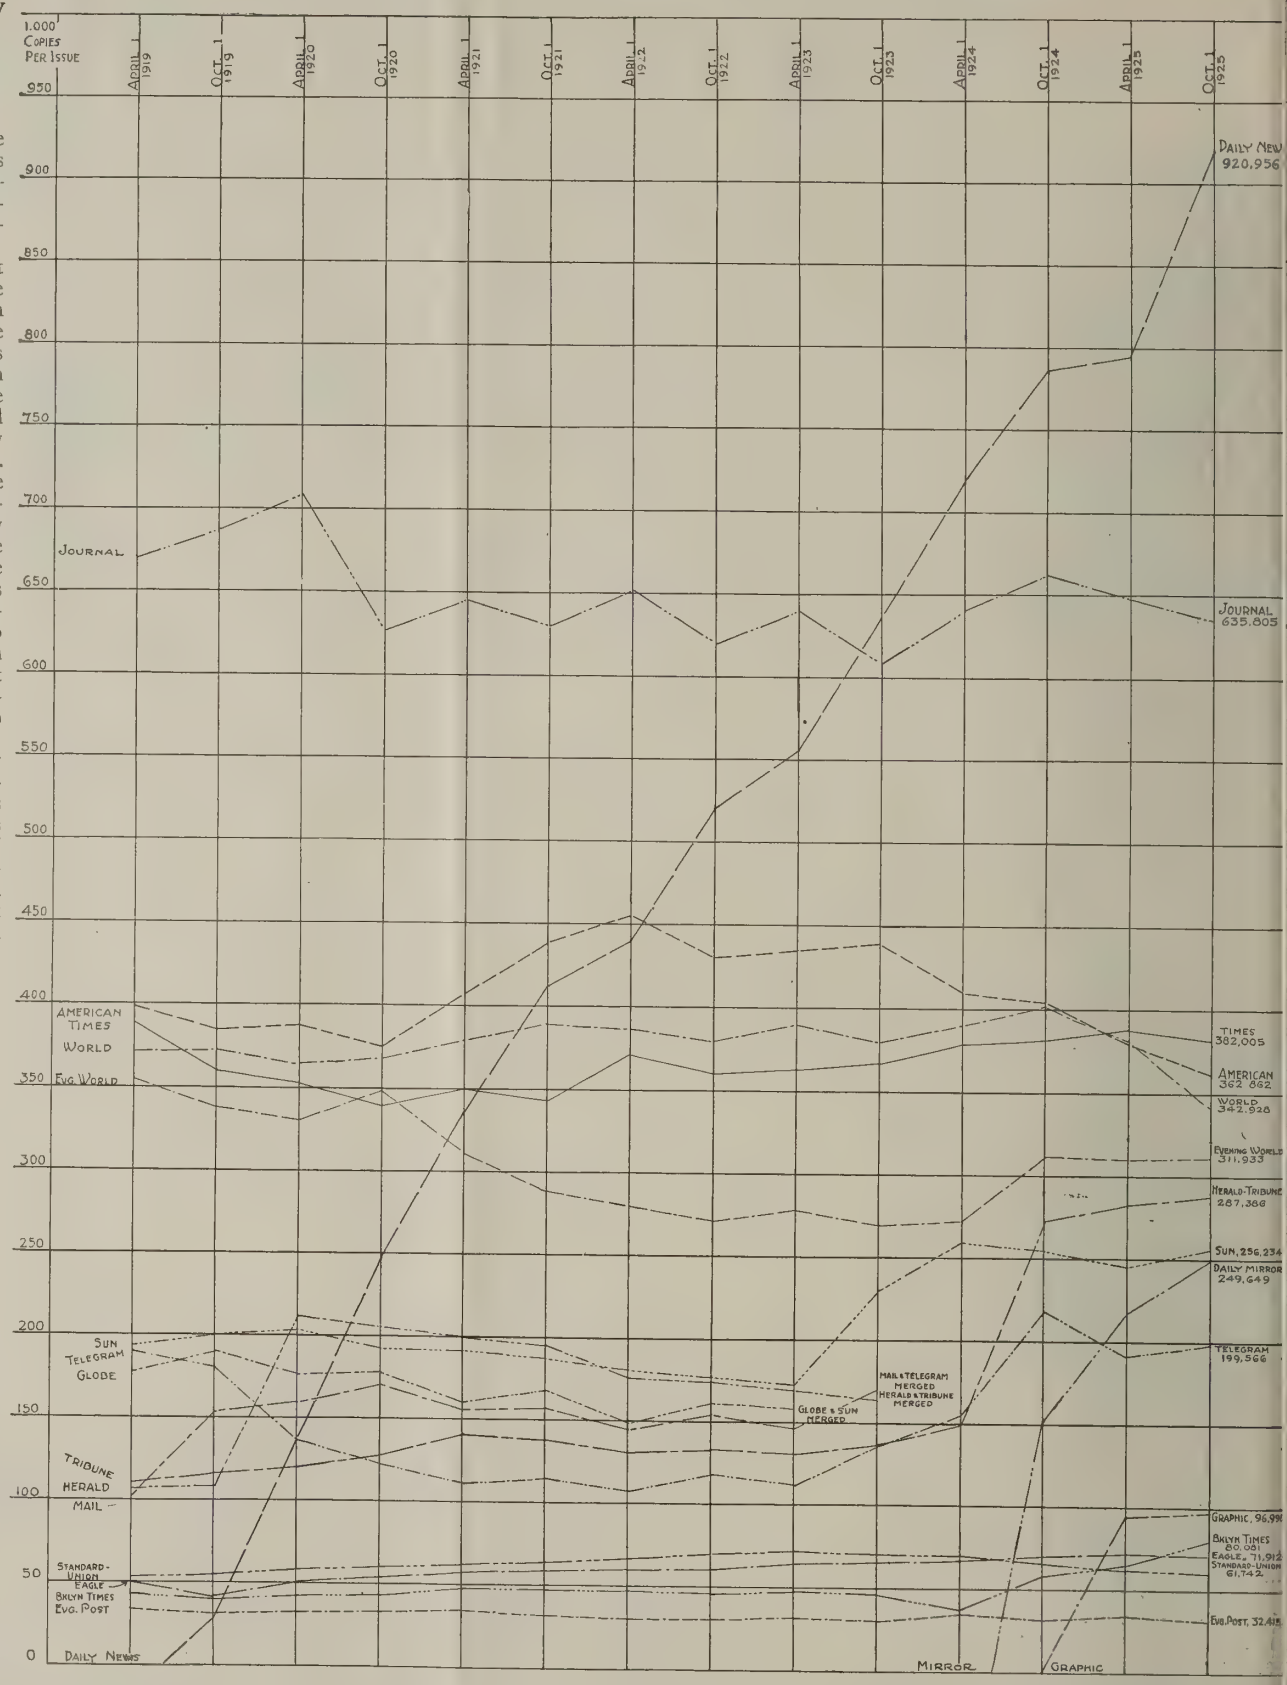
FRANKFORT NEWS SOLD

Eugene Pulliam and R. C. Swank of Lebanon Reporter New Owners

Sale of the Crescent News Publishing Company and the *Evening News*, published at Frankfort, Ind., to Eugene Pulliam, publisher of the *Lebanon* (Ind.) *Reporter*, and his brother-in-law, Roy C. Swank, also a member of the Lebanon publishing company, has been announced.

The stock was purchased from John F. and J. J. Schumann, owners of the paper who are moving to Florida. Mr. Pulliam will remain in Lebanon. Mr. Swank will go to Frankfort in the capacity of business manager of the Evening News.

Eugene Allimore of Warsaw, Ind., has been engaged as managing editor. No other changes are contemplated.



The Evening News is a consolidation of the *News* and the *Crescent*, the consolidation taking place in 1914.

New Trade Journal Launched

A new publication, *Plastics*, devoted to the manufacture and use of compostion products, such as Celluloids, Bakelte, Galilith, etc., has just been issued. Sylvan Hoffman is publisher. Carl Marx, B.Ch., is editor; Dan Rennick, B. S., associate editor, and J. H. Hodgkinson, advertising director.

Newspaper men get good jobs through EDITOR & PUBLISHER'S classified department.

MAJORITY OF N. Y. PAPERS GAIN IN CIRCULATION

NEW YORK CITY circulations show an upward trend, eight of the fifteen making statements for the six months ending Sept. 30, reporting gains over the previous period. The grand total daily average net paid circulation also continues to rise, largely, it is true, because of the phenomenal rise of the tabloid papers. The *Daily News* is the outstanding gainer, advancing 125,000 beyond last April's figure and more than 130,000 beyond last October. The *Daily Mirror* and the *Graphic*, newer arrivals in the tabloid field, also show gains, though on a less ambitious scale. Gains were also noted by the *Evening World*, the *Herald Tribune*, *Sun*, *Telegram* and *Brooklyn Times*. The above chart tells New York circulation history since the Armistice. It includes the records of newspapers which have been consolidated and indicates the dates of their suspension. The effects on the resulting newspapers and their contemporaries make a very interesting story for newspaper men. The Herald Tribune, Sun and Telegram, it will be noted, are ahead of their April averages while the Sun is about even with last October figures and the Herald Tribune is well ahead.

FIRST DISTRICT MEET OCT. 11

New England A. A. C. W. Groups to Hold Three-Day Session

The sales-producing value of advertising from the retailer's standpoint will be chief among topics to be discussed at the annual convention of the first district of the Associated Advertising clubs which opens in Springfield Sunday and continues to Tuesday. Among speakers who will be heard are C. K. Woodbridge, president of the Associated Advertising Clubs; Frederick W. Bliss, district chairman; Mayor Parker of Springfield; Arthu Freeman, specialist in public relation Chicago; and E. H. Schell, professor o business management at the Massachusett Institute of Technology and assistant pro fessor of industrial management at Har vard.

Prominent retail advertisers on the pro gram include: Sheldon R. Coons, directo of sales and publicity, Gimbel Bros., Ne York; Robert J. Murray, Murray Com pany, Honesdale, Pa.; Ernest F. Hasting Caldwell Store Inc., Washington, Pa.; Jo seph D. Nathan, president, Gross Straus Company, Worcester, Mass.; Albert W Vining, Vining and Borrner, Springfiel Mass.; Arthur Nehf, advertising manage Meekins, Packard & Wheat, Inc., o Springfield, Mass.

One of the features of the convention will be an address Sunday by Rev. Laur ence Breed Walker of Saco, Me., on, "Sel ling the Churches."

FORESTRY EXPERT OUTLINES NEWSPRINT PERILS

Dailies Consuming 3,000,000 Tons This Year—Congress Will Soon Write Budget For Reforestation and Protection—Summary of Conditions in Paper Industry.

By GEORGE G. WHEAT

OF vital importance to all who live by the printed word are the economic factors which lie behind publishing in the lumbering and paper-making fields. Mr. Wheat is well known as an engineer and analyst. We believe his statements are accurate, largely based on statistics found or confirmed by U. S. Government reports. The time has most certainly arrived when newspaper publishers can no longer neglect action in reference to this basic issue. EDITOR & PUBLISHER welcomes to its columns, authoritative discussions of newsprint conditions, forest conservation and all kindred subjects from any source.—EDITOR.

DAILY newspapers in cities of all sizes throughout the United States are this Fall attaining a record volume of advertising and the number of pages—48, 52, 56, 60 page editions are hardly news for EDITOR & PUBLISHER any longer—would have been called impossible of production and sale to the public less than 10 years ago. The newsprint upon which this tremendous volume of information appears will without doubt, amount to 3,000,000 tons for the year. Approximately half of this paper will have been manufactured outside of the United States boundaries, and considerably more than half of it will have been made from wood cut in other countries.

These facts, or information which presaged them, have been known to newspaper owners for many years and have been the subject of many anxious discussions among publishers and among paper makers. Some progress has been made toward safeguarding the future, but it is hardly more than a step or two on a lengthy journey.

Further advances are possible under the budgeting of appropriations for extension of the National Forests under the Weeks Act, which is now being considered by a Congressional committee. The committee has under consideration, among many aspects, geographical allotment of funds for forest extension during the next fiscal year and it is the purpose of this article to indicate how this program can be applied advantageously to the growth of pulpwood. It is a subject which has several newspaper contacts.

It is safe to say that nowhere in the United States is the need for growing more forests greater than in the Northeastern States.

Perhaps nowhere else can be found conditions which so fully warrant special attention to the character of forests that can be grown successfully and maketed at a profit. Surely nowhere else is there so concentrated a need for the raw materials of a large industry and at the same time so great a need for the practice of foresight in protecting the headwaters of streams.

The Weeks Act, passed March 8, 1911, provided for the purchase of forest lands and reforestation. This act was authorized under the power of the Federal government to control watershed conditions on headwaters of navigable streams, and was passed but two years after the Canadian government had placed an embargo on the export of pulpwood from Crown Lands.

At that early date, 1909, United States pulp mills were importing from Canada about 800,000 cords of pulpwood, or one-fifth of our total. The paper industry's dependence upon outside forests can be shown best by giving the figures in tons of woodpulp. We used 2,753,000 tons in 1909 and imported of this amount 875,000 tons, or 32 per cent. We used 5,847,000 tons of wood pulp and imported 2,823,000 tons, or 48 per cent, in 1922. The reported dependence on import is given for 1924 as 51 per cent.

The definite policy of Canada—to develop its pulp and paper industry at home and, to that end, the reduction of our growing import of pulpwood—was the principal economic reason that stimulated the political action in the United States. Canada has secured in a large degree the end she sought. Her own consumption of pulpwood has grown 500 per cent between 1908 and 1922.

Our own definitely enacted policy of creating new forests, a policy that had its real stimulus in the growing shortage of Northeastern forests, brought to a climax by the Canadian embargo, does not show a like favorable result. What we started to do was to create forests, and thus far, in 14 years, we have acquired only 439,101 acres under the Weeks Act in the most important pulp and paper region. The national forest areas records show a total of 2,122,970 acres purchased under the Weeks Act, but the bulk of appropriations has gone to States where there are very few mills and which import practically no pulpwood.

The manifest purpose of the Weeks Act was to combine two main objectives—grow new forests and protect headwaters of streams. As operations have progressed in new purchases, the second objective has been stretched very thin in many cases. These statements of fact are not intended in any sense as criticism of the purchase of any of these forest lands. We need these areas and the timber that will be grown upon them, but the question is here frankly raised as to whether we ought not to consider the more severe needs first.

Water supply requirements can nowhere be more of a problem than in this Northeastern section, with our present distribution of population and industry. The concentration is decidedly Northeast—New York and New England, and the New Jersey-Pennsylvania-Maryland area. Recently New York, New Jersey and Pennsylvania made a joint agreement as to division of the Delaware River waters for the future. The water supply requirements of the great cities have already brought about the investment of many millions in reservoirs, watershed forests and aqueducts. More hundreds of millions to be expended are under consideration. Boston alone as a $100,000,000 program in survey. The severity of the water problem is forced to the newspaper front pages each dry season. The menace to health and the menace of fire are constantly become subjects of greater concern.

This Northeastern section is the best natural or botanical range for growing pulpwoods. Forestry is a farming or land problem of the first magnitude, as President Coolidge has stated, and when we go into the national business of growing trees, we ought of course to go where the growing is best. Records of the lumber cut and the pulpwood cut in the pulpwood species show that the greatest harvest has been cut here. A lumber industry using up many times the volume cut for pulpwood, and the additional pulpwood cut that has built up the largest paper manufacture in the world, with the largest investment in pulp and paper manufacture, has been supported here. The business is there now and the lands are acknowledged to be the best for the growing of pulpwoods. Growing them now before the industry declines still further is surely the correct thing to do.

Studies of the pulpwood situation made by the U. S. Forest Service and the American Paper & Pulp Association show conditions as follows:

New England, New York State, and the Lake States manufacture respectively, 30 per cent, 50 per cent, and 15 per cent of our domestic newsprint. The paper industry cannot follow the forests, as the lumber industry has done, to other parts of the country.

In these regions the annual cut exceeds the new growth two or three times. As the result of unregulated lumbering, followed by fire, more than 60,000,000 acres of potential forest lands, the most accessible to the mills, are largely idle. If they were producing the reasonable expectation of one-third of a cord per year per acre, they would supply 20,000,000 cords annually, which is fully twice the amount now needed to supply all the paper of every kind now made from woodpulp in the United States.

Growing pulpwood for future markets has a reasonable promise of being a profitable business for the Federal government. The woodpulp paper industry is often called one of the marvelously fast-growing businesses of our country. From practically no production 50 years ago, we have now reached a total consumption of 150 lbs. per capita. The annual rate of growth is now about 11 per cent. The service that paper performs is an indication of its indispensability. About 43 per cent is used for printing and business records, and about 38 per cent as containers—wrapping and packages for food and commodities. These figures cover U. S.-made paper only, and when we note that nearly all of our importation is print paper, the percentage used for print becomes larger yet. More than 85 per cent of our paper is used for these two purposes.

Now the textile industries are entering the field as competitors for the supply of cellulose furnished by woodpulp. The new artificial silk has grown in a few years to an annual production of 60,000,000 lbs., taking tens of thousands of tons of sulphite pulp. This, considered beside the 7,000,000,000 lbs. of cotton annually grown and used, indicates the size of the market for textiles.

The total value of paper and its remanufactures is also a clear evidence of the economic need they fill and a true measure of their importance and future. The value in 1920 was $3,146,740,000. We need and must have these products or we would not be willing to pay this sum for them. When it is still further known that the total volume of wood required to supply this large service is only about 5 per cent of our annual total consumption of forest trees, the case becomes still stronger for growing pulpwood now where it grows best.

Actually, but 2.36 per cent of our domestic draft upon the forests goes into paper. We import now about 51 per cent of our total paper consumption, either as pulpwood, woodpulp, or paper. Sixteen years ago we imported but 32 per cent.

Let us make that a little more definite—looking at the publisher's primary concern—newsprint. This grade of paper, one year after another, runs very little more than 30 per cent of the total paper tonnage — seldom that much. Apply simple figures to that. Call all of the trees cut in our forests, burned, or otherwise lost from the forests, "40 trees." Then, domestic cut of pulpwood gets one of those 40 trees, or even less. Newsprint gets only one third or less of that tree! Newsprint, or at least mechanical pulp, puts more of the tree into paper than does any other kind of paper, and gives more actual type space from the volume of original tree consumed than other papers do. This item becomes technical, but it can be shown clearly from the technical facts.

In the face of these facts, "supine" is a convenient word to describe the usual attitude of the newspaper publisher when he has been made the scapegoat for the destruction of our forests. He has generously published the attacks made upon himself and his fellows and has freely printed the urgings of conservationists and near-conservationists who have asked him to quit wasting the forests so speedily. The real facts are the proper answer.

The actually small part of the total forest drain due to all paper manufacture serves vital social and economic needs. Paper may be classed mainly as a "container material." About 43 per cent of all paper is used to contain our printed word and business records. About 38 per cent is used to contain foodstuffs and other commodities. Our heavy imports are practically all print papers.

A correct measure of the economic service rendered by paper may be gained by learning how much value is produced by paper-use of forest materials. The U. S. Census tells us that paper and its remanufactures are valued at $3,146,740,000. This gives the industry fourth rank in value of products among the 14 "general groups" noted in the census of manufactures. Let us recall that only one tree out of 40 in our annual U. S. forest drain goes to this production of economic service, and that, did we get it all from our own forests, but one tree in twenty would be turned into paper. Further, the fact of our heavy dependence upon outside forests makes evident the strangle-hold that another nation can take on United States activities by shutting off our supply. Of course, in times of emergency, more of our own forests would be turned to paper manufacture. This was illustrated in 1920, when, during a shortage of newsprint and other papers, a number of high-cost mills which had been shut down resumed operations in a seller's market.

Against the economic value of paper and its remanufactures, let us place the record of the "sawmill route." Lumber and its remanufactures, which used more than 8 times as much U. S. timber as was used from all countries to produce paper for the United States, was fifth in rank among the 14 "general groups," with products valued at $2,429,513,000. The actual industrial return per billion board feet of timber used shows a 10 to 1 advantage for the "pulpwood route."

It must be perfectly obvious that we can afford to grow pulpwood as a nation, if we can afford to grow forests at all. We are already well started in a program of trying to do just that, and the time to do something effective about the future of pulpwood is when the plans are being made nationally for forest extension.

Government business enterprise has as good a right to look ahead to the probable markets as private business does to its markets. The rapid growth of paper use, which is found to be 11 per cent annually, is full assurance of demand. The high economic service and the corollary higher refinements of manufacture that are given to trees that go into pulpwood assures the ability of the industries to absorb the increased cost of stumpage that inevitably follows on the greater cost of new-grown stumpage over the new virgin timber which controls present stumpage prices.

We have the additional fact that no

other source of pulp other than wood has yet come commercially out of all our research. In short, wood has no competitor for producing cellulose in the form of pulp. On the contrary, instead of any visible reduction in the demand for trees to produce pulp, new demands have arrived.

Considering the other and larger user of trees, the "sawmill route," there is a marked decrease in per capita demand and use. This was well shown by a former article entitled "Minerals are Saving the Forests" (EDITOR & PUBLISHER, April 18, 1925, pp. 74-75). Mineral use has grown seven-fold while population doubled and food kept pace with population, and lumber decreased from 525 board feet per capita to less than 300 board feet annually. This took place during the period of greatest industrial expansion, accompanied naturally by the greatest period of building known.

This is mentioned solely to point out that the actual markets for some uses of timber are on the decline. Therefore, the stumpage market for those uses is lessening relatively fast. When the further fact that is considered—prices of stumpage to supply this structural timber are still in the control of virgin timber supplies, and not in the control of new-grown timber, it becomes clear that stumpage markets for structural timber may easily be much further curtailed.

To return to the Weeks Act, its purposes and its results. We have about $2,000,000 yearly to expend under the Weeks Act appropriations program at present. In the past the bulk of the appropriations have gone almost entirely South. This is not a sectional or political matter. It is not intended to suggest that patronage has entered it at all. The simple stubborn fact alone is offered that where the mills and the industry are, there the forests have had only about one-fifth of the forest acquisitions. The whole question of all national forests and our expenditures on them and the returns obtained is more or less involved in any study. But the Weeks Act alone, an act that really came out of the loss of New England forests and was authorized finally under the power of the Federal Government to police and protect headwaters of streams, is the instrument that can do more for pulpwood futures than any other phase of our tree-growing business.

FORESTRY BUDGET URGED

R. S. Kellogg Presents Suggested Estimate to Gen. Lord

R. S. Kellogg, chairman of the National Forestry Program Committee, urges the following forestry budget in a statement he has presented Gen. Herbert M. Lord, Director of the Budget:

Project	Amount Requested 1926-27	Appropriations 1925-26
Forest Purchases....	$3,000,000	$1,000,000
Cooperative Forest Protection	1,500,000	660,000
Aerial Fire Control	50,000	50,000
Fire Weather Warning service	20,000	Not to exceed 4,000
Cooperative Distribution Forest Planting Stock	100,000	50,000
Cooperative Farm Forestry	100,000	50,000
Blister Rust Control.	350,000	348,280
Protection unappropriated Government Lands	75,000	Not to exceed 4.000
Specific Forests Products Investigations.	332,000	126,000

DALLAS NEWS SPANS 40 YEARS

Fifty-six Page Edition Issued to Celebrate Anniversary

The *Dallas News* on Oct. 1 issued a fortieth anniversary edition of 56 pages. A large part of the edition was devoted to the paper's career, from its founding in 1885.

Headed by G. B. Dealey, president of A. H. Belo & Co., which until a few years ago also published the *Galveston News*, the parent paper, antedating the Dallas News by many years, the company has fifty employes in its service 21 years or more. Mr. Dealey's years of service number 51.

DAILY'S WHITE-SWEATERED MARCHING CLUB WINS PRIZE

This is marching club of the *Hibbing* (Minn.) *Daily Tribune*, which recently won first prize for the club making the best appearance in the parade preceding the dedication of the half million dollar memorial building erected to Hibbing's soldier dead. R. W. Hitchcock, owner and publisher of the Tribune, James G. Early, general manager, and George Fisher, managing editor, marched with the Tribune force.

DUPUY HONOR GUEST AT N. Y. AD CLUB

Owner of Petit Parisien Says Diplomats Share the Goodwill Between Advertising Men of United States and France

Senator Paul Dupuy, owner of the world's largest daily newspaper, *Le Petit Parisien* of Paris, host two years ago to many American advertising men visiting his city, was guest of honor Oct. 2, at a luncheon at the Advertising Club of New York, of which he is an honorary member.

He made a point of declaring his belief that the good will existing between the advertising men of the two countries was shared by the diplomats at and following the debt funding commission meetings in Washington, which he had attended.

"We leave the United States not only without any bitterness, but with an earnest feeling of esteem and sympathy toward the men with whom we have been negotiating," the Senator declared.

"They have done their best and have shown perfect good will. And on our side we went the limit."

The Paris publisher began his address by thanking the members of the advertising club for his election as an honorary member. He was introduced by Paul Meyer, owner of *Theater Magazine*, and a club director. Charles C. Green, club president, presided. Andre Geraud, who writes for *L'Echo de Paris* under the pen name of "Pertinax," was also present and spoke briefly.

Senator Dupuy's speech follows in part:

"We have just been spending some days in Washington in order to settle the French debt. We could not reach a final agreement, but it was a very difficult impassé, on account of having to bring together two so different public opinions.

"Nevertheless, great progress has been made and a foundation laid on which future settlements may be built up.

"The negotiations are not broken off—not even interrupted, and I have no doubt that in the very near future an agreement will be reached upon a solution, satisfying to both countries."

C. King Woodbridge, president of the Associated Advertising Clubs of the World, in a short speech, expressed the sentiment that "business co-operation would set the standard of harmony among nations."

Others at the speakers table included: C. C. Charles, former president of the club; James Wright Brown, publisher, EDITOR & PUBLISHER; Herbert Houston, president of the Cosmos Newspaper Syndicate; Jesse H. Neal, secretary of the Associated Business Papers, Inc., and Earnst Bourdin, New York representative of *Le Petit Parisien.*

BRISBANE PREPARES A RETAIL AD

Editor Gives His Ideas on Copy Writing for Department Stores in Advertising Club Talk—Suggests Recipe for Success

Arthur Brisbane, editor of the *New York Journal* told how to prepare a retail advertisement in an address, Sept. 25, before the retail group of the New York Advertising Club.

He formulated, he said, his recipe for successful retail copy writing 25 years ago when he prepared a full page advertisement for Macy's, New York department store, which is still used frequently by that establishment.

"Nathan Straus and his brother Isadore," he began the story, "were in those days having a hard struggle. They had just laid the foundation principal on which their success has been built—the idea of cash payment, which would allow at the same time certain advantages of a charge account, the deposit system.

"Nathan Straus had been writing the advertisements himself, but the response was slight. The two merchants needed the money badly which they could borrow from customers at 4 per cent, instead of paying 6 to the banks.

"One time I was in the store, and Straus asked me what I thought the trouble was with his plan. I asked him to show me his advertising on it, and he did. Let me tell you it was the maximum of badness.

"'All right,' I said to Straus, 'Let me prepare you an advertisement on this, just to show you. You needn't put it in the Journal, if you don't want to.'

"Well, I did lay out the ad. Across five columns I put a picture, to illustrate the Bible text: A fool is wiser in his own conceit (opinion) than seven wise men.

"Then beneath I told in the simplest baby talk, the advantages of the Macy system—something like 'while you work for money, let your money work for you.' It is true, you know, that it is impossible to exaggerate the stupidity of the public."

"'But,' Straus objected, when I showed him my copy. 'So much space for a picture.'"

"Then, I answered, and in explaning my idea formulated the recipe for advertising writing which I have repeated many times since.

"Effective advertising must do five things:

"It must be seen.
"It must be read.
"It must be understood.
"It must be believed."

INDIANAPOLIS NEWS ADVERTISES RADIO

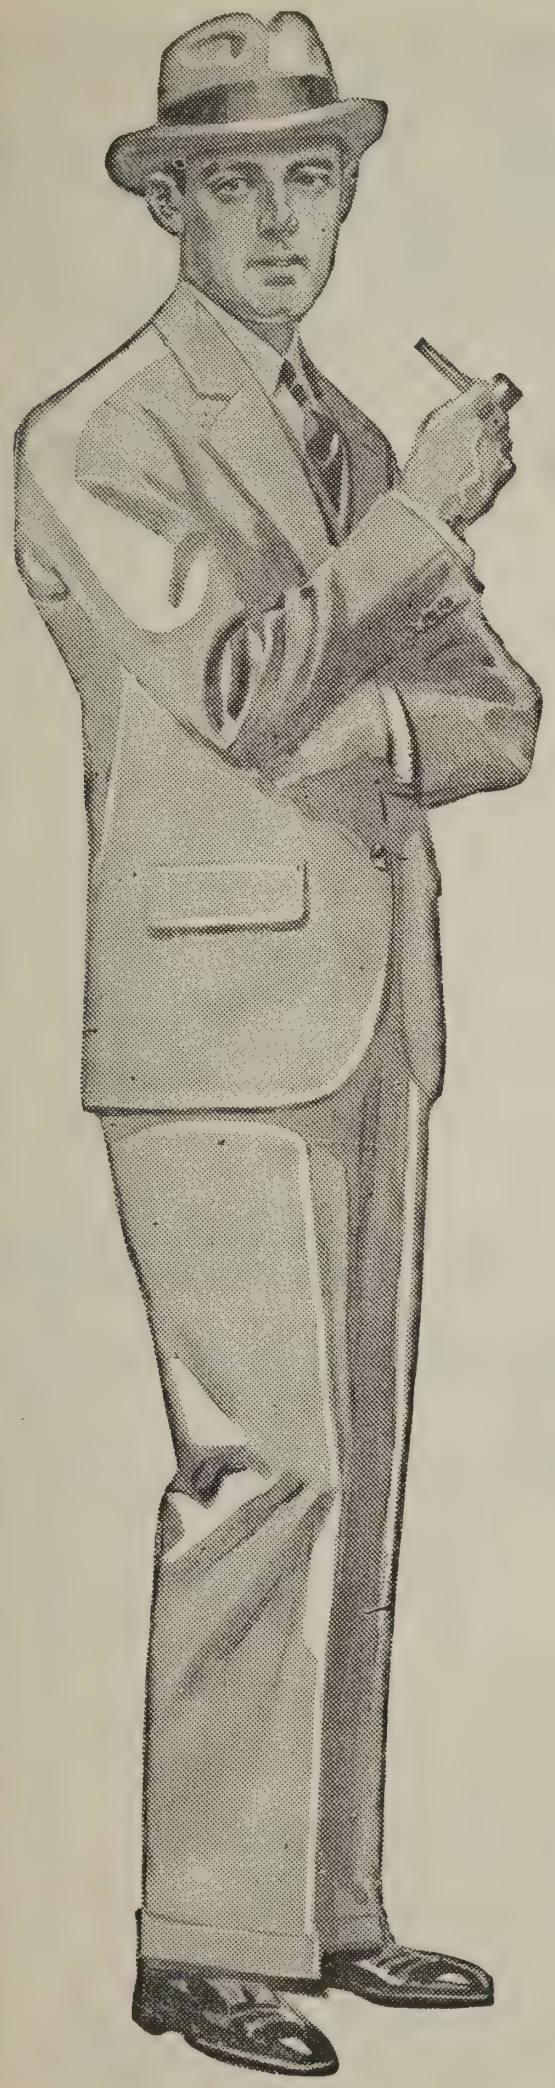
Daily Running Eight Institutional Advertisements, Totaling 6,000 Lines to Aid Sales of Local Dealers

Without direct support from local or national radio dealers, the *Indianapolis News* is conducting an advertising campaign in its own columns to promote radio.

A series of eight advertisements have been prepared to run eight weeks, making a total of 6,000 lines. The copy, institutional in character, concludes in each case with the statement: "The Indianapolis News publishes this for you and for the advancement of radio." "We are not using our columns for this campaign with the intention of producing so great a demand for radio in the abstract that the dealer may relax and curtail his own copy, depending on this campaign to do for him what he should properly do for himself," said Frank T. Carroll, advertising director.

"But we do expect to accomplish for the dealer with this campaign some things that he cannot do for himself. He is faced daily with the necessity of producing a direct and profitable return from his space. This has a tendency for him to cut down space to the minimum to reduce costs and to crowd it full of copy, usually featuring prices. There is little room left for the institutional copy.

"Aside from the advancement of radio, the News has, of course, a utilitarian purpose in running this advertising—to attract additional radio copy from dealers who see and appreciate the effectiveness of the campaign and who wish to be tied up with it. Aggressive personal merchandising of the campaign has been done through the enthusiasm of the local and national advertising staffs. Results so far have been extremely encouraging."



Each advertisement plays up the statement: "Radio—enjoy it—love it—thrill to it—you needn't even try to understand it."

Other general promotion ideas are brought out in the text, which is illustrated. Thus one advertisement in the series runs under the head "Dance music, while it is still new," and reads:

"A new dance hit comes out and starts a million feet to twinkling to its cadences.

"The newest dance music! New today in Atlantic City, and Walla Walla, new today in Miami and Seattle! No need to wait until by devious channels the newest music reaches you six months late. Radio brings it to you now.

"Today's hit is forgotten a few weeks hence. Know today's newest dance music while it is still today."

Men, Too, Make The Detroit News Their Buying Guide

50,138 Inches of Men's Wear Advertising During 8 Months!

59% of Detroit's Total Carried by The News, Two Other Papers Dividing the Balance

Few advertisers are more careful in checking results from advertising than those dealing in men's wear. It is very significant to note that in this classification The News' lead assumes overwhelming proportions, publishing practically three times as much men's wear advertising as the second medium!

There are many reasons for the greater responsiveness advertisers experience through The News. They find in The News a unique opportunity to cover America's most prosperous population through a single medium at a single cost.

The News thoroughly covers the homes in Detroit and the local trading area with twice the circulation of the second advertising medium! No newspaper in any city of Detroit's size or larger, offers such thorough blanketing of its field. Add to this concentrated circulation, the reader interest and good will enjoyed by The News, and you have every reason for its unequalled popularity. In sports topics, even as in features appealing exclusively to women, The News ranks supreme. Men find a host of interesting articles and special features to enjoy at all times. No Michigan newspaper publishes as many by as well known writers as The News.

Take advantage of this greater reader interest and superior circulation of The News. Reap the added benefit of advertising in a medium whose intrinsic merit is evidenced by an overwhelming lead in practically every classification of selling advertising. Many other advertisers find confining their advertising exclusively to The News the ultimate in economical selling.

REPORTER-SLEUTH BREAKS TRAIL FOR COPS

First Hand Investigation of Stories Is Newspaper's Duty To Public, Says Herbert Mayer, Who Digs Out His Own Facts—Has Record of Solved Crimes In New Orleans and New York

By EDWARD R. CHURCHILL

NEVER manufacture a theory but let the facts make one.

Never accept what appears to be the obvious.

Lead the police, don't follow them.

Never hit a news source once, but keep beating over the ground for new angles.

Everyone who speaks has a motive—possibly to outwit you.

Everyone you meet is using his head—use yours.

These are the maxims given the aspiring investigating reporter by Herbert Mayer, who has spent 16 years digging about behind the scenes in Louisiana and in New York City.

Mayer is the enigma of New York newspaperdom. The usual procedure, when out on a story, is for all to work together, and to share equally.

Mayer, like Kipling's cat, walks by himself, and, measuring him from his achievements, sometimes runs.

He has ruffled the feathers of a great many of the profession's peacocks by never appearing on the scene of the tragedy until his newspaper has gone to press with a first page beat. On numerous occasions, some 48 hours after the work was done, word has filtered along the journalistic highways and byways that "it was Herby."

On instances almost too numerous to mention, Mayer has been having lunch with, or has been closeted in the rooms of the protagonist of a lead yarn while the hungry mob has shouted vainly outside.

Mayer is silent. He is pensive. He seems to blend into a greyish background and one seldom is aware of his presence.

Then he is not the emphemeral worker but a romantic sort of person who sees in his newspaper a weapon for right. He feels it is filled with a sympathy for the oppressed and a relentless hate for the wrongdoer.

He cocks a graying head on one side, tries exceptionally hard to get a twinkle out of his eyes. He is slight of physique, and not tall. He looks, as a re-write man chronicled after one of his escapades recently (he gets into print now and then)—very much as if the world is "full of fun."

"Newspapers which fail to make their own investigations in order to uncover matters in which the public has a real and righteous interest fall short of their duty," he says, in justification for his digging methods. "The press of today has received the same mantle of chivalry carried by the knights of old.

"Without exposure of conditions of corruption and darkness they will continue to exist indefinitely. It is not hard to imagine what would happen if reporters spent all their time running back and forth from their offices with their hands full of press agents' copy.

"Naturally, the newspaper depends on its reporters for its investigations. The youngster of today has to be wide awake and he has to fight for his news if he expects to accomplish anything worth while. He cannot rise above the stature of a messenger boy if he accepts everything at its face value.

"It's hard to tell anyone how to handle a story. Every yarn breaks differently. But there are general rules, often overlooked by the oldsters.

"Naturally, a man must have a theory if he is about to investigate. But a theory without facts to support it is like an automobile without a motor. It won't get one anywhere.

"In dealing with the police, remember that they are not newspaper men. In many cities, too, news of crime is suppressed because it reflects on the department. Don't read the police blotter and then come into the office. Visit those involved.

"If the police fail to act when you think action is warranted, take the matter up with the district attorney. Don't wait for the law to move—move it.

"Don't forget your routine coverage of news which has happened, or is happening, as you search for more news to break. But when you have done this, follow your own ideas to the limit.

"Last of all, be observant to the extent that you will recognize a thread in a story when others have taken it for granted and have passed on to other things."

Herbert Mayer

Mayer has lived up to his maxims.

Born in Texas, and educated there, in part, he moved to New Orleans. He finished high school and one day dropped in to have a chat with Marshall Ballard about something to do, he explained.

Ballard, at that time, had assumed the managing editorship of the *New Orleans Item.*

The managing editor explained, shortly after signing Mayer up, that a newspaper was a powerful weapon, and that its writers were "dealing with a man's life, his character and his pocketbook."

"It is cowardly to use the great power of a newspaper to lay bare scandal which can have no public interest, or to be a snooping, sneaky second story man merely to excite the baser emotions of the low reader," he said.

"Upon the other hand, it is the duty of newspapers to expose wrong, to oppose fraud and to clamor without stint for the accomplishment of things beneficial to the public welfare."

Mayer took the advice into his heart and his head.

He remembers his first work with these words still ringing in his ears. He covered the Algiers and Gretna districts of New Orleans, which included a district known as Jefferson Parish. The Parish was under the control of a group of thugs headed by a sheriff with the demeanor of a czar. Gambling, drinking and vice indulgences were but a few of the evils in the district.

The youthful reporter, his face and hands dirty, his clothes torn, his intoxication simulated, invaded the district. The printed results were so effective that the district was cleaned thoroughly, but for a long time afterward, he advanced cautiously through its streets with an armed guard at his side. On one occasion he dodged bullets in a wild trip across the Mississippi to out-distance some of the thugs whom he had "offended."

He was promoted to police reporter soon after. This meant headline stories for him. But an administration opposed to the Item was in power.

Outside tips were his only means of getting news before the other newspapers printed it.

"The inspector had made some sort of remark about knocking my block off," explained Mayer, apologetically, "and as he weighed 240 pounds I didn't attempt to see whether he was joking."

The war was hot and heavy and Mayer finally enacted the role of the man who laughed last.

The body of a man was found floating in the lowlands and furnished the climax, revealing, perhaps, the most dogged piece of work the police reporter ever attempted. Mayer and Max Cressy, another police reporter, followed the body to the morgue. They found the initial "R" on an undershirt, and found friends on the police force who loaned them a message book from which they listed the names of all persons who had disappeared whose last names began with "R."

The third visit revealed the anxious wife of a jeweler, who climbed into a car and went to the morgue. There she identified the body. The Item had beat Number One.

While the chief and the opposition were still up in the air, the men took revolvers and flash lights, exploring every hut and shack near the lowlands. In one they found a letter, congratulating the receiver on having dodged the guillotine in France for the murder of a woman.

They summoned detectives, lay in wait, and when three men entered the shack they were taken. They were so surprised they confessed. Two of the three were hanged for the slaying of the jeweler. The confessions, with the arrest, went exclusively to the Item and the police inspector capitulated.

Observation brought Mayer a story which resulted in congratulations from Count Von Bernstorff. The yarn swept the nation and the world—it was the story of the attack of the *H.M.S. Baralong,* flying an American flag, on a German submarine, resulting in a loss of the underseas boat and most of those on board.

Communication and transportation in and out of New Orleans had been severed. Mayer saw several men walking down the street as he went out to lunch, while managing editor of the *New Orleans American.*

They carried suitcases and since they could not be going anywhere, and apparently could not be coming from anywhere, Mayer's reportorial instinct got the better of him. Questions followed, he had lunch with the men, and the American broke a story which, because of its stark realism and brutality shocked the civilized world.

They had come into New Orleans on a small boat which had picked them up and were survivers of the ill-fated sub. For his work on this story Count Von Bernstorff, American Ambassador from Germany, sent Mayer a letter of thanks on the black eagle stationery of the German embassy.

Mayer served on the Mexican border as a lieutenant of infantry. Later, he spent five months in first line trenches of the St. Die sector during the World War.

He has been a re-write man on the *New York American* and a reporter on the staffs of the *Daily News* and *Daily Mirror,* both tabloids.

During his several years stay in New York, he has received credit for his work in the news columns of his papers and his photograph also has been printed.

He carried the town a full 24 hours on the recovery of the body of a 12-year old lad, shot to death in a Richmond Hill swamp by first picking a theory and then following it through.

He obtained the conviction of a physician on a charge of operating illegally.

He recovered the body of another child, also working on a theory overlooked by the rest of the pack, together with a clue or two.

In each case, he was in close touch with the principals of the stories while the men who worked together were standing just on the borderline, wondering what would happen next.

These are a few of the chalk marks on Herbert Mayer's score board.

"LET THEM PAY FOR IT"

Columbia (S. C.) State Comments Editorially on Press Agents

"Why Not Let Them Pay For It" was the title of the following editorial hitting press agents in the *Columbia* (S. C.) *State* recently:

"No check has been made to ascertain precisely how many South Carolina newspapers donated to a Chicago mail order house two to three inches each of advertising under the guise of news, but the number of papers so complaisant as to publish free a two-paragraph 'hand-out,' announcing the appointment of 'crop observers' for the 'agricultual foundation' maintained by the catalogue concern is considerable—and surprising.

"Some of these same newspapers often implore their readers to 'trade at home,' rather than patronize mail-order houses or 'bell ringers.' Some editors even decline to admit to their columns on any basis material designed to promote dealing with the Chicago parcel post houses, on the ground that interest and sentiment alike constrain them to stand by the home merchant.

"Why not let the mail order gentry at least pay their way? If newspapers themselves cheapen their space, how can they expect business men to appraise it highly?"

BLOOMINGTON BULLETIN SOLD

W. Kee Maxwell, Former Akron Times Owner, Buys Illinois Daily

BLOOMINGTON, Ill., Oct. 5.—W. Kee Maxwell, Akron, O., who last spring disposed of the *Times* in that city, which he had published since 1916 in association with Ross F. Walker, of Peoria, Ill., has purchased the *Bloomington Daily Bulletin.* The change was effective Oct. 1, Mr. Maxwell taking over the interests of Graley & O'Donnell. Burnett K. Maxwell, son of the Bulletin's new owner, will be associated with his father in the business.

The Bulletin is in its 44th year, and has long been operated by the Braley-O'Donnell interests. Since the death, several years ago of Theodore A. Braley, his widow held his interests, the active management of the plant falling upon James F. O'Donnell, who began there as a reporter 39 years ago. In 1899 the Bulletin absorbed the *Daily Leader,* which was established in 1863. The *Sunday Eye* was acquired in 1900, after 22 years' existence. Mr. O'Donnell will remain in Bloomington, it is announced.

Mr. Maxwell was born in McDonough county, Illinois and was editor of the *Peoria* (Ill.) *Transcript,* from 1910-1913 and editor of the *Peoria Journal* from 1913-1916, when he purchased the Akron Times.

Roberts Returns to Paris Oct. 17

Elmer Roberts, head of the Paris office of the Associated Press, who came to this country with Finance Minister Caillaux to cover the debt parley, will return to his French post Oct. 17, on the S.S. Paris.

Our Own World of Letters

By JAMES MELVIN LEE

DOUGLAS FREEMAN, editor of the *Richmond News Leader,* begins in *Scribner's Magazine* for October "Robert E. Lee and the Ladies." In this article for the first time one catches the lighter side of the Great Chieftain of the South. Such a human touch has escaped the 20 or more biographers who have written about Lee. Mr. Freeman has not added the touch for it is found in the letters which he reprints.

For more than ten years Mr. Freeman has been making a special study of the life and character of Lee. In 1914 he edited Lee's Dispatches. Previously he had edited "The Calendar of Confederate Papers." Among his honorary degrees is that of LL. D. from Washington and Lee. Since 1925 he has edited the News Leader and since 1922 he has been one of the owners of that paper.

In the November number of Scribner's he will continue his chat and tell the story of Lee's feminine correspondence from the outbreak of the Civil War until Lee ceased to be president of Washington College because of his death.

* * *

TWO editorials in the *World's Work* for October ought not to be skipped by newspaper men. The first, partly technical and partly historical, takes up "Five Centuries of Typography." It closes with a word of warning for the schools for printers such as those at Indianapolis and at Pittsburgh.

The second editorial is headed "A Unique Western Newspaper." It describes the *Enterprise,* published at Livingston, Mont. By exact count Livingston has 1,304 homes. In that town are circulated 1,279 copies. In other words, only 35 homes in the community do not get the Enterprise. Most of these are occupied by people unable to read English.

How L. E. Flint, editor, has successfully marketed his paper through a definite editorial policy is thus given in the editorial:

> He (Flint) has simply refused to print anything in his paper that makes parents uncomfortable when they see it in the hands of their children. He does not print any police court news at all. He prints no news of local criminal trials until a defendant has been pronounced guilty. In these cases, he then prints all the essential facts. In other words, Tom Jones or Jim Smith gets no notoriety for being arrested. But if either of them is convicted, the community is told.

Other papers are adopting an editorial policy similar to that recorded in the last two sentences of the quotation.

* * *

ANOTHER practical booklet in "The Journalism Series," put out by the University of Missouri School of Journalism, bears the title "Journalism Week, 1925." It contains more worth while material about editing and making newspapers than is found in many a volume of cloth binding. It may be obtained upon application to Dean Walter Williams, School of Journalism, Columbia, Miss.

The bulletin opens with "Journalism as a Public Service" by Marcellus Elliott Foster, president and general manager of the *Houston Chronicle.* Mr. Foster insists that newspapers not only should print crime news but must print it. In answering the question "What about the Bible?" he says:

> It starts with temptation and evil in the Garden of Eden. It describes the son of Adam killing that son's brother; it tells of old Noah getting drunk; of the thousand wives of Solomon, and there is nothing more graphic that has ever been printed in a newspaper than the story of the death of Absalom and the crimes that led up to it. Debauchery of sister by brother, murder of brother by brother; war of son upon father; the terrible death of the son while fleeing from a father's wrath.

Later on Mr. Foster reminds the reader that while there are stories of crime in the Bible they are always told in a manner to warn. He makes the same observation regarding similar stories told by Dickens, the novelist, who incidentally was one of the world's greatest reporters.

James Thomas Williams, Jr., editor of the *Boston American,* in his contribution "The Profession of Journalism" outlines the opportunity and the obligations of American newspapers.

Lewis Craig Humphrey, editor of the *Louisville Post* discusses "Getting at the Truth." He, too, touches upon the subject of crime in the press, mentions the committee appointed in England to consider the subject, and express this opinion:

> I boldly affirm that each newspaper should print quite extensively the news of crime in its home locality, and perhaps all over its own state. But the publication of news of crime from all parts of America may easily be overdone.

Elbert H. Baker, President of the *Cleveland Plain Dealer,* under the head "Modern Tendencies in Journalism" startles the reader with his observation, "Blessed be the critics of our newspapers." He believes that criticism whether constructive or merely destructive is "a wholesome rebuke to the pride which goeth before a fall or to that smug self satisfaction which is an effectual bar to progress." He makes this observation about editorials:

> There is today a greater editorial page than ever before, less bitter, less personal than that of old, but with a riper thought, a finer diction, a greater sincerity and honesty of purpose.

The next feature is "Freedom of the Press" by Harry B. Hawes. As this feature has been already published in pamphlet form and reviewed in some length in this department it may be passed over without further comment.

Walter M. Harrison, managing editor of the *Daily Oklahoman and Oklahoma City Times,* answers the question, "Does a Fighting Editorial Policy Pay?" He gives interesting answers by many fellow editors but before so doing he inserts the following:

> Adolph Ochs, publisher of *The New York Times,* recently was quoted as making the statement that the first duty of a newspaper is to make money. I agree with him. You cannot be both owned and free. If you are not making money, you owe money. If you are in debt, the bank, the gas company, the cotton mills, the steel crowd or some other power rings a bell and you answer. And so the first duty of a newspaper is to make money in order that it may be absolutely free to champion the causes based on moral and principle, on which every enduring newspaper success is established.

Mr. Harrison has performed a real service in getting together so many answers to one of the most important questions relating to modern journalism.

Burt P. Garnett of the Editorial Research Reports of Washington, D. C., emphasizes the importance of investigators to supplement the work of reporters.

Roy Harrison James, cartoonist of the *St. Louis Star,* chats about "The Cartoon and the Newspaper." After explaining what is meant by "cartoon" he takes up editorial cartoons and comments as follows:

> Editorial cartoons vary in styles and technique. All are good if they get the message across. There are two larger classifications—the detailed, many-labelled, and ballooned type, and the simple direct expression of one idea with few or no labels and balloons. Personally, I prefer the simply drawn one-idea cartoon with very few labels, if any. It is strong, arresting and effective. It delivers its message with one punch. The other type, to my notion, does too much shadow boxing before registering.

Contributions by Walter Stowell Rogers, American Member of the World Conference on International Communications; J. H. Furay, vice-president in charge of foreign services, United Press Association; and Chester R. Hope, editor of Universal Service, New York City; make up the section headed "International Problems"—one of the most important sections in the bulletin.

Another section is devoted to "Book and Magazine." Represented in this section are Llewellyn Jones, literary editor of the *Chicago Evening Post;* Joseph S. DeRamus, associate editor of the *Rock Island Magazine;* J. W. Hudson, author; Edward B. Garnett, Sunday and magazine editor of the *Kansas City Star;* Miss Marjorie Barrows, assistant editor of *Child Life,* Chicago; Mrs. Ida Migliario, editor of *Household Magazine,* Tokepa, Kan.; Arthur Frederick Kollick, *Kansas City Star;* and Hugh F. Grinstead and Mrs. Amy Barron Leonard, who are short story writers. Space permits only this comment by Mr. Jones about the common fault in book reviewing:

> Many young reviewers do not review the book but simply the ideas which the book embodies. Thus they will take a book on socialism and instead of telling whether it is a good or a bad presentation of socialism they will review socialism itself, and tell us what a terrible thing—possibly—socialism is. But after all, the readers of a literary review probably have their own ideas as to whether socialism is good or bad. When they read what purports to be a review of a book on socialism all they want to know is whether the book is accurate in its presentation of socialism and logical in its criticism of socialism.

The next section "The Small-Town Newspaper" includes brief chats on the subject by Clayton T. Rand, editor of the *Neshoba Democrat,* Philadelphia, Miss. A. H. Steinbeck, editor, *Union Republican-Tribune;* William E. Arthur, publishers' Auxiliary, Chicago; Charles H. Whitaker, editor, *Clinton Democrat;* and C. P. Dorsey, editor, *Cameron* (Miss.) *Sun.*

* * *

ANOTHER book to go on the advertising shelf after it has been reviewed a little more in detail is "The Language of Advertising" (Isaac Pitman and Sons) by John B. Opdycke. The introduction is by Percy S. Straus, vice-president of R. H. Macy & Co., Inc., New York City.

* * *

JAMES L. FRI in his book "Retail Merchandising, Planning and Control" (Prentice-Hall, Inc.) devotes considerable space to retail store advertising. He lays special stress on the necessity of co-ordinating the work of buyers of different departments not only as to the quality but also as to the policy of department store advertising.

* * *

STYLE books are so numerous that a new one seems scarcely worth editorial mention. But "A Deskbook of Style" (Collegiate Press, Inc., Ames, Iowa) by F. W. Beckman and Blair Converse covers a field midway between the pretentious text of book publishing houses and the short, incomplete style sheets put out by certain newspapers.

In the publication of the present manual the authors have had in mind the needs of journalism students in American universities, the staff of the collegiate paper, and authors of bulletins and scientific articles printed under the auspices of experiment stations. The text is admirably suited to the needs of these three groups. For the last of the three it meets "a long felt want."

ABOLITION OF PUBLISHERS' STATEMENT CHIEF TOPIC OF A. B. C. MEET

Question to Be Considered at General Sessions Next Friday—1500 Expected to Attend Week's Various Conventions

POSSIBLE scrapping of the publishers circulation statement looms as the most important topic up for consideration at the 12th annual convention of the Audit Bureau of Circulations, to be held next week in Chicago.

STANLEY CLAGUE

This major question will be presented to the membership by the bureau phrased as follows:

"Shall the publishers' statement be abolished, with the activities of the bureau confined to the annual audit report?"

First broached at divisional meetings, this topic, along with other minor problems on the calendar, will then be put before the general session of the bureau to be held Oct. 16, in the Red Room of the Hotel La Salle, with O. C. Harn, bureau president, presiding.

About 1,500 editors, publishers and circulation managers are expected in Chicago next week to attend various conventions of which the A. B. C. each year forms the nucleus. Activities of A. B. C. week will culminate Oct. 16 in the annual A. B. C. dinner at the La Salle, at which the chief speakers will be Postmaster General Harry S. New, former Gov. Frank O. Lowden of Illinois, Senator Arthur Capper of Kansas, and Henri Gagnon of *Le Soleil*, Quebec.

The Audit Bureau of Circulations, established in 1914, will celebrate the beginning of its second decade of service to advertisers, advertising agents and publishers with a birthday record of more than 1,900 members—the greatest membership in its history.

"Reservations from all parts of the United States and Canada are greater than ever before," said Stanley Clague, managing director.

The importance of the activities of A. B. C. Week, from Oct. 12 to 17, and the A. B. C. convention, Oct. 15 and 16, is stressed this year by the fact that the volume of national and local advertising is approaching, if it has not already exceeded, the billion-dollar mark in the United States and Canada, according to Mr. Clague. The conservation of these appropriations is the fundamental object of the bureau.

The A. B. C. convention will open Thursday morning, Oct. 15, in the Louis XVI room of the Hotel La Salle, with a joint meeting of all divisions of the bureau. After the formal opening members will adjourn to rooms assigned to various divisions, where problems affecting each division will be discussed and candidates for directors will be selected. Following the policy inaugurated last year, definite topics will be presented for discussion at these divisional meetings and recommendations asked for presentation at the annual meeting the following day.

Among other affairs scheduled for the morning meeting will be the nomination of directors to fill vacancies. The election will be a part of the afternoon session. Present members of the Board of Directors whose terms expire at the meeting, and who will be reappointed or whose successors will be named, are:

F. R. Davis, General Electric Company, Schenectady, N. Y.

Ralph Starr Butler, resigned, United States Rubber Company, New York (1 year).

B. H. Bramble, American Chicle Company, Long Island City, N. Y.

L. B. Jones, Eastman Kodak Company, Rochester, N. Y.

E. E. Taylor, Postum Cereal Company, Inc., New York.

W. K. Towers, Paige-Detroit Motor Car Company, Detroit, Mich.

W. W. Wheeler, Pompeian Manufacturing Company, Cleveland.

Advertising Agents: Walter Hine, Frank Seaman, Inc., New York.

Newspapers: Walter A. Strong, *Chicago Daily News*.

Magazines: S. R. Latshaw, Butterick Publishing Company, New York.

Farm Papers: B. Kirk Rankin, *Southern Agriculturist*, Nashville, Tenn.

Business Publications: E. R. Shaw, *Power Plant Engineering*, Chicago.

Other important gatherings to be held during A. B. C. Week include the annual meeting of the Associated Business Papers, Inc., opening at the Congress Hotel Oct. 13 and continuing until Oct. 15, with the annual dinner at the Congress Oct. 14. Three important national speakers have promised to attend.

The Inland Daily Press Association will meet at the Sherman Hotel Oct. 13 and 14. Two luncheons have been arranged. The directors of the association will meet at a dinner at the Sherman Oct. 12.

The Farm Food Conference, held under the auspices of the Advertising Council of the Chicago Association of Commerce, will open Oct. 13 in the Red Room of the Hotel La Salle. At a noon luncheon at the La Salle, Hon. E. T. Meredith, former Secretary of Agriculture and publisher of *Successful Farming*, will speak on "The Outlook for Increased Business," based on a recent comprehensive farm analysis. Delegates to this conference will participate likew in the A. B. C. dinner Oct. 16.

The Western Council of the Amer Association of Advertising Agencies scheduled a luncheon at the Drake H Oct. 15.

Other activities are: annual meet of Agricultural Publishers' Associa Oct. 15; Bureau of Advertising, Am can Newspaper Publishers' Associa meeting; a meeting of the members "The 100,000 Group of American Citi in the East Room of the Hotel La S Oct. 14.

The Central States Circulation Ma gers' Association will hold a one- meeting at the La Salle Hotel Oct.

INLAND PROGRAM COMPLETE

Directors' Dinner to Open Three D Chicago Meeting

The Inland Daily Press Association h prepared an exceptional program for October meeting to be held at the Ho Sherman, Chicago, Oct. 12, 13, and It will start with a directors' dinner Monday evening.

President George D. Lindsay of t *Marion* (Ind.) *Chronicle*, who has b in Florida, is coming north for the s sion. At the directors' meeting repo of committees will be considered.

With President Lindsay in the chair t Tuesday session will open at 9:30 A. to hear the president's and secretary's r ports and that of the committee on r organization of the Inland. Other co mittees to report include, Cost Findi Income Tax, Postal, Labor, A. B. C., a Paper. During the afternoon R. S. K logg of the News Print Service Bure who has just toured the paper mills the country will talk and answer que tions.

A symposium of business manageme with S. E. Thomason of the *Chica Tribune* presiding, will be held on t morning of the third day. A half ho with past presidents will feature the afte noon session.

Trinity River Navigation.
Cotton Diversification.

This issue is printed on extra-calendered paper and contains the most complete collection of Dallas illustrations ever compiled.

A Mirror for a Lady of Forty

The lady? An American city in the rare bloom of fresh maturity; standing expectant, alluring, vivid in the rich promise she discloses.

"The development of Dallas began," say the city's prominent citizens, "with the establishment of The News in 1885."

On October First The News published a special Anniversary Issue presenting in a most interesting fashion the history and development of the city.

It is a splendid record of deeds of enterprise close-crowded into a short span of years; a strikingly clear mirror of Dallas' many-sided life.

The whole course of American industry, which in older cities runs back whole centuries, is epitomized in the rapid career of this young municipality.

If you want to know what has happened in Dallas, and *to* Dallas, since buffalo hides ceased to be legal tender, write for a copy of this souvenir Anniversary Issue.

Pittsburgh Press Gains!

It is one thing to establish complete dominance in circulation and advertising of every kind and division; it is still another thing to continue to gain steadily after such supremacy has been achieved.

The Pittsburgh Press has accomplished both. Net paid average circulation of The Daily Press for six months ending October 1, 1925, was—

181,883

Net paid average of The Sunday Press for the same period was

233,377

The Pittsburgh Press blankets the Pittsburgh market and is the only medium needed to reach the dealers and consumers of this rich territory.

The Press, furthermore, has no near competitor. In 1924 The Press carried more than twice as much advertising as the next nearest paper. The Press is first in everything.

THE WEATHER

FOR CLEVELAND AND VICINITY: Generally fair tonight, Friday fair and cooler. Fresh to moderate winds, mostly west.
FOR OHIO: Fair tonight. Cooler in central and northwest portions. Friday

a. m. Monday. Due to fog, it could not land and it circled the field all day and until late at night before it could be moored to its mast.
The flight was abandoned, it was explained, because of the failure of two of its engines and also of the motors which operated her water recovery system.

Largest Circulation Ever Attained In Ohio

The net paid average circulation of The Cleveland Press for the six-month period ending October 1, 1925, was—

211,210

This is the largest total circulation ever attained by any newspaper in the history of Cleveland or of Ohio.

This figure represents a gain of 9,846 over the previous statement and a gain of 17,654 over the corresponding period of 1924.

The city circulation of The Press for the six-month period was 174,170, a gain of 8,346 over the previous statement and a gain of 16,946 over the corresponding period of 1924.

The Press has more than 65,000 greater city circulation than the morning daily paper and more city circulation than the other evening paper has total circulation.

Toledo News-Bee Gains

The net paid circulation of The Toledo News-Bee for August and September, 1925, exceeded

90,000

This is a gain over the April 1 figure of

12,000

Average for the six-month period ending October 1, 1925, was 87,604, a gain of 9,552 over the previous statement.

News-Bee City, i.e., the vast group of people who read The News-Bee, represents a larger population than the cities of Dayton, Canton and Springfield combined. Visualize this loyal, interested reader-audience — thousands upon thousands of families to whom the News-Bee is their newspaper "bible." Every Ohio campaign should enter "News-Bee City." You cannot cover Toledo without The NewsBee.

A.B.C. In Columbus

Only one newspaper in Columbus is a member of the A.B.C. "Net paid" circulation quoted by the Citizen means "net paid" according to the A.B.C. definition.

The average net paid circulation of The Citizen for the six month period ending October was—

81,439

This is a net gain of 6,211 over corresponding period of 1924.

The U. S. Census of 1920 recorded 58,913 families in Columbus. Unofficial 1925 estimates place the number of families at 70,000 and the total population figure at 300,000.

The Citizen has city circulation sufficient to reach more than 50,000 families, a coverage which cannot be ignored in a successful Columbus campaign.

More than 84% of The Citizen's entire circulation is concentrated in the rich Central Ohio market. The Citizen's circulation growth is built on the Rock of Reader Faith. No contests! No premiums! Honest, solid circulation! A.B.C. circulation!

Net paid circulation for September, 83,320.

YOUNGSTOWN TELEGRAM

WEATHER: Showers tonight; cooler tonight and Saturday.

SEVENTY-FOURTH YEAR—No. 215 YOUNGSTOWN, OHIO, FRIDAY EVENING, SEPTEMBER 11, 1925. PRICE THREE CENTS

LAST FLYERS FOUND; FOODLESS 5 DAYS

The Telegram Continues Its Triumphant March

Again and again a gain—that is the story of The Telegram, the leading newspaper of Youngstown, Ohio. Take a look at the score-board showing circulation statements for 3 years:

April 1, 1923	23,957
October 1, 1923	26,036
April 1, 1924	28,285
October 1, 1924	30,029
April 1, 1925	31,311
October 1, 1925	32,522

The Telegram is first in circulation and advertising volume in the daily field. "Steel Valley" has a population of 250,000 and a payroll of $120,000,000. In this field of highly-paid skilled workers, buying power is reflected in income tax returns which show Youngstown to be third in Ohio, ranking with Cleveland and Cincinnati. The Telegram is the wanted and preferred paper—the dominant paper—in this rich and responsive market.

Two Papers In One

The consolidation of the Akron Press and the Akron Times brought together two strong evening newspapers, the new Times-Press retaining all of the features and services of the two papers.

Average daily circulation of The Times-Press for the six month period ending October 1, 1925, was—

43,275

The Times-Press offers the best contact with the homes of Akron at the lowest cost.

THE SUNDAY TIMES-PRESS is the only Sunday paper in Akron, offering an opportunity completely to cover the field at one cost.

The marriage of The Times and Press is one of the most successful newspaper consolidations on record — practically all of the circulation of the separate papers having been retained and new circulation being added steadily.

The Times-Press is definitely "first choice" for advertisers entering the national field.

THE SUN, *Alone*

In San Diego

The Sun, alone, covers the San Diego market at one cost. For only 4½c a line, the national advertiser may reach the homes in this territory through the home paper which enjoys the reader faith and loyalty of the best families in this wealthy city.

The net paid average circulation of The San Diego Sun for the six-month period ending October 1, 1925, was:

18,571

This is an increase of 18% over last year.

The value of the Sun's thorough coverage of the homes is substantiated by the fact that The Sun leads in volume of paid advertising from San Diego merchants in the daily field.

For 44 years, The Sun has been a power for tolerance, civic betterment and clean government. It is a quality newspaper in a quality field.

List the Sun exclusively and avoid duplication and excessive cost.

THE POST

Baltimore Post Leads!

National advertisers will be greatly interested in the new situation in Baltimore where The Baltimore Post has steadily climbed to leadership in the evening field.

POST CIRCULATION

October 1, 1923	56,824
October 1, 1924	77,555
October 1, 1925	111,195
Month of September, net paid	122,684

The Post is first in city circulation in the evening field.

Growth of Post advertising linage has also been rapid and substantial, the gain for the first six months of 1925 exceeding 1,300 columns. During the same period another evening paper gained 243 columns and the third evening paper *lost* 3,733 columns.

In Washington—Wow!

The circulation progress of The Washington Daily News is more than a "gain"—it is a leap. Month by month the figures have been steadily climbing.

The net paid average circulation for the six-month period ending October 1, 1925, was

62,274

This is a gain of more than 22,000 over the corresponding period of last year. This magnificent gain is the result of reader demand.

The Daily News is Washington's home paper. It is edited for the Government employee, for the families which live in Washington permanently. With the exception of The Star, The Daily News leads in home-delivered carrier circulation. The News is a tabloid newspaper—but not a picture paper.

Include The Daily News in your Washington schedules as your best contact with the permanent Washington population.

Leads Texas in Gains

During 1925, The Fort Worth Press has gained more city circulation than any other newspaper in Texas.

City and suburban net paid average circulation for the six-months' period ending October 1, 1925, was—

17,190

Fort Worth is an afternoon-newspaper city but it is not a "one-paper" city.

Fort Worth has more than 37,000 families (fully substantiated by actual canvass).

Fort Worth cannot be covered without The Fort Worth Press. Fort Worth is now, and has been for months, in the "prosperity zone." National advertisers who have bought complete city coverage have been well rewarded. Include The Press in every Fort Worth schedule.

El Paso Post First Choice

The net paid average circulation of The Post for the six-month period ending October 1, 1925, was—

10,726

This is a gain of 28% over the previous statement.

According to the latest available figures, The Post has as much or more city circulation as any other El Paso paper, and has city circulation sufficient for coverage of more than 50% of El Paso homes.

Yet the rate of The Post is only 3 1/2c a line as compared with 7c and 8c for other papers. Practically every active local advertiser uses The Post regularly.

Avoid excessive cost by listing The Post, the fastest growing paper in El Paso. Remember, too, that in this territory, country circulations of newspapers are a liability and only city circulation an asset. On the basis of cost and city coverage, The Post in FIRST CHOICE.

New Mexico at 4 Cents

The net paid average circulation of the New Mexico State Tribune for the six month period ending October 1, 1925, was—

10,472

According to the latest available figures this is about twice as much circulation as the next nearest paper in the state, and a gain of 70% over the corresponding statement of 1924.

The State Tribune offers thorough coverage of Albuquerque and reaches most of the worth while English-reading families throughout the entire state. (A substantial part of the population reads Spanish exclusively).

Thus the State Tribune, alone, at a cost of only 4 cents a line, will give the national advertiser adequate coverage of the entire state of New Mexico.

The Albuquerque market is noted for its high per capita wealth. The beauty of the city and its superb climate attract many well-to-do residents of eastern and northern states who make their permanent homes in this garden spot.

Get contact with this state market through this famous newspaper

STATE A.P. GROUP ELECTS

H. C. Schaub of Decatur Review Heads Illinois Members

The second annual meeting of the Illinois *Associated Press Association* was held in conjunction with the Illinois Press Association meeting at Champaign, Oct. 1-3. H. C. Schaub of the *Decatur Review* presented a report of the state service of the A. P. Lee Call of the *Springfield Illinois State Journal,* discussed the general wire and mail service. Edgar T. Cutter, superintendent of the central division attended.

John H. Harrison of the *Danville Commercial-News,* retiring president, was chosen Illinois member of the advisory board for the central division and will represent the state at the divisional meeting to be held later in Chicago. H. C. Schaub, general manager of the *Decatur Review,* was elected president of the state organization; Lee Call of Springfield, vice-president; Aubrey Cribbs of Springfield, secretary. Mr. Cribbs is state editor of the A. P.

NEW WEEKLY GROUP

Thomas Kennett Named President of Westchester Publishers—Seitz Speaks

Representatives of the 30 weekly newspapers of Westchester County, New York, elected Thomas Kennett, editor of the *Pelham Sun,* president of a new weekly newspaper publishers' association of Westchester County, formed Oct. 2, following a well attented dinner at White Plains.

Fred Drumgoold, of the *Mt. Kisco Recorder,* and Harry Sattler of the *Harrison Observer* were elected vice-presidents, G. Harris Danzberger, editor and publisher of the *Hartsdale Herald* was elected secretary, and Colin T. Naylor, Jr., of the *Peekskill Highland Democrat* was elected *treasurer.*

Don Seitz predicted an era of great prosperity for the county in general and for the newspapers in particular, chiefly because the New York City dailies are neglecting the suburban field.

He said it was the duty of newspapers to cover their circulation territories.

TWO CALIFORNIA CONTESTS

Dailies and Weeklies to Vie for Editorial and Front Page Prizes

With a view to stimulating interest in typography and editorial service, two contests have been arranged for members of the Southern California Editorial Association by Managing Director Ben H. Read.

The contests are divided into two classes, one for the weekly or semi-weekly papers and the other for the daily group.

The *Los Angeles Times* is offering a silver cup for the best front page entered by a weekly or semi-weekly member. Judging of the contestants entries will be on the basis of 50 points for typographical appearance; 25 points for choice of material; and 25 points for handling.

The President's Cup, offered by J. R. Gabbert, is to be awarded to the daily paper member entering the best editorial page. In judging these entries 30 points will be awarded for scope, suitability and originality of topics; 30 points for leadership; 30 points for literary excellence; 10 points for mechanical appearance.

Daily Host to B.B.B. Delegates

At the close of the annual conference of the National Better Business Commission in Indianapolis, Sept. 22, 23 and 24, the *Indianapolis News* was host to the visiting delegates and to the Indianapolis Better Business Bureau at a dinner at a neighboring Indianapolis chicken dinner farm. Hilton U. Brown, of the News, and Edward L. Greene, of New York, a director of the National Better Business Commission, spoke.

Typesetting Inventor Dies

Fred A. Bright, inventor of various devices related to typesetting machines, died Oct. 7, in his home in Greenwich, Conn. He had retired from business in 1912. Prior to that he was president of the Hess-Bright Manufacturing Company.

A. N. P. A. AD BUREAU SPELLS IT "LINAGE"

FOLLOWING the editorial suggestion of EDITOR & PUBLISHER, the Bureau of Advertising of the American Newspaper Publishers Association has now adopted "linage" as the correct spelling of the newspaper term denoting lines of advertising.

Thomas Moore, associate director, said bulletins issued by the bureau would henceforth carry only the simplified spelling of the word.

"It's a Pleasure to Boost Certified Dry Mats"

Under recent date a publisher* in writing to a fellow publisher who had inquired about the results with Certified Dry Mats, said:

"We like to receive inquiries of this sort and it is a real pleasure to give a boost to a product that comes up to the promises made for it.

"The News-Telegraph has used Certified Dry Mats for a little over two months with much success. The best answer is in the comments received from subscribers who frequently asked the writer what we had done to improve the paper, the printed matter being more clear and the cuts showing up like photographs."

There is no good reason why Certified Dry Mats can't mean just as much to you, if you will but give them a chance. If you associate in your mind all dry mats with poor, grey printing, Certifieds will be a revelation to you.

It's a very simple matter to check up on the claims made for Certifieds; if they are not perfectly satisfactory to you, they cost you nothing. If they are as represented, it will pay you to use them.

Samples are yours free of any charge or obligation; it's a pleasure for us to put Certifieds to the test in your plant. Please do it NOW.

*Name on request.

The Sun

The Sun's Commanding Position in the Advertising Field Has Been Won Solely on the Character and Quality of the Newspaper Itself

IN September, for the third consecutive month, The New York Sun published a larger total of net paid advertising by 71,820 lines than any other Evening Newspaper in New York.

In September The Sun carried 1,253,426 lines of advertising, a gain of 113,894 lines over September of last year. This gain in advertising is greater than the September gain of all the other New York Evening newspapers combined.

Moreover, it is a greater gain than the combined gain of all the New York morning newspapers on their weekday issues and it comes within only two hundred lines (200) of beating any one of these morning newspapers with both its weekday and Sunday issues—six days of The Sun against seven days of the morning.

Last year The Sun carried 13,268,308 lines of advertising and all in six day weeks—no Sunday issues. This year The Sun will show a gain of better than a million lines.

Mere volume of advertising, however, doesn't tell the full story. It doesn't reflect the full meaning of The Sun's very splendid growth in advertising. The full meaning is found in the character and quality of The Sun's advertising considered in connection with the actual lineage gain.

Measuring growth by lineage alone takes no account of character and quality. The newspaper that is careless about the character and quality of the advertising it carries has a wide field to draw upon. A line of advertising is a line of advertising in the count whatever the character.

EDITORIAL

WHERE WE STAND

THE approaching 69th Congress will witness another determined effort to repeal the publicity feature of the income tax law. This will be in response to heavy pressure. EDITOR & PUBLISHER'S recent surveys have plainly indicated that a considerable section of the daily press, perhaps a large majority, editorially favors secret filing of income tax returns. A number of editors are so deeply moved on this subject that they have considered it inconsistent to publish the 1924 income tax lists, although there is specific legal provision.

In view of the approaching agitation for a repeal of the law, EDITOR & PUBLISHER should restate its position in favor of publicity of income tax returns.

In the first place, we believe that income tax returns are public documents and as such should be open to public inspection; it is curious that the legality of a procedure so true to the traditions of our constitutional government should have been questioned.

No one has ever convinced us that there is the slightest difference in principle or in fact between the public filing of Federal income tax returns and the long-established public filing of tax returns under state laws; we have never heard of an instance where any newspapers declined to publish a state, county or city tax return, when it was a news issue, on the ground that such publication might embarrass an individual, invade public rights or be regarded as an improper press inquiry.

Secrecy in the affairs of government is as dangerous to the welfare of democratic principles as it is repugnant to free men.

Specifically, it is obvious that secrecy in regard to tax payments is dangerous because of the very great temptation it offers to weak individuals to profit through corrupt methods; in this tax instance, more than any other, secrecy is an absolute encouragement to fraud. This is not stated cynically. The average man is honest in his tax responsibilities. But every experienced newspaper man reading EDITOR & PUBLISHER knows that there are a considerable number of individuals, some very powerful, who, under a blanket of secrecy would gyp good old Uncle Sam to rags and tatters if they could "get away with it," and drag a lot of government employes into the same foul mire as accessories.

Senator Norris, of Nebraska, stated in the last session of Congress that not only does publicity tend to bring about more honesty in returns and a fairer statement of property, but that publicity enables correct legislation. Is this not to be encouraged? He added that publicity of returns would mean "many millions of income taxes," coming from men who would evade proper payments if they believed false statements might be made in secret.

There has never been a time in the history of the American press, to our knowledge, when editors have failed to join in any movement which would tend to lessen private and public fraud.

We believe in equality under the law and that secrecy makes for inaccuracy and inequality.

Above all else, we believe that the constitutional guarantee of free press is a grant of responsibility as well as of privilege. Establish the precedent of secrecy in the instance of income tax returns and, in logic, it must be carried down the line through every department of interest. When that happens the free American press will have lost its function in the life of the people and the government.

The people have a right to know ALL about their public business. Thus are we free, for with such understanding we may intelligently act.

The American newspaper shall not be thin-skinned in the instance of publicity of the dollar fortunes of citizens, when it does not scruple to publish to the world the heart and soul affairs of men, women and children.

Print income tax returns, or leave them out, as you will; exercise your news judgment; but don't uphold a law which makes news secret in the hands of the government!

If the Federal Trade Commission will kindly end the ancient "commission" argument once and for all the game may be worth the candle.

Judge not, and ye shall not be judged; condemn not, and ye shall not be condemned: forgive, and ye shall be forgiven.—St. Luke, VI; 37.

UNWORTHY CRITICISM

CRITICISM must be specific to mean anything. We feel familiar enough with syndicated press material to dispute the claim of the Methodist Board of Temperance and Prohibition, that the country is being flooded with comic strips and sport cartoons, made in New York, which are designed to flout the prohibition law. We do not believe that the comic artists are such ardent wets that they have turned propagandists, hoping to convert the West and South, by satire and ridicule, to the alleged booze liberalism of New York.

Where are these offending cartoons? We believe they are in the imagination of zealous people who write general charges against the press.

The *New York Times* aptly remarks that if the syndicated comic is propaganda assailing prohibition the power lies with editors not to publish them. Also that the newspaper syndicates are in business for profit and it is absurd to believe that they are so devoted to the devil's work that they will sacrifice both principle and profit to corrupt the pure minds of the reading public. It is all just a little weird to read the generalities of this religious committee in reference to the newspaper press. There are instances of comic cartoons which represent the low ideas of those who make and trade in them. Sometimes we think their appeals are lower than the lowest possible reader. But such cartoons are the exception, not the rule. The average comic is first rate good fun, clean and really helpful to the public. To charge that the whole comic business is in the hands of the devil's disciples is loose talk, which can only bring discredit upon those who utter it.

You see an advertiser wasting his money on inappropriate, misconceived, unscientific copy—do you dare to tell him? Why not, his failure means more to you than to him!

NEW PRESS AGENT TACTICS

OUR newspaper friends advise us that the press agent grafters are working a new wrinkle. No longer able to bam-boozle easy editors into using their advertising, disguised as "news," they now propose to club their way into the press.

A Southern newspaper publisher writes EDITOR & PUBLISHER as follows: "You have got the press agents on the run. They have made their last stand here. The advertising manager of a local department store handed a bunch of proofs and mats, raw publicity for three brands of merchandise, to one of our people, with a request that they be printed as news. We got under it and found that a press agent in New York had sent the stuff to the store with a request that we be induced to run the matter. A few minutes' plain talk with that advertising manager convinced him that he would not want to play cat's paw to pull those hot chestnuts. Keep up the good work, EDITOR & PUBLISHER."

Another editor, in the mid-west, reports the same activity in the following letter:

> "Your campaign against the menace of 'free publicity' has been one of the most constructive factors in the newspaper industry in many years. I take this means of endorsing it and of urging its continuation.
>
> "That the campaign has been effective is definitely established by the new tactics being employed by the professional publicity seekers.
>
> "Finding the direct road to the editor's desk blocked by the waste basket, they are making the approach from a new angle. Instead of mailing propaganda direct from a publicity agency, they are now compiling lists of retail dealers in each town, furnishing these dealers with the usual line of mats and stories and urging them to use the weapon of advertising withdrawals to get the stuff into print.
>
> "We have noticed an alarming increase in the number of local retailers coming in with prepared propaganda.
>
> "This approach through the local advertiser savors of blackmail, and it is important that the publisher take a determined stand against it from the very beginning. Give in to them once, and they will fill your paper with the disgusting rot. Give in to one man, and you will have to abide by the precedent with all others.
>
> "We are finding it effective to reason it out with the advertiser who brings in this propaganda. Most of them are reasonable men, and are capable of seeing the point when it is explained to them.
>
> "The publisher who has allowed his advertisers to get the habit of expecting several inches of free space with every line of paid advertising will be overwhelmed by this new flood of prepared publicity.
>
> "A clothing merchant comes in with a quarter page ad and a bunch of mats from the 'Born Tailors Guild.' Ask him if he will give you a new overcoat with every suit of clothes you buy.
>
> "This publicity mooching is an evil that must be eliminated from the industry."

Space moochers all qualify as the world's keenest judges of what's "news."

EMBARRASSING CONSEQUENCES

RECENTLY the Military Academy at West Point invited 100 editors to attend a special drill. Acceptance notices were sent out with the invitations. One hundred editors sent in acceptances. The Army authorities made arrangements for the transportation of 100 persons, luncheon was set for 100, and just 15 men appeared, four from one newspaper.

Newspaper men are a busy lot. But they are not too busy to meet the ordinary rules of courtesy. They have won a pretty terrible reputation for this sort of thing, an unconscious process better understood and explainable in news offices than elsewhere. It is a simple matter to say "sorry, can't come." Embarrassing situations are certain to arise when you say "yes" and mean "no."

Sell him a valuable advertising idea! Space will take care of itself.

DEFENDER OF MOVIE ORGY

LINDSAY McKENNA, managing editor of *Illustrated Daily Tab*, Miami, Fla., passionately denounced EDITOR & PUBLISHER'S comments on the publicity orgy that was called "Greater Movie Season," for want of a better name. Mr. McKenna's criticism was appropriately contributed to *The Quill*, the theatrical press agent's organ. He says that if it were not for the press agents he could not possibly publish a movie column in his paper. That, however, has been done by newspaper editors who control their editorial expressions.

PERSONAL

MILTON A. McRAE spoke recently before the Hammer Club of San Diego, Cal., on "The Evolution of the Newspaper."

Victor Murdock, editor of the *Wichita Eagle,* is on a trip to Southern Europe. He will visit Jugo-Slavia, Czechoslovakia and the Balkans and write a series of articles for his paper.

Harvey Ingham, editor of the Des Moines, (Ia.) *Register and Tribune-News,* accompanied by his wife, is spending a few days visiting his brother, Dr. George W. Ingham, of Olympia, Wash.

Robert F. Wolfe, proprietor of the *Columbus,* (O.) *Dispatch,* entertained the members of the Dispatch Country Club to a clambake at the club's building near that city. Mr. Wolfe himself acted as chef.

J. B. Gabbert, publisher of the *Riverside* (Cal.) *Morning Enterprise* and president of the Southern California Editorial Association, has been appointed by Gov. Friend W. Richardson as state real estate commissioner.

Maurice L. Stafford, formerly in the editorial department of the *San Diego* (Cal.) *Sun,* and now in the consular service, has been assigned to duty in London, Eng.

IN THE BUSINESS OFFICE

C. B. McKEE, who has been advertising manager of the *Danville* (Ill.) *Morning Press* two years, has resigned to take charge of the advertising department of the Cramer & Norton store.

Charles K. Jackson, for many years connected with southern California newspapers, has joined the new *San Diego* (Cal.) *Independent,* as classified advertising manager.

F. B. Grant, general manager of the *Salt Lake City Deseret News* has resigned as chairman of the Utah State Racing Commission.

IN THE EDITORIAL ROOMS

WILLIAM M. HINES, managing editor of the *San Francisco Bulletin,* visited Washington this week. He was the guest at the National Press Club of Leo A. McClatchy, Washington correspondent of the Bulletin.

Walter Chase, managing editor of the *St. Paul Daily News,* is on vacation at Lake Kabetogama, on the Canadian border.

Marshall N. Dana, associate editor, *Portland Oregon Journal,* has been elected president of the Portland Council of Churches.

Walter Howey, former managing editor of the *New York Mirror,* last week visited his home, Fort Dodge, Ia., where he was a reporter on the *Fort Dodge Messenger* 25 years ago.

J. W. Maynard, managing editor of the *Newark Evening News* has gone to Europe. He has a month's leave of absence.

Wilton W. Vaugh, of the *Boston Post* editorial staff, accompanied by his sister, Miss Mary E. Vaugh, sailed from Boston Oct. 4 for Liverpool on a six weeks' tour of the British Isles.

Henry Cabot Lodge, Jr., grandson of the late Senator Henry Cabot Lodge of Massachusetts, has resigned as state house reporter of the *Boston Transcript* to join the Washington staff of the *New York Herald Tribune.* Previous to covering the state house, he went to Europe for the Transcript where he interviewed the various prime ministers.

Nat. S. Gooding, managing editor of the *New Bern* (N. C.) *New Bernian,* and Mrs. Gooding are parents of son, born Sept. 28.

Lewis A. Kirkpatrick, managing editor of the *Santa Ana* (Cal.) *Bulletin,* has resigned to take charge of a commercial printing plant at Whittier, Cal.

A. M. Carpenter, editor of the *Spartanburg* (S. C.) *Sun,* has resigned to do editorial work on a chain of newspapers in North Carolina, Virginia and Maryland.

Wilbur Morse, Jr., of the Washington staff of the *Philadelphia Public Ledger,* and Mrs. Morse are parents of a daughter. Mr. Morse is a son of Wilbur Morse, Sr., of the *Philadelphia Evening Bulletin* staff.

Hubert and R. H. Roussel, brothers, are now city editor and assistant city editor, respectively, of the *San Antonio Evening News,* R. H. having joined the paper from the *St. Petersburg* (Fla.) *Times.* He succeeded J. F. Massey, who went to the *Jacksonville Journal.*

James A. Peterson, political editor, *St. Paul Daily News,* won the 1925 staff fishing contest with a seven-pound five-ounce wall-eyed pike, caught in Big Marine lake.

Pierce Cummings, formerly on the *Philadelphia Evening Ledger,* has joined the staff of the *San Diego* (Cal.) *Sun,* handling telegraph. J. N. Kieldsen, formerly in the northwest, has joined the Sun copy desk.

Herbert La Duke, copy editor on the *Boston Traveler,* is convalescing in the Deaconess hospital, Brookline, following an operation.

Douglas E. Done, reporter for the *Salt Lake City Deseret News* and Mrs. Done are parents of a son.

Maj. Carl F. White, managing editor of the *Kansas City* (Kan.) *Kansan* and a war veteran was recently elected president of the Kansas Reserve Officers Association.

Miss Gertrude Gordon, feature writer, *Pittsburgh Press,* has returned from a trip to Europe.

Theodore Joslin of the *Boston Transcript* Washington office recently visited his old home city, Leominster, Mass., and spoke at the luncheon of the Rotary club.

Mrs. Walter Harvey has joined the staff of the *Garden City* (Kan.) *Telegram.*

Antonio Cargas, of *El Universal,* Mexico City daily, accompanied to the United States recently four University of Mexico students who won a constitutional government essay contest conducted by the paper.

Emmett Butler has joined the editorial staff of the *Burlington* (Ia.) *Gazette.*

Miss Reba Latta has resigned as society editor of the *Leesburg* (O.) *Citizen,* and will go to Florida. Miss Carrie Barrett of Leesburg succeeds her.

John F. McNamara, city editor of the *Northampton* (Mass.) *Hampshire Gazette,* has been appointed assistant manager of the Academy of Music in that city.

Edward E. Yeaton, police and court reporter on the *Lynn* (Mass.) *Daily Item,* is a candidate for councillor-at-large in the city primaries to be held Oct. 13. Francis P. "Tip" O'Neill, of the city staff, *Boston American,* also is a candidate for the same office.

William Vose has left the insurance business to cover the federal run for the *St. Paul Daily News.*

Mrs. Ralph Tennel, associate editor of the *Sabetha* (Kan.) *Herald,* is on a tour of Europe.

Myron Townsend is now writing a column "Tips on Sport Topics" for the *Newark Ledger.* He has written sports on 22 newspapers in various sections of the country.

Herschel C. Atkinson, formerly of the *Baltimore Post,* is now city editor of the *Akron Times-Press,* succeeding Harry Bennett, who now edits the *Akron Topics,* weekly magazine. Paul W. VanCamp, formerly make-up editor, is now assistant city editor, succeeding James Schlemmer, now sports editor of the *Akron Beacon-Journal.*

Howard White, society editor of the *New York Herald Tribune,* has returned from a three weeks' vacation at Lake Placid, N. Y.

Guy Woods, local commercial photographer, has joined the *Des Moines Register and Tribune-News* staff.

FOLKS WORTH KNOWING

GILBERT N. GUNDERSEN, classified advertising manager of the *New York Telegram* who this week was promoted to advertising director to succeed Thomas Burns, resigned, has had broad experience on the business side of daily newspapers.

GILBERT N. GUNDERSON

His first newspaper work was done on the *Fargo* (N. D.) *Courier - News* and after that he was connected with newspapers in Missoula, Montana, and Little Rock, Arkansas.

For seven years he was on the business staff of the *St. Paul Dispatch.*

Mr. Gundersen joined the Munsey organization four years ago in Baltimore. After a year there he was transferred to the New York Telegram, owned by Frank A. Munsey, to take the post of classified manager. In that position he conducted a unique classified promotion campaign based on the slogan "The Right Sort of People Respond."

The new advertising manager of the Telegram has been active in the Association of Newspaper Classified Advertising Managers. He is a charter member of that group and served four years as secretary and treasurer and a year as vice-president.

Ishbell Ross of the *New York Herald Tribune,* and Bruce Rae, her husband of the *New York Times* staff, have returned from a three weeks' vacation at Bermuda.

Ralph Taylor, *New York World* reporter was given a farewell dinner by staff associates Oct. 7, and presented a leather carryall before sailing, with Mrs. Taylor, for Europe. Taylor will continue newspaper work in Paris.

WITH THE SPECIALS

H. C. BLAKE has joined the staff of Williams, Lawrence & Cresmer Company, newspaper representatives, New York. He was formerly with the Frank Seaman agency.

Woodward & Kelly, Chicago, publishers representatives, have been appointed Chicago representative for the *New York Herald Tribune.*

S. C. Beckwith Special Agency, New York, has been appointed to represent the *Sharon* (Pa.) *News-Telegraph.*

Quebec L'Evenement, French morning daily, has appointed James B. Allen, publishers' representative of Toronto and Montreal, as its national advertising representative for the Provinces of Ontario and Quebec.

HOLDING NEW POSTS

B. R. MARTIN, from circulation department, *Atlanta Georgian,* to circulation manager, *Salisbury* (N. C.) *Post.*

Malcolm Mollan, from special writer, *Boston Herald,* to *Manchester* (Conn.) *Herald* as telegraph editor and editorial writer.

H. R. Grobie, from *Beaumont Journal,* to *San Antonio Evening News* staff.

Robert L. Girvin, from editorial staff, *Reading* (Pa.) *Tribune,* to telegraph editor, *Miami News.*

Benjamin Feldman, from local staff, *Chicago Evening American,* to staff, *Chicago Tribune.*

MARRIED

MAX FOWLER COLWELL, Pasadena representative of the *Los Angeles Times,* to Miss Ruth Halliwell Chamberlin, church and fraternal editor of the *Pasadena Post,* recently in Pasadena. They will reside in Altadena.

Miss Grace F. Gillin, for 10 years executive secretary to President C. S. Henshaw of the Henshaw Motor Company of Boston, and director of the firm's advertising, to Edward J. Galvin, Oct. 12, at St. Mark's Church, Dorchester, Mass.

Tom L. Sears, Associated Press bureau man at Lincoln, Neb., formerly of the Des Moines, Ia., bureau, to Miss Mary Sommercant, Sept. 24.

John E. McComb, assistant to the publisher, *San Antonio Express and Evening News,* to Miss Julia Runge of Houston, Tex., in Concord, Mass., recently.

J. Robert Kershaw, of the staff, *Falmouth* (Mass.) *Enterprise* and correspondent for the *Boston Globe,* to Miss Doris Smith of Sandwich, Mass., recently.

Christopher Messerschmitt, State House reporter on the *Trenton Times,* to Miss Katherine Kaiser, of Trenton, Oct. 2.

John M. Cleary, of the *Trenton Times* reportorial staff, to Miss Margaret M. Caullet, of Trenton, recently.

Peter Ainsworth of the editorial staff, *Cedar Rapids* (Ia.) *Gazette,* to Miss Ruby Faul of Denison.

Kenneth McVey of the *Hillsboro* (O.) *Gazette,* to Miss Anna Lucy Emery.

William A. Corbett, circulation manager, *Hagerstown* (Md.) *Herald-Mail,* to Miss Helen Craig, of Carlisle, Pa.

Donald A. Morrison, a director of and accountant with the *Halifax Herald,* to Abbie A. Hemphill, at Mackenzie Corner, Nova Scotia.

Key Papers of Three States Prefer Central Press Service

The Portland *Press-Herald,* with the largest circulation in Maine; the Jacksonville *Times-Union,* with the largest circulation in the up and going state of Florida; and the Raleigh *News and Observer,* Josephus Daniels' newspaper, with the largest circulation in North Carolina, are new clients for Central Press' complete and exclusive illustrated daily newspaper service.

They are making and holding readers with Central Press' news-picture mats and distinctive daily features.

Write us to send you the service for four days without charge, and you will see why they prefer Central Press.

CHANGES OF OWNERSHIP

PRESTON F. GRANDON recently sold the *Quincy* (Mich.) *Herald* to C. J. Van Every and C. H. Powley of Bronson, Mich. Mr. Powley is publisher of the *Bronson Journal.* Mr. Van Every will manage the *Herald.*

Lyle R. Moorehouse, editor and owner, has sold the *Placentia* (Cal.) *Courier,* a weekly, to Henry R. Honey, editor of the *Olive Sentinel,* and H. W. McClure, formerly of the *Pomona Progress.*

D. W. Grandon, publisher of the *Sterling* (Ill.) *Gazette,* has purchased the *LaSalle* (Ill.) *Daily Post,* owned by the McLain sisters. He has taken over the plant and announces plans for the construction of new home for the *Post.*

E. W. and W. O. Jewett, owners of the *Shelbina* (Mo.) *Democrat,* have sold it to S. R. Hoover of Edina, Mo. Mr. Hoover two weeks ago sold his *Edina Democrat* to the *Edina Sentinel,* which consolidated the two.

The *Odell Tribune* and *Wilbarger Press,* both printed in the *Quanah* (Tex.) *Times* office, have been sold by A. C. Smith and C. C. Woodson of the *Times* to J. S. Spires.

Francis and Leland Case, who recently incorporated the Times-Herald Publishing Company, Hot Springs, S. D., have taken over the *Star* of Hot Springs and are operating it under the Star Publishing Company, a $25,000 corporation. Joyce Wilson, formerly with the Star, is interested in the new concern.

Herman Hilson, for many years connected with the *Coeur d'Alene* (Idaho) *Press,* has purchased the *Oakesdale* (Wash.) *Tribune.*

Butte Tipton, formerly editor of the *Jordan* (Mont.) *Times,* has purchased a used plant and will publish the *Glentana* (Mont.) *Tribune.*

Editor Johnson of the Lewis Press, Great Bend, Kan., purchased the *Pawnee Rock Herald* from L. G. Hixon.

NEW PLANTS AND EQUIPMENT

ANAHEIM (Cal.) *Bulletin,* which purchased the *Orange County Plain Dealer* early in the summer, has moved into the building formerly occupied by the latter. The paper now has larger quarters and better equipment.

The Sun Company, publishers of the *San Bernardino* (Cal.) *Sun and Telegram,* is building a second story to the Sun building, which will house the editorial departments of the two papers, the composing room, and a conference room for staff meetings. The space now used for the composing room will be used for a new press and also additional space for the advertising department. R. C. Harbison, Harry S. Webster and James Guthrie are the owners.

CIRCULATION PROGRESS

"Service Has No Substitute in Circulation Building"—Ed Pugh

Ed Pugh

"SERVICE has no substitute in building circulation."

That is the opinion of Ed Pugh, circulation manager of the *Long Beach* (Cal.) *Press-Telegram.*

The success of Mr. Pugh in building and maintaining the position of his newspaper in a city whose population has doubled, tripled and quadrupled in population since he took charge of circulation is attributed by him to the personal element which he has instituted among his hundreds of employes as the guiding force of their endeavors. But more than that, he believes that the circulation manager must know what the reading population desires and demands in its newspaper.

"A circulation manager who 'makes good' 100 per cent with his boys is in a position to demand a high-grade of service from them," said Mr. Pugh. "By the same premise, the circulation manager who fails to give the public the service it wants, finds himself slipping. He must know every branch of business, home and industrial life in his city, and he must be willing to forego his own ideas if he finds they are in conflict with the needs of his public.

"I believe the type of system used in circulation is unimportant in-so-far as the public is concerned, and that the service furnished and not the method is what counts.

"We recruit our employes from homes where the paramount idea is to train their sons in business methods; we insist that the boys shall continue their schooling; we try to adjust each individual boy to the place where he will fit in best in the organization; we encourage thrift by a system of rewards for work well done, and discharge those lads who work for us solely for the revenue derived and who do not give the maximum of service. Boys that show special ability are advanced to position of importance, where they are in a position to help train younger boys."

Mr. Pugh began as a newsboy around a steel mill in Pueblo, Col. He later joined the *Pueblo Daily Chieftain* and worked in various departments. Thirteen years ago, he went to Long Beach, where he was appointed circulation manager for the Telegram. After four years he joined the *Press* in the same capacity.

Following the merger of the Telegram and the Press, in September, 1924, Mr. Pugh was appointed circulation manager of the merged papers.

Miami (Fla.) *Herald,* which recently ordered a specially built heavy pattern unit-type octuple press from R. Hoe & Co., Inc., last week placed a further order for a quadruple of the same style. The two presses will be erected as a Double Sextuple giving greater speed and more flexibility in page combinations than possible with present facilities.

With a new Duplex press, the *Hiawatha* (Kan.) *Daily World* is occupying its new home, just completed. Much new equipment in addition to the press was purchased. Ewing Herbert is editor.

Hagerstown (Md.) *Herald-Mail* has purchased a unit-type quadruple press and a full complement of stereotyping equipment from R. Hoe & Co., Inc.

A press room and other additions are being made to the plant of the *Crown Point* (Ind.) *Star.* When construction has been completed, a new Goss web perfecting press will be installed.

George Yust, owner of the *Sylvia* (Kan.) *Sun,* has purchased a linotype.

Faribault (Minn.) *Daily News* has added two Intertypes, Model C, a Virkotype machine and a Universal saw trimmer.

Abilene (Tex.) *Reporter* Publishing Company, publishers of the morning and afternoon editions, has let a $28,000 contract for erection of a two-story and basement concrete and steel warehouse. It will have trackage facilities.

PRESS ASSOCIATION NOTES

R. B. McClain of the Consolidated Press, Washington headquarters, is seriously ill and has been confined to his home for the past three weeks.

Mark Temple, formerly of the *Paterson Press-Guardian* and more recently of the New York local staff of the Associated Press, has been transferred to the Newark bureau as night editor. Fred B. Stauffer, of the *Jersey City Journal,* is now assistant editor in the Newark bureau.

FLASHES

Nothing is more pitiful than to see a bashful child run and try to hide behind his mother's knickers.—*Kansas City Star.*

Perhaps Shapurji Saklatvala was barred in order to protect the harried proofreaders.—*J. R. W. in Milwaukee Journal.*

Crime is estimated to cost this country $10,000,000,000 a year. It is not worth the price.—*Chicago Daily News.*

The long green finds few men color blind.—*Cleveland Times.*

If the flappers keep on getting their hair cut shorter, soon they'll have their heads shaved, and then the babies can use them for rattles.—*New York American.*

We never smile about the exploits of Samson. The jaw-bones of asses have slain more millions than all the cunning weapons fashioned by men.—*Columbia Record.*

Perpetual motion: Taking prohibition out of politics.—*J. R. W. in Milwaukee Journal.*

Editor E. Fullerton Brown, writing in the *South Side Review* of Chicago, says: "We owe money to so many people that we do not have to be subservient to the predilections of any one person or clique of persons."

Shake, brother.—*The Minnesota Editor.*

HOW FAR AHEAD DO YOU PLAN?

Has your newspaper a church advertising page?

MANY churches have been seeking earnestly for a solution to a common problem,—too many empty pews.

Some churches are solving that problem effectively by the use of good, vigorous, advertising copy, displayed weekly in their local newspapers.

The new series of church advertisements prepared by the Church Advertising Department of the Associated Advertising Clubs, is dignified, purposeful, and in keeping with religious ideals. These advertisements have real pulling power because they are sane, commonsense appeals from all churches to "Come to Church."

The Church Advertising Department offers its advertising copy to newspapers

First, to promote a more general interest on the part of the public in the work of the Churches;

Second, to help churches to make the most effective use of the newspaper as a great advertising medium.

May we send you our new series of church advertisements?

ASSOCIATIONS

MINNESOTA ASSOCIATED PRESS Editorial Association members met in Duluth last week as guests of the *Duluth Herald.* Fred Schilpin, publisher of the *St. Cloud Times* and president of the state group presided. E. T. Cutter, superintendent of the Central division of the A. P. and E. T. Wolford, traffic chief attended. M. F. Hanson, publisher of the *Duluth Herald,* was host at a dinner at the Kitchi Gammi club after which the regular business session was held. Nearly 25 editors were in attendance.

Two hundred students enrolled on the opening night of the **Detroit Adcraft Club's** course in advertising, conducted this year at the Detroit College of Law. Speakers at the meeting included Verne Burnette, secretary of the advertising committee of General Motors; Ward Marsh, president of the Adcraft club; and Gordon W. Kingsbury, secretary of the club.

Kane and Kendall county, Illinois, newspaper men have organized the **Fourteenth Senatorial District Editorial Association** with C. B. Mead of the *Geneva Republican,* president.

Annual convention of the maritime provinces division of the **Canadian Weekly Newspapers Association,** was held last week in Sackville, N. B. The following officers were elected: president, Donald F. Fraser of New Glasgow, N. S.; vice-presidents: C. C. Award of Sackville, N. B.; H. G. Harris of Kentville, N. S.; A. R. Brennan of Summerside, P. E. I.; secretary-treasurer, H. B. Anslow of Campbellton, N. B.

Formal opening and house warming of the new home of the **Pittsburgh Press Club** took place on Thursday evening, Oct. 1. There was music and a buffet luncheon. The new building is at the corner of Sixth avenue and Grant street.

Crosscup-Pishon Post, American Legion, composed of Boston advertising men, last week elected Maj. Carroll J. Swan, head of the Swan Advertising Agency, commander.

Boston Press Club gave a dinner in honor of George M. Cohan, Oct. 2. Charles E. Young, assistant managing editor of the *Boston Post,* was toastmaster. The speakers included A. J. Philpott, art and dramatic critic on the *Boston Globe.* Morris Gest, theatrical producer, also was a guest.

SCHOOLS

A DEPARTMENT of journalism, will be established at Waseda University, Japan. American newspapers and journalistic practices are being studied in the United States at present by Prof. Y. Kita, of the Japanese University, who plans to offer a college journalistic course when he has completed his study and survey of the American field.

Kansas editors will be guests of the University of Kansas journalism department at the annual round table discussions on Oct. 16 and 17. General sessions will be held each day, with a dinner the night of Oct. 16.

William H. McLoed, advertising manager, William Filene's Sons Company, Boston, will give a series of lectures on Retail Advertising at the College of Business Administration, Boston University, beginning Oct. 10.

A school of journalism, organized and conducted by undergraduates, has been opened at Williams college in Williamstown, Mass., for the purpose of giving freshmen training in news writing before they enter the competitions of the *Williams Record* and Williams News Bureau.

Second year students in journalism in the University of Toledo are receiving practical newspaper experience under the direction of Charles R. Cobin, assistant managing editor of the *Toledo Blade* and instructor in journalism in the university. Each student in the advanced course will spend one Saturday morning a month on the Blade's general staff.

The *Savitar* of the University of Missouri, was judged the best university yearbook published in the United States in 1925, and *The Totem,* of South Side high school, Fort Wayne, Ind., the best secondary school yearbook, according to the Central Interscholastic Press Association, at the University of Wisconsin, which announced results of its fifth All-American yearbook contest.

Harry R. O'Brown, a staff writer for *Country Gentleman,* has been engaged to teach agricultural journalism, in the department of agriculture of Ohio State University, Columbus. He succeeds John R. Fleming, who becomes extension news editor.

NEW PUBLICATIONS

WENDELL CHAMBERS, formerly connected with the *Alhambra* (Cal.) *Argus,* has started publication of the *Rosemead* (Cal.) *Review* on the Valley boulevard east of Los Angeles.

N. Y. Publishers Meeting Oct. 30-31

The fall meeting of the New York State Publishers Association will be held in Syracuse on Friday and Saturday, Oct. 30 and 31. Headquarters will be at Hotel Syracuse. The sessions will begin with an informal dinner Friday evening. After a short speaking program, members of the Associated Press will hold their annual meeting. The business session will be Saturday morning from 9:30 to 12:30 p.m. In the afternoon the members will attend the Syracuse-Penn. State foot ball game.

$100,000 Libel Suit Dismissed

Justice H. Y. MacDonald of Regina has dismissed the $100,000 libel suit brought against the *Regina* (Sask.) *Morning Leader,* the *Saskatoon Star,* and the *Saskatoon Phoenix,* by Aaron Shapiro. Letters written by Joseph Passaneau attacking Shapiro's methods in the organization of a fruit marketing agency were published in the newspapers and formed the basis of the suit.

ON AVIATION ASSIGNMENT

John Goldstrom Touring Europe by Air for N. Y. Evening World

John Goldstrom, of the *New York Evening World,* is making a flying tour of European airways with Mrs. Goldstrom to determine whether Europe may be traveled as safety and dependably by airplane as by rail, steamer or motor.

Mr. Goldstrom flew from New York to San Francisco with the first through consignment of transcontinental air mail, and, as an aeronautical writer, has flown more than 40,000 miles. He is now making the first tourist flight of its kind ever attempted, and writing his experiences in a series of articles in the Evening World.

New Weekly Tab in New Jersey

The *Jersey Transcript,* a new weekly tabloid, started publication in Newark, N. J., Oct. 1 with R. H. Reed, formerly on the *New York American,* editor and publisher. The first issue numbered forty pages of news-features and pictures. Considerable play was given in both text and picture to A. Harry Moore, Democratic candidate for New Jersey governor, but Mr. Reed denied his paper was supported by any political group.

81 New Ludlow Typefaces

DURING the past two years, the Ludlow library of matrix faces has been doubled and now includes more than 400 different fonts. The typefaces shown are representative of the eighty-one new faces which have been cut since September 1, 1924.

Some represent complete new series as Caslon Old Face Heavy, Lining Plate Gothic Heavy Condensed, Lining Plate Gothic Bold, Artcraft Light Italic, Number Eleven Light Italic, Bookman Light, Ludlow Black and Ludlow Black Italic, but in many instances new sizes have been cut to complete an older series such as Caslon Light Italic which, with its new eight and ten point sizes, is available in the complete series from eight to forty-eight point. This was one of the first and most popular series cut by the Ludlow Typograph Company.

FOR advertising and job composition -- The Ludlow system of matrix composition provides new, clear-cut printing faces on slugs for every job. Its speed, versatility, 6 to 60 point range in a wide variety of quality typefaces, including bold and extended, ranks it first for display and job work. Because you set matrices, not type, you secure your slug lines immediately, never running short of sorts for any job.

TEXAS WEEKLIES GAIN BY TEAM WORK

New Advertising Office In Dallas Selling Field As a Whole to Advertisers—H. L. Grable in Charge

Service that saves both advertiser and publisher is being offered by the Texas Weeklies, Inc., a new association of weekly newspapers in Texas maintaining an office in Dallas. This office, of which H. L. Grable is the manager, puts before state and national advertisers the rates, circulation and other claims to patronage of its several co-operating weekly papers, takes the orders for advertising, prepares the advertisement in printed form when the size of the order justifies, and bills the advertiser at the proper time.

In a state so large that its several sections are commonly designated as North, South, East, West and Central Texas, etc., few national advertisers care to take the trouble to investigate the merit of its many weeklies. The Texas Weeklies, Inc., has done this for them.

The Dallas office not only obtains business for members, but it relieves them of all clerical work connected with the accounts. By furnishing a printed copy of the advertisements it saves the mechanical departments of the weeklies time which would otherwise be spent in planning the lay-out.

So far there are 136 members of the association and a campaign is about to be launched by which it is believed the membership will be raised to 250. In the two months the organization has been in existence the manager has secured for members advertising to the value of $7,000 notwithstanding the fact that most of his time has been spent in organization work.

The Texas Weeklies, Inc., is a ward of the Texas Press Association. Rate cards are required of every member paper and an effort is being made to standardize rates according to circulation. R. H. Nichols of the *Vernon Record* is the presi- is the vice-president, and Sam P. Harben of the *Richardson Echo* is the secretary-treasurer. Will H. Mays of the University of Texas and S. W. Papert of the Texas Daily Press League were active in the organization of the body.

N. Y. Group Meeting This Week

Members of the Central New York Press Association are scheduled to gather for their fall meeting this Saturday at Syracuse. The Department of Journalism at Syracuse University will act as host to the weekly editors and publishers.

Riffian Bullet Kills News Writer

Reginald Kahn, Moroccan correspondent for *Le Temps,* Paris, was killed by a Riffian bullet Sept. 30, a few moments after leaving staff headquarters of Gen. Naulin, near Fez.

C. TRACEY BRONSON

Former Sunday Editor, New York Times, Dies in New Haven

Charles Tracey Bronson, former Sunday editor of the *New York Times,* died at his home in New Haven, Conn., Oct. 4. He retired from the Times about seven years ago.

Mr. Bronson began his newspaper work on the *Hartford* (Conn.) *Courant,* later joining the *New Haven Register.* His next connection was with the Times, in charge of the magazine section. He remained with this latter newspaper 25 years.

While with the Times, Mr. Bronson revealed turf scandals in New Jersey, which put an end to horse racing in that state.

JOHN VINTON EARLY

King Features Artist Dies of Heart Affection

John Vinton Early, 36, a newspaper artist for the last 13 years, died Oct. 6, at his home, 33 West Eighth street, New York. Mr. Early had been ill a month. Death was due to an affection of the heart from which he had suffered for ten years. He studied art at the Stevenson Art Institute in Pittsburgh and did his first newspaper work as a member of the art staff of the *Pittsburgh Dispatch.* For the last eight years he has been on the staff of King Features Syndicate. Mr. Early was married to Miss Juanita Hamel, also a newspaper artist four years ago. He is survived by her and a brother.

P. G. Hubbell, Tacoma Veteran, Dies

One of the oldest active newspaper men in the United States, Philo G. Hubbell, 82, *Tacoma News Tribune* reporter, died Oct. 2. The "Squire," as he was affectionately called by his fellow newspaper men, suffered a stroke about a year ago, but returned to his desk at the News Tribune. Mr. Hubbell, who was a resident of Tacoma for 36 years, was born in Centerville, N. Y., Dec. 14, 1843. At 22 he entered newspaper work in Winona, Minn. Here he became interested in lumber and since that time has been correspondent for a number of national lumber journals. Since 1889 Mr. Hubbell had been a member of the staff of Tacoma newspapers.

Sargent Files His Last Story

J. Ray Sargent, for 21 years on the *Boston American* staff, died suddenly Oct. 6, in Sydney, N. S., soon after he had written and filed a story on the return of the MacMillan Artic expedition.

"Dean of Georgia Journalists" Dies

H. M. McIntosh, editor and publisher of the *Albany* (Ga.) *Herald,* and known as the "Dean of Georgia Journalists," died suddenly at his home there Oct. 2.

Obituary

CHARLES J. PETERSON, 57, editor of the *Alcester* (S. D.) *Union* for 22 years, died Sept. 26.

JAMES H. MCMAHON, 57, for the past 20 years a member of the *Boston* (Mass.) *Globe* composing room staff, died at his home in Medford last week.

WINTHROP B. JONES, 70, Boston printer and paper manufacturer, and son of Justin Jones owner and editor of the famous Civil War paper the *Yankee Blade,* died at the Brigham Hospital in Boston recently.

WILLARD E. EVERETT, 72, long identified with the newspaper print manufacturing business, died at his home in Norwood, Mass., recently.

MRS. IDA M. ATKINSON, 54, wife of Claude M. Atkinson, publisher and editor of the *Hibbing* (Minn.) *Daily News,* died Sept. 30.

IRVIN D. CONVERSE, 69, editor of the *Strandquist* (Minn.) *Press,* who had edited and managed numerous weeklies in the Northwest, died recently.

WILLIAM E. POWERS, for 18 years editor and publisher of the *Pierce County* (Neb.) *Leader,* died recently at his home in Long Beach, Cal. He had not been connected with the Leader for 20 years.

WILLIAM T. EDDY, 51, for four years editor of the *Hancock County Journal,* Carthage, Ill., former city editor of the *Quincy* (Ill.) *Herald* and for 15 years associated with western Illinois papers, died Sept. 26 in Carthage.

WILLIAM R. COWDERY, employed in the composing room of the *Boston Transcript* for nearly 20 years up to his retirement two years ago, died recently at his home in Winchester, Mass. Before joining the Transcript he was with the old *Boston Journal.*

S. G. WILLIAMS, 73, veteran editor of the *Kamokawa* (Wash.) *Eagle,* a weekly, which he had published for 30 years, died recently.

CHARLES T. YOE, 76, who with his brother the late William Yoe founded the *Independence* (Kan.) *South Kansas Tribune,* died at his home recently.

JOHN ALBURTIS, of the *Boston Globe* composing room for more than 34 years, died at his home in Cambridge, Mass., Oct. 1, from injuries received when struck by an automobile last January.

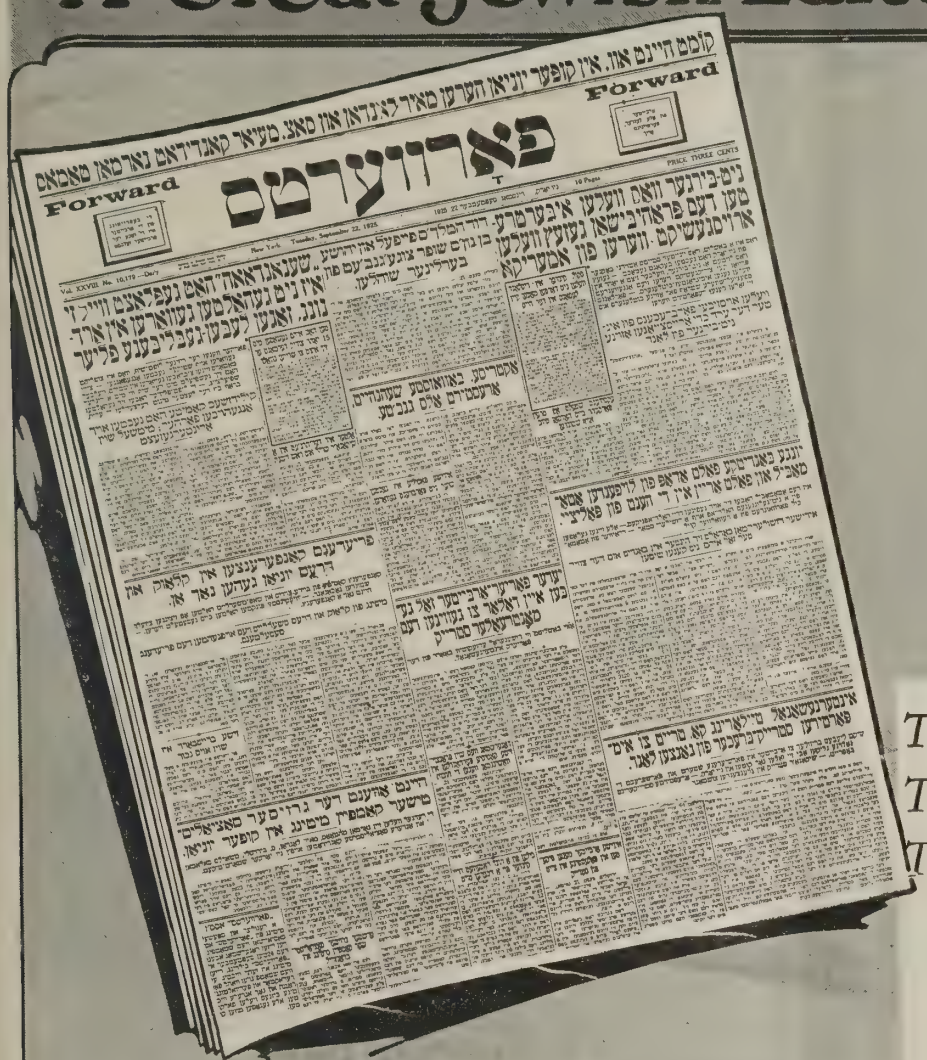
W. J. PATTON, 48, for the past 24 years editor and publisher of the *Green Castle* (Pa.) *Echo-Pilot,* died in his home, Oct. 4, after a brief illness.

Service cannot stop

The telephone, like the human heart, must repair itself while it works. The telephone system never rests, yet the ramifications of its wires, the reach of its cables and the terminals on its switchboards must ever increase. Like an airplane that has started on a journey across the sea, the telephone must repair and extend itself while work is going on.

To cut communication for a single moment would interrupt the endless stream of calls and jeopardize the well-being and safety of the community. The doctor or police must be called. Fire may break out. Numberless important business and social arrangements must be made.

Even when a new exchange is built and put into use, service is not interrupted. Conversations started through the old are cut over and finished through the new, the talkers unconscious that growth has taken place while the service continues.



Since 1880 the Bell System has grown from 31 thousand to 16 million stations, while talking was going on. In the last five years, additions costing a billion dollars have been made to the system, without interrupting the service.

A Great Jewish Editor

The Impressions of a Gifted Journalist
The Experiences of a Keen Observer
The Observations of a Great Editor —

A vivid pen picture of the Jewish ancient homeland —

PALESTINE

by

MR. ABRAHAM CAHAN

Editor of the

JEWISH DAILY FORWARD

are recorded in a series of brilliantly written articles now published in both Yiddish and English in the columns of the Forward—America's largest Jewish newspaper.

Mr. Cahan went to Palestine as an impartial disinterested observer to investigate at first hand the true conditions concerning the future of Palestine as a Jewish Homeland. His will be no partisian expression of any single viewpoint, but a truthful, colorful, straightforward interpretation of conditions that prevail, and what basis there be for the ultimate realization of the hopes and dreams and aspirations that have fired the hearts of millions of Jews the world over.

Mr. Cahan is the first editor to have gone to Palestine with a staff of men to perform the worthy mission of bringing to his hundreds of thousands of readers a true and vivid picture of Palestine. His articles are looked forward to with an expectancy and interest which his writings have always enjoyed among all Yiddish and English reading people.

In Mr. Cahan's revelations of PALESTINE OF TODAY, the Forward feels that it is rendering a service to the millions of its faith, and it is this spirit of enterprise and service to its people, which has identified the Forward and its Editor, as two vital and dominant forces in the life of American Jewry.

WHAT'S WHAT IN THE FEATURE FIELD

Introducing Robert F. Schulkers, Creator of "Seckatary Hawkins"—New Historical Feature Offered—Blanchard Writes Auto Series

A SLIM, dark-eyed youth of 20 appeared at the *Cincinnati Enquirer* office seeking work.

R. F. SCHULKERS

"Well," said W. F. Wiley, then managing editor, "What can you do?"

"Nothing much, but..."

"Good, you can be my secretary."

That was 15 years ago. The youth's name was Robert F. Schulkers. Today Mr. Schulkers is rapidly gaining a reputation as creator of the "Seckatary Hawkins" series, distributed by Metropolitan Newspaper Service.

Mr. Schulkers remained with Mr. Wiley 10 years. During that time he did not forget the "but" which the managing editor had interrupted when he was asking for a job. He had intended to say—"but I love to write for kids."

Since his high school days he had been writing stories for boys. His first story appeared in the *Cincinnati Commercial Tribune* in 1904.

Mr. Wiley soon found this out and Schulkers was asked to continue to write for the children's page of the Sunday editon. His staff appeared twice a month. Then one day the Sunday editor asked him to write weekly. It was then "Seckatary Hawkins" came into being.

Jonathan A. Rawson, Jr. is author of a new daily feature entitled "150 Years Ago," which is now being offered by the Putnam Syndicate, New York. The feature takes up day by day happenings of the Revolution.

Harold F. Blanchard, automobile expert, has written a series of nine special articles on the care and operation of motor vehicles for weekly release to newspapers through King Features Syndicate, New York. Each release will be illustrated.

"Do You Mean What You Say" is the title of a new one column daily feature added to the list of the Register & Tribune Syndicate, Des Moines, Ia. It reveals the origin of popular phrases.

A new weekly style service for men is now being distributed by the Ledger Syndicate, Philadelphia. It appears under the title "London's Latest Modes for Men" and is signed "Beau Burlington." Text runs to about 1,000 words, and each release is illustrated with a two-column and a one-column cut.

J. N. "Ding" Darling, cartoonist for the Herald Tribune Syndicate, New York, is visiting in New York for a few weeks. His home is in Des Moines, Ia.

Two new serials put on the market by the Ledger Syndicate are entitled: "Island Gold" by Valentine Williams; and "The Locked Book," by Frank L. Packard.

McClure Newspaper Syndicate, New York, announces a symposium of nine authors entitled "My Religion" to appear in weekly installments. Authors writing for the series are: Hugh Walpole, Sir Arthur Conan Doyle, E. Phillips Oppenheim, Israel Zangwill, Henry Arthur Jones, Compton MacKenzie, J. D. Beresford, H. DeVere Stackpoole, and Rebecca West.

F. J. Starzl, assistant manager of the Register & Tribune Syndicate, Des Moines, Ia., visited New York this week on business.

Goss Representative Enjoined

The Goss Printing Press Company of Chicago and its representative in Indiana, Frank Bernard, have been enjoined at Jeffersonville, Ind., by Judge James W. Fortune, from removing a Goss Comet printing press from the building of the Cloverleaf Press, publishers of the *Jeffersonville* (Ind.) *Evening Bulletin.* The paper recently suspended publication. The affairs of the Cloverleaf Press are involved in the bankruptcy courts, an involuntary petition having been filed Aug. 24. Before being enjoined, Bernard was arrested for malicious trespass at the behest of Claude B. McBride.

Stanton Buys Anthony Republican

Mack Stanton, who recently purchased the *Anthony* (Kan.) *Bulletin* from George Van Dyke, half owner with Mr. Stanton, has also purchased the *Anthony Republican* from H. M. and J. P. Sydney, owners. The papers will be consolidated.

Marble's Daily in New Home

Ft. Scott (Kan.) *Monitor-Tribune* has moved its new home. The building is of brick, two stories high, and will house the job printing and bookbinding departments as well as the newspaper publishing business. George W. Marble, former president of the National Editorial Association is president of the Monitor Tribune Publishing Company, and editor of the paper.

CHRISTMAS GIFT ADVERTISEMENT PLAN
THE NEW YORK TIMES
NEW YORK

A subscription for The New York Times makes an acceptable Christmas present. It keeps alive the thought and sentiment which inspired the gift and is a reminder of the giver, every day in the year. It is appropriate for men or women, young or old. The New York Times is many gifts in one; it prints all the news, foreign, national and local, of politics, finance, sports, science, art, literature, music, the drama, fashion and society.

The Sunday edition is without equal in the newspaper world; its contents of the highest value and quality appear nowhere else. The Book Review, Magazine, Picture Sections and Sports Picture Section are all printed by the beautiful rotogravure process.

The New York Times is strictly a newspaper, for intelligent and thoughtful people. The regular reading of The Times is a liberal education.

ORDER THE TIMES IN ADVANCE. IT IS ALWAYS SOLD OUT FIRST.

CHARLES W. ELIOT, President Emeritus of Harvard University, says of The New York Times:"

"Many years of experience with The New York Times and of observation of many other newspapers, both American and foreign, have satisfied me that The New York Times is the best newspaper in the world for thinking Americans to take who want to get promptly all the news of the world free from guesses, comics, scandals, puzzles, gossip and mere speculation."

Still First in Miami!

The Miami Herald Policy Of Fairness To Its Advertisers

The value of newspaper leadership to an advertiser is consistency. It has never been the policy of The Miami Herald—nor will it ever be—to use any one month's business in which it issues a special edition, as a claim to leadership in advertising lineage. Herald leadership in Miami—and the world as well—is based upon a long term period, allowing a sufficient amount of time to guarantee to its advertisers that Herald leadership is consistent—that it is NOT a "spasmodic" affair—and that it represents the continued preference of advertisers. The Miami Herald is still first in Miami—First in the South—First in the United States—and First in the world!

Still First!

In Miami
In the South
In the United States
In the World

The Miami Herald is still first among the greatest newspapers of the world in total advertising lineage for the first eight months of 1925.

This fact certainly bears out the statement that The Miami Herald is not only a continuous leader in Miami, but in the world as well.

The following comparative figures of advertising carried by The Miami Herald and The News-Metropolis for the first eight months of 1925 will reveal that The Herald leads in 25 out of 31 classifications, and is tie in one—proof positive of The Miami Herald's continuous leadership in Miami.

WITH THE GENERAL ADVERTISERS

Carl J. Schumann Succeeds Sumner as A. N. A. President—Oakland Motor Car Company to Promote "Surprise" Car—Radio's Advertising Investment Estimated at $10,000,000

CARL J. SCHUMANN, secretary of the Hilo Varnish Corporation, has been appointed acting president of the Association of National Advertisers, succeeding G. Lynn Sumner, resigned as vice-president of the Women's Institute of the International Correspondence Schools, Scanton, Pa.

Mr. Sumner retired from the A. N. A. presidency as soon as his business resignation became effective, which was Sept. 21. Mr. Schumann will serve until the next annual association convention to be held in Washington Nov. 16-18.

Mr. Schumann was a director of the A. N. A. from 1922 to 1925, when he was elected vice-president by the board of directors to succeed Ralph Starr Butler, who resigned Feb. 5, of this year.

As a member of the general committee on the "Save-the-Surface" campaign and its sub-committee in charge of advertising for the last four years, Mr. Schumann has been prominent in the co-operative work of the paint and varnish industry. He is vice-president of the National Varnish Manufacturers' Association, and a member of the National Industrial Advertisers' Association.

Graduated from Rensselaer Polytechnic Institute in 1902, he taught a year and then spent four years as a civil engineer before entering the advertising business. He is president of the Rensselaer Society of Engineers.

Extensive plans are being made to promote through advertising a new General Motors' car yet unnamed which is now being manufactured by the Oakland Motor Car Company. The Campbell-Ewald Company, Detroit agency, is handling the account.

It had been rumored for some time that General Motors contemplating bringing out a new car and these rumors were verified in the announcement in trade papers last week, the first of the teaser advertising campaign to be released.

The new car will be manufactured in the Oakland factories at Pontiac and it is expected that an additional force of 2,000 men will be added to the plant before the first of 1926. At the present time Oakland Six is having the largest sale in the history of the company, according to Campbell-Ewald, with production of 350 cars a day in an effort to keep pace with incoming orders.

The radio industry will invest $10,000,000 in advertising this year, according to the estimate of an investigator reported to the Bureau of Advertising of the American Newspaper Publishers' Association. Of this sum it is figured $2,500,000 will go to newspapers.

The radio linage in magazines, the bureau states, will probably show an expenditure to exceed the amount in the newspapers, but the newspaper figure does not show the immense volume of linage placed through local jobbers, distributors and dealers.

There are more than 500 manufacturing concerns, large and small, competing for radio business this year, and there are something like 4,000,000 sets to be sold between now and Jan. 1.

Malcolm B. MacIntire, assistant to the president of the R. L. Watkins Company, makers of Mulsified Cocoanut Oil Shampoo, Glostora, and Liquid Arvon, has been elected to membership in the Association of National Advertisers.

Pathex, Inc., is making contracts for large newspaper campaigns in metropolitan eastern cities. The account is handled by Dorrance, Sullivan & Co., New York. This agency says national use of newspapers may be put under way during the fall months.

Wahl Company, Chicago, manufacturers of pens and pencils, has become a daily newspaper advertiser instead of an exclusive magazine account.

B. L. Wales, formerly advertising manager of the M. N. Arnold Shoe Manufacturing Company of North Abington, Mass., has been promoted to sales manager and director of this company. Mr. Wales is only 35 years of age and has been with the company for 17 years, working his way up from the factory.

Carl Gazley, formerly advertising manager of the Yauman & Erbe Manufacturing Company, has been promoted to assistant general sales manager.

The Arrowhead Springs Company, Los Angeles, is conducting a campaign on Arrowhead Pale Dry Ginger Ale in Pacific coast newspapers.

ADVERTISING AGENCY AFFAIRS

Harford Powel, Jr., Leaves Barton, Durstine & Osborn, Inc.—Charles W. Hoyt Company Opens Southern Branch—Horace Cleveland on European Trip

HARFORD POWEL, Jr., has resigned from the staff of Barton, Durstine & Osborn, Inc., New York advertising agency, to become editor of the *Youth's Companion*, Boston, it was learned this week. Mr. Powell has been three years with Barton, Durstine & Osborn, and became widely known as author of the Macy editorial advertisements, which won the Harvard Advertising Award last year.

Graduated from Harvard College, Class of 1909, he first was connected for five years with the business department of the Vogue Company. Later he became editor of *Harper's Bazaar*. During the war he served as a Captain in the air service, and afterwards was appointed editor of *Collier's Weekly*, a post he held until joining the New York advertising agency.

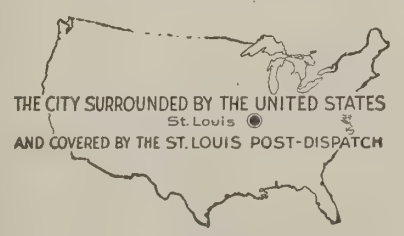
Williams and Cunnyngham, 6 North Michigan boulevard, Chicago, contracting for space for the Lavex Chemical Company of Kansas City, Mo.

St. Louis
The Most American City in America



Advertising agencies, advertisers, manufacturers and distributors agree that the community which is the most American has the highest standards of living. And standards of living greatly influence the potentiality of a market.

St. Louis not only has the smallest number of foreign-born of any metropolitan city in America, but also has the lowest percentage of foreign-born and illiterates. St. Louis has less than 20,000 aliens—only 3.7% of its total population. When compared with other large cities, this small percentage becomes even more striking.

One Big Newspaper Covers the most American city and its trading area. The Daily Post-Dispatch reaches five out of every eight families in the St. Louis Market. The Big Sunday Post-Dispatch reaches five out of every seven! The St. Louis Market, as officially defined by the Audit Bureau of Circulation, is a circle having a forty-mile radius with St. Louis at its center. In this compact area there are 1,240,000 people served by 18,748 retail outlets.

The St. Louis Market—near the center of population, near the center of agricultural production, and near the geographical center of the United States—with its great purchasing power and high standards of living, is an ideal "Try-Out" market which can be reached most effectually by advertisers at ONE COST—Daily and Sunday—through its ONE BIG newspaper, the St. Louis Post-Dispatch.

The great power of the Post-Dispatch as an advertising medium is indicated by the fact that it carries far more local Display Advertising than the second and third newspapers COMBINED, and the further fact that more than 650 National Advertisers used the Post-Dispatch **exclusively** in 1924 to introduce, maintain or increase the sale of their products in the St. Louis Market.

The Post-Dispatch is FIRST in St. Louis in Local Advertising, FIRST in St. Louis in National Advertising, FIRST in St. Louis in Classified Advertising, and FIRST in St. Louis Circulation.

JACK WILLIAMS, OF WAYCROSS, GA., WINS SUTLIVE TROPHY

JACK WILLIAMS, editor and publisher of the *Waycross Journal-Herald* and publisher of the *LaGrange Reporter,* the *Blackshear Times* and the *Hoggansville News,* is the winner of the Sutlive Trophy, a loving cup offered annually by W. G. Sutlive, managing editor of the Savannah Press and former president of the Georgia Press Association, to the editor performing the most valuable community service in the state of Georgia.

The cup is presented through the Georgia Press Association. It was offered for the first time in 1924, and was first awarded to Mrs. Nora Laurence Smith, of the *Ashburn Wiregrass Farmer.*

Mr. Williams has been an enthusiastic advocate for good roads and schools, through his support of local bond issues, and he has conducted a booster campaign for his city.

Last year editor Williams was the winner of the Waycross Kiwanis Cup for rendering the greatest civic service to Waycross.

The Kiwanis Club this year, in recognition of the valuable work Mr. Williams has done, proclaimed Friday, October 2, Jack Williams Day.

CRITICS GET PUBLICITY

FIRST

IN CITIES OF ITS CLASS
(200,000 to 249,000 Population)

THE
Akron (O.) Beacon Journal

according to Editor and Publisher's, September 19th, linage tabulation, carried in six days a greater volume of advertising than any other six-day newspaper in any city of its class.

The Beacon Journal was first in local, classified and radio linage, being exceeded in National linage by only a small margin by The Memphis Commercial Appeal.

The Beacon Journal—First with 6,988,649 lines
January 1st 1925—June 30th, 1925

It's First Because It's Best

Akron, Ohio.

Akron is enjoying the greatest prosperity in its history. Work is plentiful—wages are high.

The advertiser who wishes to try out a campaign in a real live, active city, will get excellent results in Akron.

When Akron is the question—The Beacon Journal is the answer

Her Majesty, Marie, Queen of Roumania, will write a short daily article entitled QUEEN'S COUNSEL, for release October 19th.

Her Majesty writes easily and simply, with humour, understanding and almost startling frankness. Queen Marie has much to say and knows how to say it. Her Majesty has the greatest of gifts—human understanding—and has both the love of writing and the courage to write truth.

This is the first time in history a reigning sovereign has consented to write daily for an indefinite time for American newspapers.

A partial list of the cities in which this feature is under contract is as follows:

New York	St. Louis	Seattle	Milwaukee
Albany	Louisville	Cleveland	San Antonio
Syracuse	Washington	Cincinnati	Fort Worth
Rochester	Baltimore	Birmingham	Los Angeles
Boston	Chicago	Portland	San Francisco
Philadelphia	Detroit	Atlanta	Pittsburgh

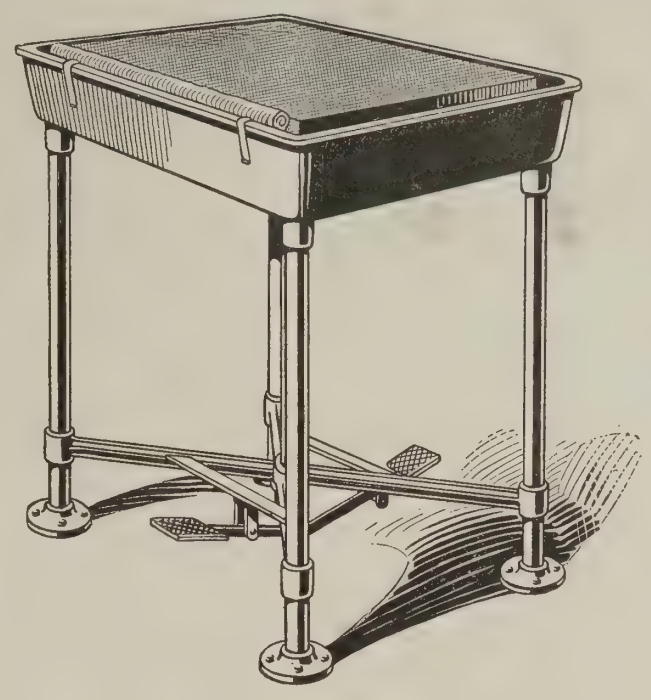
POWERS PERFECTION COOLER

Every Newspaper Photo Engraving Plant should have at least one



The Powers Perfection Cooler requires no water connection of any kind.

It can be moved at will by simply picking it up and placing it where it is wanted.

It has no mechanical parts to get out of order.

It applies cold water evenly and simultaneously to all parts of the plate—ON THE BACK OF THE PLATE only.

It cools the plate instantaneously to the exact temperature required and saves wiping, mopping and reheating.

The price of the Powers Perfection Cooler is $350

The *Powers Perfection Cooler* met with the instantaneous approval of both the workers and the owners wherever it was installed and tried. The men in the shops like it because it helps them in their work. They save time and effort, turn out more work and better work, and do it with very little physical labor. It is a clean, workmanlike way of doing what is otherwise a messy, sloppy task.

Proprietors like it because it saves gas, water, time and makeovers. These savings mean money and profits and that is what we all want. To satisfy yourself, go into your etching rooms and see what happens when the etcher tries to cool a large plate by dragging it over a roller wrapped in old towels and rags or a piece of burlap. Watch the plate buckle and then see him try to straighten it out. You know what that means in color work.

The use of the Powers Perfection Cooler does away with buckled and twisted plates, the splashing of water on the face of the plate and the constant work and worry connected with etching. A zinc etching is heated from 13 to 16 times by the etcher. That tells the story.

A. P. DIRECTORS PAY TRIBUTE TO LAWSON

Order Picture in Steel Engraving to Be Sent to All Members—One Hour of Next Annual Meeting Will Be Set Aside to His Memory

Victor Lawson's portrait will be reproduced in a steel engraving and sent to every member of the Associated Press, it was decided at a meeting of A. P. board of directors in New York this week. The directors passed a resolution paying tribute to Mr. Lawson as the creator of the Associated Press.

The resolution follows:

The members of the Board of Directors of The Associated Press lament the death of Victor Fremont Lawson, a man of brilliant and conscientious mind, with the highest conception of his obligations as a citizen; fair, just and honorable in all his transactions, of pleasing personality, a loyal friend, a charming companion. He was a true American in every fibre; an outstanding Christian gentleman who made Divine wisdom his guide; a courageous, generous and enterprising newspaper man, practicing the highest ideals and ethics of journalism; a tower of wisdom and strength in every activity with which he was associated.

Mr. Lawson's life, his work, his achievements, the devotion of his most intimate friends and the impression he made upon all who had the privilege of his acquaintance, will not only be a cherished memory of the profession to which he gave his life, but will also be an example and inspiration to all who are right-minded and aspire to useful life and the respect and admiration of mankind.

Victor Fremont Lawson was the first president of a national association of newspapers to gather and dstribute news, without profit and with the sole purpose of fairly, promptly and honestly informing the public of the happenings and occurrences of the day. He led the revolt against privately owned and controlled news agencies and gave to the movement the stamp of his high character and unselfish public service and the financial standing of his large resources—and thus rallied to his support leading newspapers of America and created the greatest news gathering organization in the world—The Associated Press—in which 1,200 newspapers, representing diverse opinions and divergent interests, co-operate in demonstrating that brethren can dwell in unity for a great and useful purpose.

The Associated Press typifies the character, lofty aims and noble purposes of the life of Victor Fremont Lawson; and so long as it maintains its high principles and serves the public honestly, the spirit of Victor Fremont Lawson will continue to live with the beneficent influences it exercised during his lifetime.

Therefore be it Resolved, That the Board of Directors and the executive staff of The Associated Press extend deepest sympathy and condolence to the members of the family of Victor Fremont Lawson and particularly to his associates and co-workers in that great and model newspaper—the idolized child of his brain—*The Chicago Daily News.* We have with them a deep and keen sense of irreparable personal loss in comradeship and in wise constructive counsel.

Resolved, That his portrait be reproduced in a steel engraving suitable for framing, inscribed as founder and President of The Associated Press, and a copy thereof be sent to every member of the association.

Resolved, That the first hour at the next meeting of the members of The Associated Press be devoted to tributes to Mr. Lawson's memory.

Resolved, That a copy of these resolutions be sent to the family of Mr. Lawson, to The Chicago Daily News, and be sent to all members.

Reporter Named Prosecutor's Aid

Harry S. Rushmore, *New York Evening World,* has been appointed executive secretary of Attorney Buckner.

WHAT OUR READERS SAY

Chanticleer!

To Editor & Publisher: Good friend, why all this hullabaloo about *linage?* That spelling which means "quantity of written or printed matter estimated in number of lines," or "payment according to number of lines," has been in use in the language for at least a half a century, and the distinction is clearly drawn between this sense and the sense of the word *lineage,* "lineal descent; ancestry; pedigree."

The editors of *some* dictionaries rejoice in misinforming a nation. The public has been told that the form *linage* was an obsolete form of *lineage,* a statement made away back in 1877 by the editors of "The Encyclopedic Dictionary," copied by "The Imperial," "The Century," and Webster's "International."

Let me install an up-to-date dictionary in your office, or, if you have one, good friend, why not consult it once in a while?

Frank H. Vizetelly,
Editor New Standard Dictionary.

Ably Fighting Moochers

To Editor & Publisher: The Southern California Editorial Association is co-operating very thoroughly in the drive against the free publicity grafters. Members have been referring to this office some of the most flagrant violaters and we have been writing direct to the heads of the companies to be benefited, along the lines of your sample letters recently published.

We also carry a column in our monthly publication headed, "Into the Waste Basket." In this column we call attention to some of the worst offenders. In addition to this, the members of our Weekly Division have been supplied with stickers as per the enclosed. Also instructions on how to return free publicity. The members of our Dailies Division will be supplied with rubber stamps with similar wording. This is copied after the plan used by Wil V. Tufford, secretary of the Inland Daily Press Association.

You are certainly to be congratulated upon the vigorous fight you are putting up and members of this association are with you to a man.

Ben H. Read,
Managing Director,
Southern California Editorial Association.

Not a "Game"

To Editor & Publisher: Just a word of appreciation from one who never misses reading Editor & Publisher each week for your editorial, "Personal Romances," in your issue of Sept. 12.

You are doing a remarkable work in constantly driving home the thought that newspaper work, regardless of the particular field, is no longer a "game." And your editorial on the rewards of ability and sticking to it is the best thing you have yet done in impressing your readers the days of the "game" are over.

Austin B. Fenger,
Gen. Mgr., Kimball-Mogensen Co.,
San Francisco.

Why Be a Dead Beat?

To Editor & Publisher: The following letter has been sent by this newspaper:

Rocky Mount, N. C., September 28, 1925.
Procter and Gamble, Cincinnati, Ohio.
Attention Advertising Manager.

Dear Sir: Again we are called upon to mail back to you some of your attempted free publicity undertaken in the guise of Home Economics and as sent us by the high sounding firm name of National Household Service. We are at a loss to understand why we should continue to get these mailings when your firm doesn't spend a cent with us and if we had space to give away we would undoubtedly give it to people who make our existence possible.

And just another reaction to this effort on your part to land free advertising. We don't believe you would have much respect for a dead beat whether he merely beat the street car company out of his fare, the railroad out of a ticket or the slot machine out of a stick of chewing gum. We just cannot admire your way of doing business. If you want something pay for it or do without it.

In fact for more than ten years my wife has been a constant user of your Crisco and she noted some of your attempted graft the other day and has indignantly declared that from now on it's Snowdrift for her. In fact, I was tempted to ask her to take your graft to her club and show it to some of the other ladies there who do their own work and who prefer your Crisco—but who wouldn't do it if they knew of this graft effort on your part. She has been using your Ivory soap, and its a good piece of goods and the wonder to us is how you can consistently make it so good and at the same time employ such confidence destroying tactics with reference to your efforts to secure advertising. We would like to have your impressions. Yours very truly,,

The Evening Telegram,
J. L. Horne, Jr.

"No Propaganda Week"

To Editor & Publisher: More power to the campaign the Editor & Publisher is making against "publicity specialists."

In this connection it seems that most editors fill their waste baskets daily with the general run of press agent stuff, but we all fall, more or less, for the biggest of all space grafting propositions, namely the "national weeks," proclaimed by some interest with an axe to grind. These "eat more prunes" and "watch your step" weeks, etc., come with great regularity sometimes with presidents, governors and commercial organizations lined up to help in the propaganda, which is designed primarily to get free space.

We have a magnificent example of this sort of thing in "Fire Prevention Week." There is no business in the country more strongly intrenched than the fire insurance monopoly, (many different companies but all operating in a rate fixing combination that is air tight). While none of us are incendiaries, we can see no good reason why this business enterprise should deluge the press of the country with propaganda for the benefit of its business. Other business enterprises much weaker financially than the fire insurance trust, are able to get their messages to the public in the regular way, and do not resort to propaganda drives of this sort.

Why not have the Editor and Publisher declare a national "No Propaganda Week," and urge every newspaper in the country to fill the waste baskets with all the propaganda that comes along?

Many would like it so well, no doubt, that they would make it a fifty-two weeks a year affair. Yours truly,

Edwin Rackaway,
Editor *Mt. Vernon* (Ill.) *Register-News.*

The Wanamaker Copy in Phila.

To Editor & Publisher: In the issue of Editor & Publisher, dated Sept. 19, last, column 1, page 7, in news item headed: "Advertising Is Imperative," Cyrus H. K. Curtis is reported to have said to a convention of general agents of the Ætna Life Insurance Company at Poland Spring, Me., on Sept. 12: "A newspaper in Philadelphia today cannot exist without the Wanamaker advertising."

If Mr. Curtis is reported correctly, he certainly is wrong. The *Philadelphia Evening Bulletin* with a daily circulation of approximately 500,000 does not and has not in the last 25 years, at least, carried one line of Wanamaker advertising, and the *Public Ledger,* which is now owned by Mr. Curtis, did not carry the Wanamaker advertising until after Mr. Curtis bought the old *Evening Telegraph* for its A. P. membership for his evening paper, the *Evening Public Ledger,* and is paying the greater portion of the purchase price for that newspaper and the old *Philadelphia Press,* in advertising space for the Wanamaker copy.

Of course, it is a fact that Wanamaker copy, as well as the copy of any popular big department store is a circulation asset to a Philadelphia newspaper, but not to the extent that a publication cannot exist without it, as is proven by the facts stated.

New York State

MUST BE FED

In the 47,654 square miles of land surface of New York State, with a population (estimated, 1925) of 11,105,625, there is an average of 233.04 persons to the square mile.

In the 59 cities there are six with over 100,000 inhabitants, and sixteen with 25,000 to 100,000. There are close to nine million city dwellers in New York State and these folks, in addition to the hundreds of thousands of visitors, constitute a vast army of food consumers.

Here is a great territory in which ninety per cent of the residents are engaged in various industrial, professional and business occupations.

An increase of 17 per cent in August sales of chain grocery stores over August, 1924, is reported by the Federal Reserve Agent in New York under date of October 1st. This increase was partly reflected in the opening of new stores.

Here in New York State is one-tenth of the people of the United States—and they must eat.

The Greatest Market in the World for the Merchandising of Food Products

NEWSPAPER MAKERS AT WORK

By PHILIP SCHUYLER

Looking Ahead for Holiday Linage—Jack Tims.

SOME newspaper business executives are of the opinion the present is none too early to plan for big local linage during the coming holiday months.

They remember the Christmas Club saving funds will be released from banks the first two weeks in December and are mapping out solicitation campaigns centering around this date. The report is these deposits are larger this year than ever before.

One stunt for making the best out of the big advertising investment days prior to Dec. 25, was described this week by Jack Tims, Jr., business manager of the *New Orleans Times-Picayune*.

"On the second Sunday in December," he said, "we issue a special section, made up entirely of advertising. In a five column box on the front page, we index every article mentioned in every individual advertisement.

"For instance, a department store takes a full page, say page three. Among merchandise promoted in the advertisement are ties. This same article is also offered by other advertisers on succeeding pages.

"Thus, in the index, which is arranged by our staff alphabetically, we would list this product possibly as follows: 'Ties ....pages, 3, 4, 7, 9' etc!"

"It is a section we have found easy to sell, and one that has proved valuable to local merchants. Of course, an obvious sales argument is that gift buyers will want a handy reference guide such as the section presents in making up their Christmas shopping lists. We also base advantages on the fact the Christmas savings funds are just being released by banks. Another way to promote the stunt is around the slogan, 'Do Your Christmas Shopping Early—and in Comfort.'

"We call the issue with this section our 'Catalogue Edition,' and it is just that. We have been publishing it now for about five years. Last year we printed 765 columns of advertising in this one edition."

Mr. Tims is an energetic newspaper business man. His brain is crammed with ideas he has worked out. But, in the main, he is not a believer in stunt advertising, he said. A newspaper, in his opinion, should be sold above all on the merits of its market.

To aid advertisers in understanding the New Orleans market, Mr. Tims and the Times-Picayune organization are continually making exhaustive and comprehensive surveys.

"We never want to take an advertiser's money, unless we are confident we can bring him results," he asserted.

"In consequence we are always willing to check up the field accurately for an advertiser by questionnaires and personal dealer calls and let him know the outlet possibilities for his product in our city and trade territory. I believe this is a service newspaper should perform."

It is no wonder Mr. Tims likes his newspaper and his city. The Times-Picayune was his first and only job. He started on the old Picayune in 1908 as an office boy and has worked himself to the top of the business staff since. He was made business manager in 1922.

EDITORS PROTEST TO A. P.

Pacific Coast Newspapers Want Earlier Release Dates

A plea for an earlier release date was made this week to the board of directors of the Associated Press by member newspapers from the Pacific Coast.

At present morning newspapers in California, Oregon, and Washington, are not permitted to publish A. P. dispatches earlier than 9 o'clock in the evening. Editors object that this ruling makes it necessary to use other services than the A. P. to obtain telegraph copy for early editions, which, in some cases, are on the streets at 8 o'clock in the evening.

Karl M. Anderson, managing news editor of the *San Francisco* (Cal.) *Chronicle,* was among the protesting editors.

"Sporting events and financial news from the east are ready for publication long before nine o'clock," he said. "We feel we are entitled to this news for our early editions."

Other Western editors in New York on the same mission include: Ralph Trueblood, *Los Angeles Times;* William Hines, *San Francisco Bulletin;* and Clark Leiter, *Portland* (Ore.) *Journal.*

Duplex Press Company Sues

Suit has been filed in district court, Independence, Kan., by the Duplex Printing Press Company, Battle Creek, Mich., against T. P. Perry, Coffeyville, stockholder and former president in the old Dawn Publishing Company, publishers of the *Coffeyville Morning Dawn,* to collect $2,500 on notes which he signed. The Dawn was a Klan paper, C. C. Drake was editor and managing editor and Mr. Perry was business manager. The Dawn's shop was dynamited and the press on which the suit was based, was destroyed, in December, 1924.

GREETINGS ROUND THE WORLD

North Americans Radio Messages to Empire Press at Melbourne

Newspapermen of the British Empire attending the Imperial Press Conference in Melbourne, Australia, received greetings from American press associations and American newspapers and press organizations by radio on September 30. The messages of greetings were transmitted from Pittsburgh by Westinghouse Station KDKA on its international short wave relay system, and received by the *Melbourne Herald.*

The messages were relayed at 5 o'clock in the morning, so as to be received in Melbourne during the evening, as there is nearly 12 hours difference in time between the two cities.

Press Invited to Radio Conference

The press has been invited to send delegates to the fourth annual conference on radio called this week by Secretary Hoover, to be held in Washington, Nov.9.

COLLECTIVE NOUNS CAUSE OF MOST NEWSPAPER ERRORS SURVEY SHOWS

Dangling Participles Also Menace to Good Writing, Oregon Journalism Professor Says—50 City and Country Papers Examined for Errors

WHAT are the most common errors in newspaper English?

To discover them, C. J. McIntosh of the ırnalism faculty, Oregon Agricultural llege recently examined more than 50 blications, both country and city. The ject of the survey was to clip mistakes d also to note correct usages showing w errors were dodged.

Mr. McIntosh reported the results of investigation in a recent talk before e Oregon State Editorial Association.

"The survey showed that the quality of nglish varies widely, not only among fferent papers but in different parts of e same publication," he said. "In gen- al the copy prepared in the office by e editors and reporters was much freer om error than the copy from out-of- ice sources—correspondents, news syn- cates, and publicity agencies, and oc- sional forum contributors. A further assification showed that the bulk of rors in outside copy comes from the cor- spondent and the forum writer, which often not only poorly written but for me reason or other does not seem to so carefully edited as the office, syn- cate and publicity copy. The greatest udeness appears in the marriage and neral writeups.

"In all, 191 clippings were taken, 49 owing correct usage in difficult situa- ons, and 142 showing errors, as follows: rbs, 63; pronouns, 15; adverbs, 12; con- nctions, 19; adjectives, 5; prepositions, 5; ouns, 2; and wrong meaning, 25; with faulty structures and 6 particularly icked spellings.

"The nature of the verb errors proved structive. The greatest number was in e verb number as governed by subjects presenting group words, known in our hoolboy days as 'collective nouns.' In any instances the mind of the writer and e editor seemed to have been on the ob- ct of the intervening prepositional phrase stead of the group subject word. Nei- ıer did any difference appear to indicate ıat the writer distinguished between the nited action' purport and the 'divided ction' idea—as 'the jury is agreed,' but he jury are disagreed.' Other wrong lurals and wrong singulars were occa- onally found. Other verb errors were ı active and passive voice, in past and resent tense, in participial phrases—angling participle—and in subjunctive ıode.

"The survey indicated that the subjunc- ve mode as a means of clear expression about done for in the Oregon press as ell as in newswriting and literary writ- ıg throughout the country. A few writ- rs used it to excellent advantage in dis- nguishing between clauses that concede ıe point and those that either deny or ıke it as uncertain.

"'If he *be* a man he will play a man's art,' wrote one writer, showing that he new how to express uncertainty. Just o indicate how clear the opposite meaning ıay be made by the subjunctive, assume ıat the writer had said 'If he is a man,' ıdicating that he believes he is, or that ıe writer has said 'If he were a man he ould have played a man's part,' thus trongly denying that he is a man. This lustration shows that the subjunctive has eal values. If it is to be saved, it seems hat the press will have to save it. Con- emporary literary writers do not seem o know that it ever had a place in good riting.

"The verb error in tense is found chiefly n secondary clauses after verbs of say- ng, teaching, etc. Reports of the evolu- ion trial in Dayton carried error after rror in this particular.

"'The defense attorney said that the orld *was* round,' is characteristic. While he general rule is that the secondary lause verbs agree with the primary clause erbs in tense, the noted exception is that ll present and continuing truths are ex- pressed in the present tense—'is round' rather than 'was round.'

"'Leaving in a drenching rain, the weath- er did not portend...' is one illustration of the dangling participle, several of which were clipped. The only safe rule here seems to be to put the real subject modi- fied by the beginning participle before any other noun or pronoun in the follow-up clause.

"Notwithstanding these and other mis- takes in verb forms a real improvement over those used a few years ago was noted. Not one editor made use of the old-timer—'took his departure for' for 'left for.' Most editors write 'died' and 'married' rather than 'euphonious syno- nyms.' 'Motored' is the most over- worked verb, substitutes for which might be 'drove,' 'went,' or, as some editors suggest, 'autoed.'

"Words are not so important as things, thought they express and lead to things. Oliver Wendell Holmes may have had editors in mind when he wrote:

'Words lead to things—a scale is more precise—
Coarse speech, bad grammar, swear- ing, drinking, vice.'

For many an editor has been sent on an orgy of profanity and drinking by reason of the slips he has made in newspaper writing .

"'A little word is like apples of gold in pictures of silver,' chanted the proverbs author, and Oregon editors have no pen- chant for the big word.

In the opinion of Mr. McIntosh the Oregon survey can be considered as typical of news writing in most states.

STATEMENT OF THE OWNERSHIP, MANAGEMENT, CIRCULATION, ETC., REQUIRED BY THE ACT OF CONGRESS OF AUGUST 24, 1912, OF EDITOR & PUBLISHER
published weekly at New York, N. Y., for October 1, 1925.

State of New York, County of New York, ss.:

Before me, a Notary Public in and for the State and County aforesaid, personally appeared J. B. Keeney, who having been duly sworn according to law, deposes and says that he is the Business Manager of EDITOR & PUBLISHER and that the following is, to the best of his knowledge and belief, a true statement of the ownership, management, etc., of the aforesaid publication for the date shown in the above caption, required by the Act of August 24, 1912, embodied in section 443, Postal Laws and Regulations, to wit:

1. That the names and addresses of the publisher, editor, managing editor, and business managers, are:

Publisher, James Wright Brown,
234 Valentine Lane, Yonkers, N. Y.
Editor, Marlen E. Pew,
Wading River, L. I., N. Y.
Managing Editor, Arthur T. Robb, Jr.,
175 Linden St., Rockville Centre, L. I., N. Y.
Business Manager, J. B. Keeney,
609 West 173d St., New York, N. Y.

2. That the owners are:

THE JOURNALIST CO., 1475 Broadway, New York, N. Y.; James Wright Brown, 234 Valentine Lane, Yonkers, N. Y.

3. That the known bond holders, mortgagees, and other security holders owning or holding 1 per cent or more of total amount of bonds, mortgages, or other securities, are: None.

4. That the two paragraphs next above, giving the names of the owners, stockholders and security holders, if any, contain not only the list of stockholders and security holders as they appear upon the books of the company, but also, in cases where the stockholder or security holder appears upon the books of the company as trustee or in any other fiduciary relation, the name of the person or corporation for whom such trustee is acting, is given; also that the said two paragraphs contain statements embracing affiant's full knowledge and belief as to the circumstances and conditions under which stockholders and security holders who do not appear upon the books of the company as trustees, hold stock and securities in a capacity other than that of a bona-fide owner; and this affiant has no reason to believe that any other person, association, or corporation has any interest, direct or indirect in the said stock, bonds, or other securities than as so stated by him.

J. B. KEENEY,
Business Manager.

Sworn to and subscribed before me this 1st day of October, 1925.

WILLIAM ATKINS,
Notary Public.

TESTS HUMAN INTEREST NEWS VALUES IN FICTION THRILLER FORM

Young Author of "The Heart of Salome" Finds Four Universal Human Interests in Seeking Formula for Fiction Writing—Studies Values

ALLAN RAYMOND, copy-reader on the *New York Times,* formerly with the Paris office of the North American Newspaper Alliance, has written and published his first novel—"The Heart of Salome." In it is embodied, he says, the experiment of a newspaper man to see if the same human interest values which make for newspaper circulation will make for reader interest in the fiction field.

ALLEN RAYMOND

"During some nine years of writing and editing newspaper stories, chiefly from the re-write and copy desks, I have tried to analyze the qualities in news which make for "stories," and in so doing to analyze my audience," he said. "I reasoned deductively from the 'why' of headline words, such as Mother, Millions, Millionaire, Wife, Baby, Shot, Love, etc., trying to justify them on the most widespread appeal,—and as a result I gradually reached the theory that there are four human interests to be found in everyone, from the top to the bottom of society,—i.e., in the whole newspaper audience.

"The first is money—because most of people's lives are spent in coping with getting the wherewithal to live,—or in spending on luxury the surplus after acquiring enough cash for necessities. Because of this it has become a truism in newspaper circles that the very spectacle of money itself, in the mass, or in its manifestations of luxury, exerts a tremendous fascination on people. Stories about rich people are better news than stories about the poor, and Rich becomes a great headline word. Before the war $1,000,000 was a great headline word. Now it is some multiple of that.

"Reasoning still as a copy reader, anxious to advertise news stories, I came to the opinion that after the money interest, comes the sex interest. This, perhaps, is not in a "world of things as they ought to be," but in a world of "things as they are." The primary interest of man and woman is getting enough to eat and drink, to shelter themselves from the elements, etc.,—in other words, getting money. Once the living is assured, both man and woman turns to sociability,—the human being is a gregarious animal and can't exist happily alone. He bases his whole social existence on sex, with its manifestations in pure love, lust, parental or filial affection, etc. So Husband, Wife, Mother, Baby, Triangle, Homes, etc., become headline words. They are of universal appeal.

"Granting that the human being is fed and satisfied sexually in some fashion, he or she turns to diversion, to escape from the routine of living in which the economic and social systems conspire to make mankind prisoner. I believe the fact that excitement is the third widespread human interest is the chief factor in making our Amundsen stories, and Plane Flights, to say nothing of horse racing, baseball, and sporting news, likewise news of the movie stars and theatricals. Some satisfaction to this instinct for adventure, to be satisfied vicariously in the press, is found in the crime news,—most certainly was found in the war headlines.

"And last of all I find in Crime and Church news, strange allies in satisfying the fourth human interest, which is in self-justification and the judgment of others, in other words in morals or religion. Granting mankind a little leisure, it pauses to figure what the game is all about, frames religions and superstitions, moral codes and the like. There never was a person so low but what he had some code of honor, some act he deemed beyond his pale, and some standard by which he measured his fellows.

"Such was the reasoning that produced "The Heart of Salome," as my first experiment at gambling my work against the chance of a best seller. I was out as a newspaperman to tell a good story with the widest human appeal, so I shot the story at all four of these I have outlined: Interest in money and riches, in sexual love, in adventure, and in the sense of right and wrong."

Mr. Raymond said he began to think about headlines and their result-bringing formula while sitting in the slot on the *Detroit Times* copy desk. Then he had to tell some greenhorns on the rim what it was all about. He himself was under the direction of John Hastings, now managing editor of the *New York Journal,* and Arthur Brisbane, who spent several months in Detroit in 1921 getting the Times under way.

"I look at my novel as a re-write man's job," he said.

It took him only four months to write the novel, and he was holding down three jobs at the same time. In addition to being Paris correspondent of the North American Newspaper Alliance, he was reading copy on the *Paris Times,* and representing the *London Daily Sketch* in Paris.

In 1922 he had gone to France with his wife and family (he has two children) on $750 he received for a 60,000-word six-part serial which ran in *Ace High Magazine.*

During 11 years of newspaper work, Mr. Raymond has worked on 14 newspapers. He started on the *New Bedford* (Mass.) *Standard* under George Hough. Other newspapers with which he has been connected include the *Worcester Telegram,* the *Lynn Telegram, Brooklyn Times, Brooklyn Standard Union, New York American, New York Sun, Evansville* (Ind.) *Journal* and *Detroit Journal.*

During the war he served in France with the Tank corps. He saw service overseas for eight months, and was gassed. Returning to this country he was forced to spend a year on a farm for his health. It was in this year he did his first successful fiction writing—the serial which made him enought money to take him to France.

CABLE JARGON DISTURBS MUSE

Snappy Journalese Intrudes Upon Reporter's Somber Poetry

Joseph Freeman, staff man in the New York bureau of Rosta, Russian Telegraph Agency, tried his hand at poetry during the early stages of his vacation. Memories of cable stories, however, persisted in breaking the scene and rhythm. Result as follows:

LIFE AMONG THE ZUBUG-RAWANAH INDIANS

Wide mist implacably obscures
The vast green hills; the lake endures
The rippling burden of the rain
(BOLIVIA TO EXPORT GRAIN)

The heavy perfume of the pines
Fills all the valley (COOLIDGE DINES WITH PARTY LEADERS) gray and still
The west grows dark (NEW SENATE BILL

CUTS TARIFF ON WOOL) beloved, come
And we shall make the night our home;
Warm is the flower of your mouth
(BOLL WEEVIL MENACES THE SOUTH) etc., etc., etc.

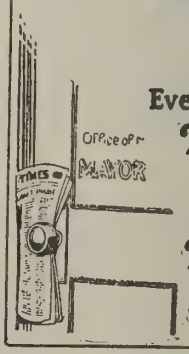
Lovering Returns to Work

F. J. Lovering, of the editorial staff, *Chicago Evening Journal* has returned to work following an attack in the county jail by Terry Druggan. Lovering was interviewing Druggan. The trial for the assault will take place Oct. 14.

Pleasants Joins Item-Tribune

W. S. Pleasants succeeded B. C. Anderson-Smith as financial advertising manag of the *New Orleans Item and Morni Tribune* this week. Mr. Pleasants was a vertising manager of the Hibernia Bank Trust Company in 1919-1920. In 1920 joined the advertising department of t Item. In 1923, he resigned to associa himself with the Reese Advertisi Agency, New Orleans, where he b came vice-president. Mr. Anderso Smith recently resigned from the Ite Tribune to join the brokerage firm Watson Williams & Co.

New A. N. P. A. Member



The *Saginaw* (Mich.) *News-Couri* has been elected to active membersh in the American Newspaper Publishe Association, L. B. Palmer, manager, a nounced this week.

EN U. S. PAPERS HAVE COLONIAL ANCESTRY

nnapolis Capital, Spanning 198 Years, Is Oldest Paper Still Publishing— Kansas Professor's Booklet Lists Pedigrees

Ten American newspapers now being blished can trace their beginnings back the Revolutionary period or before, ac- ding to William A. Dill, assistant pro- sor of journalism, University of Kan- , who has just compiled a booklet "The rst Century of American Newspapers." ery newspaper issued between the years 1690 and 1790 is listed by Prof. Dill th the date of its start and the name its founder.

In that early period 227 papers were nched, some to struggle and die, others have long and illustrious careers.

The ten survivors still being published, most cases under changed names, in e order of their founding are: *Annap- s* (Md.) *Capital,* 1727; *Hartford* Conn.) *Courant,* 1746; *Boston Adver- er,* 1748; *New Haven* (Conn.) *Journal ourier,* 1766; *Baltimore American,* 1773; *lizabeth* (N. J.) *Journal,* 1779; *Alex- dria* (Va.) *Gazette,* 1784; *Augusta a.) Chronicle,* 1785; *Hudson* (N. Y.) *zette,* 1785; and *Poughkeepsie* (N. Y.) *gle-News,* 1785.

The *Saturday Evening Post,* established 1728 as the *Pennsylvania Gazette* is the ly antiquarian in the magazine field.

The Annapolis Capital, 198 years old, w published by Ridgely P. Melvin be- n as the *Maryland Gazette.* The Hart- rd Courant's name has remained un- anged in its 179 years of publication. is owned by the Courant Company and harles Hopkins Clark is present editor.

The Boston Advertiser, starting as the *dependent Advertiser,* and the Balti- re American first christened the *Mary- nd Journal* are now owned by William ndolph Hearst.

The New Haven Journal-Courier, de- ended from the *Connecticut Journal* and *ew Haven Post Boy,* is at present pub- hed by John B. Carrington.

The Elizabeth Journal dates from the *ew Jersey Journal* launched at Chatham 1779. It is owned by Frederick E. ane. The Alexandria Gazette, like the artford Courant, is still published under original name. C. C. Carlin, Jr. is esent editor.

Beginning as the *Georgia State Gazette Independent Register,* the Augusta ronicle has spanned 140 years. T. J. amilton is present publisher.

The Hudson (N. Y.) Gazette is now blished as the weekly edition of the *udson Register,* of which Fred J. Cook editor.

Francis W. Platt is present editor of e Poughkeepsie (N. Y.) Eagle-News, nich is a descendant of *Zenger's New ork Journal,* established in 1885.

The earliest papers in the colonies as ted by Prof. Dill with the dates of their blication are: *Boston News Letter,* 04-1775; *Boston Gazette,* 1719-1798; *hiladelphia American Weekly Mercury,* 19-1747; *New England Courant,* Bos- n, 1721-1726; *New York Gazette,* 1725- 72; *Annapolis Gazette,* 1727-discon- ued 1736, revived 1745, still published; ennsylvania Gazette, 1728 now Saturday vening Post; *South Carolina Gazette,* 31-1802; *Weekly Rehearsal,* 1731-1775; *ew York Journal,* 1733-1751-2; *Boston Weekly Post Boy,* 1734-1775; *Virginia Gazette,* 1736-1750; *Germantown Penn- sylvania Recorder,* 1739.

The *Philadelphia North American,* launched in 1771, continued publication until May 14 of this year when it was purchased and merged with *Public Ledger* by Cyrus H. K. Curtis.

STAFF WORKS 3 MONTHS IN QUAKE WRECKED PLANT

So many buildings were thrown down in Santa Barbara, Cal., in the earthquake of June 29, it was three months before a construction crew could be obtained to start rebuilding the plant of the *Morning Press.* During this time the business and editorial forces continued work in the partially demolished building. The entire front was out and the roof shattered.

The composing room, press and mailing rooms of the Press are in a reinforced concrete building in the rear of the three-story brick editorial and business office quarters. No damage was done to the mechanical departments.

The accompanying picture shows builders at work Oct. 1, three months and a day after the quake. A heavy piece of canvas across the front end of the building has protected the force from the drafts to a certain extent. Fortunately no rain fell during the three months. The staff admits, however, that it was "issuing a newspaper under difficulties."

Immediately followed the earthquake it was necessary to run a private gas line to the gas factory for the Mergenthalers and string a private power line to the electric light plant.

NEW COAST AD GROUP

S. S. Anderson Heads Northwest Advertising Executives

Organization of the Northwest Advertising Executives was completed at a recent meeting in Tacoma. A code was adopted providing for the standard of practice conforming closely to the standard of the National Association of Advertising Executives.

The new association elected S. S. Anderson, advertising manager of the *Tacoma News-Tribune,* president, and J. A. Davidson of the *Portland Oregonian,* secretary-treasurer. A committee will prepare by-laws to be presented at the next meeting to be held in Portland in March.

P. O. Issues Cost Questionnaires

Questionnaires were sent out Oct. 1 by the Cost Ascertainment Section of the Post Office Department to all publications using the second class mails requesting data for use in this year's cost report to be prepared by Postmaster General Harry S. New. Information asked for includes number of complete copies with foreign destination in each issue, amount of postage on foreign copies, and number of separately addressed pieces and bundles for domestic and foreign points.

News Men Launch Swampscott Weekly

The *Swampscott* (Mass.) *Review,* a weekly, made its first appearance last week. Thomas B. Farrell, Jr., formerly on the advertising staff of the *Lynn* (Mass.) *Telegram-News* and *Manchester* (N. H.) *Union-Leader,* is publisher and business manager; Edward R. Place, formerly golf editor, *Providence* (R. I.) *Journal,* is editor; Harry Zam, literary editor, and Mrs. Harriett Hull, society editor. The initial number was of eight pages. In the summer it is planned to publish the Review daily.

SHREVEPORT JOURNAL NOW OCCUPIES NEW MODERN $250,000 BUILDING

Sharp Contrast Seen Between Humble Building of 29 Years Ago and Present Plant—Thousands Attend Open House

IN sharp contrast with its humble beginning, 29 years ago, in one room, 20 by 30 feet, housing all departments and equipped with a cheap, old-fashioned printing plant, the actual value of which could not have exceeded $1,000, the *Shreveport* (La.) *Evening Journal* recently moved into its new $250,000 home, with a modern equipment, the cost of which runs well above $300,000.

DOUGLAS ATTAWAY

A. L. WILLIAMS

The move was celebrated by two days and nights of "open house," when thousands of Shreveport people and visitors from near-by towns were shown through the plant and presented with souvenirs.

The building is spacious, with three stories of large, well lighted, well ventilated rooms. The structure is of brick throughout and was built for permanence.

The lobby is 20 by 40 feet. Italian Botticeno marble has been used for wainscoating. It has walnut woodwork and bronze grills. Stained wood beams in the ceiling are finished in dark walnut, while their supporting brackets carry out the general Italian architectural effects.

Behind the lobby are the general offices, with new furniture, fixtures and rubber-tiled floors. There are smaller offices for the managers of the various departments.

The editorial rooms on the third floor are complete in every detail. The main room is 30 by 40 feet, while the managing editor and the telegraph editor have their "dens" connected with the main editorial room, enabling them to keep in close contact with the staff men.

D. G. FRANTZ

A small stereoptical room has been provided and equipped with everything necessary for the projection of election returns and other important news to a screen on the opposite side of the street for the benefit of the general public.

The composing room is directly behind the editorial rooms. This room is 50 by 90 feet. Here the 10 linotype machines are located. A special ventilating system has been installed. There is a tiled shower and locker room.

A large conference room and stereotype room are also located on the third floor. An electric elevator at one side of the building serves all the floors. A ladies rest room and locker room is provided for the women employes.

The press room is large, roomy and well ventilated. The press, a Duplex Tubular, prints 24 pages at the rate of 30,000 an hour.

A total of 140 persons are employed in the various departments of the Journal building. Many of these employes have been with the paper for years and all feel a proprietary interest in the business. All the older employes own their homes and most of them received material assistance from the management in the process of becoming home owners. Asked to name the chief factor in the success of the Journal, Douglas Attaway, president and general manager, said simply, "That everlastin' team work."

Mr. Attaway holds a majority of the stock of the Journal Publishing Company and the remainder is distributed among the city's leading business men.

The Journal has never had any labor troubles. The mechanical work has always been under the jurisdiction of organized labor, and harmony has prevailed throughout the three decades of the publication's life.

The managing editor, Dolph G. Frantz, is a Mississippian, and comes of a family of journalists, his father being at present engaged on a morning paper at Jackson, Miss. Mr. Frantz's policy, since taking the helm of the Journal, about ten years ago, has been to foster the schools and churches and every movement for the advancement of the community. In addition to his editorial duties on the Journal, he finds time to serve the *New Orleans Times-Picayune* and the *Dallas News*, together with other publications, as special Shreveport correspondent.

A. L. (Bill) Williams, associate editor, has been on the Journal staff about nine years. He has served in every capacity from galley boy to associate editor. Prior to his connection with the Journal he was composing room foreman of the *Shreveport Times*.

A staff of local correspondents serves the Journal throughout North Louisiana, Arkansas and East Texas.

It is much easier for a rich old man to make a fool of himself than a poor old man.—*Frankfort* (Ind.) *News*.

Ask the Canadian Pacific about Canada

CANADIAN PACIFIC RAILWAY

Bureau of Canadian Information

THE Canadian Pacific Railway, through its Bureau of Canadian Information, will furnish you with the latest reliable information on every phase of industrial and agricultural development in Canada. In the Reference Libraries maintained at Chicago, New York and Montreal are complete data on natural resources, climate, labor, transportation, business openings, etc., in Canada. Additional data is constantly being added.

Development Branch—If you are interested in the mining wealth and ever increasing mining industry of Canada or in the development or supply of the very great variety of industrial raw materials available from resources along the Canadian Pacific Railway you are invited to consult this Branch. An expert staff is maintained to acquire and investigate information relative to these resources and to make examinations of deposits in the field. Practical information as to special opportunities for development, use of by-products and markets, industrial crops, prospecting and mining given on application.

No charge or obligation attached to the above services. Business men and organizations are invited to make use of it.

MERCHANDISING SERVICE A LUSTY INFANT NEEDING CONTROL

tandardization of This Newspaper Department Through Association of Managers Urged—Many Publishers "Offering Everything But the Moon"

By CHARLES H. CARSON

Manager, Merchandising Service Department *Roanoke* (Va.) *Times*

THE merchandising idea as now offered by a large number of newspapers roughout the country, is at once an in- nt and a giant. It is an infant, in so far s its age is concerned, while looking at from the benefits that have been de- ved and the opportunities ahead for rvice, it is a giant of no mean pro- ortion.

Like the child, however, that in its early ears is meek and by no means strong, is new idea in newspaper business is rowing and will continue to grow. hose newspapers which have adopted uch a department praise it and at the me time condemn it. It receives praise ue to the fact that gains in national as ell as local advertising linage is trace- ble directly to its operations. It is con- emned because of the rapidness of its rowth, and without the restraining hand f a parent to guide it.

Agencies have the various merchan- ising departments spotted and make full se of their service. However many of hose who are making use of this service re at the same time abusing the privilege. Newspapers are running a neck and neck ace to see which can offer the most to the dvertiser through this department, and hereby obtain additional linage. It is n that aspect that the merchandising idea as become a giant and needs a Jack to old it in tow.

Practically every other department of he newspaper today has its own organi- ation through which it benefits by an xchange of opinion. Such an organiza- ion for merchandising managers with an xchange of ideas, ways and means of handling the work and the placing of his work on a definite basis of coopera- ion which would be observed by all the newspapers—should be an accomplish- ment that would materially aid news- papers that now have a merchandising department and also newspapers contem- plating installing one.

Realizing the need of such an associa- ion the writer during the past month sounded out merchandising managers upon the idea. It was advanced several years ago by the *Philadelphia Record* we were informed in a letter from Ross An- derson of the Advertisers' Service Bureau, but at that time, stated Mr. An- derson, "received no encouragement. This we could not understand as the advantages of such an association are so obvious."

The result of the work of the present writer, although by no means complete, has been much more encouraging. The merchandising managers listed in the 1925 Year Book of EDITOR & PUBLISHER, each have been approached by letter

The replies received have been most interesting.

Here are a few extracts from them showing the interest taken in the sug- gestion:

The *Columbus* (O.) *Dispatch*:

"It would not be a bad idea at all for the newspapers throughout the country to allow their merchandising managers to meet each year for the exchange of ideas and opinions on the cooperation to be rendered national advertisers."

The *New Orleans* (La.) *Times-Picayune*:

"Such an association would, I believe, be of great value in adopting and prac- ticing standard forms of merchandising cooperation, and I will be glad to hear from you on the subject again."

The *Philadelphia Record*:

"***the advantages of such an associa- tion are obvious. I assure you that I will be glad to cooperate in forming such an association as you mention."

Other newspapers endorsing the plan are the *Peoria Journal-Transcript; Fargo* (N. D.) *Forum; Cincinnati Post; Tra- verse City* (Mich.) *Record-Eagle; Kansas City Journal-Post; Detroit Free Press; St. Paul Dispatch and Pioneer Press; San Francisco Examiner; Pueblo Star-Journal; Indianapolis Times; New Orleans Item-Tribune; Indianapolis Star; Hartford Courant* and others.

There will be of course various objec- tions brought up against such a plan, chief among them being that now there are too many organizations in the news- paper business. That is no doubt true. However the fact remains that there must be some organization to perfect a standard of work for merchandising de- partments or this new device will run wild and ruin not only itself but its sponsors. Most of the departments are observing the Standard of Practice laid down by the A. N. P. A., while on the other hand it is found in many cases where a paper has a competitor that this standard is not observed, both papers go- ing after the business and offering every- thing but the moon.

The idea of such an association as out- lined here is also an infant, but from the type of response that has been re- ceived the writer believes it will grow into an organization.

World Stages Accuracy Test

An "accuracy contest" conducted by the *New York Evening World* has caused considerable comment. In the contest representatives of four different sports competed for low score over a golf course. More than 1,000 watched the match in which a golf player, baseball player, archer, and surf caster participated. Lou Gehrig of the New York Yankees won. To "hole out" on the green he was re- quired to throw the baseball in a tub. The archer was required to hit the bulls- eye of a target; the surf caster to drop the lead in a small hoop.

ADVERTISING WILL CURE MARKETING ILLS

So Members of Co-operative Pure Milk Association Are Told By L. J. Tabor, Grand Master of National Grange

Advertising, more advertising and still more advertising was prescribed by Louis J. Tabor, Grand Master of the National Grange and the former Director of Agri- culture of Ohio, now residing at Colum- bus, as one of the most important cures for the marketing ills of the farmers of America. Grand Master Tabor gave the prescription while addressing the annual picnic of the Co-operative Pure Milk Association, an organization of 3,500 dairy farmers of the counties of southern Ohio and Indiana and Northern Kentucky, held the Cincinnati Zoo recently.

"Farmers must learn to organize, mer- chandise, standardize and advertise," said Mr. Tabor. "And I want to stress this one point and say the greatest of these for this present time is advertise. I be- lieve one of the greatest needs of the farmers today is the practice of a larger use of printers' ink. Advertising has made millionaires out of scores of mer- chants and manufacturers. It has strength- ened every kind of financial and industrial institution that has practiced it consist- ently. I think it is high time that the farmers made use of it in a judicious manner. It will yield big dividends to all organized farmers.

"Dairy farmers most of all need to tell the public in a convincing manner that they have the best and purest milk, the freshest of country eggs and that their butter is better than most of their competi- tors. The farm organizations have a right to win the confidence of their fellow citi- zens, for last year through co-operative marketing more than $2,000,000,000 worth of farm products were sold."

Williamsport Newspapers Like Imperial

WE feel that the best possible evidence of the worth of the Imperial Plus Metal Plan is shown by the many cities that have every newspaper using the Plus Plan. As an example of the above we are showing this week two splendid Pennsylvania newspapers from the same city, The Williamsport Sun and Gazette-Bulletin.

No matter how widely newspapers of the same city may differ in national and local questions they all get together on the best way to take care of their type metal. That way is to sub- scribe to the Imperial Plus Metal Plan.

The Plus Plan serves all newspapers alike regardless of location or size of circu- lation. And it brings them all the same results—a con- stantly balanced, efficient metal and the addition of years of working life.

Save by The Plus Plan

Using the Plus Plan in your shop means that you are postponing for years the time for getting a new supply of metal. May we tell you about this economical, reliable Plan?

MEN ALSO ARE BARGAIN SEEKERS, AUTO ACCESSORY DEALER SAYS

Samuel Taubman Gives Newspaper Advertising Credit for Building His String of 14 Stores—Says Ad Costs Decrease As Linage Mounts

"I CANNOT understand how anyone can truthfully say that newspaper advertising does not pay," says Samuel Taubman of Taubman's Auto Accessory Stores, a chain operating in several cities throughout the East which has its headquarters at Buffalo. "We don't spend our money in newspaper advertising—we invest it."

Mr. Taubman started his first store at Greensburg, Pa., six years ago, and today there are 14 in the chain located in Buffalo, Baltimore, Washington, D. C., Rochester, Altoona, Johnstown and Greensburg, Pa. Starting with a business of a few thousand dollars a year this chain has grown to a total volume of millions. The founder unhesitatingly says that the growth of his business would not have been possible without the daily newspaper.

In fact, it was newspaper advertising that forced him into the chain store business. He started primarily with the idea of selling his goods at lower prices than prevailed in the auto accessory field. To do this he had to have volume and to get volume he was compelled to use newspapers.

Taubman's Bargain Copy Appealing to Men

Business came and in his efforts to supply the demand for lower and lower prices Taubman began to buy in large quantities. Soon he was buying larger stocks of a single item than could possibly be disposed of in a single store. Therefore he had to acquire a second store, and shortly thereafter a third.

When it is considered that this chain sells articles which have to be advertised almost exclusively to men, the story of this newspaper success becomes all the more remarkable.

Many storekeepers claim that men are not bargain seekers and that they will not respond to the department store type of newspaper advertising. Yet this is exactly the type of display on which Taubman has built his success—large advertisements featuring dozens and scores of small articles, each illustrated and priced, with a few words of descriptive matter.

Now, when Taubman puts out an advertisement of a special sale he brings crowds of men to his store—sometimes thousands in a single rush. They come early, too, just the same as the women and it is no uncommon sight in front of a Taubman store to see a big crowd of men lined up waiting for the doors to open.

Mr. Taubman has tried other forms of advertising—outdoor display, direct mail, etc., but he has concluded that the newspaper alone must be depended on to get him business.

He is a user of large space, sometimes using pages and occasionally resorting to two-page spreads. When times are hard he increases his newspaper advertising instead of cutting it out.

When Mr. Taubman first began using such large space in the newspapers, his competitors frankly told him they thought he was crazy. The automobile accessory business never will stand such an expense, they claimed. But he smiled and went on his way.

Sometimes in opening a new store he spends as much as 40 per cent of total sales in newspaper advertising at the start. Experience has shown that the advertising cost soon runs down to under 5 per cent because of the immense volume of business built up.

"We have to produce volume and we have found that the only way to build volume is through newspapers," claims Mr. Taubman. "If a retailer today cannot use newspaper advertising he might as well get out of business. Of course, one has to take a gamble at the start in spending big money in the newspapers, but we find it always pays in the end. The more we advertise the more our advertising costs decrease, compared with our total business.

"We carry 5,800 different articles in stock and illustrate every one of them in our advertising. We carry more cuts in the newspaper offices than some department stores. This means a problem for the composing rooms. Yet by keeping a close contact with the newspaper men we rarely have a mix-up in cuts.

"With us it is very important always to get the right cut used. We insist on absolutely truthful advertising. If a mix-up occurs and the wrong cut is inserted with a certain advertisement it means that the public is disappointed when they come to the store and that we are guilty of unintentional misrepresentation.

"We have found that the location of an item in an advertisement has something to do with results. By moving an item around from one place to another in the ad, we can increase or decrease the sales. This is important to know, but every advertiser must find out the best locations for his particular proposition for himself.

"When we use double-page spreads our results are simply phenomenal. When we opened our Baltimore store for an expansion sale, we used two-page spreads. Next morning we had a crowd of 1,000 persons in the store, and many outside that couldn't get in. We had to have a cash register both in front and back and open the rear doors so that part of the crowd could get out.

"One other point I would make is that the retailer must advertise regularly and without cessation. We advertise 52 weeks each year and sometimes twice a week. We never let our advertising stop or lag.

"One of the finest results of newspaper advertising I know of happened when we opened our Rochester store. We used extensive advertising and turned our entire stock over in 15 days, establishing a new record for our chain."

Pioneer Kansas Paper Sold

The *Pratt* (Kan.) *Republican,* oldest newspaper in Southwest Kansas, and founded in the late 70's as the *Iuka Republican,* has been sold by A. A. Cochran, owner and postmaster, to the *Daily Tribune* and the *Weekly Union.* The paper is said to have used the same press with which it was first printed until its last issue. The machinery was distributed between the two papers.

San Antonio Raising Ad Fund

The San Antonio Chamber of Commerce this week began a drive to raise $250,000 for each year of a three-year program, $100,000 per year to be used on a national advertising campaign to attract tourists and industries and business to the city.

Courses Dull, Student Daily Says

Severe criticism of 40 of the most prominent courses at Harvard College was made by the *Harvard Crimson,* student daily, at Cambridge, this week. In Monday's issue it printed a catalog of the 40 courses in question, with a criticism of each by some prominent undergraduate who has taken that particular course during the past two years. This is believed to be the first time in American college history that such a criticism has been attempted by a student organization.

Carrier Shot; Mistaken for Thief

Mistaken for a robber, Frank Poss, carrier for the *Kansas City Star,* was shot by a subscriber. The man had been robbed the evening previously and had spent the night in his store. Poss was poking a paper through the letter slot when shot.

TECHNICAL MEN JOIN IN DALLAS CAMPAIGN

ngineers, Architects, Contractors Cooperate on Large 24 Time Copy Stressing Civic Aspect of Their Work

The engineers, architects, contractors, id others of their class in Dallas, Tex., lieve there is much to be done by way educating the public and have been pporting that conviction for several ars with advertising campaigns in the *orning News* of that city.

The Technical Club embraces men of l technical professions although many these have their own organizations ch as the local branch of the American ociety of Engineers, the Architectural lub, The Traffic Club, and others. he "Tech" Club is a luncheon organation in which cross-sections of all inistrial and technical problems are mascated with the roast beef.

Some four years ago they began to lvertise using "card" spaces within a ge layout. When the copy service partment of the News offered to pre- re some constructive educational mesges to the public, they were ready.

The purposes of the campaigns which ve followed are: to develop a civic lant" on all engineering and industrial ndertakings; to show that the technical an is a civic-minded individual; and so that Dallas has trained men along ery technical line whose services are ailable to the public.

Back of the current campaign are four the five public utility corporations, a ilroad, a college of engineering and chitecture, a railroad, a paving comny, a lime concern, a sand and gravel mpany, machinery manufacturers, a rtland cement manufacturer, besides nsulting civil and structural engineers, alytical chemists, architects and conactors. There are 24 on the list.

And what do they say in their copy? They tell about portland cement, city streets and paving, natural gas and other industrial products and engineering undertakings. Take the portland cement copy: "They Grind Hills to Powder to Make Sky Lines Such as This—" And then the reader is invited to guess the number of sacks of cement in the Dallas sky line. A brief history of portland cement is told and, as the story is unfolded, the exact processes of science are described which make this product a building material of the highest standardization. And the technical man? He is the physicist and the chemist who take and analyze samples from the newly-quarried raw materials; who tests the product at every stage of manufacture. He is the engineer and chemist at the laboratory of the Portland Cement Association's headquarters. He is also the engineer in charge of building projects.

Touches of philosophical comedy are used as "attention-getters" in the copy dealing with city streets and paving. Philip II, of France, in 1184, to rid his palace windows of offensive odors, ordered the street paved. A cartoon sketch shows the king standing by the window saying: "Phew! Pave that street right away!" Similarly an episode is taken from "Les Miserables" in which Jean Valjean betrays his identity by giving a "fancy exhibition" of weight-lifting when the poor carter's vehicle bogged in the street.

Streets are discussed as a social, economically and, finally, an engineering problem.

The present campaign calls for twenty-four 952-line spaces in 12 months.

Warner Now Elizabeth Times M.E.

Former Assemblyman Arthur E. Warner has been named managng editor of the *Elizabeth Times,* recently purchased from Leonard F. Sawvel by Hearst representatives. Mr. Warner was named to his position by Edgar Shaw, president of the new company. E. Michael Scanlon remains city editor.

Where Opportunities Meet

THE Buyer and Seller of Equipment, Supplies, Features, Services, Business Opportunities, etc., can meet in the classified pages of Editor & Publisher to their mutual advantage.

Classified advertising means specific opportunities — opportunities of the present not prospects of the future.

Its record as a result-producer recommends the classified service of

EDITOR & PUBLISHER

BUSINESS CONDITIONS WERE NEVER BETTER IN

ILLINOIS

Continued improvement in business and increasing confidence in the prospects for an enormous autumn and winter trade throughout the entire state of Illinois are based on the following reports:—

Increased production of corn, cotton, wool, lumber, coal, iron, petroleum and practically all of the metals and minerals. An increased consumption of leather, cotton and silk in manufacture. An increased freight tonnage.

Railroads are preparing for a record freight and passenger movement. Orders for equipment indicate that practically all the carriers have entered the market on a larger scale.

Crops already harvested show the agricultural districts will have plenty of money. Wholesale merchants report marked activity on the part of the country dealers.

Building continues on a large scale, although the season is far advanced and the usual let-down is not yet in sight. Prices remain firm in all building material markets.

Iron and steel mills are active.

These are positive indications of increased purchasing power in an already dominant market.

Merchandising and sales promotion in this ideal territory can be accomplished by advertising in the following list of newspapers:

17TH CENTURY PAPERS IN STATE'S FILES

Copies of London Newspapers of 1665 In Collection of Minnesota Historical Society, Also U. S. Papers of Post-Revolution Days

The newspaper collection of the Minnesota Historical society in St. Paul is the third largest in the United States, being surpassed only by those of the historical societies of Kansas and Wisconsin. There are upwards of 14,000 bound volumes, which occupy steel shelves on four floors of stacks, nearly the whole length of the building, under the reading room. The collection is being augmented daily, for the society receives about 500 current daily, weekly and semi-weekly papers, nine-tenths of them being published in Minnesota.

This collection also contains some of the oldest newspaper files to be found in the world. To mention a few, there are the *Gazette* of London, England, from 1665 to 1713, and the *Chronicle,* also of London, from 1757 to 1762; the *Massachusetts "Centinel"* (so spelled) and *Columbia Centinel* of Boston, 1792 to 1827; the *Independent Chronicle and Universal Register,* Boston, Sept. 3, 1795, to April 17, 1797; the *Goshen* (N. Y.) *Repository and Weekly Intelligencer,* July, 1793, to April, 1802; the *Orange Patrol,* 1800-1802, and the *American Mercury* of Hartford, Conn., 1802-1815.

Most interesting are the contents of these ancient papers. For example, they record the details of the Napoleonic wars from beginning to end and present the first printing of "Common Sense," by Thomas Paine, that "stormy petrel of revolution," which was so potent for the cause of the colonies at the time of the American Revolution that Washington had it read to every regiment of his army and pronounced it worth a regiment of soldiers.

The collection also comprises New York, Albany and other American newspapers from 75 to 100 years old. It would be possible to write, without any other material, almost a full history of the United States from these files. Indeed, they or their like have proved of incalculable value to ali American historians.

The Minnesota Historical society was founded in 1849, the same year Minnesota Territory was organized, and the newspaper collection dates from the same year. These files are and have been for 17 years in charge of John Talman, a retired newspaper man, whose first work was done for the *Rochester* (N. Y.) *Democrat & Chronicle* and the Albany *Argus.*

Four Generations in Newspaper Work

C. C. Eaton, editor of the *Winthrop* (Minn.) *News* is said to be the only editor in the state to belong to the fourth continuous generation of newspaper men. His great grandfather, Samuel Eaton, was a printer in New York state; his grandfather, Samuel William Eaton, was an editor and printer at Lodi, N. Y., and his father, Horace G. Eaton, founded and edited the *Rochester* (Minn.) *Post,* now the *Daily Post-Bulletin.*

Former Trindad Publisher Dies

Olney Newell, prominent newspaper publisher and writer and outstanding figure in Colorado politics died Oct. 3, in Denver. One of the pioneer western publishers, Newell established the *Trinida* (Col.) *Daily News* in 1880. Althoug he later abandoned publishing for sta politics the veteran editor until short before his death wrote a weekly letter political and humorous comment under t pseudonym of Jason Pepper for the De ver *Rocky Mountain News.*

California Semi-Weekly Merge

The two Compton California sem weeklies, the *News* and the *Tribune,* ha consolidated. Carl M. Bigsby and V H. Coonradt of the Tribune have join forces with G. H. and A. L. Gilbert the News in the new *News-Tribun*

12 Pages of Comics in Milwaukee

Twelve pages of comics, in color, now included in the Sunday editions the *Milwaukee Journal,* which beginni Sept. 20, was enlarged from nine to twel sections. There was added a tabloid ma azine, in color, for children, a ficti story magazine, in color, newspaper s (supplementing a tabloid magazine), a a motoring and radio magazine. T sport section was doubled.

ONE DOLLAR WILL BE PAID FOR EACH IDEA PUBLISHED

BUSINESS TICKLERS

M. MURRAY, hardware dealer of Honesdale, Pa., has been using a novel style of advertising, with results reported to have been unusually good. In a recent issue of the *Independent* the firm carried a 3 x 9 display ad headed "Everything for the Farm News." In this ad was contained general farm news; also records of recent sales made of farm equipment, etc., with care being exercised to use as many names as possible. The idea should prove effective in the average country town newspaper and for the average general hardware store in such a community.—T. J. Brislin, Scranton, Pa.

The *Houston Post-Dispatch* offered prizes aggregating $50 for the best window displays made during "retail week" in that city, and a large number of merchants entered the contest. The paper called attention every day to the windows in the contest and invited the public to inspect them. Merchants used advertising space to invite inspection. Each reader of the paper was entitled to a vote as to the best decorated window. The voting was heavy. Such a contest pleases the merchants and created interest in window shopping as an aid to advertising in selling goods.—W. H. M., Austin, Texas.

"Letters to Elizabeth, With Sidelights on Buying," is an advertising feature, run on the society pages of the *Sunday Times-Picayune,* New Orleans. The "sidelights," boosting the different businesses, are written in a chatty, personal vein, as if they were the results of real visits of the writer to the shops played up. This has been done before by other big newspapers, but never better, perhaps, than the New Orleans paper is doing it.—A. W. Roe.

Many of our large cities are following the business policy of closing their principal stores on Saturdays. Other places choose different afternoons upon which to close. Not all the stores, however, close on these business holidays. A Boston paper has hit upon the novel idea of running a column of advertisements under the heading of "Open For Business On Saturday," Saturday being a business holiday in Boston. Other papers might do well to follow the same idea in relation to their closing days. It is a help to the public as well as increased advertising space for the paper.—C. E. Pellissier, Boston, Mass.

"Present Prices of Your Favorite Car in Seattle," was a recent ribbon of a Seattle newspaper under which many of the local dealers took space. The page was commended to the readers as valuable to dealers and prospective purchasers. All the leading dealers co-operated in presenting the prices of standard cars in uniform space.—C. M. L.

Why not hit the roadside stands for an ad? Fill a page once a week, each week taking a different road to exploit. Run a box in the center of the page, telling how to get to them, and get each stand owner to specialize on its best seller.—R. E. Dietz, Battle Creek, Mich.

Vacation is now over. Everyone is back at work again and the desire to save money will soon begin to be felt by the average citizen. Now is the time to get the savings banks' advertising. Run a special section devoted to savings.—C. E. Pellissier, Boston, Mass.

"CLOSE THE PUBLICITY DOOR"

Is Advice of Sheboygan (Wis.) Press —Says Newspapers Would Gain

Try the "closed door policy" in the matter of free publicity is the editorial advice of the *Sheboygan* (Wis.) *Press,* which states newspapers have nothing to lose and everything to gain by fighting press agents.

"If newspapers want to share in the prosperity that is coming to the magazines," says the Press, "they must close their columns to free publicity.

"Can yau blame an advertiser for accepting gifts. Magazines give nothing away.

"As one advertiser said: 'Why spend money in newspapers, when a publicity agent can get free readers, either direct or through local influence.'

"Let us turn down every request for free publicity, and we will soon realize handsome dividends from those who have been giving the press everything but their money. The magazine is a selling organization with no free publicity to handicap its success."

Motorists say that the pedestrians dumbells, while the pedestrians say motorists are reckless idiots. Who right? Interview the chief of police several of the cops, then talk with s of the motorists and then with some those "dumbell" pedestrians who hav cars.—P. B. Oakley, Geneva, N. Y.

Many times syndicate pictures of erally interesting happenings or ev which have taken place in the past printed with a brief explanation of picture. Would it not be of more in est to the reader to have the picture companied by an account of the hap ing. In most cases this could be obta from the old files.—M. C. Ryason.

Why not a feature on the amoun petty thievery in your city's lea hotels? Interview half a dozen h managers. It'll be a revelation how m hotel property is carried off by h guests—every thing from a cake of s to the rugs.—Harold J. Ashe, L Beach, Calif.

HUNCHES

ONE DOLLAR WILL BE PAID FOR EACH "HUNCH" PUBLISHED

AN Old Pet Animal letter contest started by the *Madison* (Wis.) *Capital Times,* drew a great number of letters from readers that were, in themselves, absorbing human interest feature articles, describing patriarchal domestic animals of many species: cows, cats, dogs, squirrels, canaries, and many others. Five dollars was offered to the person writing the best letter on an oldest animal. On the first day of the contest, the Capital Times published a feature article, illustrated, on the oldest cat in Madison, one that was 20 years old. If unusually aged animals are described in some of the letters, a reporter may be sent out to write feature articles on them.—Ruben Levin, Madison, Wis.

For more than two years the *Greensburg Review* has been publishing a baby picture on the first page every Saturday morning. As there are always new babies and proud parents this feature can run indefinitely. Besides the name of the child and parents a short appropriate poem or quotation is used.

Ask leading citizens, "What is your favorite sport and why?" and make a daily feature of the answers, using one briefly each day, perhaps as a sport page box.—John H. A. Kelly, Norristown, Pa.

An effective promotion stunt is being used by the *Toledo Blade* in its Saturday football extras. Fans are asked to guess the scores which will be made in ten specified games the following Saturday. All guesses are filed with the contest editor the day before the games. The thirty persons whose guesses are nearest the scores made on the gridirons are given tickets to any Toledo game, high school or collegiate, they select. The first mail after announcement of the guessing contest brought 70 letters and hundreds of others swamped the contest editor before the deadline.—Max Hahn.

THE SOUTH

A Market for National Advertising

THE trend of growth from every direction is southward. The South is fast becoming the greatest center of activity in the United States.

The wealth of the entire country and the rapidly increasing population are now serving to strengthen the power of the South.

It has more natural advantages for development and for creature comforts of its growing population than any other part of the world.

The growth of southern commerce is shown in foreign exports from southern ports during 1924 as having amounted to $1,627,930,000. It is nearly four times the total value of foreign exports from the entire Pacific coast, which amounted in 1924 to $444,555,000.

Though the South has given great attention to the production of cotton, it is making rapid progress in diversifying its farm products. For the five-year period from 1918 to 1922 it raised an average of 975,000,000 bushels of corn. The total production of grain of all kinds—corn, wheat, oats, rice and kaffirs is about 1,250,000,000 bushels a year. It is annually shipping to the people of the North and the West, during the winter and early spring seasons, about 500,000 carloads of early vegetables, fruits and cotton seed oils.

Colonel Charles Sweeney

They Told It To Sweeney

Somebody said there was a war in Africa.

Sweeney heard it and went—with an air squadron of gentlemen adventurers—and once more a fighting Irishman was making history.

Colonel Sweeney and his fliers are fighting the Riffs with a $5000 reward on their heads in a country where a safe landing is impossible and capture means death by exquisite torture.

And Sweeney is writing about it between flights. He has furnished some of the most remarkable human interest tales of first-hand adventure in the history of journalism.

He is writing his exclusive dispatches for the Chicago Daily News Foreign Service. They are cabled direct to America and distributed over the leased wire system of the Consolidated Press Association.

World News of Human Interest is only one part of the eight-hour day leased wire service of the C. P. A. which furnishes "to-day's news specials today".

The Key to the Chicago Market—

Is The Chicago Daily News

Metropolitan Chicago comprises almost 50% of the total population of Illinois—and an even greater proportion of its personal wealth and buying power.

Chicago is the richest, most compact and most economically served market in the middle west.

Its most profitable buying power, as advertisers have proved by long and successful experience, is substantially and effectively covered by a single medium—The Chicago Daily News, which carries a greater volume of display advertising than any other Chicago daily newspaper.*

You can sell very nearly all of financially competent Chicago by using The Chicago Daily News alone. An advertising campaign in Chicago that omitted The Daily News would be Hamlet played without Hamlet.

Advertisers who wish to succeed in this greatest and most compact market in the world, should profit by experience and print their sales messages where they will be most effective; in the "medium of proved returns"—

THE CHICAGO DAILY NEWS

First in Chicago

****Because it paid them,* advertisers bought in the first 8 months of 1925 9,890,113 agate lines of display advertising in The Chicago Daily News. The next highest record for the same period was 8,011,741 lines.**

Invitation Accepted

EDITOR & PUBLISHER, October 10th, asks to be told how to conserve newsprint. It says the daily newspapers of the United States will consume 3,000,000 tons this year.

The average saving of print paper by using the WOOD DRY MAT process is 2½%. And to save it no reduction in the number of pages printed or change in measure is necessary.

If all daily newspaper stereotype foundries used WOOD DRY MATS—and of necessity they must eventually come to the dry mat process—the saving for the year in newsprint would be 2½% of 3,000,000 tons. This means an actual saving of 75,000 tons.

We suggest to EDITOR & PUBLISHER it can do much to aid in the saving of newsprint by putting into effect the following plan:

EDITOR & PUBLISHER knows the tonnage of newsprint consumed by individual newspapers and the cost of it to the newspaper. Let EDITOR & PUBLISHER put the saving of 2½% in actual dollars and call the attention of each publisher to just what he can save in paper costs every year. This saving will continually increase as the cost of paper *must* go higher.

Publishers who are suspicious of the claims for WOOD DRY MATS, because we have something to sell them, will believe the statements of EDITOR & PUBLISHER. And furthermore we will guarantee their accuracy.

In this way EDITOR & PUBLISHER can render a great service to daily newspapers.

WOOD FLONG CORPORATION

501 Fifth Avenue **New York City**

Double the number of postmen—

¶ You feel reasonably secure when, in New York or Seattle, you drop a letter in the mail addressed to Baltimore, Md.

¶ You know that Baltimore is a city of close onto 800,000; and you feel sure that Baltimore is ably and efficiently served by a large corps of letter-carriers.

¶ To be exact Baltimore's postoffices employ 589 regular letter-carriers.

¶ Suppose we double that 589—what have you? 1178.

¶ Well, that 1178 is within 100 of the number of carriers who are every day employed in the delivery of the Sunpapers through the length and breadth of Baltimore's 93 square miles.

¶ Just double the number of letter-carriers in Baltimore and you have a fair idea of the thoroughness with which the exclusive Sun Carrier Organization covers the homes of Baltimore and suburbs.

¶ For the Sunpapers are home papers, read from front page to back, at home, leisurely, carefully—

¶ And that explains, in part, the immediate and gratifying response called forth by advertising in the Sunpapers.

Selling Men's Clothing and Furnishings IN PHILADELPHIA

Philadelphia, having the third largest population in the United States, is a very important market for the maker of men's clothing, underwear, furnishings, shoes, hats, etc.

Philadelphia has been very prosperous this year and holiday buying of wearing apparel on the part of its men and boys will be very big.

Naturally the big sales will go to those manufacturers who educate the buying public regarding their brands of apparel.

What local advertisers do is probably the best guide to national advertisers in sizing up the situation in any city. Nearly every Philadelphia retail merchant that advertises uses The Bulletin. Follow him, he knows!

Send for a free copy of THE BULLETIN ROUTE LIST OF MEN'S WEAR DEALERS IN PHILADELPHIA AND CAMDEN. It will be of great help to your salesmen when calling on the trade.

DOMINATE PHILADELPHIA

Create maximum impression at one cost by concentrating in the newspaper "nearly everybody" reads—

The Evening Bulletin.

PHILADELPHIA'S NEWSPAPER

"In Philadelphia nearly everybody reads The Bulletin"

520,072 Copies a Day

Average daily net paid circulation for the six months ending September 30, 1925.

The circulation of the Philadelphia Bulletin is the largest in Philadelphia and is one of the largest in the United States.

Chicago Scene of 13 Fall Conventions With Audit Bureau as Focus

More Than 900 Attend Mobilization of Publishing and Advertising Forces—Vital Topics Discussed —Vote Against Abolishing Publishers' Semi-Annual Circulation Statements.

By WARREN BASSETT

(*By Telegraph to* Ed.tor & Publisher)

CHICAGO, Ill., Oct. 16.—An impressive mobilization of the most powerful publishing and advertising interests in the United States took place in Chicago this week, when more than 900 publishers and advertisers gathered for the twelfth annual convention of the Audit Bureau of Circulations and for the thirteen allied conventions held during the week.

It celebrated the beginning of the Audit Bureau's second decade of service, with the bureau standing in efficiency, activity and membership at its highest peak. Stanley Clague, managing director, in his annual report (printed elsewhere in this issue) said that the bureau now has 1,900 members, a new record.

Every hotel in Chicago felt the influx of convention delegates. On Wednesday, preceding the opening of the A. B. C. sessions, the allied activities reached their height, with five different groups meeting simultaneously at separate hotels.

Every section of the country was represented, and many Canadian A. B. C. members were present.

One of the most important topics up for the consideration of the bureau was the proposed abolition of publishers statements. The subject was referred to the various divisional meetings in the following form:

"Shall the publisher's statements be abolished, with the work of the bureau confined to the annual audit report?"

Action was to be taken upon this important subject at the general sessions today.

The newspaper division Thursday affirmed the resolution paying tribute to the late Victor F. Lawson, publisher of the *Chicago Daily News,* which was passed by the board of directors of the Audit Bureau.

The rapid growth of advertising was stressed by Stanley Clague. He told the convention that a billion dollars is now being spent annually in newspaper and periodical space in the United States and Canada.

Earnestness of purpose characterized all sessions. Every group meeting of the week was largely attended and each organization edited its activities down to a strictly business basis.

Convention week opened Monday night with a meeting of the board of directors of the Inland Daily Press Association and culminated in the brilliant annual dinner of the Audit Bureau Friday night, the latter the most successful in history.

Held in the huge ball room of the LaSalle, it proved such an attraction that an overflow dinner had to be arranged in an adjoining room where more than 200 were served.

Headed by Postmaster General Harry S. New as the principal speaker, those on the program included Senator Arthur Capper of Kansas; former Governor Frank O. Lowden of Illinois, and Henri Gagnon, publisher of *Le Solcil,* of Quebec.

O. C. Harn, presiding officer of Audit Bureau of Circulations, at Chicago said:

The real worth of the bureau is not in "making a few people honest."

The object is to create a better understanding among publishing and advertising interests.

Total membership of the A. B. C. is now 1,900, a new record.

Former Governor Lowden said it was a hopeful sign that those engaged in other occupations were beginning to interest themselves in the farm problem.

"It is the soil and its fertility which sets a limit to national growth," he declared. "The products of industry may multiply indefinitely. Today the working man enjoys luxuries denied a king a hundred years ago. Science and invention are busily engaged in suggesting new wants to man and then supplying them. We are spending uncounted millions upon luxuries of which our grandfathers never dreamed. If it were not for one limiting factor, no one can say to what heights this industrial era in which we live might go. That limiting factor is the raw materials that come from out the earth. Most important of all these is food."

Henri Gagnon, publisher of *Le Soleil,* Quebec, sketched for the assembled editors the history of "New France," its cultural and industrial achievements. He began with the French explorers who landed in the northeastern part of America in the 16th century and with rapid strokes brought the progress of the French in Canada down to the present time. Regarding newspaper development, he said there are now nine important French dailies in Canada and that every small town with a French population has its weeklies and bi-weeklies. He invited the publishers to visit the old capital of the province of Quebec.

During the dinner the publishers were entertained by a galaxy of grand opera singers that included Rosa Raisa, Rimini, Charles Marshall and Margery Maxwell. Following the banquet the delegates moved en masse to a special midnight performance of Eddie Cantor in "Kid Boots."

O. C. Harn of New York, president and chairman of the board of directors of the A. B. C., opened the general session of the bureau's convention Friday morning at the LaSalle with his annual report, followed by the presentation of the eleventh annual report of the board of directors.

Reports were then received from the departmental meetings held Thursday afternoon, at which a number of questions affecting the six divisions of the A. B. C. were discussed.

Nomination and election of directors whose terms expired at this convention was scheduled for the afternoon meeting of the bureau.

Meetings of the six departmentals of the A. B. C. were held Thursday afternoon at the LaSalle. Mr. Harn, presided at the meeting of the Advertisers' Division. The Advertising Agents Division met under E. I. Mitchell, head of Mitchell-Faust Advertising Company, of Chicago. Director David B. Plum, of the *Troy Record,* presided at the meeting of the Newspaper Division, while Director F. W. Stone, of the *American Review of Reviews,* was in the chair at the meeting of the Magazine Division. Director Marco Morrow, of the Capper Farm Press, was chairman at the Farm Paper Division meeting. The Business Publication Division met with Director Mason Britton, of McGraw Hill Co., N. Y., presiding. Canadian members met under Director John Murray Gibbon of the Canadian National Railways.

Thursday evening the members of the board of directors met to consider matters referred to them by the various departmental meetings.

Encouraged by the largest attendances in their histories, publishers, business managers, advertising agents and other newspaper representatives pronounced their various meetings the most successful ever held.

The Inland Daily Press Association which held record sessions, reported much progress in solution of various problems before it. In the matter of the cost finding system the members directed the employment of one man to work out in a practical way the application of the system to member newspapers desiring it. The report that the Southern Newspaper Publishers Association had voted to adopt a cost finding system was greeted with enthusiasm by Inland members.

With the agricultural districts in a really prosperous condition for the first time in several years, the meeting of the Agricultural Publishers Association reflected the optimism of its members over conditions generally. Plans for future development took concrete form. Business publishers outlined future policies and discussed present day problems.

The advertising agency members of the A B C indivisional meeting Thursday afternoon, voted against the abolition of publishers statements. Walter Hine, of Frank Seaman, Inc., New York, was nominated for director.

The newspaper division also voted to maintain the present system of publishers' statements. At its session a lively discussion of combination circulation of papers in separate cities at the price of one paper occupied a large share of the afternoon meeting. A resolution was adopted requesting the general assembly which meets Friday to ask the A. B. C. board of directors to rule that when two papers are sold in combination they must be sold at a price higher than either. The discussion revolved about the *Los Angeles Express* and its suburban affiliated papers. The circulations of each of the latter papers has hitherto been recognized by the Bureau as net paid, with the notation that the paper was circulated with the *Los Angeles Express.*

The Business Publications Division followed the lead of the agency and newspaper divisions in voting against the abolition of publishers' statements. The group decided also to change its name to the Business Paper Division of the A. B. C. and eliminate all but business periodicals.

The Bureau's annual report will be found on Page 4 and accounts of other Chicago meetings appear on subsequent pages. The Bureau's closing activities will be chronicled next week.

PUBLICATION WASTES DIE HARD, A. B. C. REPORTS

Yet They Are Small Beside Those of Decade Ago, Says A. B. C. Manager, In Annual Report—Urges Foreign Language Field Should Get Bureau's Close Attention

FOLLOWING is the eleventh annual report of the Bureau of Audit Bureau of Circulations:

The Tenth annual report submitted to the members of the Audit Bureau of Circulations at its last annual meeting was, appropriately, devoted in a large measure to a review of the achievements of the Bureau at the conclusion of its first decade of service to the publishing and advertising world.

It is equally appropriate in this Eleventh Annual Report that, not forgetting the achievements of the first decade, we should look forward as to the manner and methods for still greater achievements through which we can contribute to the allied professions of publishing and advertising.

While the fortuitous combination of words in the title of our Association made possible the familiar "A. B. C." which is now well known throughout the entire civilized world, yet to a certain extent it is a misnomer.

The inference given is that the Bureau is solely an auditing institution, whose duties are confined to the adding and subtracting of figures. This work plays a large part in the duties of the Bureau, but if its activities were confined to the work of an adding machine the many hours of careful thought devoted to your interests by the Directors and your executives, and the time devoted in traveling over one hundred thousand miles annually to attend the meetings of the Board of Directors would be to a large extent wasted.

And the same is true of the time devoted by the departmental committees who were appointed last year by some of the divisions of the Bureau.

This does not mean that your Board counsels a departure from the sound fundamental principles which have made the Bureau successful during the past decade. But it does counsel an open mind in the development of the Bureau's work.

A famous educator, Dr. Glenn Frank, President of the University of Wisconsin, within the last few days epitomized six rules for success given by a well known merchant in the East. He characterizes these six rules as "the A. B. C. of effective work in any job, big or little."

The sixth rule he gives as follows: "Keep the plan open to revision but do not allow it to be changed until after the most careful reasoning. You must not keep digging up your beans to see if they are growing. Be open minded about your plan; but remember that a mind can be so open that it is drafty. The best minds have swinging doors rather than open doors. They open for a draft of fresh inspiration in order to close it on a decision, to be gladly opened again when the decision is to be revised."

The Board desires to emphasize again its opposition to departure from the sound principles on which the Bureau has been built. The presentation of accurate figures by which the advertiser and advertising agent can more successfully spend the advertising dollar is the alpha and omega of the Bureau's work. Opinions as to the value of such circulation must be left wholly to the judgment of the advertiser and the advertising agent.

But to enable the advertiser and the agent to wisely judge circulation, he must be given the full facts concerning such circulation. He must know, not merely the total copies distributed, but he must know where they were distributed; he must know how the subscriptions were secured, the price paid by the subscriber, the condition of his payments and many other vital facts. In the Business Paper field he must know the class and character of the recipients.

He must know all these things in order to avoil waste. It is within the memory of many who will read this report that 10%, 15%, 20% in some cases 30% waste existed. This was before the days of the A. B. C.; but even today there exists a volume of waste in the publishing and advertising business which, while not as large as formerly, is economically unsound. This very largely exists outside the membership of the A. B. C.

It has been stated that the total volume of newspaper and periodical advertising in the United States and Canada now nearly approaches or has already reached the billion dollar mark. If the activities of the Bureau have saved or are now assisting in saving only 10 per cent of this amount, the tremendous figure of $100,000,000 per year is the result. And when the millions of tons of white paper consumed is taken into consideration, the value of the Bureau's service has not been confined to advertisers alone, but has also embraced the entire publishing business.

Every ton of white paper needlessly used to endeavor to secure results for the advertiser or to serve the public is a wasteful decimation of our forests—and it is in this respect that the work of the Bureau extends beyond the advertising and publishing business, but should interest every citizen of the United States and Canada.

A careful analysis of the waste of a limited number of publications made not many years ago showed that this waste on these publications alone was sufficient to destroy every year a forest which would cover the whole of Manhattan Island.

This is being eliminated. Waste is much less than it was ten, five, even two years ago. But the price of maintaining this forward movement in the elimination of waste is eternal vigilance on the part of both advertisers and publishers.

In order to maintain and enhance the results of the Bureau in this elimination of waste, your Board again appeals to advertisers and advertising agents to carefully study every detail of the analysis of circulation methods. In spite of repeated appeals to the space buyer to carefully analyze every detail of both the publisher's statement and audit report, there still exist those who accept total figures without reference to the full analysis to be found only in the Bureau's reports.

This attitude on the part of a diminishing number of space buyers is the result of lack of appreciation of the damage involved. Not only are conscientious publishers discouraged in their effort to maintain high ideals, but the acceptance of total figures gives aid and comfort to those outside the Bureau whose last desire is to give the complete analysis required from A. B. C. members.

Aside from total figures, it is the "big, little things" in a circulation report which count most—and sometimes the "big, little things" count for more than total figures.

And it is to the adjustment of these "big, little things" that the Board of Directors applies its time at each meeting, so that out of the adjustments of these cases there may be established month by month a slow but constant advancement of the ideals underlying the institution.

If members of the Bureau could attend the monthly meetings of the Board, they would have a keen appreciation of the thought and care given to individual cases, which may have an influence on the changing of a rule or the reaffirmation of the justice of an existing rule. The Board has often wished it were possible to open up these meetings to members in general, but this is not practicable because of the necessarily confidential nature of the information which must be laid before the Board before decisions are reached.

At the September, 1924, meeting of the Board the followni resolution was passed:

RESOLVED, that the Managing Director be requested to suggest to eacn division of the Bureau the election by the division of a divisional committee of five each, whose duty it shall be to bring before the Board, either in writing or in person, any suggestions which they may consider desirable for the welfare of their division or any member thereof; such divisional committees to be elected for a period of one year.

In response to this suggestion several departments appointed committees to work in cooperation with the Board of Directors. Several committees have met both separately and with the Board of Directors, with beneficial results. Each committee worked upon the theory that its advice and counsel could be valuable only when general principles were involved. The members of these committees knew that they had neither the time nor opportunity for the adjudication of competitive differences and these were referred to the Board, which in every case has given all the facts possible. It is hoped that this work of the departmental committees will be continued and extended during the coming year. Your Board desires to record its especial appreciation for the work done by the Newspaper Committee. The members have traveled thousands of miles to meet the Board and their recommendations have been soundly constructive.

From this 1925 convention of the Bureau, there will be absent for the first time in many years the gracious presence of Victor Fremont Lawson. He will be absent from conventions of other associations—the American Newspaper Publishers Association—the Associated Press (of which he was one of the founders)—but from no association will he be missed with keener regret than from the annual meetings of the Audit Bureau of Circulations.

The following resolution was unanimously adopted at the September meeting of the Board of Directors:

"The Audit Bureau of Circulations through its Board of Directors, representing a membership composed of 1890 of the leading publishers, advertisers and advertising agents of the United States and Canada, desires to place on record its expression of profound sorrow in the passing on of Victor Fremont Lawson, late publisher of the Chicago Daily News.

"The journalistic world has lost a leader whose influence extended far beyond the North American Continent, one who by his far sighted vision in sending emissaries to all corners of the world to gain unbiased views of progress, contributed greatly to the fund of knowledge so essential in the years of reconstruction since the War. The passing of Victor Fremont Lawson is not only a very great loss to the United States and Canada, but a loss to the entire civilized world.

"To an almost equal extent the journalistic world is bereft of a great business leader.

"Over thirty years ago Mr. Lawson pioneered the way toward an honest deal between publishers, advertisers and advertising agents. Not only did he insist on a fair basic rate to all advertisers, but, anticipating the Audit Bureau of Circulations of which he was a charter member by almost four decades, he insisted upon the right of the advertiser to know exactly how many copies of his publication reached actual buyers and readers.

"At the head of his editorial column the net paid circulation of the Chicago Daily News has been stated since the year 1877 and not one year since that policy was established by Victor Fremont Lawson has the truth of his statements been successfully assailed.

"The Audit Bureau of Circulations, through this action by the Board of Directors and the Canadian Advisory Committee, feels that in honoring the memory of Victor Lawson, it is placing on record a tribute to a man who, perhaps unconsciously, not only made possible to a large extent the establishment of the A. B. C. but through his active personal interest contributed substantially to its success.

"Men of the type of Victor Fremont Lawson can be ill spared from the journalistic and business world of the United States and Canada, but if his career, and his example, inspire the youth of the North American Continent to carry on in journalism as he carried on, we need have no fear of the future.

"AUDIT BUREAU OF CIRCULATIONS
"STANLEY CLAGUE
"Acting Secretary."

Your Board presents herewith the report of Arthur Young & Company, showing a satisfactory increase in the balance available to cover membership liability.

The obligation to members as established by Arthur Young & Company as of August 31st, 1925, is $186,314.39. The balance available to cover this liability as shown in the report is $185,867.96.

There is, as expected, a slight increase in the liability to members, due as stated in last year's report, to the increase in publication membership. This is caused by the fact that the increase in publication membership has been and must from now on necessarily come from publications of small circulations, the dues from which do not always cover the cost of service rendered by the Bureau.

The increased efficiency of the Bureau must also result in increased cost of operation. There is a constantly growing demand for more and more outside investigations supplementing the inside work of our auditors, which will necessarily result in a decrease in the amount which can annually be added to the balance available to cover the liability to the membership.

While the Bureau is in an excellent position in that its liabilities are adequately protected by sound assets, and while it is the plan and purpose to meet these increased demands for outside investigations, progress in this direction must only be made with regard to sound business practice.

Care should also be taken in the adoption of any sugestion which would substantially increase the cost of operation. Several suggestions have been made as to the extension of the Bureau's service. For instance, one suggestion has been made that would involve an increased cost to the Bureau of approximately $29,000 per annum without any revenue to offset this increased cost.

The service which the Bureau is rendering to advertisers and advertising agents in connection with the "Blue Book," which has been so widely appreciated, is also adding to the cost of operation. Your Board believes that this service is fully warranted and it is planned to continue the issuance of the "Blue Books" during the coming year.

The financial condition of the Bureau is thoroughly sound, but every care should be taken to maintain this status.

Some progress has been made during the year in the movement to secure larger representation of this branch of the press in the membership of the Bureau, but not as much as the Bureau had hoped. The intensive work on this branch of publications will be continued during the coming year.

Advertisers and advertising agents can contribute materially to the progress of this endeavor by appreciation in a practical way of those publications which submit their circulations to a thorough analysis by the Bureau. A great work can be accomplished in this direction by making possible the success of worth while publications printed in foreign languages.

As stated in last year's report, there are about twelve hundred foreign language publications printed in the United States, in about forty different languages. It has been asserted by an authority in this field that a real service would be rendered not only to the publishers of foreign language papers and to advertisers and advertising agents, but also to the American people, if the light of circulation truth extended to this branch of journalism, thereby making possible the success of worthwhile publications printed in foreign languages, which would inevitably result in the spreading of true American principles among our people of foreign birth.

A special representative of the Bureau, speaking six European languages, is employed to keep in touch with the publishers of foreign language papers and to assist them in the maintenance of records adequate to the Bureau's requirements.

If advertisers and advertising agents will cooperate in this movement it is

SEND FREE PUBLICITY TO ADVERTISED CONCERN

n Inland Address Huckle Commends EDITOR & PUBLISHER Space-Graft Fight and Approves Remedy—Bitterly Assails Editors Who Use Free Advertising as News—Situation Improving

UBLISHERS who run free publicity articles were condemned and propa-ndists were termed "grafters" by T. O. uckle, business manager of the *psilanti* (Mich) *Press,* in a talk on ree Publicity; Its Abuses—How to ight It" before the Inland Daily Press nvention at Chicago on Wednesday.

EDITOR & PUBLISHER came in for com-ementary remarks by the speaker, be-re he opened his formal talk, in which showed the co-operation extended in ghting free publicity, and articles from DITOR & PUBLISHER were used in illus-ating his salient points.

Mr. Huckle quoted the following letter nt by his newspaper to a New York to-truck manufacturer:

"Yours at hand regarding New Ash and rbage Truck. After reading the illustrated aterial and your suggestion that we run the ustrated news story (mat furnished) in our per we know you are going to grant us the llowing request:

"On all your trucks sold in Michigan will u please have the following printed on both des, having name of our paper in red: 'You n not cover "The Ypsilanti Trading Territory" ithout advertising in the Daily Ypsilantian-ress. Advertising rates on request.'

"The lawyers say in law that a jug handled reement won't hold water. It must be ualized. In business there is only one satis-ctory deal, i. e., where everyone profits."

The speaker asked: "Do you think my quest is absurd? I say not a bit more than those we publishers receive in lmost every mail. As publishers we ust first admit that some of the free blicity material is not only interesting t beneficial to our readers." He men-oned the financial reviews of the Guar-nty Trust Co., New York, and the nion Trust Company of Detroit.

Concerning architects who employ ress agents the speaker said: "Too hical to take paid advertising they are xious to send in write ups in which re included their names. How many re today who do not attach the chitect's name under the illustration of new local building, or in a real news ory? How many have been featuring e numerous parts that are going into e giant salt water ship *Malolo* by ac-pting propaganda news stories sent out Gibbs Brothers, Inc., New York chitects? How many have featured ogganson Bros., New York bank archi-cts, when a fine new bank was built in our own town? In doing this are you ir with those who make your paper ssible with paid advertising?

"Another profession that robs the cash awer with their so-called ethics and t as a national organization are spend-g thousands of dollars for so-called humanitarian" news stories broadcast rough their Hygeia and kindred chan-ls are the doctors. In mentioning the ctors we must also recognize the eye ght conservation propaganda.

"As publishers we realize the import-nce of the farmer's prosperity to the owth of the nation, and so does the lue Valley Creamery Institute, Sears ebuck & Co., and others, but theirs is different motive.

"When a new hotel stock company is anned for a large city, a big manu-cturing venture contemplated, a con-lidation of certain public utilities con-dered, a railroad merger comtemplated, d many other ideas in which the prime otive is to sell stock; those behind the ovement get in touch with the "space afting publicity writers," who live at e expense of the publisher with the re-ilt that newspaper editorial rooms are oded with attractive and illustrated ews stories." The promoters then mply sit back in swivel chairs, send out eir stock salesmen, and await the shear-g of the lambs lead to the slaughter the 'easy mark' publishers who even day accept such propaganda as news.

"How beautiful are some of the pic-res of the fair sex used to illustrate certain kind of shoe leather, knitted ear, silk hosiery, embroidery, and scores others. Is it the attractive girl in the picture that makes such fools of publishers who ran these as feature articles to the detriment of the cash drawer?

"The worst offender is our own government and particularly the civil service department which issues an enormous amount of propaganda all too well known to the publishers. Write them about it and their only answer, in effect is: "We can see your point of view but there are no funds available for this, but really it is news." Some publishers ease their minds into believing that a local civil service opening is of news value, but charge their best local advertiser for a classified ad if he wishes to hire a new clerk. The same applies to government savings stamps and the postal savings department, but the publisher takes cash from his local bankers who use 'honest-to-goodness' advertising space to put their thrift messages across.

"How many publishers are 'holding the bag,' while outsiders use the American Legion as the point of contact to get local interest? The outsiders take the long end of the receipts for entertainments after the public has donated liberally with the thought that it was for the ex-service men while the Legion gets what is left. Of course the publisher gets nothing. I think every publisher should visit the local Legion, and all others who are being used as tools, and put the matter up to them and stop these public mulchers riding under false pretenses.

"Isn't it time that publishers awoke and stopped running the unlimited amount of bunk that is now coming from the automobile industry, even if it is spending large amounts for paid advertising? Is it news that the 'Speedum' car goes in high from the Atlantic to the Pacific, or is it propaganda? Publishers have made Henry Ford the richest man in the world, while many of them may have hard times paying their own bills. Is it fair to charge higher rates for automobile advertising and include their bunk, as some publishers do, and foist it upon the reading public as news?

"In passing I might ask is not the local merchant entitled to just as much free publicity as the automobile manufacturer, and yet none of you, I dare say, run weekly column articles for even your best advertising merchant.

"How many state fairs can exist without the newspapers? How many of them are taking even a semblance of paid advertising, they should in putting them over, but rather are depending on free publicity? How many state fairs are in the hands of politicians instead of real business managers who know rural life instead of the gay midway and questionable amusements.. Yet some publishers support state fairs to the limit.

"I believe it is needless for me to dwell further on special interests or individuals who are growing rich at our expense. But in passing I want to ask. Are the great news feature services above reproach in this matter? We all received an unlimited amount of propaganda on behalf of the rodeo here in Chicago, and the new Union Station and I assume in large part it was not printed, but here we have an illustrated item from a well known feature service which charges well for its material, including both the rodeo and the Union Station, in a very attractive illustrated features.

"Who is to blame for this free publicity octopus? No one but the weak-kneed or indifferent publishers. I have used 'space grafter' to designate the man who sends out this material. But he is as human as we publishers and I ask, who of you here today, from a financial standpoint, would not consider stepping into his shoes to receive some of the fancy salaries paid with no material equipment capital or Saturday night pay rolls to worry about?

"It was mentioned in our meeting two years ago that one space grafting organization offered for $80,000 to do more for a certain national advertiser with 'news articles' than they could get with their contemplated $100,000 paid space appropriation. Who would not want to save a clear $20,000? Why blame the advertiser?

"It is a strange coincidence that I should be listed on the program today with a talk on free publicity following H. Colin Campbell, who represents one of the greatest co-operative working organizations in America today, which has been slammed right and left by some publishers. So have the Society for Electrical Development, the fruit growers exchanges, Cycle Trades of America, the Enamelware Association and many others.

"Times have changed in some instances. Today the Portland Cement Association and some others are buying advertising; the cement advertising, by the way, is running in nearly every daily paper in Michigan besides a large list of weeklies. Then note the co-operation extended this month by the Portland Cement Association in Fire Prevention Week advertising and the tie-up advertising of the Cycle Trades of America.

"While these and many other big national organizations and advertisers are not entirely convinced something has been accomplished by these organizations co-operating more freely with the publishers. It was through Mr. Campbell's personal visit and free and frank discussion with members of the Michigan League of Home Dailies at a gathering last year that a better understanding was had of the interests and purposes of both sides and the way paved for Michigan cement advertising.

"Every live publisher is already conversant with the fact that hundreds of space grafting publicity artists are being well paid and their clients made rich. They want to know of a remedy to help kill the octopus. Throwing the material into the waste basket is not going to help much as long as some publishers will let it get into print.

"I would suggest that all free publicity material received at every newspaper office be first sent to the business office for perusal before the editorial end has access to it. The business office can more quickly detect the joker and also stop the city editor or others from letting it get through as news.

"Then I would mail it back as received each day to the advertiser, (not publicity grafter) in a plain, unstamped envelope with a circular or folder drawing attention to this great evil against the publishers of America. It might be well to also include a rate card. I have used different methods.

"Stop for a moment and think what it would mean if every one of the 242 members of the Inland Daily Press Association would do this for but one month and the advertiser received 242 requests from as many postmasters telling them a letter was held for 2 or 4 cents postage. Then if our association could interest other regional publishers in this I venture to say more than one arm would be cut from the octopus."

LAYING THE SPACE GRAFT PROBLEM ON THE DOOR-STEP OF THE FREE ADVERTISER

THE following is a circular letter which is enclosed with all space grafting offerings as they are returned to the advertised concern (not the press agent):

If You Were a Publisher

Three Questions

Has it ever been your privilege to sit in an editorial chair and receive the great amount of help (?) that the publisher receives in every mail from those who have "news" stories for the dear public?

If you were a newspaper publisher, honestly, would you be fool enough to be asleep at the switch (or too lazy to write real news stories) and let such propaganda as you are sending out get into your news columns?

Do you think a publisher would be fair to his readers if he should run your propaganda (returned herewith) as news matter?

ANOTHER ANGLE TO THE QUESTION

The man who wrote the enclosed; the artist who drew the fine illustrations; the engraver who made the cuts; the printer who printed the material; the mat manufacturer; also others "got theirs"—and the publicity artist who sent the enclosed is receiving a very fancy salary, or is a big fool.

WHAT DOES THE PUBLISHER GET?

All of the above is worthless unless it appears in print—and yet what does the publisher get?

We enclose our latest rate card and upon receipt of your order and check we will be glad to run some "honest-to-goodness" paid advertising. In the meantime please have The *Daily Ypsilantian-Press* taken from your list of "weak-kneed" publishers.

PAY FOR DISPLAYS

Advertisers Should Not Expect Unreasonable Free Service

Members of the Pacific Northwest Newspaper Advertising Executives' Association, meeting last month at Tacoma, discussed merchandising co-operation which would prevent competition leading to excessive and unreasonable trade service.

The standard of merchandising practice adopted by the National Association of Newspaper Executives was reaffirmed, with the added sentiment that newspapers should not install window or counter displays unless such service is paid for by advertisers.

In the event that any individual newspaper renders to any advertiser any form of unusual service not covered by the standard of practice, that newspaper shall notify the other newspapers of the details of the service given.

S. S. Anderson, advertising manager of the *Tacoma News Tribune,* was elected President and J. A. Davidson, manager of the merchandising service department of *The Oregonian,* was elected secretary-treasurer.

"THAT'S NO AD, IT'S A PLAIN EDITORIAL!"

Press Agent for Tailors Guild Imputes Lack of Brains in Cleveland Editor Who Wants Pay for Publicity

When the Born Tailors' Guild began a month ago to flood newspaper offices with matrices and proofs of free publicity designed to educate the male public in matters of good dress, its offerings to the *Clveland Times* reached the desk of Marshall R. Hall, financial editor. Mr. Hall noted the satiny stationery which convoyed the Guild's copy. He noted the "Office of the Fashion Director" at the upper left corner of the letter-head. Then he wrote to the "Fashion Director," presuming that the mats and proofs were for a schedule of paid advertising in the Times and would the Guild please indicate whether it had any special page or position preference, etc.

"I should like to know what there is about the articles from the Born Tailors Guild that should make you think that they were intended to be run as paid advertising in the Cleveland Times," came the prompt rejoiner from the Fashion Director, Glenn G. Hayes by his signature.

"For the life of me," he continued, *"I can't understand how any advertising man with any brains could misconstrue a plain editorial as a paid advertisement.*

"The Born Tailors Guild hasn't a thing in the world to advertise. It is purely an educational institution established to promote better dress among men and boys, and what funds we have available are used entirely in educational work. Advertising is to sell something, and we haven't a single thing to sell. We did go to the trouble to prepare in mat form these articles on men's dress, all of which are strictly educational and do not contain one iota of advertising. A set of these were sent to the Cleveland Times, because we believed that the readers of this publication would be interested in this message. We still believe that. We should like very much to have you turn them over to your feature fashion editor for his best editorial consideration."

To which Mr. Hall replied:

"Thank you very much for your letter which disillusioned me about the matrices and articles that were turned over to me in connection with your 'educational' drive.

"If by educational, you mean spreading through newspapers a demand for fashions created by the Born Tailors Guild, then you certainly are right in your contention; unfortunately, however, a real newspaper cannot appreciate the subtlety of your views.

"By creating a demand for Born fashions, I have no doubt you are able to sell to wide numbers of tailors designs that originate with your company. I can hardly bring myself to believe that you GIVE this service away, or that you are a philanthropic institution devoting its time and money to helping poor, miserable man to improve his personal appearance and without hope of remuneration for your efforts.

"I grant you that your matrices and articles do not carry an outright hint that you have anything other than a fashion service to sell, but you must surely admit that you are asking a lot of valuable space from newspapers for material that is of no earthly benefit except to the Born Tailors Guild.

"I appreciate your hint that I haven't any brains. If I really had any, I probably would be a fashion director of some tailoring establishment instead of a lowly financial editor. There, again, I am unfortunate. Born that way, perhaps.

"But, speaking plainly, don't you think that the Born Tailors Guild has a lot of unmitigated gall in asking newspapers to spread the firm name over the continent without hope of remuneration for the service?

"Despite what you say, your stuff is advertising pure and simple, and your prejudiced contentions cannot change this condition. You are spending good money on space-grabbers and on occasion you doubtless get the space you seek from deluded papers with editors who care more to fill up their columns than to produce quality news. The same money spent in the legitimate advertising that you really should be using would do you a lot more good and cover a lot more territory."

"Golden Circle List"

To make it easier for advertisers to use Southern California newspapers, Ben H. Read, Managing Director of the Southern California Editorial Association, Los Angeles, has compiled the rates of the members of that association and placed them before the advertising agencies. "Golden Circle List" is the name coined.

Indiana Daily Chances Field

The *Connersville* (Ind.) *Free Press* has changed from the morning to the evening field.

CAMP FIRE GIRLS TENDER BAIT ON OLD PRESS AGENT HOOK

Scores of Newspapers Fall for Story Broadcast to Advance Colleen Moore, the "Perfect Flapper"

MORE than 160,000 American lassies, associated in the Camp Fire Girls, Inc., learned through newspapers of the country the other day that they were engaged in a "crusade" led by a motion picture actress.

The campaign had as its alleged motive the utter abolishment of the word "flapper."

None of these little girls knew, of course, that this gallant fight against the "odious and unfair" term as applied to maidens of this day and age, had been set into motion by the press agent of the First National Pictures, Inc., but each must have taken quite seriously the stuff that got into an Associated Press di patch.

It was a fair example of how the pre agent defeats advertising by framing "news" story. Inconsequential as w the "news" in world affairs, it doubtle seemed important to many Camp Fi Girls who were unconscious bait for free advertisement.

The original "release" of the Fi National's press agent coined story abo Colleen Moore, "long known on t screen as 'the perfect flapper'" and n had been "invited" by officers of t Camp Fire Girls to lead a nationwi campaign against the use of the te flapper. The actress had wired fr Holywood, quite naturally, that she wo accept the kind invitation and, thus e couraged, the press agent fired hundre of words of free advertising which land in news columns of many papers, oft in first-page "boxes."

The Associated Press put the story from New York under date of October saying that Colleen Moore, "known the perfect flapper of filmdom," had be "drafted" for the business of leading t Camp Fire Girls' crusade. The A. carried an interview with Lester F. Sco national executive of the Camp F Girls, who was not asleep to the opp tunity to issue a little Camp Fire enli ment propaganda and appreciation of organization.

Miss Moore's press agent gave out telegram he said she had received fr Mrs. Oliver Harriman, President of Camp Fire Girls, wherein that lady pleadingly asked: "Would you lead nationwide crusade of Camp Fire G to stamp out the use of the odius word

EDITOR & PUBLISHER got at the facts the case at the headquarters of the Ca Fire Girls, Inc., in New York this we It was admitted that the press agent the First National Pictures had sugges that the Camp Fire Girls invite M Moore to lead the battle; this was d with the full consent of responsi officers of the Camp Fire Girls; object was considered worthy. It stated that officers of the Camp F Girls, Inc., were aware of possible vantages to accrue from newspaper p licity concerning its activities, altho hooked to the wagon of the motion ture star.

Colorful Angora Yarn Embroidery To Add a Furry Touch of Warmth

SOMETHING really new for your child's dresses this Autumn is English Angora yarn in the loveliest of colors. Little children are adorable in knitted suits made from it and older children look charming in dresses trimmed with it. These new yarns are especially desirable for children's clothes because they wash beautifully. In fact, they become furrier with each washing. They never mat. They are made from the fur of Angora rabbits, fluffy, white animals that grow fur six inches long. The fur is spun into yarn and dyed in the newest French shades. It can be worked in various cross-stitch designs on net or any loosely woven washable material. The range of colors is large and includes all the delicate pastel shades so suited to children, as well as the deeper shades and black. In making a child's dress it is well to do the major part of the embroidery in delicate shades and use but a small amount of the deeper shades for contrast. The yarn is extremely light so it can be employed in complicated designs without making a garment too heavy for a child. While these Angora yarns give the effect of fur, it is rather nice to know that it is obtained without in any way harming the winsome rabbits that furnish the fur from which it is spun.

Gay Angora Designs

THESE girls are wearing dresses that they have embroidered themselves with the new English Angora yarns. The one with the jumper is wearing a hat knitted from the yarn and embroidered to match the jumper. The jumper is made of a heavy net embroidered in tangerine and black Angora yarn. The other girl's dress is of a finer net embroidered in a floral design that is carried out in lovely pastel shades. English Angora yarns are made from the fur of Angora rabbits, spun into yarn and dyed in the most delightful French shades. This beautiful embroidery actually improves with washing.

A Cosy Suit to Keep Him Snug

NOTHING could be prettier than a knitted suit of English Angora yarn for the small child. It is so soft and furry that it seems completely suited to a baby. The yarn is spun from the fur of Angora rabbits, snow white little animals with pink eyes that differ from our own white rabbits in that their fur attains a length of six inches. This new yarn is dyed in the prettiest shades. It makes an adorable suit for a baby in white, pale pink, pale blue or pale yellow. An older child might look charming in a suit knitted in Antwerp blue Angora yarn, which is dark, or in a bleue de France, which is bright. A brown eyed child would be pretty in a suit knitted from one of the brown shades such as suede, cameo tan, cinnamon or perhaps a russet. The yarn washes so well that you do not have to think of selecting a color that will not require washing. In fact, each time it is laundered it becomes more furry. English Angora yarn is very light and, being made from fur, very warm. A little suit with cap and mittens to match would make an incomparable Christmas present for a child.

Smart Hat and Scarf

THIS snug hat and scarf to match can be made by any girl who is clever with her needle. The material is sand colored duvetyne. The embroidery that makes the set so smart is done in English Angora yarns in warm Autumn shades. These yarns are something very new that have just been introduced in this country from England. The colors used in the conventional design are suede, russet, cinnamon and tangerine. These give an effect of cheerful warmth most gratifying on a frosty day.

All free! Just think of the high privilege of publishing these valuable mooch advertisements for the English angora yarn people, as "news,." An editor would have to be hard up for "filler," it would seem.

New News Course in Birminghan

Birmingham-Southern College at Bi ingham, Ala., has established reg classes in journalism, with practical w in writing newspaper stories. Profe Michel C. Huntley of Milsaps and Em University is the head of the departm Professor Huntley has had several y of practical experience under E. M. F derson of the Associated Press in A bama, in addition to his Univer training.

Fort Madison, Ia., Loses Its Dail

The *Fort Madison Broadcaster* morning publication, which started a semi-weekly March 17 and became a d last August, has suspended. Mark F son of Nauvoo, Ill., founded the pa but turned the business over to fou his employes, Nick Cowherd, Collie ter, Hilding Bingston and Ted S The last issue was dated Sept. 26.

Iowa Daily Incorporates

The *Oskaloosa Daily Herald* has incorporated with $60,000 capital. Hoffman is president of the comp Arthur Walling, vice-president, and M gie Hoffman, secretary-treasurer.

Sunday Edition in Ft. Lauderda

The *Ft. Lauderdale* (Fla.) *New* now publishing a Sunday edition. Associated Press board of directors week approved the newspaper's plea the Saturday night news report.

CALIFORNIANS READ MOST PAPERS KELLOGG TELLS INLAND PRESS

Largest Percentage of Newspaper Readers to Population— Inland to Further Perfect Cost-Finding System— S. N. P. A. Adopts Inland Methods

By LUCILE BRIAN GILMORE

(*By Telegraph to* EDITOR & PUBLISHER)

CHICAGO, Ill., Oct. 15.—Another forward step in the development of a cost-finding system for newspaper publishers was taken by the Inland Daily Press Association Tuesday and Wednesday, during the autumn meeting of the organization at the Hotel Sherman, Chicago, when Clifford Yewdall, accounting expert of New York, was engaged by the association to promote the cost-finding work. He will assist the members of the cost finding committee, A. L. Miller of Battlecreek, Michigan; Chairman, C. L. Butler, Mankato, Minnesota; and A. J. Wilhelm, Huntington, Indiana; who have devoted several years to the plan which has attracted the interest of publishers in every part of the country.

At the Wednesday evening session of the association, John A. Park of the *Raleigh* (N. C.) *Times,* announced that the Southern Newspaper Publishers' Association had decided to adopt the cost-finding methods evolved by the Inland Daily Press Association. Inquiries have been received from publishers in Australia and Hawaii, as well as from hundreds of American newspaper owners.

The fall meeting of the association was attended by one of the largest gatherings ever assembled, attracted by many new features and important problems of the organization. Two amendments to the By-Laws were accepted at the two-day session, one fixing dues of members, and the other providing for a budget committee to control the expenditures of the association.

The laws adopted read: Amendment to Article 4, Section 2; the dues of each member of this association shall be $10, plus such additional sum, not to exceed $3 for each 1,000 circulation or major fraction thereof, and may be determined by the Board of Directors; and said circulation to be the figures submitted by the member in its record to the government the October preceding; provided that the maximum amount of dues to be paid by any member shall be $100. This method of computing dues shall become effective January 1, 1926, and dues shall be payable semi-annually, in advance.

"Amendment to Article 2, Section 4: The president, secretary, and chairman of the board of directors shall constitute the budget committee. In December of each year the budget committee shall meet and formulate a budget for the ensuing fiscal year, which budget shall include the amount necessary to be raised from dues and the manner of its expenditure, and shall submit said budget to the board of directors.

Section 5. Expenditures for any purpose in excess of the amount allotted thereto in the budget shall be made only with the unanimous approval of the budget committee.

A report of the re-organization committee of the association was tabled until the next meeting of the association in February. A resolution was adopted, thanking the Canadian National Railways for its invitation to the association members to make a trip through Canada. "A see Canada Club" will be organized among individual members and the sight-seeing trip most likely will be held in May, following the meeting of the Association then.

George C. Lucas, executive secretary of the National Publishers Association, addressed the meeting at the Tuesday morning session on postal conditions, following a report of that committee by Mrs. Zell Hart Deming of Warren, O.

H. Colin Campbell, secretary of the Portland Cement Association made a short talk on "High-Way Construction in Relation to Newspaper Delivery." "There is not any industry that exerts a greater influence on prosperity in this country, or the reverse, than the construction industry, interpreting the term in its largest sense," Mr. Campbell said. "Put a stop to construction and you put a damper on a lot of other things." The relation between literacy, newspaper circulation and population was interestingly presented to the association by R. S. Kellogg of the Newsprint Service Bureau, of New York, in a lecture. California leads in the percentage of newspaper readers to population, according to Mr. Kellogg's charts, with Illinois second. An unusual addition to the program of the meeting was a past president's luncheon Wednesday at which many interesting reminisences of past inland days were recalled by the speakers. A. W. Gleasner who was president of the association from 1902 to 1905, who is now associated with the Excelsior Furnace Fittings Company, Chicago, presided, as toast-master. Because of the press of business attendant upon the launching of a new publishing enterprise in Sarasota, Fla., President George D. Lindsay, of the *Marion* (O.) *Chronicle* was unable to be present at the session of the Inland Association. J. E. Campbell of the *Owosso* (Mich.) *Argus Press,* vice-president, acted in Mr. Lindsay's absence.

BUSINESS MANAGEMENT VITAL FACTOR

By H. C. Stilley

Chief Accountant of *Chicago Tribune* in an Address This Week Before the Inland Daily Press Association at Chicago.

IN my opinion the most important factor in the development of the newspaper business is its business department and its business management. Let it be understood that a newspaper, in every department of its activity, must apply common sense business methods. The more attention paid to its business management, the greater is the promise of success of its business. It has been true in the past that a large number of newspapers have been able to exist by employing slipshod or indifferent business methods, but if the causes for financial failures in the newspaper business were analyzed, I venture the opinion that a large majority of such failures can be atributed to the fact that proper attention was not given to the business side of their operations. Publishing a newspaper cannot become a reality without some sort of business management, and therefore that part of the business of publishing a newspaper which relates to the revenues, the expenditures, the production, and the accounting should properly be under the supervision and control of a man especially fitted to analyze and direct the affairs of the company by acceptable business methods. The subject under discussion, therefore, is one of tremendous importance and in the limited time at my disposal, I will attempt to dwell only upon the functions of the business departments of a newspaper in which all of the business activities of the paper are placed in the hands of one man.

If the organization of a newspaper is such that its business management in respect to its different departments are entrusted to the managers of each department, some degree of success can be attained, provided the manager of each department is able to apply business methods and consider the affairs of his department in a business way when occasion requires. The organization of a large metropolitan newspaper requires concentration of its business affairs and the supervision by one man of that portion of its business which relates to its revenues, production, disbursements and accounting. This department, when the company is so organized, becomes the manufacturing department of the concern. The business manager is the manufacturer of the concern and it evolves upon him to produce, circulate and attend to the financial needs of the paper. The business manager in particular, and his staff generally in the business department, whether wholely under his control or only partially under his control, must be men with cool heads and sound business judgment. The business manager must be able to act with decision and firmness and he must have a general knowledge of business and business methods. He must be able to co-ordinate the business of his paper with all other departments. The business manager and his subordinates, of necessity, must furnish the labor and material for producing the paper. He must apply keen business judgment in the sale of the paper and of the advertising that appears in the paper. The revenues must be made to exceed the expenses and the funds must be conserved and properly disbursed. In a large metropolitan newspaper all of the mechanical departments naturally fall under the direction of the business manager of the paper. The purchase of raw material and all supplies for the printing of the paper must naturally come under his control. Adequate and proper machinery and equipment must be installed to meet the requirements of the paper. The business manager naturally is the guardian of the credit of the paper and therefore he is responsible for the economies and the reduction or elimination of extravagances.

Prior to the world war many newspapers conducted their business regardless and in spite of extravagances which would have been fatal to the success of any other business, and evils then existed which were accepted as being necessary, without any thought of their elimination. Labor then was much lower than it is at the present time and the trend of most newspapers was toward extravagance, first in the consumption of paper and second, in the acceptance of advertising for which little, if any, thought was given concerning payment. The paper was circulated without much regard to revenue and in some instances, at least, of which I have personal knowledge, the only thermometer by which the owners and publishers of the paper determined the success of their operations was the available cash in the bank on the first of each month. The war brought on a changed condition. Labor became scarce, the supply of news print was regulated and a tax was levied upon the profits made. This new condition made it necessary that the owners of newspapers should make an inventory of their conditions. Within a few years the waste in newsprint had been materially reduced and many economies were employed which put the business on a sound financial plane. More attention was paid to accounting and the accounting department became a real factor in the business.

Never in the history of newspaperdom has the accounting department been so vital and important as it is today. The owners of newspapers through their business managers are able to ascertain the actual conditions of their business through the accounting department which mirrors and reflects a true picture of revenues and costs. It is generally conceded that The Chicago Tribune is one of the most progressive newspapers in this country and I can say without fear of contradiction that there is no other newspaper in this country in which the business department and the accounting department under the business manager have been brought to as high a state of perfection to render real service to the owners of the paper in keeping them informed of their business at all times. The owners of the paper recognize the value of service of this kind and the auditing and accounting departments have ceased to be a necessary evil. I will refer, therefore, to the auditing and accounting departments as an important factor in the management and operation of a newspaper, believing that my hearers are interested in the methods employed by us for keeping the business manager and the owners of the paper fully informed.

More than four hundred people are employed in the business management, auditing and accounting departments of the Chicago Tribune. This is about one-sixth of the entire number of people employed in the business by the company in this country. I believe this demonstrates to you that we at least recognize the value of the work performed by these people. This department, under the auditor and controller who is accountable to the business manager and the president of the company, sees to it that all the revenues are placed upon the books, all the expenses and disbursements are made in accordance with agreements and contracts entered into by the management, attends to all the collections of money and renders a comprehensive statement of revenue and expenses each month, as well as special statements required by the management at all other times. Operations of the company are shown in more than eight hundred accounts and the cost sheets furnished to the management shortly after the first of each month are sufficiently detailed by reason of this large number of accounts to make it unnecessary, except in very exceptional cases, for the management to call for additional information concerning the operations.

The circulation department and the advertising department, both under the direction of the business manager, have highly developed sales organizations. Their functions cease after the sale is made and it then is the function of the auditor and controller to see that the sales are entered upon the books, bills rendered therefor and collections made. This is likewise true of sales made for any other service in any other department. It has been accepted, I believe, as a fact that a salesman makes a very poor collector and this perhaps accounts for the fact that in the methods employed by us the salesmen do not attempt to influence or control the gathering in of the proceeds of their sales and as a consequence the Chicago Tribune and other metropolitan newspapers are enabled to conduct their business on a cash basis.

We are able to collect our revenue and make it possible for the business management to function without the uncertainty of cash receipts. Losses and bad debt accounts have practically been eliminated. Waste and extravagance in the production of the newspaper have been brought down to a minimum and the business management is able to calculate to a certainty how much there is available at all times for expenses and improvements beyond the actual needs of the paper in its current operations.

Every advertisement appearing in the paper is checked into the books of the company; every paper circulated is checked into the books of the company; every commodity bought for consumption is checked as to its receipt and use; every item of labor is verified and checked into the books of the company; every payroll for labor and every bill for material and supplies is checked, verified and distributed on the books of the company. Every piece of mail addressed to and received by the company is received and distributed to its proper destination in the organization without delay.

A highly developed credit department is maintained and contracts and sales are entered into and made in accordance with modern ideas and practice. Advertising space is sold only to individuals and firms who can demonstrate their financial ability to pay for same. Some classified advertising is accepted without credit supervision from individuals who are telephone subscribers and credit supervision does not begin to operate with this class of advertisers until they fail to pay their bills which are rendered promptly after the appearance of their

advertisements. The summary of charges to advertisers of all classes, compiled by a force of men who check the advertisements which appear in the paper and enter same to what we call charge sheets, are compared with the monthly summaries which are compiled by the billers and are taken from the bills actually rendered and these are compared with the advertising revenue for the month and tested as to space and rates, thereby proving their accuracy before the books are closed for any month. Circulation revenue is checked somewhat in the same way. Monthly summaries are compiled from reports of the pressroom and the circulation departments and these reports are compared with the records of the accounting department to show the total revenue derived from circulation. The quantities delivered as recorded by the circulation department are summarized and designated in respect to the various rates effective in the several territories.

The rates are applied to the quantities delivered and compared with the revenue determined by the accounting department at the close of each month. Charges are checked against roll sheets and compared with the summary of charges with individual accounts in the city on a special ledger containing the names of city carriers and the charges to the carriers in this ledger with the total shown by the roll sheets for each month are compared and verified. The same process is employed with country newsdealers whose accounts are kept in its separate ledger.

The total of all bills for any month are compared with the quantities as shown by the summary of such bills for the month with those as shown by the blotters or charge sheets furnished to the accounting department by the circulation department.

The ramifications of the auditing and accounting departments cover a wide scope as every attempt is made to check and recheck every item that is entered upon the books. All cash from every source comes to and passes through the hands of a general cashier. Departmental cashiers are located in several of the departments which are separated in location from the main office and all such departmental cashiers report to the general cashier all moneys received during every day. The accounting department functions twenty-four hours a day, seven days a week. Representatives of its staff are located in almost every department of the organization. This is especially true in departments in which it is necessary to obtain highly exhaustive and accurate cost records, both as to labor and material.

Payrolls are prepared by each department under the supervision of the chief payroll clerk and all payrolls are checked, verified and approved by the department manager, after which they are forward to the payroll department and bank checks are prepared to be delivered to the paymaster for distribution.

Special attention is paid to complaints and adjustments, the cancellation and correction of orders for advertisements and an effort is constantly being made in this department to further the good-will of the public in its dealings with the paper.

The accounts of advertising agencies are carried in a separate set of books under the supervision of men trained by experience and learning to cope with the special requirements of this highly organized profession.

Mechanical devices are employed wherever practical and every effort is made to reduce the labor costs by the substitution of mechanical devices unless the employment of a mechanical device promises in its use to create friction with the patrons of the paper. For instance The Chicago Tribune discarded mechanical bookkeeping devices after we found that we had a potential enemy and dissatisfied patron in over 50 per cent of the people to whom we rendered bills. This was no reflection on the device which simply did not lend itself to our needs. In our business we found that the rendering of bills and statements requires at least some brains in their preparation of the books of account and we returned to old fashioned bookkeeping by intelligent bookkeepers who knew the importance of detail in posting items upon the books and in rendering statements to their patrons.

The institutional copy seems most effective with our regular advertisers, but it must have strong attention—getting power in illustration and headline. Such advertising copy is employed to increase the regular advertiser's appreciation of our service. Our testimonial copy aids our sales people in proving their claims, and the copy suggesting the various classification uses seemed to stimulate interest both in prospects and in previous advertisers. We are in the same situation as many of the paper's display advertisers—our prospects do not all fall into one category; consequently we have to devise totally different kinds of appeals for every group.

Probably the most effective thing ever done by The Chicago Tribune for the benefit of want advertisers, was the development and exploitation of the theory "The More You Tell, The Quicker You Sell."

Last year a professor of psychology at Northwestern University submitted a plan for a scientific test of our theory. He claimed that because the advertisement which failed in our "Tell More" example, and the advertisement which succeeded were not published on the same date, that the results accomplished for our advertisers did not constitute a scientific endorsement of the "Tell More" theory. We agreed to accept any test he wished to make, and he submitted a plan of inserting four advertisements in each of four classifications in the Sunday Tribune. He was to write the advertisements, which would be graduated in sizes from two to nine or ten lines, using box number addresses and holding the call tickets himself. We used the standard classifications of "Situations Wanted," "For Sale—Houses," "For Sale—Household Goods," "For Sale—Automobiles."

At the same time we felt that market conditions were not particularly favorable for those classifications. In three out of four classifications (the exception being Situations Wanted) the two and three line advertisements brought no returns whatever. But none of the other advertisements, ranging from four to nine lines, failed to bring results. And in each instance but one "that exception again being in Situations Wanted), the larger advertisement brought more results than the advertisement next under in size.

It may interest you to know that in 1924 The Chicago Tribune used in its own columns 290,000 lines of space for want ad promotion.

CLASSIFIED ADVERTISING PROMOTION

By W. E. Macfarlane

Classified Advertising Manager *Chicago Tribune,* Before Inland Daily Press Association at Chicago This Week.

THE *Chicago Tribune* will print approximately 1,460,000 want ads this year, totaling approximately 8,500,000 net agate lines. The Tribune maintains a private post office for the benefit of its advertisers through which was received and distributed last year more than 3,300,000 letters in reply to box number advertisements alone. Fifty street salesmen cover their allotted territories every day. We have a telephone adtaking department capable of receiving 67 advertisements simultaneously. And we maintain a want ad store employing 24 people who give service in person to want ad patrons. In addition, our telephone and store forces are augmented on Fridays and Saturdays so that we employ an extra, or part-time force, which often equals the number of regular workers in those departments.

With a large number of small orders and early deadlines, we are confronted constantly with the need for speeding up organization activities. In our endeavor to provide the best service to readers and advertisers, while at the same time adding to our records of volume and revenue, we keep closely to the following plan of promotion:

First—Organization efficiency.
Second—Intelligent Sales Aggressiveness.
Third—Rigid Censorship.
Fourth—Adequate advertising.

We proceed in the belief that when we receive an order from a want advertiser, the most important part of the transaction, so far as he is concerned, is accuracy in publication. We may train our sales people to be courteous, and patient; we may hire those of good presence and education; but when an error is made in the handling of an order, so that it does not appear as given, all the benefit of good salesmanship and service is lost to us until that error is rectified. Even when rectified, it becomes a set-back from which it takes time to recover.

It is, therefore, imperative to us that a high degree of accuracy shall be maintained in all departments having to do with the receiving and handling of want ad orders. To assist us in this effort, our accounting department prepares and submits to the business management a detailed monthly record of the number of errors made by our mechanical, clerical and sales departments. By the number of these errors and their percentage to the grand total of advertisements printed, we are enabled to judge how well each and all of these departments are functioning. When we find by this monthly record that the percentage of errors is increasing in any particular department, we investigate for the purpose of finding the cause and applying the necessary remedy. The greatest percentage of errors is made by the mechanical department and, as is probably true of all newspapers printing a great number of want ads, this is due to the hurry in setting and classifying advertisements just before the deadlines.

We continually strive for greater efficiency in the detail of organization work, because we feel that errors constitute a business illness and when they reach undue proportions may undermine the best planned sales work.

Much effort is put into the selecting and training of those who are to do the selling of want ad space. The successful men are promoted to the local display advertising department.

The percentage of our advertisers who deliberately deceive is small, but small as it is, it is sufficiently large in numbers to call for a book of rules on censorship. Rigid censorship began with us about fifteen years ago. Additional rules of censorship are constantly being formulated as the need arises. We can never reach a state of perfection in censorship, but we have fought many a good fight against usury, fraud and immorality, and our readers are generally aware of our attitude to protect them.

As an illustration: today there is an almost nationwide real estate boom. We are feeling the advertising sales activity of Chicago and Florida operators. In their competitive haste even many reliable dealers began to make speculative statements that we felt paralleled misrepresentation. In the face of resistance and possible loss of advertising linage, we recently made a new censorship decision covering real estate advertising. Now we endeavor to eliminate all speculative copy, such as "Buy now and clean up," "Will double in value in 3 months," and so on, because such statements are virtually guarantees not only of profit but of a definite amount of profit, and we do not feel that that is good investment copy for our want ad readers.

In all cases where the names of institutions, organizations, or individuals are mentioned, the relationship to the advertiser and his offer must be passed upon before publication.

We have another problem of censorship in holding out of our columns the floating furniture dealers. These advertisers are bold and ingenius. When held out they come right to headquarters and cry "mock" tears. They try to bribe those in control of censorship. When they find our censorship is rigid, they "squeal" on those who have gotten by us, aiding us in our task.

Every sales person and every order clerk, together with a number of individual censors, is charged with the responsibility of censorship. Much additional help is given by proof-readers.

Adequate advertising is as essential to a newspaper's want ad business as to the business of a merchant or a manufacturer. Consistently employed, it breaks down sales resistance and builds institutional prestige.

We divide our advertising exploitation into three classifications of copy: Institutional, suggestive, and testimonial copy. We buy the best of art work available and employ able copywriters.

REPORT OF SECRETARY INLAND DAILY PRESS

Prosperity has attended the year's work of the Inland Daily Press Association, according to the report of Wil V. Tufford, secretary and treasurer of the association since February 1899. The membership now totals 244, he said.

WIL V. TUFFORD

The report treated in detail the fight against free publicity being waged by Inland under Mr. Tufford's direction; public utility advertising the postal situation; newsprint conditions; and the history of the group.

Regarding free publicity, Mr. Tufford suggested humorously that a D. of F. P., Doctor of Free Publicity, be awarded him.

"I have only one suggestion to make about continuing the fight," he continued, "and that is that I think it should be directed, not so much against the free publicity fakers, as towards the education of publishers, coupled with some influence, to get them to cease printing the stuff, because there is no crime committed until the publisher actually prints the stuff."

The Inland, Mr. Tufford said, was the first newspaper group to try and impress public utility managers with the need of newspaper advertising. This was three years ago. Since then systematic advertising campaigns in local newspapers have been advocated.

"At the present time," he added, "the rule is firmly established, that a public utility manager is rated as successful or not as he is a successful advertiser. The increased business of the utilities is the result."

A similar program is now being advocated by the American Gas Association, he pointed out.

In closing his report, Mr. Tufford told the history of his association from its incorporation in 1887, describing its various accomplishments.

MORNING-EVENING MEN ORGANIZE

Combination Publishers Form Association at Chicago for Cities Under 100,000—Seek to Promote Their Special Interests

(*By Telegraph to* EDITOR & PUBLISHER)

CHICAGO, Ill., Oct. 14.—A new publishers group, The Combination Newspaper Publishers' Association, organized by publishers of combination morning evening papers in cities of less than 100,000 population, was formed at a meeting at the LaSalle Hotel on Tuesday.

J. S. Parks, of the *Fort Smith* (Ark.) *Southwest American* and *Times Record* was elected president and Cowgill Blair of the *Joplin* (Mo.) *Globe* and *News Herald* was named secretary.

The following executive committee was named: E. Nowels, *Colorado Springs* (Col.) *Telegraph-Gazette;* W. Y. Morgan, *Hutchinson* (Kan.) *News and Herald;* J. H. Bixby, *Muskogee* (Okla.) *Phoenix and Times-Democrat.*

The meeting came as one of the unexpected activities of A B C week. The new group plans to meet twice yearly in Chicago during the A B C convention and in Kansas City in February. The new association was formed, Mr. Blair said, to promote an exchange of ideas among publishers of combination newspapers. No other publishers group, he declares, considers thoroughly the special problems common to this body.

Newspapers in cities under 50,000 have increased such combinations 100 per cent in the last three years, Mr. Blair told the meeting editorial problems resulting from these combinations naturally are subject of immense concern to the publishers especially where papers consolidated have held radically different political views most of the combinations solve the editorial problem by an independent attitude printing both sides in politic controversies and leaving the decision to their readers, Mr. Blair declared.

"Experience has shown," Mr. Blair said, "that a combination old enough have a background and a definite aim can give vastly increased service to advertisers and readers at greatly reduced prices to both. It is necessary, of course to sell the community the idea of the publication's honesty and its intention to devote itself to the welfare of the community rather than its own interest. He advocated institutional advertising whereby the publisher frankly tells the public of his problems to instill confidence.

Other members of the association present at the meeting were; J. S. Parks of the *Fort Smith* (Ark.) *Southwest American* and *The Times Record;* J. H. Bixby, of the *Muskogee* (Okla.) *Phoenix* and the *Times-Democrat;* J. M. Stevenson, of the *South Bend* (Ind.) *News Times;* W. Y. Morgan and C. L. Nichols, of the *Hutchinson* (Kan.) *News* Martin J. Hutchins, of the *Missoula* (Mont.) *Sentinel;* W. P. Stanley, Sedalia, Missouri; C. E. King, Appalachian Publications, Inc., Johnson City Tenn.; W. M. Taylor, Enid Publishing Company, Enid, Okla.; J. C. Seacrest *Nebraska State Journal,* Lincoln Charles E. Marsh, Austin, Tex.; J. Chew, Chew Publications, Xenia, O.; D. Black, *Fargo Forum,* Fargo, N. D. and James E. Thompson, of the *New Orleans Item.* The meeting was called by Mr. Parks, Mr. Blair and Mr. J. H. Bixby of the *Muskogee Phoenix* and *Times-Democrat.*

Honor Wilcox for 48 Years' Work

J. L. Wilcox, for 48 years editor and publisher of the *Ashland* (Mo.) *Bugle* will be honored Oct. 23 at an appreciation picnic. The entire membership of the Missouri Press Association has been invited. Dean Walter Williams, of the Missouri school of journalism and president of the Press Congress of the World will be the chief speaker.

MAJORITY DO NOT READ "DIRECT MAIL"

85 Per Cent of Newspapers' Readers Throw Away Such Advertising, T. E. Murphy Reports to Newspaper Advertising Executives—Important Topics at Chicago Meeting

(*By Telegraph to* EDITOR & PUBLISHER)

CHICAGO, Ill., Oct. 14.—Lightening the advertising columns of newspapers by elimination of heavy black type and reverse cuts was one of the principal topics discussed at the one day fall meeting of the Association of Newspaper Advertising Executives held at the Morrison Hotel, Wednesday.

It was one of the important allied conventions of A. B. C. week and more than seventy advertising executives from the area bounded by Colorado, Texas, Mississippi, Kentucky and Ohio were present.

There was no set program of speeches, members having voted to spend the day in free discussion of whatever important subject was suggested.

Beginning with the question of smudgy advertising copy the meeting successively considered the direct mail activities of department stores, newspapers vs. magazines for national advertisers and private store sales in advance of public announcements.

Frank Carroll, of the *Indianapolis News,* presided. The first speaker was W. E. Donahue, local display manager of the *Chicago Tribune* who declared that newspaper advertising departments can educate advertisers away from smudgy black copy.

Jason Rogers talked on the general advantages of newspapers over magazines for national advertisers. W. H. Moore, national advertising manager of the *Detroit News,* said that despite the direct mail propaganda which has centered recently in Detroit, store advertising in The News has increased over any previous period. He made the statement in answer to a question as to whether the direct mail activities of J. G. Pattee, of the Newcomb Endicott department store, had had any effect on newspaper linage. Mr. Pattee's arguments in behalf of direct mail were printed in booklet form and distributed, and fully exposed in EDITOR & PUBLISHER.

Continuing on the direct mail question, Thos. G. Murphy of the *Janesville* (Wis.) *Gazette* reported that his paper recently sent questionnaire to 6,000 readers asking whether they read direct mail copy or newspaper advertising. Eighty-five per cent reported they did not read direct mail. An equal number said they read newspaper copy. The extension division of the University of Wisconsin is now compiling further data from the questionnaires, Mr. Murphy said, the full report on it to be released at an early date.

The questions were sent out as from the "Bureau for Better Business," The Gazette paying half the expense and the Janesville merchants half.

Private store sales held for a select charge account list, notified by mail two to three days in advance of the public sales announced in newspaper space, were scored by Harvey Young of the *Columbus* (O.) *Dispatch.* "This system is highly unfair to the general public and to the store's best trade—the cash customers," he declared.

"We have been trying to eliminate this practice in Columbus by enlisting the local better business bureau. We intend to place the question before the owners of the stores rather than the advertising managers, and show them how unfair it is to the public."

At the afternoon session Don Bridge, *Indianapolis News,* secretary of the A. N. A. E., announced that the Association had completed a survey intended to show just what form of merchandising service was considered most valuable by advertising agencies and national advertisers. A full report on the survey will be released in the near future. Following Mr. Bridge, Ralph A. Turnquist, of the *Milwaukee Journal,* described the local national rate system adopted by his newspaper last January. Under it the local rate is allowed only to strictly retail stores. The national or general rate applies to all manufacturers, distributors, and jobbers regardless of location. This method requires a local manufacturer or jobber to pay the general rate in the local newspaper.

FRANK T. CARROLL — DON BRIDGE — H. K. YOUNG — T. L. RYAN

H. A. Sprague, business manager of the *St. Joseph* (Mo.) *News-Press,* talked on measuring advertising. The session adjourned at four P.M. The association had as guests at luncheon the local representative and visiting executives of the Bureau of Advertising of the American Newspaper Publishers Association.

Among those attending the A. N. A. E. session were: Thomas L. Ryan, general manager, *St. Louis Star;* R. K. Stocks, advertising manager, *Toronto Globe;* J. W. Fisk, *Cincinnati Post;* Harvey R. Young, *Columbus Dispatch;* George M. Burbach, *St. Louis Post Dispatch;* W. G. Johnson, *Jackson* (Miss.) *Daily News;* H. W. Roberts, *Cleveland Plain Dealer;* S. Kelton, *Houston Chronicle;* Harry T. Watts, *Des Moines Register and Tribune-News.*

FORESHADOWED EVENTS

Oct. 19-21—National Industrial Advertisers' Assn., annual convention, Atlantic City.

Oct. 19.—New England A.P. Members, Fall meeting, Boston.

Oct. 20-21—New York State Circulation Managers' Assn., Fall meeting, Statler Hotel, Buffalo.

Oct. 28-30—Direct Mail Advertisers' Assn., annual convention, Boston.

Oct. 28—Ohio State Circulation Managers' Assn., Fall convention, Columbus, O.

Oct. 29-31—University Press Club of Michigan, annual meeting, Ann Arbor, Mich.

Oct. 30-31—New York State Publishers' Assn., meeting, Syracuse, N. Y.

MID-WEST CIRCULATORS COMPLAIN OF MOUNTING DISTRIBUTION COSTS

Motor Routes, Buses, High Postal Rates, Aeroplanes and Fancy Methods Make Reader Service Expensive—Say Tabloid Best Suited to Cities with Newsstand Circulation

(*By Telegraph to* EDITOR & PUBLISHER)

CHICAGO, Oct. 14.—High postal rates have virtually doomed "bargain day" as an effective circulation builder for newspapers. Distributing costs have reached such a figure that it no longer pays to offer cut-rate subscriptions once a year. It is imperative today for newspapers to get the maximum revenue from subscriptions and street sales.

H. W. STODGHILL

This was the concensus of opinion at the fall meeting of the Central States Circulation Managers' Association held Wednesday in conjunction with A. B. C. week in Chicago.

The one day session, attended by more than fifty mid-west circulators, was chiefly spent in round table discussions under the leadership of H. W. Stodghill of the *Louisville* (Ky.) *Courier-Journal,* president of the group.

The question of mounting distribution costs was touched on by several speakers. It was introduced by E. R. Hatton, president of the International Circulation Managers Association, first on the program, who declared that the adding of motor routes and the high postal rates had pushed expenses beyond former peaks.

"Each field is becoming more competitive," he said. "Any facility which will get the day's paper home earlier is being added. Motor routes are being extended, airplanes have even been experimented with.

"However, the outlook for circulation increases in 1926 is bright, but it will be increasingly expensive to add readers."

The problem of bus transportation was considered from the standpoint of standardizing the rates in each state. It was brought out that the privately operated bus companies are charging a flat, arbitrary rate for carrying newspapers, the rates varying among the different bus ownerships.

Sampling, properly done, is a highly successful method of adding readers, it was brought out at the round table discussion. Virtually all circulation managers present reported excellent results from this method. However, for the best returns, a strong follow-up campaign must be carried out.

Tabloids were touched upon briefly, the prevailing opinion being that the tabloid is not feasible as a home-delivered paper, but has its greatest field in cities where newsstand sales predominate.

The next meeting of the association will be held in Chicago, the third Tuesday in April, 1926.

FIFTY HONOR GUESTS

Luncheon Given by G. B. Dealey to Veteran Employees in Dallas

The first public function in the new $5,500,000 Baker Hotel at Dallas was a luncheon tendered in honor of the 50 employes of A. H. Belo & Co. who have been with the company 21 years or more. Thirty-seven of the 50 attended the luncheon, which was in celebration of the Dallas News' recent 40th aniversary.

G. B. Dealey, president and general manager of the company, with a record of more than 50 years' continuous service, was toastmaster, who after the invocation by DeWitt McMurray, 39 years with A. H. Belo & Co., eulogized former employes who have passed from the scene of journalistic activities. Various others spoke.

New Tabloid "Page One"

The *Rochester* (N. Y.) *Herald,* which changed to tabloid form on Sundays recently, has altered its front page from a picture to a news-story layout.

BUSINESS PAPERS MEET

Chicago Scene of Conventions of Publishers and Editors This Week

(*By Telegraph to* EDITOR & PUBLISHER)

CHICAGO, Oct. 15—More than 200 hundred editors and publishers of business papers gathered at the Congress Hotel Thursday in two of the Important allied conventions of A. B. C. week.

"Better Business Papers" was the theme of both meetings. One was the twentieth annual convention of the Associated Business Papers, Inc.; the other the annual meeting of the National Conference of Business Paper Editors.

No addresses were scheduled for the Tuesday sessions of the Associated Business Papers, Inc., the entire day being devoted to general business and committee reports. John M. Nind, president of the group, presided.

Among speakers Wednesday were Charles E. Herrick, vice president, Brennan Packing Company, Chicago; C. J. Stark, editor, *Iron Trade Review,* Cleveland; Harlan J. Wright, *Chicago Merchant Economist;* Arthur L. Rice, *Power Plant Engineering,* Chicago; and Prof. Paul T. Cherington, Director of Research, J. Walter Thompson Company, New York.

Mr. Herrick paid tribute to the power of the business press.

"The business press has become more and more the crutch of business, having a salubrious effect on the improved advertising policies of the business world," he stated.

A complimentary luncheon was tendered the visiting publishers and editors Wednesday by the Chicago Business Publishers' Association. In the evening the annual banquet was held.

The following officers were elected at the closing business session Thursday morning:

Malcolm Muir, McGraw-Hill Company, New York, president; J. H. Bragdon, *Textile World,* New York, vice-president; Warren C. Platt, *National Petroleum News,* Cleveland, Secretary, and Jesse H. Neal, executive secretary.

Paul I. Aldrich of the *National Provisioner,* Chicago, was elected chairman of the National Conference of Business Paper Editors,, succeeding Julian Chase, Chilton-Class Journal Company, New York, at the business sessions held Tuesday, Frank C. Wright of *Engineering News-Record,* New York, was named vice-president and Douglas G. Woolf of *Textile World,* New York, secretary-treasurer.

MEMORIAL SERVICE FOR VICTOR LAWSON

Walter A. Strong Points to Columns of Daily News as Best Guides to Character of Chicago Publisher

The late Victor F. Lawson, editor and publisher of the *Chicago Daily News,* the examples of his life work and the legacy given the Congregational church in Chicago by his will were discussed by the Chicago Congregational association Oct. 13, in the church, in which Mr. Lawson worshipped, the New England Congregational.

The first speaker of the day was Walter A. Strong, business manager of the Daily News.

"Twenty years in the Daily News office and my impression as a boy before that time have given me some fundamental impressions of Mr. Lawson's work and of him as a man," said Mr. Strong. "Certainly no man could have come into contact with him without feeling his great personality.

"Dr. Ozora Stearns Davis said that Mr. Lawson was a lover and defender of the truth and first of all a Christian gentleman. Those words will remain in my mind forever.

"I believe that Mr. Lawson's vision of Chicago is best interpreted in the columns of the Daily News in the past fifty years. In the Daily News you have a book in which can be read Mr. Lawson's life. He was a master of detail. It is the small things by which we sometimes measure greatness. In the building of the Daily News we see a picture of his mind in the making. I really believe that Mr. Lawson's mind was such as we see only once in a generation. He was a defender of the truth and he knew, moreover, what the truth was.

"The Daily News was not an accident. Its fifty years of success and unique accomplishments were due to the character of Mr. Lawson. In the early days most newspapers were subsidized by groups of people or were in the hands of radicals who had set up false gods."

Speaking of the Associated Press, which Mr. Lawson founded, Mr. Strong said that Mr. Lawson was not satisfied with the sources of news existing fifty years ago.

"Press associations were fighting among themselves," said Mr. Strong, "and it was Mr. Lawson's distrust of weak links that caused him to found the Associated Press. He told me on one occasion that he left his office with the statement that he would not return until he had induced 100 of the best publishers in the country to subscribe to his idea. He spent the next six months on the road, trying to convince these publishers and at the end of that time the simultaneous announcement in all of these newspapers of the establishment of the Associated Press stopped all the fighting among the press associations. I believe that no one but Mr. Lawson could understand the tremendous importance of the work he was doing.

"Truth in advertising was another difficult matter at that time. The publishers had no yardstick by which to measure it, and so Mr. Lawson decided to put the daily circulation of the Daily News on the 'masthead' every day. It has been there ever since. That action finally resulted in the organization of the Audit Bureau of Circulations."

GAINS $1,000,000 in Week

Through Newspaper Advertising Big Chicago Store Breaks Record

(*By Telegraph to* Editor & Publisher)

Chicago, Oct. 14.—The power of newspaper advertising, when both by good values in merchandise and the service of a big store of good reputation, was demonstrated here during the week of October 4 last, by The Fair, now owned by S. S. Kresge. Advertisements were published, based on the fiftieth anniversary sale in Friday and Saturday evening papers, with 8 pages in the *Chicago Tribune,* of Sunday, and 7 pages in the *Herald-Examiner,* Sunday issue.

These advertisements, it is announced, produced net sales on Monday of $480,000, breaking all merchandising records in the history of the big store.

A gain in sales for the week through the use of newspaper space totalled for The Fair $1,000,000, the highest record in the store's history, the operation's eclipsing Macy's, New York, August sale when the gain in the month totalled about $1,000,000. The Fair gained $1,000,000 in a week as compared with Macy's gain of $1,000,000 in a month.

PROSPEROUS NEW YEAR

O'Shaughnessy Predicts Big Advertising Business in 1926

(*By Telegraph to* Editor & Publisher)

Chicago, Oct. 15.—Future advertising contracts already signed guarantee that business in 1926 will exceed that done in 1925, James O'Shaughnessy, executive secretary of the American Association of Advertising Agencies, told members of the Agricultural Publishers' Association at their annual meeting in the Hotel LaSalle Thursday.

Marco Morrow

"This condition safeguards our national welfare against any artificial panic," he asserted. "It will make business recession impossible."

Marco Morrow of the Capper Publications, Topeka, Kan., president of the group, opened the session. One of the important questions considered was the request of the Association of National Advertisers that the organization introduce in the various state legislatures a bill making it unlawful for any firm or business to substitute another article for an advertised article ordered.

The following directors of the association were elected: A. F. Jones, *Farm Journal,* Philadelphia; J. F. Young, *Pacific Northwest Farm Trio,* Spokane, Wash.; W. C. Allen, *Dakota Farmer,* Minneapolis; J. A. Falconer, *Springfield* (Mass.) *Northeastern Homestead;* H. C. Klein, the *Farmer,* St. Paul; Morgan Shepard, *Southern Planter,* Richmond, Va.

S. N. P. A. ADVERTISING

Discussed by Directors at Chicago Dinner Meeting

Members of the southern newspaper publishers association who were in Chicago for Publishers Week held an informal meeting and dinner Oct. 16. Plans were discussed for the 1926, joint advertising campaign, but no formal action was taken.

Among those who attended were: President W. C. Johnson, *Chattanooga News;* W. L. Morgan, *Knoxville Sentinel,* secretary-treasurer; Cranston Williams, manager, Chattanooga; and A. G. Newmyer, *New Orleans Item-Tribune;* John A. Park, *Raleigh Times;* J. S. Parks, *Ft. Smith,* (Ark.) *Times-Record;* W. G. Tetrick, *Clarksburg,* (W. Va.) *Exponent.* Directors: Edgar M. Foster of the *Nashville* (Tenn.) *Banner,* chairman of the advertising committee, outlined plans for the advertising campaign now under consideration.

Telegram Rate Raise Proposed

A new scale of transit and terminal charges on all classes of telegraph messages was adopted Oct. 9 by the tariff committee of the International Telegraph Congress, meeting in Paris. The new scale provides for from 10 to 35 per cent higher tariffs. If adopted in plenary session the scheme will mean higher world-wide telegraph and cable rates.

BIG STORE ADVERTISING

Does Not Dominate Some Papers and "Shopping News" is Not Feared

(*By Telegraph to* Editor & Publisher)

Chicago, Ill., Oct. 15.—The attitude of newspaper business office executives attending the sessions of the newspaper departmental here this week, is one of supreme indifference to the propaganda of direct-by-mail producers and to the users of shopping store "newspapers"—the executive of one big central states morning and Sunday paper said that department store advertising in the columns of his paper now represents but fifteen per cent of the total volume of business carried and that his paper could lose it all without making any very great difference in annual net profits. The rate paid by big stores is now the same as the rate paid by the small advertiser who uses but one hundred lines per day. The present trend is to raise rates in department store classifications and to encourage specialty store advertisers. There has been an enormous increase in the volume of specialty store advertising in all of the larger centers of population, it is said.

AGENTS ENTERTAIN THE PUBLISHERS

Gay Luncheon at Chicago Attended by 800 — "You Are All Respondents," Says Thomason

(*By Telegraph to* Editor & Publisher)

Chicago, Ill., Oct. 15.—One of the outstanding features of convention week was the luncheon tendered the visiting publishers and advertising men, Thursday noon, at the Drake Hotel, by the American Association of Advertising Agencies.

More than 800 persons attended. It was the first occasion upon which all the separate groups convening during A. B. C. week assembled simultaneously. Guests were seated five at a table, with the sixth place reserved for the host, in each case a member of the A. A. A. A.

L. R. Northrup, chairman western council of the four A's, presided, first introducing James O'Shaughnessy, executive secretary, who welcomed the guests on behalf of the organization. O. C. Harn, president of the Audit Bureau of Circulations, the next speaker, emphasized that the real work of the bureau was not in "making a few people honest," but in creating a better understanding among publishing and advertising interests. S. E. Thomason, president of the American Newspaper Publishers' Association and business Manager of the *Chicago Tribune,* amused the gathering by referring to the recent move by the Federal Trade Commission, seeking to join the A. N. P. A., with the Southern Newspaper Publishers' Association and the four A's, in a complaint alleging restraint of trade in connection with agency commissions.

"Virtually all of you are respondents," he said, "I had intended seriously to discuss our common problems, in fact all of you have come to Chicago for the purpose, but when you realize that we are taking our liberty in our hands when we do so, you will recognize that I can talk nothing but pleasantries."

Following the luncheon the entire group returned to the LaSalle for the opening divisional sessions of the A. B. C. at 2 o'clock.

To Change International Stock

The International Paper Company, it was learned this week, contemplates holding a stockholders' meeting on November 6 to change the common shares to no par value and offering additional common stock to present common stockholders on a share for share basis at $50 a share, payable in equal instalments on November 30, 1925; March 1, 1926; June 15, 1926, and August 1, 1926. Quarterly dividends will be initiated on the common on August 15, 1926, at the rate of $2.00 annually.

SAYS FARMERS DRAW MONTHLY "WAGES"

Meredith Finds Advertisers Have Mistaken Ideas of Farm Economics—Advertising Bobtail Waste Scored

(*By Telegraph to* Editor & Publisher)

Chicago, Oct. 13.—A more scientific analysis of the farm market was urged upon food manufacturers, distributors, advertising men and agricultural publishers by E. T. Meredith, publisher of *Successful Farming,* Des Moines, Ia., luncheon speaker at a farm food conference held in the Hotel LaSalle Tuesday in connection with the A. B. C. Week.

Held under the auspices of the advertising council of the Chicago Association of Commerce, the conference considered every angle of the farm food problem. Special consideration was given the question of distribution and selling.

Mr. Meredith pointed out that agriculture definitely affects every business, and that manufacturers, in order to cut down overhead and increase sales, must carry on intensive research in the farm market.

"When the farmers are doing an increasing business you can increase your own business no matter what you are in," he declared.

"Among national advertisers there are many mistaken ideas in regard to the farmer. They say, 'I won't advertise now; I'll wait until fall when the farmer gets his corn money.'

"A recent survey that we conducted showed that the farmer gets his money every month, with almost the same regularity as a salaried man. In no month does he get more than ten percent of his year's income, in no month less than seven percent."

Mr. Meredith stated that a more scientific conception among manufacturers and advertisers of how the farmer lives, what he buys and when, will eliminate advertising waste and increase sales.

The power of newspaper advertising was testified to by John B. Garver, advertising manager of the Garver Brothers Company, country grocers of Strasburg, Ohio.

Speaking on "A Country Grocer's Viewpoint" he scored the advertising waste represented in the large display cards and window promotion material sent to retail stores by manufacturers of food and products. "Seventy-five percent of this material goes into the stove," he declared.

He urged manufacturers to cooperate with retailers more through their salesmen than through printed promotion. He said many salesmen try to sell on the basis that their products are nationally advertised, rather than on the specific merits of the products themselves.

Mr. Garver said his store last year sold $234,642 worth of groceries in a town of less than one thousand population. Newspaper advertising is considered a necessity in pushing sales. Each week copy is placed in four county weeklies. Twice each week space is purchased in two dailies.

"We use all the newspapers in our territory," he declared. "We have demonstrated that newspaper advertising sells goods."

Another speaker at the conference was K. K. Bell, president, Calumet Baking Powder Company who discussed "The Problem of Food Distribution."

Homer J. Buckley, president of Buckley, Dement & Co., made the opening address. Frank B. White of the Frank B. White Company, Chicago, led a round table discussion at the conclusion of the conference.

Editor Held for Libel

Robert E. Davey, editor of the *Newport* (Ore.) *Journal,* has been bound over to the grand jury on a charge of criminal libel. The charge was brought by Fred Coffeen, city recorder, after Davey had attacked the city administration.

TATE FIELD MEN COMPARE NOTES

Convention at St. Louis They Talk ewspaper Problems — Edgecombe nd Wood Are Speakers—Thirteen Managers Attend

By Telegraph to EDITOR & PUBLISHER)

T. LOUIS, Mo., Oct. 12.—The National ociation of State Press Field Men, ting in third annual convention in St. is, Oct. 9 to 13, emphasized a number problems incident to newspaper adising as well as matters peculiar to tasks of the field manager. Thir- of the fifteen managers who com- the membership were in attendance, leading a discussion on an outstand- topic. Several invited speakers adssed the sessions, including F. O. ecombe, president of the National torial Association, and W. C. Wood, erintendent of the Division of Classions Washington, D. C. Mr. Wood's dealt with second class mail rates, Mr. Edgecombe spoke on coopera- between the field manager and his ial board.

dwin A. Bemis, field manager of the orado Editorial Association was reted president and Ole Buck, field ager of the Nebraska Press Associa-, was reelected secretary and treasurer he National Association of Press Field nagers at a late session of the contion. A new office of vice president created and L. W. Feighner, of higan was elected to the post for a year term.

board of directors composed of three nbers was added to the list of execus. The elected members are O. W. le, Kansas, G. L. Caswell, Iowa, and Read, one year. St. Paul was sen for the next annual convention ch will be held Aug. 21 to 30. After closing session the delegates were sts of the St. Louis Advertising Club a river excursion.

dwin A. Bemis, field manager of the orado Editorial Association, Littleo., Colo., and president of the associa-, was chairman at all sessions.

he National Association of State ss Field Men, is an organization comd of full-time paid secretaries of e press associations. Ole Buck, field ager of the Nebraska Press Associaand secretary of the national organion, stated that there are fifteen states ible for membership, and that the reaining states are not as yet sufficiently anized to support a paid secretary. intimated that additional states would eligible to elect representatives in the future.

he organization was created two 's ago to further the interests of spaper men by obtaining the adoption advantageous legislation, improving ness conditions and business methods. e a year the members meet in inal convention to review past activand lay plans for the future. Topics ussed at round-table sessions here, the leaders, included: "Promotion Employment of Field Men in Other tes," G. L. Caswell, managing director a Press Association; "Schools of nalism," J. S. Hubbard, Field Man- Missouri Press Association, "Space ifters," Will V. Tufford, President In- Press Association, "Uniform Advertig Rates," Len W. Feighner, Field nager Michigan Press Association, gislative Work," H. L. Williamson, etary Illinois Press Association, "The ing and Production Costs of Newsr Advertising," W. J. Keyes, Winig, Can., and "Price Lists and What Future Holds," Harry Porte, vicident Porte Publishing Co.

resident Bemis led a discussion on per Subjects for Field Work," and etary Buck spoke on side issues. re were also informal discussions on nest Circulation Statements," "Indial Experiences in Field Work," and r matters of interest to field managers. cretary Buck said that 424 of the 425 raska newspapers were members of ssociation and were enabled to handle certain matters, mainly advertising, with efficiency and dispatch. He said he, as field manager of the state association, recently accepted a political advertisement to be run in every newspaper in the state and that another blanket advertisement had been handled in connection with the state fair. But two letters were mailed to each newspaper, one giving the order and another sending a check.

The papers were protected in that the political advertisement was accepted only with immediate payment. This was demanded to preclude the possibility of a defeated candidate's objection to buying a "dead horse."

Mr. Edgecombe in his address said:

"Of all of the forms of organized human endeavor the purely co-operative is the most difficult to keep going efficiently and profitably. Division of responsibility and lack of authority are among its inherent weaknesses. We all find it difficult to yield our own views on minor points and limit our independent action for the common good. We also find it difficult to devote some of our private time to the welfare of our neighbor and to the effort necessary to cinvince him that our interests are common and that they can be served best by a union of numerical and financial strength. Appreciation of these basic facts by his directors will earn the gratitude of every earnest field man.

"May I ask you to take a message to the state associations you represent? It is this: The National Editorial Association is the only present national voice of the publishers composing those state associations. To stop with state organization is to leave the job half done. I beg of you to impress upon your members the fact that the National Editorial Association is just as soundly managed from a business point of view as any state association and has just as high ideals professionally as any state association or any professional school for the training of newspaper workers. We must place large dependence upon you, the field men of the several states, to convince the publishers of your several states that they owe the National Editorial Association a professional duty and a financial obligation."

THIS CLEAN FOREST MEANS WEALTH

THIS is the picture of a young clean spruce forest.

A little money has been spent to protect it from fire on the theory that this growing timber is wealth stored up for the future.

The future of the publishing business, as well as many other industries, is dependent upon the future supply of wood-pulp from spruce. EDITOR & PUBLISHER need not reiterate to its readers that the future supply is in peril.

Uncle Sam made the first important step to safeguard the future of spruce woodlands when the Weeks Act was passed, having as its objectives—grow new forests and protect the headwaters of the streams. To date 2,122,970 acres have been purchased under the Weeks Act, but the appropriations have gone to states where there are few paper mills.

Further advances are possible under the budgeting of appropriations for extension of the National Forests, now being considered by a Congressional Committee. It is the duty of journalism to interest itself in a program which will apply suitable appropriations for the growth of pulpwood and its protection.

Correction

By mistake of a correspondent EDITOR & PUBLISHER recently stated that the *Worcester* (Mass.) *Telegram* had established the first newspaper radio broadcast station in New England.

As a matter of fact the first New England station was established by Edward Gans, publisher of the *Fall River Daily Herald*. This was not only the first in New England but was one of the pioneer operations in the United States. That station is listed in the government records as WTAB and its success has been notable.

SCIENCE UNEXPLORED JOURNALISM FIELD

Walter Lippmann, New York World, Says Editors Need Trained Scientific Writers to Round Off Editorial Pages

Science was described this week as "the great unexplored field of journalism" by Walter Lippmann, editor of the *New York World's* editorial page.

WALTER LIPPMANN

In an interview with EDITOR & PUBLISHER, Mr. Lippmann said development of a special class of scientific writers was the greatest need today of the director of the modern newspaper's editorial page.

"Newspapers," he said, "have successfully steered away from excessive editorial political partisanship. Skullduggery is a thing of the past.

"But, in science, we are still at sea. The average newspaper editorial comment on a scientific subject is often a disgrace.

"This presents a very curious situation, which I believe all newspaper editors should pause to consider. Technical science is at the foundation of practically every current human activity, yet very few editors are fit to pass judgment on any important or unimportant phase of the subject to their readers.

"All sorts of so-called scientific 'cures' are forever coming up. Their evaluation constitutes an unsolved editorial problem.

"For instance not long ago it was announced that the cancer germ had been segregated. All the editors knew was that what appeared to be a group of reputable doctors were behind the story. But that knowledge would get no editor very far.

"Again, a 'universal germ-killer' is announced. Fortunately in this case a smattering of scientific knowledge is sufficient to inform the newspaper's editorial writer that a universal germ-killer is impossible.

"The problem is not in obtaining scientific articles. It is an editorial question. What we need is a class of scientific writers capable of sifting the true from the false, the important from the unimportant. Slosson is one of the few such writers we now have in America."

Mr. Lippmann said he had tried himself to obtain the services of a scientific writer without avail.

"There are very few American scientific men who are able to write for newspaper readers. Some few who can write refuse to do so, saying it is beneath their dignity."

The unexplored fields of science must be discovered by newspaper editors. Mr. Lippmann believes, before a well-rounded newspaper editorial page in this age of specialization is possible.

"The omniscient editor is no more," Mr. Lippmann continued. "The utmost a single editor may know these days is who to ask and where to look for information. Newspaper editorial pages are on the metropolitan dailies the products of experts."

The World editor said he had a staff of seven editorial men each one of whom specializes in some one particular subject, such as municipal problems, federal government, foreign affairs, economics, military, church, and law. He recently engaged W. O. Scroggs, former financial editor of *New York Evening Post*, and later with the Western Electric Co., to write editorials on economics. The World also employs a lawyer for advice on all editorial questions involving constitutional law.

What Mr. Lippmann lacks, he said, is a specialist in science.

LIPTON'S TEA OPENS HARD TERRITORY BY COUPON DRIVE IN NEWSPAPERS

Company Strengthens Distribution in Greater Boston, Long Known as a Salada Market—Other Special Offer Stunts Have Won Success for Advertisers

By HAMMOND EDWARD FRANKLIN

EVERY manufacturer has territory in which his distribution is weaker than it should be.

Perhaps his competitors have been active in the territory for years. Possibly the section has not been given the attention it deserves from the sales department. Maybe peculiar local conditions act against him. More often, he has failed to do the intensive local advertising which would have created a real demand; he may be depending upon too thin national magazine "coverage."

Something more than simply a volley of local newspaper advertising out of a clear sky is necessary to strengthen his position in such a market. There must be a merchandising plan behind the advertising and the plan must be put across in advance by good, old-fashioned personal selling.

Thomas J. Lipton, Inc., long has advertised Lipton's Tea as having "The largest sale in the world." He has used much newspaper space, including special campaigns and tie-up copy with the "Drink India Tea" campaign, which is gaining headway.

Greater Boston has always been known as a Salada Tea market, due to the fact that it is the home town of Salada Tea, which has been advertised in the local papers steadily for years. How Salada Tea under discouraging circumstances built a national American market by starting in Boston and gradually reaching out over the country with non-stop exclusively newspaper advertising and selling already has been detailed by EDITOR & PUBLISHER. This brand is a leader in practically all of the worthwhile Boston stores.

Plainly, just to go in and start plugging advertising of itself was not enough to increase Lipton's distribution, which was only about 12 per cent of the total possible outlets.

The company decided to make a strong drive on the remaining 88 per cent prospects, to be followed up by a big newspaper campaign, which would have as its feature a coupon good for a 10c. package free to every woman who would present it and buy a package at the regular price. The grocer was told to redeem the coupon during Sept. 23-28 at full cash price, he to make his regular profit on both packages.

A general meeting was held at Boston late in August with Joseph Saunders, Lipton general sales manager; H. R. Schaeffer, manager of the producton department of the William H. Rankin Company advertising agency; Earle K. Woodman of the *Boston Post*, and E. W. Preston of the *Boston Herald-Traveler*, among those present. The newspapers were glad to give their co-operation.

Some 15 salesmen were hired locally, furnished portfolios and full information and put to work. The special offer gave them an approach better than ordinary.

Early in the drive, Mr. Saunders wired his agency: "839 new accounts closed and have received orders for 3,787 dozen packages to date. Very well pleased with everything which has taken place in connection with Boston campaign."

Distribution was greatly strengthened further in the three weeks remaining before any copy was released, which was on Sept. 23, in the *Post*, *Globe* and *Herald-Traveler*.

Full pages featured "two for the price of one." This was followed by half pages, featuring the packages, the offer and the coupon together with the fact the tea won gold medals at Ceylon and India. Poster followup copy in smaller space continues the educational work, bearing down especially on the fact that Lipton grows his own tea.

Window displays and other tie-ups were effected wherever it was possible.

A feature of the portfolios, usually supplied Lipton salesmen, is an analysis of overflow circulation of the papers in neighboring towns. A letter from the local paper, a letter from the home office at Hoboken and a letter from the space buyer of the William H. Rankin Company, with the schedule, usually are pasted in a large, imposing strong brown paper portfolio, which also has the proofs of the copy.

Coupons are excellent indication of the creation of new users and it is well worth paying the dealer the full retail price for the sake of getting the new customer started, if there is going to be a steady repeat. To redeem a thousand coupons would only cost $100. If there is any suspicion of gross dishonesty on the part of dealers in sending in coupons, it is possible to check up with the people whose names are signed on the coupons and also to check the number of packages which the dealer bought from the manufacturer at the start of the drive. The coupons can be keyed to show which advertisement and which medium produced the most.

The American Tobacco Company the last few months has been having a series of special offers and propositions to keep various brands turning over fast. Its Lucky Strike offer, good one day only for a package of Lucky Strikes for 9c., the company paying the 6c. tax, was only one of a number of offers made. These give the salesmen something new to talk, the trade a real reason for stocking up and the public a motive for buying in quantity without delay.

Copy which featured Alfred W. McCann's views on Van Camp's Evaporated Milk had a "hook" in the form of a coupon good for one can of Van Camp's Tomato Soup free with a purchase of six cans of the milk.

The Baker Food Products Company has been introducing its Delicia Sandwich Spread by the carload city by city, with local sales drives followed by full page and smaller advertising offering two cans for the price of one. The coupon is of especial interest as it required no signature and was worded as follows:

"GET Your FREE Can Now!

"Take this coupon to any grocer or delicatessen store anywhere in the United States. Buy a 15 cent can of Delicia Sandwich Spread and the dealer will give you an extra 15 cent can FREE—you get two cans for the price of one. We will pay the dealer for the extra can. Go while this special distribution is on. Don't hesitate to ask for the free can. This coupon entitles you to the extra can free.

"RETAILER: This coupon good for 15c. cash.

"When customer presents this coupon and buys 1 can of Delicia Sandwich Spread for 15c., give her an extra can free, remove the wrapper from one of the cans and attach it to this coupon. Send all your coupons with wrappers attached, either to us or your jobber, and you will be paid 15c. apiece in cash for them."

Please note that the dealer has to remove a wrapper from a can to accompany the coupon.

Hams are an important Christmas line in New Zealand. The New Z. Bacon & Meat Packing Company, the principal ham and bacon house on the island, notified its dealers that on Dec. 1 of last year it would conduct, through advertising, a competition for one word as a trade name for their Swan Ham, with cash prizes to be awarded after the close of the contest. Dec. 20. Advertising played up the ham appetizingly for Christmas and talked the contest. It was required that each entry be accompanied by a tag from a Swan uncooked Christmas ham. It also was stated that the winning names would not be used unnecessarily.

Ordinarily, the grocers do not receive these hams in their stores until Dec. 10. Francis Shearer, manager of the grocery department of Graham & Co., Masterton, New Zealand, ordered the store's hams delivered on Dec. 1. His store made a display of the hams, all priced. It cut out a number of the advertisements of the Swan advertisements appearing that week in the leading newspapers and pasted them up in the window. A show card, saying, "Secure your's now—remember, competition closes 20th." The dealer used small local advertisements to announce the arrival of the hams and to tie up with the general advertising.

The result was that this enterprising merchant sold out his usual Christmas supply of hams the first week and repeated his order before most dealers had even stocked theirs. This is an interesting example of how a dealer can benefit from a special advertising drive.

URGE $5,000,000 FU FOR BRITAIN

Sir Charles Higham Says Governm Should Advertise in Newspaper to Stimulate Its World Trade —Cites India Success

LONDON, Oct. 6.—Advertising is as sential to inter-Imperial trade as it i the individual advertiser, and it is r that the British government shall an interest in publicity and spend the payers' money on it, declared Sir Cha Higham, British advertising expert, i address at the trade dinner of the Lon Old Colony Club on "Should the Bri government spend £1,000,000 on Adve ing." Agents-General of five states w in the Empire and representatives of m important business interests heard Charles.

The government has appropriated 000,000 to stimulate the sale of Em produce within the Empire. Sir Cha believed the only way any producer c successfully advertise a commodity in newspapers and periodicals, and w it came to a national matter the v should be in the newspapers of the wo

Quoting the case of India, which sp £100,000 a year on publicity for the motion of its tea trade, Sir Cha said the country could spend £1,000,00 advertising to enormous advantage.

A resolution in favor of the gov ment spending £1,000,000 on adverti was carried.

Warns Against Air Advertising—Lively Interest in Sixth Annual Convention of New England A. A. C. W. Members—Advertising Successes Related

(*By Telegraph to* EDITOR & PUBLISHER)

SPRINGFIELD, Mass., Oct. 14.—New England, its products, spirit, and honesty, dominated the sixth annual convention of the New England District, Associated Advertising Clubs of the World, the first three days of this week. The slogan "Make Yourself Worthy of New England," adopted at the closing afternoon session, was the keynote of the entire convention. At the final banquet and meeting Tuesday night, which was addressed by Dr. Tehyi Hsieh, head of the Chinese Trade and Labor Bureau of Boston, and Maj. Gen. John Charteris, head of the British military intelligence office, the convention was termed the most successful of the district's gatherings, "a program crowded with information for the members and dominated by the New England faith."

C. K. WOODBRIDGE

John W. Longnecker, of the Hartford, (Conn.) Publicity Club, was elected district chairman, and John Cline, of New Haven, was chosen secretary and treasurer. No convention city was chosen, the decision being left with the executive committee, with Worcester and Boston as the favorite cities. For the first time in the history of the organization a women's club won the prize for the best attendance record. The Women's Publicity Club, of Providence, was awarded the cup donated by the Kimball Hotel, the records being computed in consideration of distance, membership and percentage present.

The Tuesday afternoon session in the Springfield Auditorium was devoted to stories of advertising successes, told by representatives of well known New England companies. Each of the speakers traced the development of his business from a small restricted selling house to national prominence and stressed the important part played by advertising of all kinds.

Willard B. Rogers, president of the Advertising Club of Hartford, presided. Among the speakers were H. Ronald Carter, of the William Carter Company; Watson M. Gordon, of the S. D. Warren Paper Company, of Boston; Earl G. Manning, General Agent of the John Hancock Mutual Life Insurance Company; H. C. Ray, of the American Optical Company, of Southbridge; Sherman F. Johnson of the International Silver Company; and William T. Card, of the George E. Keith Company, of Brockton.

John S. Lawrence, of Boston, chairman of the Governor's joint committee for the New England Conference in Worcester, Nov. 12 and 13, addressed the Tuesday morning session, giving a detailed account of the organization of the New England Conference. Miss Marion Brown, president of the Advertising Women's Club, of Boston, presided. Prof. E. H. Schell, professor of business management at the Massachusetts Institute of Technology, another speaker of the morning, said that his section needs some "town criers who will stand on their feet and tell of the advantages of New England."

Arthur D. Neff, advertising manager for Meekins, Packard and Wheat, described in detail the planning and conduct of a "store event." Arthur Freeman, president of the Freeman-Smart Company, of Chicago, also spoke, and Albert W. Vining, of Vining and Borrner, of this city, spoke in a humorous vein.

Honesty in advertising, whether in retail or in wholesale business, its value to individuals and communities and its absolute necessity in business life, was the keynote sounded at Monday's session. Practically every major phase of advertising and merchandising was treated by an expert.

C. K. Woodbridge, president of the Associated Advertising Clubs of the World, treated the general theory of advertising, urging the use of systematic organization of advertising departments and the use of a system in writing the advertisements.

Sheldon R. Coons, director of sales and publicity for Gimbel Brothers, of New York, and president of the Associated Retail Advertisers, spoke on the "Future of Retail Advertising." He touched on its history, told of the various periods through which it had passed, and expressed the belief that for the retailer there was no advertising medium that would ever take the place of the newspaper.

Warning against an attempt to advertise by radio was sounded by Sheldon R. Coombs, Director of Gimbel Bros., New York. Mr. Coombs said that although his firm operated a radio broadcasting station it did not advertise its goods through the station and added that he wished to warn any others who might be contemplating installing a radio station as an advertising medium to give up the idea. He listed the varied mediums of advertising used and said in part: "I have tried all the media mentioned in this talk. I have even tried some not mentioned. My store uses practically one medium and that is newspapers. We have never discovered any agency which could convey to the public store news as quickly and economically as newspapers, nor have we ever been through a period when merchandising measured up to that policy has not sold readily if the quantity of that type of merchandise is available. We do not hesitate to buy enough space to acquaint people with it. If our space is small it is not because we are trying new media, but simply because there is not enough of that kind of merchandise to warrant the use of more space that day. Speaking personally, therefore, I believe the advertising of the future will be similar to that of the present. It will appear in media that have proved most productive. Its size will be determined by other agencies. As circulation and rates grow, and they seem to be ever on the upward grade, our space will be cut down even greater. Emphasis will be placed upon copy, layout, illustration and typography. More and more emphasis will be placed on accuracy in presentation of merchandise news and of so-called institutional news. The level of public confidence in our printed message will be raised in proportion to the increased effort we make to convey to them news."

Robert J. Murray of the Murray Co., of Honesdale, Pa., told how his company had built up a $500,000 business in a town of 5,000 population.

Charles R. Weirs, of the National Shawmut Bank, Boston, advanced a suggestion that advertisers use the direct mail system to supplement newspaper advertising, giving examples of effectively written sales letters. Louis E. Kirstein, vice-president of William Filene's Sons Company, of Boston, told of the actual work to reach a standard of absolute honesty as exemplified in the methods of the Better Business Commissions, of whose national organization he is a director. Robert J. Murray, head of the Murray Company, of Honesdale, Pa., told in graphic and interesting fashion of what advertising had done for his firm, how it had built it up from a house doing a business of $10,000 gross a year until now what was once a small town hardware store is doing a half million dollar business yearly.

The delegates were guests of the *Springfield Republican* and the *Daily News* at a dinner Monday. Waldo R. Cook, editor of the Republican, welcomed them on behalf of the press of the city. a hoax was perpetrated when John Daniels, of Boston, was introduced as "Sir Alexander Ferguson, editor of the *Glasgow* (Scot.) *Chronicle,*" which was disclosed only at the close of his speech when he pulled off a huge beard he had been wearing. There was no doubt of Mr. Daniels' sincerity however, in his scathing denunciation of billboards that clutter up hills and valleys and make an eyesore of what should be a scene of beauty and charm.

Frederick W. Bliss, chairman of the New England District, offered a creed for New England. The creed suggested was:

"NEW ENGLAND—KNOW THYSELF!"

"Know thy weaknesses that they may be cured by the light of proper publicity.

"Know thy conservatism, that it may guide and be guided aright.

"Know thy opportunities, that they may be improved by constant effort and co-operation, and offered to the world.

"Know thy extensive resources, that they may be used in exemplary fashion.

"Know thy infinite charm, thy great, green-clad hills, thy silver rivers gently flowing through fertile meadows, thy alluring shores of the eternal sea.

"Know thy proximity to the markets of the world, that thy relationships may be the closer.

"Know the advantages thou hast in thy mature craftsmanship, in thy venerable traditions, in thy repute for character higher than the mere honesty of justice.

"Know thy own maturity, New England, lest thou be confused by the babel of lusty vaunting cries from youthful regions still immature.

"Know thyself, New England, so that thou mayst veritably, 'Turn tradition into trade,' remembering that future tradition must be built on present trade in the service of the world."

Rev. Laurence Breed Walker, of Saco, Me., in an address at the opening of the convention Sunday night, urged church advertising. He said: "We must sell the church to the people and the only way that can be done is through advertising. Advertise in the newspapers with things that touch the level of average mentality." A municipal organ concert preceded Mr. Walker's address.

Exhibits of Springfield products were arranged around the main hall and attracted much attention. The J. D. Bates Advertising Company loaned about 50 foreign posters, collected in Europe by Mr. Bates and a part of one of the finest American poster collections. Francis M. Waters, of Springfield, was chairman of the committee arranging the convention.

SONGS OF THE CRAFT

(*Written Exclusively for* EDITOR & PUBLISHER)

By Henry Edward Warner

CONFESSION

(Will you of the Craft pardon the diversion from purpose in this verse of other than Craft things?—H. E. W.)

Within an outdoor sanctum
I kneel in spirit, I
Who came to Earth a child of sin
And who in time must die.
Above me, thru the foliage
Of trees, just peeking through
The network of the forest, is
My Temple's roof of blue.

In spirit kneeling, humbly
I search my soul to find
The errors and the sins that lurk
In body and in mind;
But when I find an error
And moan the cursed thing,
Somewhere among the flowers there
A bird begins to sing!

Ah miserere mei! . . .
O sinful man of men!
In ashes must I purge my soul
To live in peace again?
But, I who should be mournful
In that so sacred bower,
Behold, I cannot weep at all,
Because . . . I smell a flower!

And God who reads me rightly,
He lifts me from my knees
And starts a feathered choir aloft,
In His own, deathless trees!
I come to my confession
In that great wooded hall
To find that I, a sinful man,
Have never sinned at all!

POSTPONE HEARING

Advertising Case Put Over by Federal Trade Commission Until November

WASHINGTON, Oct. 14.—The Federal Trade Commission hearing in the advertising "restraint of trade" case, was today postponed from October 23 to November 23.

Coast Cities Plant Joint Ads

Plans for an all-Pacific Coast campaign of tourist advertising were announced Oct. 6 by the Seattle Chamber of Commerce. The plan, first proposed to California and Oregon cities by President David Whitcomb of the Seattle Chamber has received numerous indorsements by chambers of other Coast cities and a general meeting, the Seattle chamber was recently informed, will be called at San Francisco within the next month to discuss definite procedure. The name of "Pacific Cities Associated" has been proposed for the new organization.

SALINA, KAN., PAPERS CONSOLIDATED

Laubengayer Purchases Journal and Union and Promises Strong Daily —Say City Could Not Support Two

(*By Telegraph to* EDITOR & PUBLISHER)

SALINA, Kan., Oct. 13.—R. J. Laubengayer, who recently acquired the *Salina Evening Journal* by purchase, announced today that he also had secured control of the *Salina Daily Union* and that the two papers would at once be consolidated into the *Salina Journal* which will be owned by the General Newspaper Publishing Company, of which he is principal owner. The Journal building will be remodelled and while this is being done the paper will be published from the Union plant, after which it will be operated as a commercial job printing establishment.

A Hoe 32 page Simplex press has been ordered and will be delivered within a few weeks, while two new Model Eight linotypes are to be shipped at once giving the journal a battery of eight machines to handle news and advertising.

Mr. Laubengayer will be publisher, while Roy F. Bailey, who has been manager of the Journal, will be general manager of the consolidated newspaper. Fred L. Ludes, managing editor of the Journal, will continue to hold that positon, while E. C. Woodward, formerly editor of the Union will be advertising manager of the Journal, and C. P. Parker of the Journal, will handle national advertising. C. W. Wheeler, who was manager of the Union, will be in charge of the job printing plant.

Associated Press leased wire service of the Journal will be supplemented by special service from United Press and Newspaper Enterprise Association.

Mr. Laubengayer, who is a prominent central Kansas business man, secured his newspaper education on the *Ann Arbor* (Mich.) *Times-News* and the *Detroit News*. In announcing the consolidation he said:

"For many years it has been my ambition to engage in the newspaper business, and it therefore is with a great deal of pleasure that the Salina Journal comes into my possession as a consolidation of the Salina Evening Journal and the Salina Daily Union. There is a place for a strong newspaper that will serve Salina and Central and Northwest Kansas and it will be the aim of the Journal to meet that need.

"Having no personal ambitions to serve, and no enemies to punish or friends to reward, it will be the mission of the Journal to print all the news that is fit to print, both local and national, truthfully, fearlessly and fairly. While the Journal will continue to be a Republican paper, there will be no attempt to throttle opinion. Its columns will be open to those who disagree with its policies, and during political campaigns the Democrats will be given space, free of all cost, in which they may present their views."

The publishers of the Union, in their farewell statement said:

"The main reason for the suspension of the Daily Union and for this consolidation is the fact that there is not room for two daily papers in a city the size of Salina, nor, we believe, in one of less than 50,000 population.

"During the last fifteen years several different managements have tried to make the Union a financial success. We believe the only solution here, as it has been in many other cities the size of Salina, and larger, is consolidation. During the last few years, newspaper costs, and by that we mean all the elements entering into the making of a newspaper, have steadily increased. Newspaper costs are greater now than they were during the war."

BANQUET FOR EISENLORD

Chicago American Executives Celebrate His 25th Anniversary

Department managers of the *Chicago Evening American* gave a banquet, Oct. 13 for John H. Eisenlord, circulation manager, in honor of his 25th anniversary with the publication.

Mr. Eisenlord who went to the Evening American shortly after the paper started, has been with the publication ever since and has worked himself up through the circulation department.

A. B. C. DIRECTORS' REPORT

(*Continued from page* 4)

Your Board is pleased to announce to you that the total membership of the Bureau has now passed the 1,900 mark.

During the year the Bureau has added to its membership 168 advertisers, advertising agents and publishers. As against this 10 publications were discontinued; 8 advertisers and advertising agents ceased business; 24 publications were consolidated; 21 publications and 1 agent were dropped from membership; there were 36 resignations, 8 of which were local advertisers.

The net result, after taking into account applications rejected, etc., shows a total membership and applicants for membership in the Bureau of 1,908 as of October 6th, 1925.

The first report of the Bureau showed a membership of 499. The reaching of the 1,900 mark in its eleventh year is, therefore, a gratifying indication of the appreciation of the Bureau's benefits to its members. It is the hope of your Directors that at the next annual meeting they will be able to report the passing of the 2,000 mark.

The present members of the Board of Directors whose terms will expire at this meeting, and who will be reappointed or whose successors will be named, are:

ADVERTISERS

F. R. Davis, General Electric Co., Schenectady, N. Y.

Ralph Starr Butler, Resigned, United States Rubber Co., New York, N. Y. (one year).

B. H. Bramble, American Chicle Co., Long Island City, N. Y.

L. B. Jones, Eastman Kodak Co., Rochester, N. Y.

E. E. Taylor, Postum Cereal Co., Inc., New York, N. Y.

W. K. Towers, Paige-Detroit Motor Car Co., Detroit, Mich.

W. W. Wheeler, The Pompeian Co., Cleveland, Ohio.

ADVERTISING AGENT

Walter Hine, Frank Seaman, Inc., New York, N. Y.

NEWSPAPER

W. A. Strong, The Chicago Daily News, Chicago, Ill.

MAGAZINE

S. R. Latshow, Butterick Pub. Co., New York, N. Y.

FARM PAPER

B. Kirk Rankin, Southern Agriculturist, Nashville, Tenn.

BUSINESS PUBLICATION

E. R. Shaw, Power Plant Engineering, Chicago, Ill.

We have released during the twelv months which this report covers 1,40 audits, or an average of 117 audits pe month.

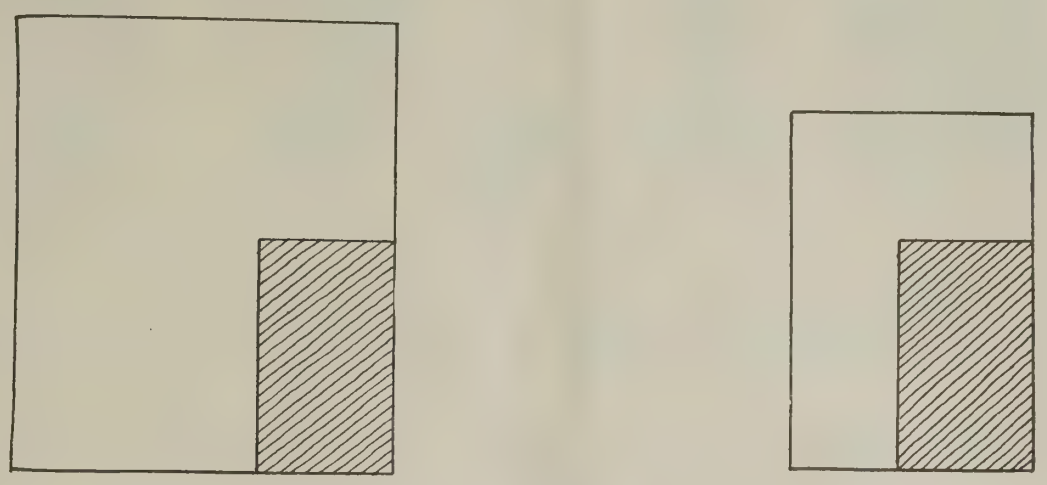
This means that within the fiscal yea the total number of audits made exceede the total number of publisher member of the Bureau. Not every audit due wa completed at the end of the fiscal year— that would not be possible from an ecc nomic viewpoint.

During the year a conference was hel between the executive officers of the Bu reau and the members of the Internationa Circulation Managers' Association a their annual meeting held in Colorad Springs. At that conference the Chie Auditor presented a set of forms cover ing bookkeeping methods. At the sugges tion of the convention these forms wer distributed to members who were not i attendance and numerous requests hav since been received. This will result i great progress toward the adoption o uniform records and the work of th Bureau's auditors will, therefore, b greatly expedited.

The auditing force numbers forty-on field auditors, six house auditors and tw special investigators in addition to th Chief Auditor, Assistant Chief Audito and Manager of the New York Office.

Holding fast to the sound principle which have made the past successes o the Bureau possible, your Board look forward to another year of steady pro gress. While a drastic change in pla or purpose is not, in our opinion, you desire, yet the present Board believes yo will have full confidence that the ne Board which you will elect at this con vention will approach the future with a open mind and seek, by the wise solutio of all problems with which it may b confronted, to further advance and en hance the Bureau's prestige and use fulness.

May we urge that in many and a decisions which may be reached at th convention, this underlying thought sha prevail, so that out of your deliberation may come an inspiration for furthe achievement which will mark the ensuin year as the greatest year in the Bureau history?



Respectfully submitted,
O. C. HARN, President,
W. A. STRONG, Secretary,
E. R. SHAW, Treasurer,
STANLEY CLAGUE, Managing Director.

*Morning Sun and Press consolidated. ¶Sun and Herald combined into Sun-Herald Feb. 1, 1920; name changed to Herald Oct. 1, 1920. †Average for two months Sun-Herald.
‖Evening Sun and Globe combined June 4, 1923. Name changed to Sun March 10, 1924. ‡Average for 2 months Sun and 4 months Sun-Globe.
§Price of evening newspapers advanced from 2 cents to 3 cents June, 1920.
††Telegram and Mail combined January 28, 1924. Sunday issue discontinued March 16, 1924. Name changed to Telegram May 18, 1925.
‡‡Herald and Tribune combined March 19, 1924.
§§Mirror (Tabloid) first issue June 24, 1924.
[1] Includes daily average of the Daily News, inclusive of the Sunday News.
[2] Evening Graphic first issue September 15, 1924. Sunday edition inaugurated May 3, 1925, discontinued September 1, 1925.
**During the general strike of the New York newspaper pressmen, from September 18 to 26, 1923, inclusive, "combined morning" and "combined evening" papers were published. Statemen of the following newspapers show that circulation figures of this period were omitted: Times, Herald, World, Mail, Sun-Globe, Eve. World, Eve. Telegram, Brooklyn Eagle, Brooklyn Standar Union, Brooklyn Citizen.

On these page diagrams, drawn to scale, the 420-line advertisement occupies 37.4% of the tabloid page; 18.7% of the large page.

Up 22,000!

The Washington Daily News gained more than 22,000 net paid circulation October 1, 1925, as compared with the corresponding six month period of 1924.

This gain of 55% was the result solely of reader demand — no premiums nor other artificial stimulants were used.

Through The Daily News, the national advertiser may secure the second largest home delivered circulation in the nation's capital.

The plan on which advertisements are arranged in the 5-column-16-inch pages of The Daily News provides that every advertisement has favorable position. Daily News space has double value per unit of circulation because of the high visibility of each advertisement. Not a single eye is wasted.

Include the Daily News (circulation 62,274) in your Washington schedules as your best and most economical contact with the permanent Washington population.

SEPTEMBER ADVERTISING GAINED OVER LAST YEAR IN 30 CITIES

MORE than five million lines of advertising were gained in September over the same month of 1924 by 132 newspapers of 30 cities, according to the *New York Evening Post* statistics. Losses were shown in only five cities. Total advertising carried by each newspaper and a linage summary by cities follows:

Summary of Advertising by Cities

30 cities listed 132 papers listed	25 show gain 94 show gain 3 no comparison		5 show loss 35 show loss
	1925	1924

Supremacy in Circulation *and* Supremacy in Advertising

In New York Evening Newspaper Field

Supremacy in Circulation for 26 Consecutive Years

The NEW YORK EVENING JOURNAL is the choice of evening newspaper readers in New York because nearly half of them buy it. The NEW YORK EVENING JOURNAL is therefore the choice of New York advertisers, and they use it more than any other New York evening paper. The choice of the buyer is the choice of the seller.

The NEW YORK EVENING JOURNAL is shown by the latest Post Office circulation statements to stand so unquestionably head and shoulders above any of the other evening papers that it represents nearly half of the total paid circulation of the entire New York evening field.

The circulation of the NEW YORK EVENING JOURNAL is greater than that of the Evening World and Sun combined. It is more than twice the circulation of the Evening World by over 11,000, and more than twice the circulation of the Sun by over 123,000.

It gives advertisers the largest evening circulation in America—more ***buyers*** than the total population of Pittsburgh, the ninth largest city in the country—more ***readers*** than the total population of Philadelphia—America's third largest city.

Supremacy in Advertising for 11 Consecutive Years

What Post Office figures show for supremacy in circulation, official lineage records show for the NEW YORK EVENING JOURNAL'S supremacy in advertising. During the nine months of 1925 it **PUBLISHED MORE TOTAL ADVERTISING** than any other New York evening newspaper by over 583,000 lines.

IT PRINTED MORE DEPARTMENT STORE ADVERTISING than any other evening paper during first 9 months of 1925 by over 646,000 lines.

IT PRINTED MORE WOMEN'S WEAR ADVERTISING than any other evening paper in New York by over 544,000 lines during the first nine months of 1925.

IT PRINTED MORE MEN'S WEAR ADVERTISING during this period than any other evening paper by over 206,000 lines.

IT PRINTED MORE FURNITURE ADVERTISING than the Evening World and Sun combined during first nine months of 1925 by over 104,000 lines.

IT PRINTED MORE BOOT AND SHOE ADVERTISING than any other evening paper by over 21,000 lines for the nine months.

Every New York advertiser has available in the EVENING JOURNAL a direct and tested method of increasing sales in New York City and suburbs.

CHICAGO CONVENTION SIDELIGHTS

THE twister of convention activities swirled in a circle through five Loop hotels, with the vortex in the lobby of the La Salle, where the A. B. C. convention assembled Thursday and Friday. The La Salle lobby on Wednesday, preceding the A. B. C. opening session, was jammed with publishers, advertisers, circulation men, advertising managers and other groups present for the meetings. Caravans of bell boys squirmed through the crowds burdened with reserve chairs for meeting rooms. The atmosphere was one of greetings, handshakes, cigar smoke, jostle and fellowship.

The simultaneousness of the various conventions made reporters present wish for a pneumatic tube transportation circuit. On Wednesday five meetings were in progress at the same time at five different places. They were: At the Sherman Hotel, Inland Daily Press Association; LaSalle Hotel, Central States Circulation Managers' Association; Morrison Hotel, Association of Newspaper advertising executives; Congress Hotel, Associated Business Papers Inc. and National Conference of Business Paper Editors; Offices of the Bureau of Advertising, A. N. P. A., Meeting of Bureau Executives.

All the convention delegates were interested in seeing the new Tower home of the *Chicago Tribune* on Michigan Boulevard and many inspected the plant.

Florida interests prevented George D. Lindsay, president, and Mrs. M. B. Shaw of the *Dixon* (Ill.) *Telegraph* from attending the Inland Press Convention. Mr. Lindsay had planned to be present, but at the last moment he was detained in Florida where he is planning to found a new paper. Mrs. Shaw was unable to leave Homosassa, Fla., where she and her son, R. T. Shaw are launching a new weekly, which will be followed shortly by a daily.

Cowgill Blair of the *Joplin* (Mo.) *Globe,* secretary of the new combination Newspaper Publishers' Association formed during A. B. C. week, reports high prosperity in his section. So far this year the lead and zinc mines about Joplin have exceeded last year's entire production and 1924 was the banner local year.

One of the most ardent sports enthusiasts at the Inland meeting was George W. Purcell of the *Vincennes* (Ind.) *Sun,* who, in addition to promoting the educational interest of his community, is boosting local basket-ball as a grand old game.

Former Secretary of Agriculture E. T. Meredith's Plea for more scientific research in the farm market met the approval of manufacturers, distributors and retailers gathered for the Farm Food Conference held at the LaSalle Tuesday. He cited instances showing that in many cases advertisers do not comprehend the farm market in its relation to their own business progress.

George Morris, who was in charge of the Inland program, is head of the business survey of the *Chicago Tribune.* He was formerly a reporter on the Tribune, but later entered his present department, taking charge when James E. Cleary resigned to become associated with the Studebaker Corporation.

R. E. Williamson was present, his first attendance at an Inland meeting since he became advertising manager of the Ludlow Typograph Company.

Mrs. Zell Hart Deming of the *Warren* (O.) *Tribune-Chronicle,* one of the few women publishers in the United States, expects to leave shortly for her anual trip to Europe.

Wiley L. Morgan, vice-president and general manager of the *Knoxville* (Tenn.) *Sentinel* extended a welcome to the Inland in behalf of the S. N. P. A., inviting the members to attend the annual meeting of the Southern Association next summer.

Among the interesting people present was Mrs. Wil V. Tufford, wife of the secretary of the Inland, formerly a dramatic lecturer on the Chatauqua circuit. She is now actively engaged in dramatics in Clinton, Iowa, the Tufford's home town.

August J. Fertig, advertising manager of the *Cleveland* (O.) *Waechter and Anzeiger,* German daily, attending the A. N. A. E. and A. B. C. meetings, said 32 foreign language newspapers are now members of the A. B. C.

So valuable and so scarce was time amid so much convention activity that many small parties and luncheons were held, and in several instances, small groups were entertained at "breakfast"—a unique departure from usual customs.

After spending several days in Chicago looking in on all press meetings, H. L. Williamson, secretary of the Illinois Press Association, left Thursday night for St. Louis to attend the sessions of the Missouri Press Association, October 15, 16 and 27.

Homer Gard, of the *Hamilton* (O.) *News,* accompanied by Mrs. Gard, combined pleasure and business last week in Chicago where he was attending the meeting of the A. B. C.

An unusually large number of wives of members of the A. B. C. were present at the banquet, and most of them joined the group which viewed the special midnight performance of "Kid Boots" afterwards.

W. C. Johnson, president of the Southern Newspaper Publishers Asssociation, and publisher of the *Chattanooga* (Tenn.) *Times,* with W. L. Morgan of the *Knoxville* (Tenn.) *Sentinel,* secretary and treasurer of the association, and Manager Cranston Williams of Chattanooga, were prominent attendants at the A. B. C. meeting.

FIX EDITORS' MEET DATE

American Society Annual Convention at Washington, Jan. 15-16

(*By Telegraph to* EDITOR & PUBLISHER)

CHICAGO, Ill., Oct. 14.—At the close of a meeting of the board of directors of the American Society of Newspaper Editors, at the Blackstone Hotel yesterday, it was announced that the annual convention of the organization will be held in Washington, D. C., Jan 15 and 16, 1926.

Casper S. Yost, editor of the editorial page *St. Louis* (Mo.) *Globe Democrat,* president of the society, and E. C. Hopwood, editor of the *Cleveland Plain Dealer,* the secretary, were present.

New Presses for S. F. Bulletin

In the cargo of the S. S. "President Monroe," which left New York last week, was half of the heavy-pattern unit-type double sextuple press that the *San Francisco Bulletin* recently purchased from R. Hoe & Co., Inc. Included in the same shipment were four multi-color units to be attached to the Hoe color press already in the Bulletin pressroom.

U. P. Expands Printer Circuit

The United Press has added four newspapers to its printer circuit in Indiana, which is now being operated out of Indiana. The additional newspapers are the *Connersville News-Examiner; Greenburg News, Newcastle Courier,* and *Rushville Republican.*

News Print Service Meet

The fall meeting of the News Print Service Bureau will be held at the Hotel Commodore, Wednesday, October 21. Arrangements are being made for a discussion of economic and business conditions in Europe and America.

Minnesota Weekly Quits

The *Fergus Falls* (Minn.) *Free Press* has suspended. It was owned mostly by farmers.

BUREAU OF ADVERTISING

Fall Meeting at Chicago Reviews Wo and Plans for New Activities

CHICAGO, Oct. 14.—The Bureau Advertising, American Newspaper Pu lishers Association, held its regular F meeting at the Chicago offices Wedn day. Chairman William F. Rogers Boston, presided and others present wer Louis Wiley, *New York Times;* D. Town, Hearst papers; Chas D. Atkins *Atlanta Journal;* David B. Plum, *Tr Record;* Allison Stone, *Providence Jou nal;* Frank H. Burgess, *LaCrosse T bune;* William A. Thomson, Director the bureau; Thomas H. Moore, Asso ate director and F. Guy Davis, Weste Manager.

It was voted to give Mr. Hofmann the committee and the Pacific Coast ma ager, full authority to operate for the b reau at the San Francisco meeting Pacific Coast publishers. Matters connection with the Fall convention the A. N. P. A. were discussed and the was a detailed review of various phas of the bureau's work.

The bureau's finances were found be in good condition and several sugge tions were made for immediate acti ties.

The committee voted to hold anoth annual dinner in connection with the N. P. A. April convention in New Yo and the chairman was authorized to nar a dinner committee which will be a pointed at a later date.

At the conclusion of the business se sion, the committee adjourned to ha luncheon with the association of new paper advertising executives at the Ho Morrison.

A Word of Caution to Radio Advertisers

Yours is an infant industry,—a giant undoubtedly, but an infant nevertheless. Your rate of growth is amazing but your rate of mortality is even more so. Those among you who are most scientific survive. Those who fail to profit from the cumulative knowledge that experience makes available to all,—they are "on the way out" before they get fairly started.

In the field of radio advertising definite and cumulative knowledge of profitable media is available. Experimenting is unnecessary. The manufacturers of musical instruments, talking machines, pianos and similar lines of household merchandise have done the experimenting for you. They have added their findings to those of builders of furniture, makers of electrical goods, manufacturers of drug-store merchandise, clothing, boots and shoes, food and confectionery. They have checked their evidence against the experience of department stores and specialty shops, automobile tire and accessory dealers.

In Cincinnati it is true that the Times-Star, during the first months of the present year, has carried thousands of lines of radio advertising more than any other newspaper. But more significant than this leadership in radio lineage is the fact that for eighteen consecutive years the Times-Star has held undisputed leadership among the Cincinnati newspapers in every one of the above-named classifications.

This composite record of results is the safest guide for the radio advertiser. No amount of experimentation with other media can make it obsolete or detract from its market value. It is the one established body of advertising data which the radio industry can safely accept for guidance in the Cincinnati market.

NEWSPAPER MAKERS AT WORK

By PHILIP SCHUYLER

Gone are the good old days.—K. M. Anderson

"MAYBE it's prohibition. I don't know."

Karl M. Anderson, managing news editor of the *San Francisco Chronicle,* sank back in his swivel chair and lit a cigarette, the better to look into smoky dream clouds and remember days gone by.

"But it's fact. We don't have real newspaper men any more. They don't like a good fight. They don't like to work nights. They want to be human beings, that's the trouble.

"Fifteen or twenty years ago, before the days of the telephone and the early edition, when a story broke, a man went out and got it, cleaned it up, came back to the office and wrote it. If it wasn't written right, he got Hell for it.

"Time, however, has brought us the wretched telephone, which is the biggest detriment and the greatest help the newspaper world has ever known. Newspaper stories are now no longer stories; they are fragmentary bulletins and scrapends. The personal touch is missing."

Perhaps Anderson expects so much, because his 27 years of newspaper experience date back to the wild gold rush days of the Northern Pacific Coast. His first reportorial work was on the *Seattle Post-Intelligencer.* Gun fights were frequent. Anderson's adventures as police reporter are dime novel thrillers. He knows some good stories about battles between reformers and gamblers over the important question as to whether or not resorts should be moved from the first to the second floors.

In 1902 Harry Tracy, notorious outlaw broke loose from penitentiary and killed 13 men before he was captured. Anderson carries today the marks of three of Tracy's bullets—30-30 dum-dums. He also carries a gold watch presented him for his heroism by Sheriff Williams.

Anderson was with a posse when Tracy was cornered. Bullets flew. Tracy killed three of the sheriff's men, before he himself was wounded. Anderson was first to hit the outlaw, shooting him in the hand.

But Anderson found himself becoming faint from loss of blood. Sheriff Williams dropped beside him badly wounded. Anderson picked up the man and carried him a half a mile back to a farm house and safety.

Tracy escaped.

"Yes," said Mr. Anderson, throwing the cigarette butt to the floor and stamping on it. "My greatest difficulty today is finding good newspaper men."

Mr. Anderson has been in charge of the Chronicle's news department since 1915. Altogether he has been on the Chronicle staff 19 years.

He came to San Francisco from Seattle. In the latter place he had become such a good police reporter that it looked as though they would keep him at that job without opportunity for going higher. Every once in a while his chief would bring him inside as city editor, but always he would send him back to cover police.

His first work on the Chronicle was political writer, and he eventually became political editor of that newspaper. During the Exposition in San Francisco, he was assigned to take charge of the Chronicle bureau on the fair grounds. From this work, he was promoted to his present position.

WAGNER PROMOTED

Moves Up to General Manager of Los Angeles Express

Announcement was made this week by Guy C. Earl, Jr., president of the Los Angeles Express Publishing Company, of the appointment of Frederick Wagner as general manager of the *Los Angeles Evening Express.* He is succeeded as business manager by H. S. Sharpless, who for many years has been auditor of that newspaper.

Mr. Wagner has been identified with Pacific Coast newspapers for 23 years and during the last nine years has served in the capacities of manager of the automotive department, national advertising manager and business manager.

The promotion of Mr. Wagner to the post of general manager is part of a program for the vigorous and comprehensive development of the *Evening Express,* which is the oldest newspaper in Los Angeles. With the recent acquisition of control of the *Evening Express* by Mr. Earl, considerable additional capital has been provided for intensified upbuilding of the newspaper in editorial, circulation and business production departments of the publication.

In addition to a wide acquaintance on the Pacific Coast, Mr. Wagner is well known in the east through annual business trips in the interests of the *Evening Express.*

Hugh O'Neill Dies in Denver

Hugh O'Neill, former editor and publisher of the *Denver Times,* and contributor at various times in his career to the editorial columns of the *Kansas City Star, Denver Post, New York World,* and other newspapers, died Oct. 8, at Mercy Hospital, Denver, of pneumonia following an operation. Upon loss of his eyesight nine years ago, O'Neill had retired from newspaper work. He is survived by his widow and a son and daughter by his former marriage.

PUBLICITY BEST WEAPON AGAINST MAIL FRAUDS

Better Business Bureau Executives Told of Fight Post Office Department Is Waging Against Swindlers

"Meet the mail swindler with his own weapon—Publicity," was the plea of Horace J. Donnelly, solicitor for the Post Office Department in an address before a convention of executives of Better Business Bureaus at Indianapolis.

That part of the investing public which "Falls for mail schemes," Donnelly said, differs from the proverbial burnt child who dreads the fire. They come back again and again for more, undoubtedly actuated by that burning desire to get something for nothing, but actually giving their something for nothing. Lists of their names command high prices from "Sucker List" brokers.

Hundreds of millions of dollars are saved to hundreds of thousands of the investing public annually through the issuance of fraud orders by the Post Office Department, Mr. Donnelly pointed out, but fraud orders and prison sentences are not going to entirely eliminate the fraudulent promoter so long as he can so readily find dupes upon whom to prey, and until the public becomes more educated and pays more heed to warnings, such dupes will be found in plenty.

"The Press and the printed word are effective ways of teaching the public," he said. "The printed word is convincing; the promoter finds it so and of course profits by it.

"Some newspapers give a good deal of space to fraud orders issued by the Post Office Department. Others give scarcely any.

"Wide publicity is desirable in these matters in order that the public may be acquainted with the methods employed by mail order swindlers and profit by such knowledge."

Nearly a thousand persons and concerns have been named in fraud orde issued since Postmaster General Har S. New became head of the departme early in 1923—a greater number th has ever before been issued during a li period, Mr. Donnelly said.

The schemes cover a wide range, said, but perhaps the most pitiable their results are those which lure to th deaths with fake remedies persons suff ing from real diseases, such as cancer a tuberculosis.

Not so serious are those where eld men seeking youth and younger m looking for more youth, literally ju from one rejuvenation cure to anoth until they cover the entire field.

STILL A NEWS MAN

Roy Howard, Traveling in Orie Cables Story to His Newspapers

Roy Howard, chairman of the board the Scripps-Howard newspapers, has forgotten he is a news writer, as well manager of a newspaper chain.

Traveling in China with Mrs. Howa Mr. Howard met and interviewed Cha Tso Lin, former bandit military lea of Manchuria, and General Feng, Christian leader, cabling the stories tained to his newspapers.

The Howards left on their trip to Orient last month and are due to retu to this country the latter part of Nove ber.

GREATER RESULTS FROM NEWSPAPERS DIRECTING AD FLOW TO DAILIES

Newspapers Carrying 50 Per Cent of All Paid Advertising Says E. S. Friendly of New York Sun—Discusses Three Successful Campaigns

MUCH more than 50 per cent of all advertising in the United States is now being done in the daily press—a greater amount than in magazines, streetcars, bill boards, trade-journals, miscellaneous media, and other forms of advertising combined—Edwin S. Friendly, business manager of the *New York Sun* declared this week in discussing the present advertising trend toward newspapers.

"The reason of it may be expressed in one word: Results," he said.

"That is—more results, better results, quicker, real, apparent; perceptible, and at less cost.

"In New York—the world's greatest market—tangible proofs are presentable. Take three cases of recent record—Canada Dry Ginger Ale, Tao Tea Balls, and Post Toasties and Post Bran.

"The latter has been one of the outstanding newspaper successes during the current year. The campaign was conducted, as I am reliably informed, solely through the newspapers. The goods were thus sold through the dealers and wholesalers to the retail grocers, chain stores and others. Shelves were amply stocked, and the public promptly responded through newspaper advertising. Trainloads were sold and re-orders were repeated with regularity.

"A similarly successful campaign was conducted for Canada Dry Ginger Ale. In this case, as in the one above, copy and cuts were of superior excellence. As fine a product as this, backed by such superior advertising, using as good newspapers as was done, must, and naturally does, produce satisfying results. Ample space was used, with pages in color as well as in black and white, and the increase in sales of this judiciously advertised brand of ginger ale was surely phenomenal.

"The residents of New York City buy 18,000,000 pounds of tea a year, for which they pay $16,000,000. Apparently not an encouraging outlook for a tea advertising campaign. Yet the producers of Tao Tea Balls successfully conducted a campaign exclusively in newspapers. They report practically a 100 per cent distribution with sales increases 'way beyond expectations.

"Recently the Bureau of Business Research of New York University asked 1000 represtative retailers, 'What form of manufacturers' advertising is most helpful to you in creating sales?' The replies summarized were: magazines, 47; posters, 91; car cards, 185; newspapers 677.

"In these three instances, I am pleased to say, the *New York Sun* played an important part, as it has in other cases too numerous to mention. But it was the combined results of two or more high-grade newspapers pulling simultaneously in a common cause for the welfare of readers in presenting truthful messages pertaining to dependable products. The Sun, as a family newspaper is justly proud of the important part it has played in developing tremendous sales enjoyed by worthy brands of worthwhile products.

"But, after all, it is all a re-affirmation of the maxim: Truthful advertising, backed by attractive copy, neatly displayed, and placed in a dependable newspaper, is bound to bring adequate returns.

"One of the reasons for increased effectiveness in newspaper advertising is censorship.

"The following paragraph is not self-praise of the Sun, but used simply for illustration. Other newspapers are establishing similar modes of procedure, and are reporting gratifying results.

"Advertisements to appear in the Sun are required to pass two boards of censorship. The first group of censors passes on accuracy, truthfulness and dependability. The second board of censors passes on the typographical appearance of the advertisements offered. Advertisements having big black type, heavy black illustrations, bizzare arrangement, or otherwise untasteful display, are not acceptable. But the Sun is not over-exacting. It maintains a department for the purpose of improving copy and rendering every constructive service possible to its advertisers.

"These are among reasons why the pulling power of newspaper advertising is greater today than ever before, and growing greater daily. This statement is borne out by the testimony of both local and national advertisers, large and small, all over the United States."

OBSCENE MATTER IN THE MAILS

By LOUIS F. JORDAN

AN advertisement in a recent issue of *The Nation,* sets me to thinking.

I see a page notice that a new and unique publication is soon to come into existence with tales that are risque; and Rabelaisian anecdote. The periodical is to appear quarterly at a price of $10.00 per annum; but what is interesting—it will be sent by express instead of through the mail.

Advance account of such a work causes skepticism. Is it of the kind the postal authorities would ban from the mails? Is it to be offensive to the common decency and modesty of the community?

But this is not an article dealing with the merit or demerit of the ten dollar quarterly. Its notice in The Nation simply serves to cause investigation of the law concerning the mailing of obscene literature and just what the word obscene means in the statute regulating the Post Office Department.

The test of obscenity has been well put in the following definition. "Matter is obscene within the statute making it a criminal offense to mail obscene, lewd or lascivious publication, when it is offensive to the common decency and modesty of the community, and is such as to deprave and corrupt those whose minds are open to such immoral influences."

And yet, merely coarse language is not banned by the statute. But, we find that "It is not necessary that the entire contents be objectionable. A single article or passage (offensive to common decency) is sufficient to cause ban by the postal authorities."

One would think a medical work certainly entitled to passage through the mails. It all depends however, for it is said in Burton v. U. S. 142 Fed. 57 "Where the acts described and the ideas conveyed in a book are calculated to deprave the morals of the reader by exciting sensual desires and libidinous thoughts, the book is obscene, and it is immaterial that the information conveyed is accurate and scientific and tends to prevent disease and other ills resulting from existing ignorance upon the topics discussed."

This decision, while dealing with a medical work is of value in analyzing all publications. And it is further said by the Court in this case that it is immaterial that the book as a whole is meant to be of value to the medical practitioner or to men and women in the marriage relation. Even the approval of several physicians did not save it.

One singular distinction is drawn in this case, however, for it is intimated that the book would not be banned if it had been sent by a physician to his patient or to another physician.

As said in Brill's able work on Criminal Law "The statute (meaning the Federal law regulating the mailing of obscene matter) is within the power to establish post offices and post roads conferred on Congress by the Constitution. It does not violate the constitutional guarantees of religious freedom and freedom of the press. Nor is it invalid as failing to provide any certain criteria of guilt."

And, in construing the meaning of the word obscene matter, Mr. Brill has this to say: "The test is whether the language has a tendency to deprave and corrupt the morals of those whose minds are open to such influences, and into whose hands it may fall, by arousing or implanting in such minds sensual, obscene, lewd, or lascivious thoughts or desires. Whether it actually had such an effect on the mind of the recipient is immaterial." "The code also makes it an offense to deposit or cause to be deposited for mailing or delivery any matter otherwise mailable upon the envelope or outside cover wrapper of which, any delineations, epithets, or language of an indecent character may appear."

There have been interesting articles late about the tendency toward the o scene in much of our literature. N many months ago an important deba took place in New York on a propos censorship law for that state.

Magazines or other periodicals m escape the ban of the Postal authoriti by expressing their wares instead of ma ing them but there is danger of acti by state authorities if the material print falls within the established meaning the word obscene.

The few citations of legal authori are given here to show that the wo "obscenity" has a decided meaning in t law, and to contrast the attitude of t courts with that of the man of literatu

In scanning the report of a debate he in New York between John S. Sumn and Ernest Boyd, I find a statement th is much at variance with the opinions able judges. Says Mr. Boyd: "The la existing at this moment barring obsce matter from the mails is, fundamental ludicrous; for the simple reason that o scenity has not, can not and never c be defined, because it is purely subjecti Certain conventions may be observe But conventions, even during my life, a being altered so frequently that to bui legislation on such a thing is ludicro The actual, fundamental issue of wheth obscenity can be dealt with by law is a swered by the simple fact that you c not define obscenity."

Mr. Boyd's conclusion is not borne o In a country where the judiciary is t final arbiter on matters of constructi such as ours, we find that the word "o scenity" has been amply defined and t Postal regulations interpreted accordi to the true import of Federal statutes.

Occasions of late have not been i frequent where State authorities ha made wholesale raids on newsstands a withdrawn from public consumption o scene matter. Not only is there Fede law against obscene publications but pra tically every state in the union has statute directed against the disseminati of such matter.

The Ludlow-- a demon for work

WHEN the copy hook's full and press time is drawing near, it's no time to hunt for sorts. Last minute copy gets last minute attention. By the old one-type-at-a-time method, second choice type becomes good enough. Anything goes, even battered and worn faces—of course the paper and the advertiser suffer but it can't be helped—unless a Ludlow is installed.

No matter how deep the copy is piled, the Ludlow will dig you out. It's a demon for work—producing an unending supply of type on slugs as you want it in any size from six to sixty point including light, bold and extended, in a large variety of faces—and all without mold or machine changes.

The feature edition—the heavy Sunday issue—ceases to be a problem to the Ludlow equipped newspaper. With distribution of used forms eliminated, the time formerly used for distribution is now used for productive work.

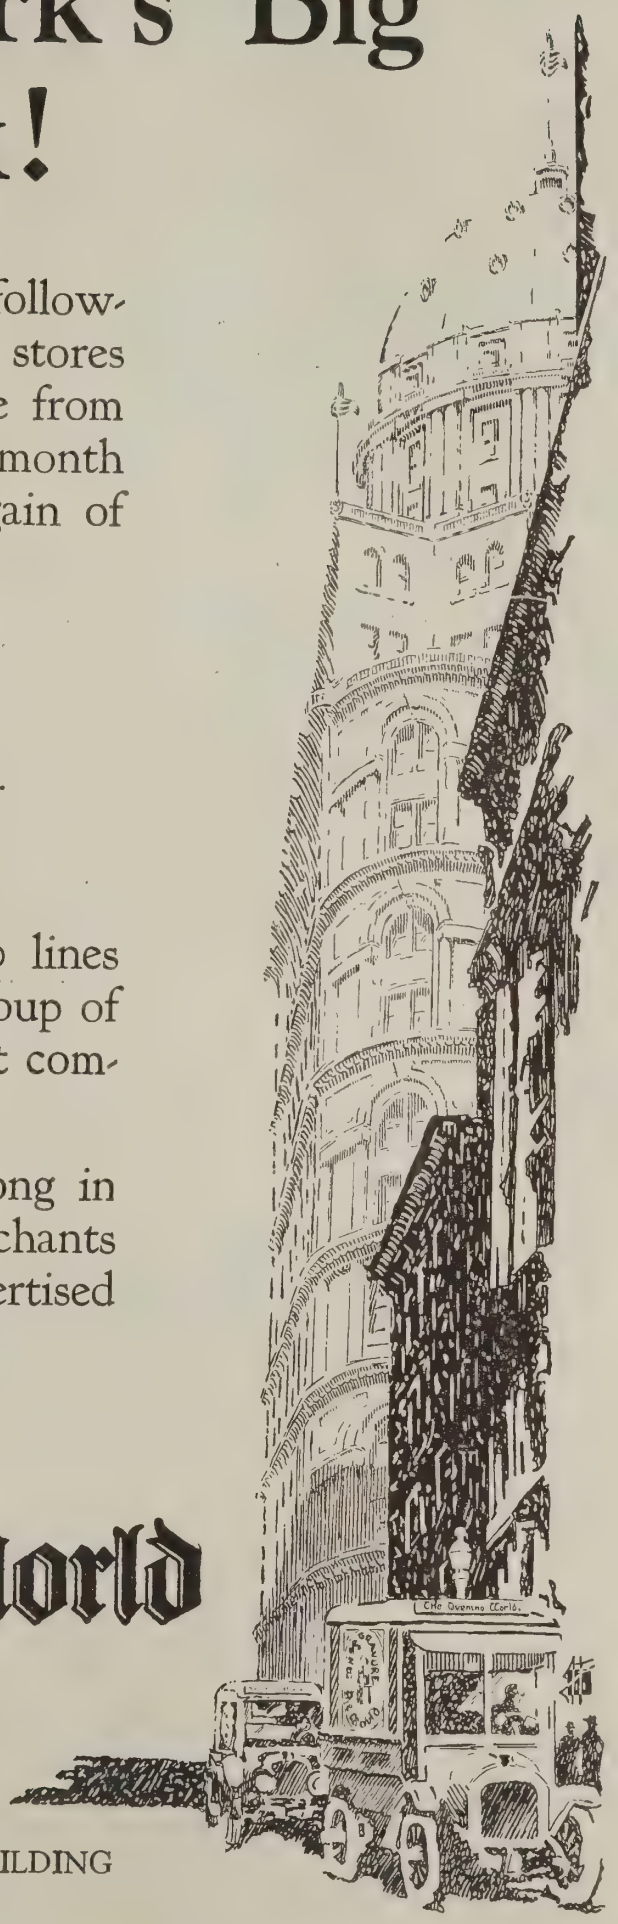
LUDLOW QUALITY COMPOSITION

What New York's Big Stores Think!



DURING the month of September, the following leading New York department stores increased their EVENING WORLD space from 272,420 lines (used in the corresponding month last year) to 388,700 lines this year, a gain of 116,280 lines:

B. Altman & Co.	Best & Co.
Arnold, Constable & Co.	Bloomingdales
Bonwit, Teller & Co.	Gimbel Brothers
Hearn & Co.	R. H. Macy & Co.
James McCreery & Co.	Stern Brothers

John Wanamaker

This gain of 42% is greater by 71,900 lines than the gain shown among the same group of stores by THE EVENING WORLD'S nearest competitor.

National Advertisers cannot go wrong in accepting the judgment of the very merchants through whom the bulk of Nationally advertised products is sold in New York.

ABILITY TO MAKE FRIENDS CALLED SALESMAN'S TRUMP CARD

Every Person Met and Every Incident of Daily Life Can Be Turned to Advantage, Writer Says—But Don't Become a Nuisance, He Adds

BY CHALMERS L. PANCOAST

EVERY person he meets and every incident of every day life can contribute something toward the success of the salesman who throws himself open to meeting people and having interesting experiences.

Sales are made in many ways, some are the result of keeping the eyes open for opportunities, many come through just the ordinary happenings of everyday life, some of these are credited to luck or fate, but the greatest number come through substantial and helpful friendships.

We all go through blind days, days when we shut ourselves off from the people we can and should meet and talk with. We do not realize that life is made up of people, the more people we know the more interesting will our lives become.

I knew a young salesman who, when traveling, found pleasure in engaging in conversation with anyone who might happen to step in his pathway. He was just naturally a friend-maker. He craved human companionship.

One time he was in the club car of the Merchants' Express going to Boston. An old gentleman came in and sat beside him. He was the president of a large factory. His mind was busily occupied with a perplexing sales problem. The young man started a conversation. He was a salesman and knew how to talk and what to talk about. You may call it luck or fate, but he started to talk about selling goods and he hit upon the very subject that was worrying his elderly traveling companion.

As the talk took form it developed that the young salesman had the very solution to the problem. They got together, the young man had something to sell, his services, and he replaced an older man who was taking it easy back at the factory without worrying about the old man's problems.

Another salesman whose job it is to sell cement, told me recently that he finds it necessary to cultivate a prospect before he can close a big sale.

He is a radio bug. He has built sets. He listens in almost every night and he can talk the subject from R to O. He told me he found he could many times talk Radio where he could not talk cement—just yet.

He had a particularly tough prospect. It was impossible to get an audience. One day on the train he met this man and started to talk radio. The prospect was having trouble with his set. He liked to D X but could not get far away points. The salesman went out to his home, fixed up his set so he could get anything he wanted. Within a month he had sold the prospect a big order of cement.

The point is that they had something in common over which to build a good friendship. This subject of radio gave the salesman an entry into many offices where a cold hard business proposition kept him out.

His idea of salesmanship is to extend his acquaintanceship in every way possible. Meeting men on any kind of an interesting basis is better than not meeting them at all.

This young man is making a success because he keeps up on new inventions, popular pastimes like the radio. He is a golfer and he finds a great many men will talk about golf when they haven't time for business.

He simply uses popular subjects, sports and interesting developments to make himself better known. He knows few sales are made on first calls. He knows big sales are made on the basis of acquaintanceship and more often friendship of long standing.

The more friends a salesman has the more chances he has of making sales. All other things being equal it is human nature to do business with the man you admire, you know, or you want to help along. You can talk all you want to about business being done on a strictly cold basis, but the most successful salesmen know that lasting friendships are the foundation of a growing sales record.

This is a very human world and there is a lot of sentiment mixed with business. If this were not so, the business world would be a dreary and unhappy place.

I have checked up with a great many successful salesmen and I find they were all good mixers, that they make friends readily—not merely for what they can get out of their friends—but because it is their nature to be genuinely friendly and sociable. They like to meet people—they enjoy knowing people and they prize friendship above all else.

They are successful because many good friends make a greater success possible. A noted psychologist made the remark that the more people a man knew intimately the more successful he would be. Friends just naturally want to help other friends and the more friendly the closer the relationship.

Mutual friendships are profitable and most worthwhile. The good salesman cannot operate without building confidence. We want to do business only with the man in whom we have explicit confidence—he can be no other than friend in whom we trust.

But mere friendship will not ho business. You must give these frien customers the best you have to give. saw an advertisement a short time ag which covered this point very well. Th headline said:—'Some day your friend old customer may be exposed to a ne idea." This idea followed—"Then yo may lose him unless you have alwa given his business the same attention yo have given your new prospects. Eve salesman's new customer was some oth salesman's old customer."

It is never a good idea to take friend's business for granted. The fa that he has been a good friend of you and has given you his business for yea does not mean that you can neglect abuse that friendship.

The man who values friends for mere what he can get out of them does n hold friends or business. Friends a made by giving and giving—not mere receiving.

The salesman who has a good perso ality, and a host of friends who admi him for his ability and respect him f his honesty and square dealings has t right foundation for sucessful salesma ship. Without these he can resort to the cleverness, subtle tricks and use t most powerful arguments conceival but he will get nowhere—because he not a human salesman—merely a machi

Lynett's Thirtieth Anniversary

SCRANTON, Pa., Oct. 13.—The thirti anniversary of E. J. Lynett's ownersh of the *Scranton Times* was observed cently when the Times 25-year club h its annual meeting here. John E. Bradl business manager, was host to the c this year, while William R. Lynett, ass tant to the publisher, was elected pre dent for the coming year. The 25-y club holds its dinners on October 10 each year. Chester Kellar, foreman the composing room and Charles W kins, pressman, were admitted.

BUFFALO THE WONDER CITY OF AMERICA

Ask Department Store Buyers About Buffalo Evening News Pulling Power

They Must Get Action!

GOOD Department Store Buyers fight for their merchandise. They battle with their merchandise Manager for more "buying" money. They battle with the Employment Office for more help. And in Buffalo they battle with the Advertising Manager for more space in the Buffalo Evening News.

DEPARTMENT Store methods demand quick merchandise turnover. Sales figures must be made every day and inventories are never permitted to run high. Buyers are judged by their turnover and their inventories. One promotion failure leaves a department overbought. That is why buyers watch so closely the pulling power of Newspapers.

THAT is why, when you ask a Buffalo Buyer to choose one of two or more Buffalo Newspapers he will invariably choose the Buffalo Evening News.

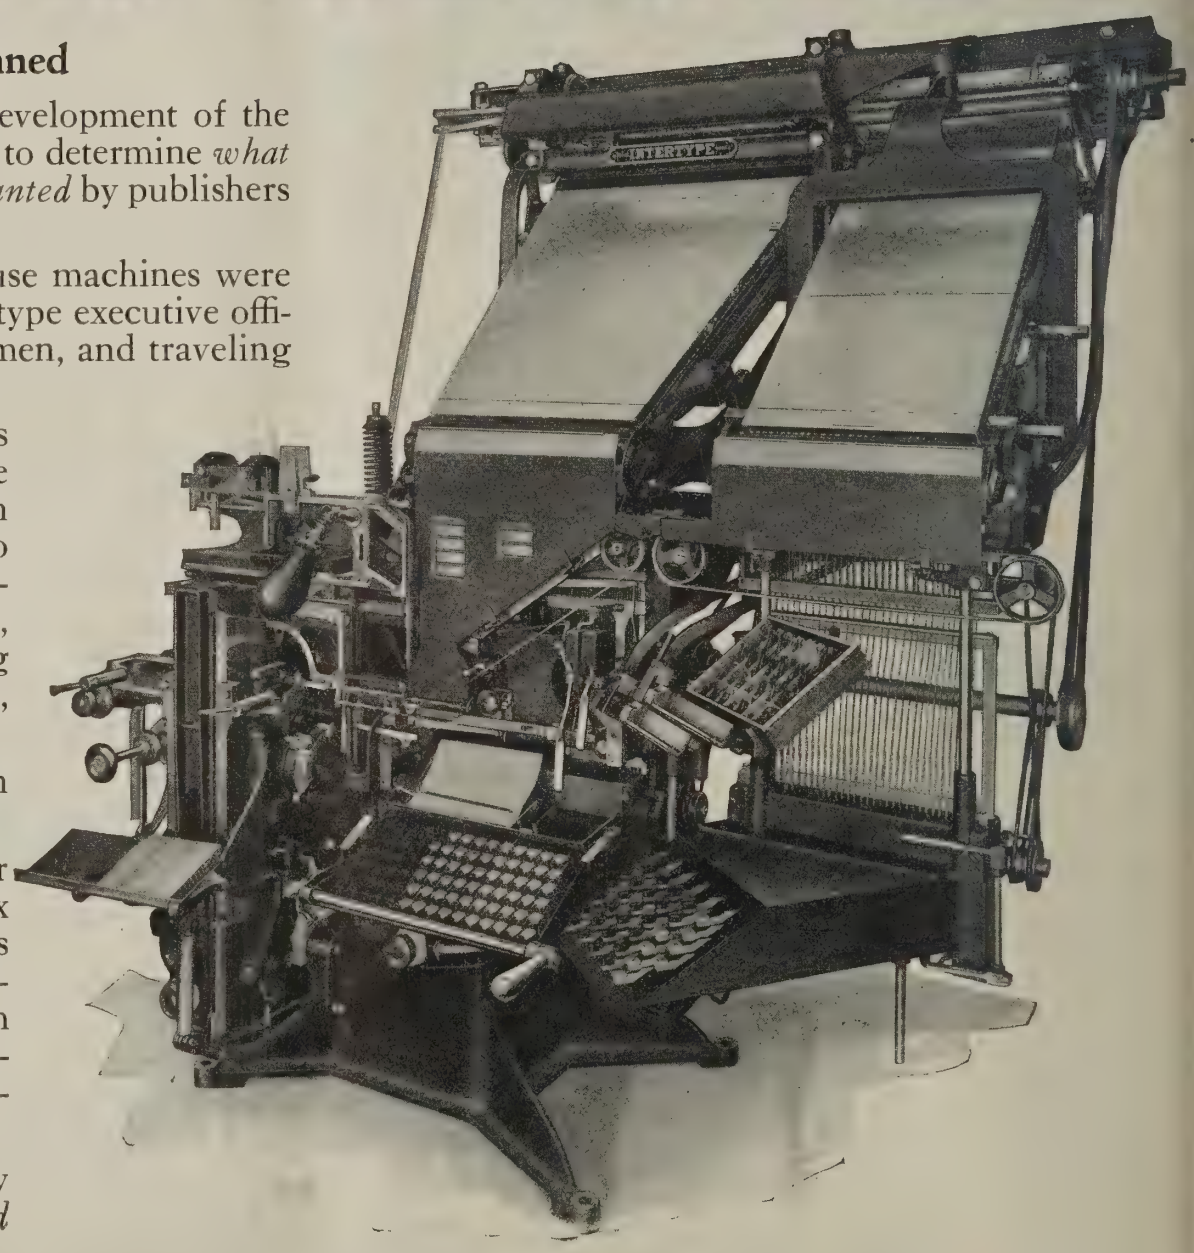
New!

SEVERAL Intertype "Mixers" were ordered last Spring when the first handmade machine was exhibited—before it was even put in production. Now is the time to investigate if YOU are to be among the first to profit by this new machine.

Standardized

Carefully Planned

THE first step in the development of the Intertype "Mixer" was to determine *what type of machine was wanted* by publishers and printers.



The opinions of those who use machines were sought and recorded by Intertype executive officers, branch managers, salesmen, and traveling mechanics.

Additional research work was employed through an outside agency. A man familiar with slug machines was sent into scores of plants to get first-hand advice from publishers, superintendents, composing room foremen, machinists, and operators.

The consensus of opinion was:

(1) that a new machine for "mixing" two or more matrix faces in the same line was badly needed—a machine permitting *instant* changes from one type face to another, without waiting for the distributor;

(2) that above all the new machine should be *simple and dependable;*

(3) that it should, if possible, be standardized, with magazines interchangeable on all other Standardized Intertypes.

The Intertype "Mixer" was built to meet these specifications.

It mixes "mats" at the operator's will from two or three or four magazines—and then sorts and distributes them *automatically*.

There are no mechanical complications.

And the machine is thoroughly standardized and *interchangeable* with all other Standardized Intertypes.

New Features

Carries two standard 90-channel magazines—interchangeable on all Standardized Intertypes.

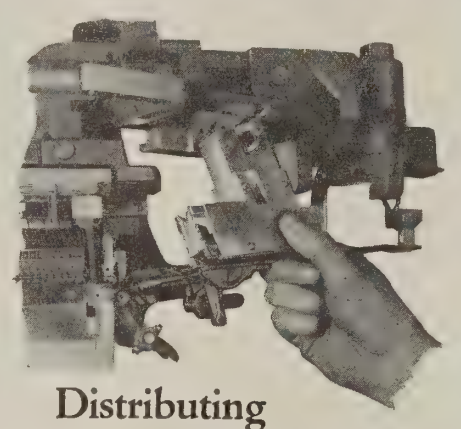
Can be furnished with or without side unit carrying two extra wide 34-channel magazines.

To change from one main magazine to the other, or from one side magazine to the other, the operator simply shifts a convenient, light-touch lever. Magazines do not have to be shifted.

Matrices from all four magazines (two main and two side) can be assembled—"mixed"—in one line.

Matrices of standard maximum width can be run in both upper and lower magazines.

Main magazines are removed from the rear—exactly the same as on all other Standardized Intertypes. The side magazines also are easily removable.



ntertype "Mixer"

—**a machine that sets Roman, Bold, Italic, Small Caps, Special Figures, etc.—*all in the same line*—with automatic sorting and distribution of matrices;**

—a machine that effects enormous savings by making easy, inexpensive work out of what was formerly difficult composition;

—a machine that enables the operator to change from one type face to another in *one second* (no shifting of magazines, no waiting for the distributor);

—a machine that proves that a "mixer" can be made to run as dependably, with as little expert care, as any other machine.

Distributing Mechanism

includes *only one distributor box* (easily removable, as shown above), two distributor bars (side by side) with the usual conveyor screws, and a double channel entrance built as a single unit.

The sorting of mixed fonts is done by the single distributor box, which automatically moves back and forth from one distributor bar to the other (controlled by simple font notches in the matrices), placing each matrix on the right bar for its magazine.

Send for literature illustrating new features of the Intertype "Mixer" and showing typical layouts and specimens of composition.

EDITORIAL

$100 REWARD OFFERED

EDITOR & PUBLISHER hereby offers the sum of $100 to any person who will furnish conclusive information that any newspaper syndicate, regularly in the business of selling editorial materials to the daily press of this country, has been guilty of offering to procure publication of an editorial favorable to a special interest in "at least 35 daily newspapers throughout the country at a total cost to you (meaning the special interest) of $350," or any other number of daily papers or any other sum of money, in the circumstances related herewith.

In the *New Republic* for October 7, the charge is made that an American syndicate, unnamed, addressed a venal proposal to an individual or corporation, also unnamed.

Here is the letter the New Republic charges was sent by the syndicate:

"Gentlemen:

"A happy circumstance provides a most unusual opportunity for nation-wide newspaper publicity for the work of the ..... through an editorial on the subject.

"In this timely editorial direct and effective mention would be given to any facts to which you wish to give wide-spread publicity, with the aid of interesting information you could furnish on the subject. I am able to guarantee to obtain publication in at least thirty-five daily newspapers throughout the country at a total cost to you of $350. Marked copies of the papers would be furnished.

"The ..... Railway Co., the ..... Co., the ..... Works, the ..... Co., the .....Association, ... Inc., and others have found this service the most effective means for nation-wide publicity of the best kind.

"Timely interest in the subject has created this opportunity for one organization. Timely action will capitalize it for you.

"Very truly yours,
"....."

EDITOR & PUBLISHER believes that this letter was not sent by any syndicate, but may have been the work of a crooked press agent. However, we have no way of knowing this to be true and we are willing to pay a reward to any person who can demonstrate that newspapers are thus being imposed upon by a crooked syndicate. The woods are full of grafting press agents operating sham "syndicates." It is entirely possible that the New Republic has picked up the letter of one of the well-known space moochers. The element that creates doubt in our mind is the agreement to furnish 35 marked copies. We do not believe that any moocher could make such a delivery, although it is admitted that there are some stupid editors who still fall for gifts from Greeks. But can one press agent stand 35 such in a row? We doubt it.

EDITOR & PUBLISHER will not hesitate to expose any syndicate guilty of the venal offense against the press charged in the New Republic and our reward offer is, of course, open to the editor of our esteemed contemporary.

"I don't carry any statistics regarding markets or media in my brief-case when I call on advertisers," said an English agent visiting America, "because I am supposed to know these facts. If you don't believe I do, ask me something." That's the way to master your job!

FISHING FOR SUCKERS

HERE is something for editors to keep in their mind's eye when they are publishing dainty menu suggestions, handed out free by a New York press agent, which mention the use of fish: Recently the United States Fisheries Association met at Atlantic City to discuss advertising. Seventy per cent of the members came to the meeting convinced that newspaper advertising should be done. Then up stepped a New York advertising agent, said to have been a representative of the Charles W. Hoyt Co., and proposed that the advertising appropriation be made for magazines and that free publicity be given to the newspapers in the form of daily menus and "news features." The exact proposal was that the magazines be given $67,163.47 and the newspapers free publicity on fish for which the press agent would be paid $700. Does this cause any sensation under the skin of editors who play with press agents?

Don't let an advertiser who would bite off more than he can chew buy the space at any price!

Debate thy cause with thy neighbor himself; and discover not a secret to another;

A word fitly spoken is like apples of gold in pictures of silver.—Proverbs, XXV; 9, 11.

NEW SPIRIT AT CHICAGO

WE are attracted by the new spirit demonstrated at the several important Fall meetings of newspaper men, representative of all departments, at Chicago this week. That so many meetings were held at one time indicates the breadth of the fraternal spirit. That each meeting attracted such large attendance signifies that the long-sought organization of the forces of journalism is rapidly being attained. But it is especially striking that, rather than giving so much attention to the social side, the delegates got down to the brass tack facts of the industry and were seen unitedly pleading for standard practices through analysis of causes leading to reasons for a thousand publishing riddles.

The delegates at Chicago talked in the terms of science. Our ills are being cured by skilled men in conference. The newspaper business is getting onto a new plane. Surely this is subject for congratulation.

Business is good—that is the testimony from all sides. Never was there a better year in which to place solid foundations under the national structure of publishing.

The editorial page is still the spinal column of our press.

BUT NOT DEMANDED

JOHN K. BLITZ, of Detroit, Mich., is issuing free advertising publicity for the Detroit Steel Products Company, and what do you suppose? Over his handout Mr. Blitz makes the quaint suggestion that editors, grateful to him for his "service," might be willing to pay him space rates. Honest injun! Here's faithful John's own statement: "You will not be billed for this copy, whether you use it or not. Payment at space rates will be acceptable, but not demanded." Laugh that off without breaking a rib!

A little about something beats much about nothing.

GOOD MANAGEMENT

THE new spirit in industry, by no means universal, but hopefully progressing in every line of endeavor, calls for relations of employer and employe based upon sound appreciation of reciprocal service, human rights, ordinary civility. Look over the newspaper field and witness splendid advances during the past decade. Wasteful, hateful, head-long fighting between employes and employers is very uncommon. No one ever made a dollar from such scrapping. All sensible people seek peace and the fruits of peace, one of which is prosperity. This applies equally in our press world to inter-office relationships and to harmonious operation of newspapers in the same field, supplanting the old, insane competitive methods which left both sides bleeding after every fray.

Welfare is replacing warfare. Welfare means to the employer: I am the daddy of this industrial family. I cannot prosper unless my business family prospers. I cannot be in health, nor enjoy life, nor play a spirited game if I am not supported by healthful, happy, spirited people. I owe as much or more to my employes than they owe to me, for our mutual successes. I propose to deal with them with full consideration of every right, not on the basis of master and servant, not because I wish to speed them up to increase my profits, but because we are a family of workers striving for the same goal.

To the employe, it means: I yield my time, talent, skill, loyalty, to the best of my ability. These are my investments. I expect a happy, fruitful life. The success of this business is important to me. When I do not serve it faithfully, it owes me nothing. When I do serve it loyally and well, it owes me a living and sound savings.

This sort of spirit *works*.

Here are incidents to illustrate the point: Some years ago the *Washington Star*, one of the larger employers in the newspaper business, began welfare work among its employes, though not under that name. Some wise person in the management conceived the idea that, as all of the folks, up-stairs and down-stairs and all around the shop, encountered the usual human peril of imperfect dentistry, the Star should select a skilled dentist and make him responsible for the tooth health of the whole, big newspaper family. The plan was a success, greatly appreciated by all. The next logical step was the establishment of a Star medical clinic, with a physician and nurse in attendance.) Recently it was stated that this clinic averaged 16 patients per day, all Star people, and the management had figured out the practical proposition that whereas the Star's sick benefits in a previous year had amounted to $8,000, let alone lost time, through the clinic they had been reduced to $3,000. It paid in dollars, as well as in finer coin. The Star encourages many forms of welfare among its people.

This is by no means uncommon among newspapers—this, or similar forms of cooperation. Group insurance has become usual. In good years some newspapers share profits with faithful employes, on a bonus basis. Scores of newspapers provide the noon-day meal in pleasant surroundings, with economy to the employe. There are dozens of methods of fraternization. All are in the spirit of the new day.

No longer, in many cities of the country, is there the old, hateful hostility toward mechanical departments, or by mechanical departments toward the management of newspapers. The "grind 'em down" employing attitude has been a futile policy wherever tried. Equally vain and foolish has been unreasoning, violent resistance on the part of the employed. The liberal policy has won for both sides.

We heard a pleasant story the other day regarding George Berry, head of the pressmen's union. His organization called the attention of the publishers of a certain city to inefficiency of their press-rooms. There was needless waste. It was something that the publishers were overlooking. Constructive suggestions were made. The publishers accepted them with thanks, and instituted reforms which have resulted in important economies.

Give men an opportunity to express their souls, as well as their brains and brawn, and you get thrilling surprises.

PERSONALS

HON. CHARLES R. SKINNER, former editor of the *Watertown Republican* and at one time an editorial writer for the *Watertown Times,* will retire from state service, Oct. 31, when he will be 80 years of age. He has been engaged in state and Federal work for a period of 16 years, being state legislative librarian and formerly an assemblyman and congressman, and was the father of the special delivery letter law. He is the author of "The Manual of Patriotism" and "Bright Side". Mr. Skinner will continue to reside in Albany.

Lou E. Holland, president of the Holland Engraving Co., Kansas City, Mo., and former president of the Associated Advertising Clubs of the World has been elected president of the Kansas City Chamber of Commerce. Mr. Holland has been vice-president and head of the industrial department of the chamber for the past year.

Sam Druck of Scranton has been named publisher of the *Carbondale* (Pa.) *Leader* to succeed his brother, Jack Druck, owner of the publication. The latter recently purchased interests in daily newspapers at New Bedford, Mass., and Easton, Penna.

T. Paul Barron, editor of the *Midland* (Tex.) *Reporter,* who when at 25 he was elected to head the Midland city government, was Texas' youngest mayor, has been chosen president of the Midland Chamber of Commerce.

IN THE BUSINESS OFFICE

MR. ARNOLD SANCHEZ of the *New York Times,* left last week for an extended vacation. He will visit Havana, St. Petersburg, Key West, Miami and Jacksonville, returning in about five weeks.

Mr. Wainwright began his advertising career with the *New York Times* twenty years ago. For sixteen years he was with the *Evening Mail* and has been with the New York Telegram since the amalgamation of the two papers.

J. V. Mahoney, from the *Sioux City* (Ia.) *Journal,* and W. M. Barkley, from the *Duluth News Tribune,* have joined the display advertising staff of the *St. Paul Dispatch-Pioneer Press.*

Jack Emmons of the advertising department of the *Lewiston* (Me.) *Journal* has resigned and with his wife moved to Chicago, where he is employed in a school of window trimming and show card writing.

Miss Marjorie Sines, of the *Trenton Times* business office, who had been out several months recuperating from a serious operation, has returned to her work.

Ben W. Poole is now connected with the *Paris* (Tex.) *News,* as advertising manager. Formerly he was with the *Brownwood Bulletin* for 18 years.

IN THE EDITORIAL ROOMS

MAJ. CARL F. WHITE, managing editor of the *Kansas City* (Kan.) *Kansan* recently was elected president of the Reserve Officers' association of Kansas.

Jack Keefe, formerly on the city desk of the *New York Mirror,* has gone into publicity work in the West.

Foster Dulles, of the *New York Herald Tribune* staff in Paris, is visiting in New York, and working on the New York staff during his stay.

Joe Berger, copy desk, of the *Kansas City* (Kan.) *Kansan* won a prize recently of $150 offered by *McCall's Magazine* for the best letter of 500 words on the subject "The Things I Wish My Neighbors Wouldn't Do."

Henry Cabot Lodge, Jr., formerly state house reporter for the *Boston Transcript* is now in Washington where he has begun his duties as political correspondent for the *New York Herald Tribune.* He is a grandson of the late Senator Henry Cabot Lodge. He was graduated from Harvard last year.

Edward F. Meara, Jr., a former Princeton University student, has joined the reportorial staff of the *Trenton Times.*

Bliss Isely, former city editor and Sunday editor of the *Wichita* (Kan.) *Beacon,* who has been on a leave of absence for several months on account of illness, is back at his desk.

Lester D. Combs, general manager and editor of the *Parsons* (Kan.) *Daily Sun,* and Mrs. Combs, are parents of a daughter, Carol Bird.

Philip Kerby, formerly *New York Herald Tribune* correspondent in China has returned to this country to spend a year here.

Arthur Chapman, one of the Sunday feature writers for the *New York Herald Tribune,* supervised the daily picture pages and rotogravure sections in the absence of Morris Gilbert, picture editor. Mr. Gilbert spent his vacation in Bermuda.

B. F. Johnson has rejoined the *San Antonio* (Tex.) *Light* staff after a trip to Germany.

Miss Marie Leeds is now social editor of the *Atlantic City* (N. J.) *Daily Press* having succeeded Miss Betty Penrose, resigned.

Edward M. Gilroy is now a member of the *Newark* (N. J.) *Ledger* staff.

Jack Kurtz has been added to the sports staff of the *Newark* (N. J.) *Ledger* staff.

Frederick L. Bagby for the last few years a reporter for the *Salt Lake City Telegram* has announced his intention of running for the office of City Commissioner of Salt Lake this fall.

Miss Edith Shank, formerly of the *Canton* (O.) *Repository,* has become editor of the *Community News,* Columbus, O. She succeeds Miss V. Phillips, who has become a feature writer on the *Mansfield* (O.) *News.*

Ralph Wheelock, formerly with the *Minneapolis Tribune,* who underwent treatment in the Mayo hospital for a nervous breakdown, has recovered completely.

Clifford Russell is now associate editor of the *Mankato* (Minn.) *Daily Free Press.*

Arthur C. Gernes has been named city editor of the *Winona* (Minn.) *Republican-Herald* succeeding Harold M. Olson.

Mrs. Theodora Sohst has taken over the "Women in Sport" column in the *New York Herald Tribune* edited until recently by Margaret Goss.

MARRIED

ROBERT A. BARRACKS, of the editorial staff of the *Decatur* (Ill.) *Review* to Miss Charlotte Proctor, in St. Louis, Mo.

Harry H. Page of the state news desk, *Des Moines Register* to Mildred Blanchard of Des Moines, last week.

Earl Rostberg of the engraving department, *Des Moines Register and Tribune-News* to Miss Esther Brandt, last week.

Walter Blair, of the editorial staff, *Spokane Spokesman-Review,* to Miss Carol Conrad, Spokane, Sept. 21.

WITH THE SPECIALS

GEORGE B. DAVID, publishers' representative, New York, has been appointed special representative for the *Harrisburg* (Pa.) *Courier* and the *Hollywood* (Fla.) *News.*

HOLDING NEW POSTS

FRANK DALY, from artist and layout man for the *Newark* (N. J.) *Ledger,* to the *Jersey Transcript,* a New Jersey tabloid.

F. W. Busch, from real estate editor, *Newark* (N. J.) *Ledger,* to news editor of the *Jersey Transcript.*

Claire Hall to *Columbus* (O.) *Citizen* from *Ohio State Journal.*

Mark Staples, from reporter, *Salem* (Mass) *News,* to staff, *Concord* (N. H.) *Evening Telegram.*

Oliver Jenkins, from *Lynn* (Mass.) *Telegram-News,* to staff, *Concord* (N. H.) *Evening Telegram.*

ASSOCIATION CHIEFS

JOSEPH G. ALDEN, editor of the *York* (Neb.) *Republican,* and president of the Nebraska Press Association, has spent considerable time in association work. Last year he was vice-president of the Nebraska group, and prior to that served several years as member of the executive committee.

JOSEPH G. ALDEN

Mr. Alden started newspaper work on the *Aurora* (Neb.) *Republican,* working up from "devil" to compositor, foreman, manager and then owner of that enwspaper.

In 1917 he purchased the *York Republican.* Last year his newspaper was awarded the Nebraska cup for the best front page.

CHANGES IN OWNERSHIP

JAMES FARQUHAR of the *Cedar Rapids* (Ia.) *Daily Republican* has sold the *Dewitt* (Ia.) *Observer* to A. C. McKinsey, who is publisher of the *Maquoketa* (Ia.) *Excelsior.* Fulton McKinsey will edit the Observer.

R. L. Howell, who recently disposed of his interests in the *Alta* (Ia.) *Advertiser* to W. R. Coyle, has bought the *Bussey* (Ia.) *Record* and will revive that paper, which has been suspended several months. Mr. Howell was formerly with the *Sioux City Advertiser,* three years in the advertising department.

W. M. Morrow, has sold his interest in the *Grove City* (Pa.) *Herald* to E. C. Sleet, of Jefferson, Ohio.

Dwight L. Miller has sold the *Lathrop* (Mo.) *Optimist* to E. L. Fisher of Edina, Mo.

A. G. Campbell, for three years owner and editor of the *Tina* (Mo.) *Journal* has sold to Chester Strong, formerly with the *Hale* (Mo.) *Leader.*

Robert Goshorn, editor and owner of the *Eagle Grove* (Ia.) *Times* has sold a half intrest in the plant to Russell F. Rogers, New York. Mr. Rogers, who for six years, has been on the staff of the Pierce farm weekly publications, and was formerly with the *Sioux City Journal, Ottumwa Courier* and *Atlantic News-Telegraph.* He assumed his duties Oct. 15.

W. D. Junkins and Paul S. Junkin have sold the *Chariton* (Ia.) *Herald-Patriot* to a firm consisting of Victor E. Swartzendruber, Will D. Allender, Charles F. Wennerstrum and Kenneth F. Baldridge. Paul S. Junkin publishes the *Fairfield* (Ia.) *Daily Ledger.*

PRESS ASSOCIATION NOTES

RAYMOND CLAPPER, United Press staff correspondent, who contracted typhoid fever while reporting the Dayton trial, this week left the Port Chester, N. Y. hospital where he was confined nine weeks.

C. B. Kelsey, formerly of the United Press Chicago bureau, has been appointed manager of the Cleveland office, succeeding Raymond Bruner, resigned.

Carl Groat, cable editor of the United Press, will return next week from a vacation spent in New England.

Mrs. Ed Keen sailed from New York last week to join her husband who is European manager for the United Press with headquarters in London.

SCHOOLS OF JOURNALISM

JOURNALISM students of the University of Missouri have elected officers as follows: George N. Elliot, Kansas City, president; Tom Mahoney, Dallas, Tex., vice president; Roselee Manlon, Sedalia, secretary-treasurer; George Trenholm, St. Joseph, councilman, and Don Reynolds, Oklahoma City, junior senator.

With a class enrollment of 556 students and with 280 students registered in the four-year course of journalistic studies leading to a degree, the Course in Journalism at the University of Wisconsin is beginning its twenty-first year. In addition, 128 students in commerce and journalism are enrolled in the courses in advertising. The freshman class numbers 85 and the senior class 53.

For the first time in its history a class in journalism is a part of the course offered by the Elmira College in Elmira, N. Y. Miss Dorothy Dondore, Ph. D., of Iowa City, Iowa, assisted by Miss Ernestine French, college director of publicity, is acting as instructress. Nineteen students are taking the course.

SPECIAL EDITIONS

COLUMBUS (O.) DISPATCH issued a special section on Oct. 11, featuring "Home Beautiful Week," which had been arranged in cooperation with the local furniture dealers association.

Livonia (N. Y.) *Gazette* semi-centennial edition, 32 pages devoted largely to recollections of the past, a tribute to its former editor, C. M. Alvord, who recently died.

Millersburg (O.) *Hub* issued a centennial edition Oct. 14.

"The Arabian Nights" In a Cartoon Strip!

WRITE or telegraph today for first proofs of the greatest feature "buy" of the year. The best loved fiction stories in the world, the 1001 tales of "The Arabian Nights" are now available in six column daily cartoon strip form.

The drawings are by T. Crawford Hill, and they'll surprise you with their marvelously beautiful and graphic presentation of these incomparable stories. The lines, matted with the pictures, are taken verbatim from authoritative translations. The eyes of your readers simply will not be able to resist the drawings.

This is a feature you can exploit and put to work making and holding readers.

If you want to be the lucky newspaper in your territory, telegraph us at once to reserve your territory until you see the proofs.

The Central Press Association

V. V. McNITT, President — Central Press Bldg., Cleveland — H. A. McNITT, Manager

ASSOCIATIONS AND CLUBS

JAMES A. WILSON, Seattle, was elected president of the **Pacific Coast Association of Display Men** at their second annual convention in Portland, Oregon. Other officers are: A. O. Hewitt of Portland, first vice president; Bert Snyder, Tacoma, second vice president; J. Walter Johnson, Portland, third vice president; Henry Stolton, Seattle, secretary-treasurer, and L. A. Mullen, Portland, Ralph J. Hamer, Los Angeles, Newell M. Pratt, Victoria, B. C.; W. R. Wilder of Douglas, Ariz., H. B. Kelly of Yakima, Wash., and D. P. Smith, Oakland, Cal., as members of the executive committee. It was decided not to affiliate with the national group, but to give all members of the Pacific Coast association the option of holding membership in both organizations if they chose to do so. Seattle was selected for the third annual convention city.

The Vancouver-Westminster branch of the **British Columbia Institute of Journalists** scaled Hollyburn Ridge and had luncheon at an elevation of 2500 feet Oct. 11, as guests of the municipality of West Vancouver. The annual Hallowe'en Cabaret of the British Columbia Institute of Journalists will be held Oct. 30 at the Hotel Vancouver ballroom.

Lower Rio Grande Valley Press Association, meeting at McAllen, Tex., recently, discussed the problem of coping with transient advertising solicitors and voted to instruct the secretary to write the city commissioners of every valley town urging passage of an ordinance levying a $50 daily license tax upon such solicitors. The association elected the following officers for the ensuing year: Isadore Moritz, Raymondville, president; Mrs. M. M. Huffor, Donna, vice-president; W. G. Holland, San Benito, secretary-treasurer; Ralph Buell, Mercedes, and T. J. Howarth, McAllen, directors.

Adcraft Club of Detroit is mapping out a program for the publicity and advertising for a $150,000 expansion campaign of the Detroit Convention and Tourist Bureau. During the current year it is expected that 400,000 delegates will have been brought to Detroit through the efforts of the Bureau, and that these will have enriched the city by $50,000,000.

Women's Advertising Club of Toledo, twice winner of trophies in the Federation of Women's Advertising Clubs, will this year offer a silver cup to the women's club which makes the most signal achievement in better business work. This announcement was made the other day by Miss Julia Coburn, president of the club.

Publicity Club of London is using display advertising in British media to call attention to the advantages of membership in the club, the annual dues for which are one pound or about $5 a year. The Publicity Club is the largest Advertising Club in the British Empire, with a total membership of approximately 600.

Advertising Club of Pine Bluff, Ark., is actively working for good roads in that state. It has called a public meeting, organized a Citizens Committee, held conferences with lawyers and engineers, and will submit a plan which, it is expected, will offer a practical solution of many highway problems.

An Advertising Exhibit, in which about thirty local business houses participated, featured the annual meeting of the **Advertising Club of Pittsfield, Mass.,** Oct. 6.

Young art students are being offered prizes totaling $30 by the **Advertising Club of Greensburg, Pa.,** in a Poster Contest. The winning poster will become the official advertising poster for the Greensburg Mercantile Exposition.

Los Angeles Advertising Club has a new membership drive on—pledges of five to fifteen new members is the way it is starting off—over 1,200 new names submitted already in two weeks' time.

Women's Advertising Club of Boston held its first fall meeting last week at their club rooms on Carver St. Charles Collier of the Direct Mail Advertising Association addressed the meeting.

CIRCULATION PROGRESS

Sampling Followed Up by Salesmen Advocated by William Cunningham

William Cunningham

SAMPLING, followed up by trained salesmen, is advocated by William Cunningham, circulation manager of the *Macon* (Ga.) *News,* as the best method of obtaining circulation "that sticks."

"Any circulation department can render good service and any circulation department can sell anyone any paper once," he said. "If the paper can stand the acid test of comparison, the job is complete."

When sixteen, Mr. Cunningham started work in the business office of the *Baltimore American,* on a salary of $4.00 per week. He was rapidly advanced from one position to another learning the details of the business end of the newspaper.

After the close of the World War, he became connected with the *Baltimore News and American* which was consolidated at that time through the purchase of the American by the Frank A. Munsey Company. When Mr. Munsey sold his two Baltimore properties, Mr. Cunningham went to work for the *New York Herald,* as circulation promotion manager.

From the Herald he came to Macon to take charge of the circulation department of The News, the position he is now occupying. Mr. Cunningham received his circulation experience under one of the best known circulation managers in the country, Paul O. Sargent the present business manager of the *Louisville Herald and Post.*

New York League of Advertising Women at its regular monthly dinner meeting Tuesday evening, Oct. 20, will have an unusually interesting program. The topic for the evening is "Some Types of Media,'" and in line with this parent subject three speakers will handle different kinds of Media, as follows: "Broadcasting Good-Will," G. F. McClelland, Radio Station WEAF, American Telephone and Telegraph Co.; "Knowing the National Market," E. R. Dunning, Eastern Advertising Manager, *Women's Home Companion;* "A Few Phases of Outdoor Advertising," D. S. Schenck, National Outdoor Advertising Bureau, Inc. C. Harold Vernon, internationally known advertising man will be the guest of honor and the dinner committee invites all men and women interested in advertising to meet this distinguished guest.

Schenectady Press Club was formed in Schenectady, N. Y., Oct. 10, at a meeting of 25 newspaper and publicity men. Mayor William W. Campbell, himself a newspaperman before he entered upon his political activities, was named honorary president. Other officers elected were as follows: R. A. Mowers, managing editor, *Schenectady Union-Star,* president; Ralph B. Streever, Schenectady representative of the *Albany Knickerbocker-Press,* vice president; Morgan Strong, city editor, *Schenectady Gazette,* treasurer, and Harold W. Cole, *Schenectady Union-Star,* secretary. The purpose of the club is to promote sociability among its members and to provide an open forum for discussion of newspaper and publicity work.

Women's Advertising Club of Chicago met Oct. 6, C. K. Woodbridge, president of the A. A. C. of W. and president of the Dictaphone Corporation, discussed the organization work of the A. A. C. of W.

NEW PLANTS AND EQUIPMENT

CHESTER (PA.) TIMES has added an eight-page deck to its 32-page Hoe Simplex press.

With the moving of job and business offices, the *Hornell* (N. Y.) *Tribune Times* is now completely installed in its new home. A formal opening will be held son.

Among recent newspaper installations of Ludlow machines are those of the *New York Times, Meriden* (Conn.) *Journal, Lexington* (Ky.) *Leader, Lodi* (Cal.) *Sentinel,* and *North Penn Review,* Lansdale, Pa.

ADVERTISING AGENCY AFFAIRS

MacDonald-Wood Incorporates With Detroit Headquarters—Power, Alexander & Jenkins Company Suspends—Ede Joins John S. King Company

INCORPORATION of Cole-MacDonald-Wood, Inc., to operate as advertising agents in the national and local fields was announced this week.

This new organization, whose general office is in Detroit, is headed by Walter C. Cole, former Secretary of the Detroit Board of Commerce. Col. Cole will serve as president and treasurer.

Edmund D. Wood, first vice-president, an automotive advertising and merchandising expert with experience in Chicago, Toledo, and Detroit, will be in charge of merchandising and contacting.

The second vice-president, Arch H. MacDonald has served as a creative advertising executive in Chicago and New York and will act in a similar capacity with the new company.

Paul Hale Bruske, former advertising manager of the Studebaker and Maxwell interests, has been appointed copy chief.

Cole-MacDonald-Wood, Inc., with a staff of over 30 people, has leased the twelfth floor of the new Metropolitan Building.

Accounts now being handled by the new company include the Jewett Radio & Phonograph Co., Hinkley Motors, Inc., Gould-Detroit Axle Co., Thomas F. Boothby, Commercial National Co., Covert Gear & Manufacturing Co., U. S. Motor Truck Co., W. M. Finck Co., Stiner Piston Ring, Inc., Michigan Railroad Association and a wide variety of other advertising assignments.

George M. Murray, formerly advertising manager and assistant to the president of the Lehn & Fink Products, Inc. of New York, has joined the Charles W. Hoyt Company as account executive in the New York offices.

The new firm of Cole-MacDonald-Wood is taking over some of the accounts previously handled by the Power, Alexander & Jenkins Company, suspended.

Lynn B. Dudley has joined the Detroit staff of the Campbell-Ewald Company, resigning a connection with the Michigan Electrotype Company to return to the agency field.

Kenneth L. Ede, formerly with Henri, Hurst & McDonald of Chicago, has joined the staff of the John S. King Co., Inc., Cleveland advertising agency, in charge of market research.

The advertising firm of Battenfield and Ball has been formed in Des Moines, Ia., and will maintain offices in the Register and Tribune-News building. Walter E. Battenfield, for several years managing editor and later general manager of the *Des Moines Daily News* and John W. Ball, for years managing editor of the *Des Moines Capital* organized the company. Until recently Mr. Battenfield was associated with L. R. Fairall in advertising work. Associated with the new firm will be Leonard Gneier, Gordon Hittenmark, Sherman Long and Guy Young.

Miss Alma Zaiss has been appointed to the staff of the Chicago office of the George Batten Company, Inc. Prior to joining this agency, Miss Zaiss has specialized in special style merchandising work for Chicago department stores and as a free lance copywriter.

Louis H. Sebbes formerly of the Merchandising Staff of the Class Journal Company and until recently editor of the directories division of the Chilton Class Journal Company has resigned to become account executive in the automotive division of Reinecke-Ellis Company.

Robert E. Ramsay of the Robert E. Ramsay Organization will conduct a class in "Advertising for Printers" to be held in New York beginning Oct. 19. The class is offered by the New York Employing Printers Association, Inc.

Claude H. Miller, of the Charles W. Hoyt Company, was elected president of the Rockaway River Country Club of Denville, N. J.

FINANCIAL AD EXHIBIT

Feature of Tenth Annual Convention of Financial Advertisers

More than 250 panels of financial advertising were exhibited this week at the tenth annual convention of the Financial Advertisers' Association at Columbus, O. It formed the largest display of advertisements of this nature ever shown at any convention of the association.

Speakers at the convention included C. King Woodbridge, president of the Associated Advertising Clubs of the World; Gov. A. V. Donahey, of Ohio, and H. Ennis Jones, Philadelphia. President E. H. Kittredge, of Boston, presided. Some 300 delegates attended.

WITH THE GENERAL ADVERTISERS

Fisheries Group Plans Magazine Advertising, Expecting Free Space in Newspapers—R. J. Reynolds Starting Newspaper Drive—Leavitt's Lancaster Address

DESPITE the fact a questionnaire-vote showed the majority of the membership favored newspaper advertising, the United States Fisheries Association proposes to invest the bulk of its appropriation this year in the magazines, according to a report presented at a recent convention. The Charles W. Hoyt Company, New York advertising agency, is said to have prepared the report.

According to the report $67,163.47 would be invested in paid magazine space, while a press agent would be paid $700 a month to get free publicity into the newspapers.

"Your advertising will concentrate in magazines," it is explained. "You want your publicity to tie up with this advertising. You want the same people to see both advertising, news stories, and features. Newspaper publicity, however, will also be aimed for.

"Women's pages of the newspapers are eagerly watched by housekeepers to help solve their cooking problems. The housewife is at her wits end to know what to prepare for her family that is wholesome, palatable and different. She turns to the newspaper for ideas. There she finds the daily menus most helpful.

"We can see that there is more fish in these menus, by furnishing the newspapers menus that feature fish.

"We can also submit stories on the food value of fish, the many ways to cook it, the many edible varieties, the interesting ways to serve it for breakfast, for luncheon, for dinner, for supper. All of these subjects would yield ample material for many stories for the women's pages of the newspapers."

The committee of the United States Fisheries Association that presented this report is made up of T. J. Anderson, Atlanta, Ga.; Amos G. Chesebro, New York; Dana F. Ward and James E. Lenhart, Boston; F. J. Girse, St. Louis; A. E. Hallett, and C. C. Robbins, Chicago; and Henry S. Wirsching, Providence, R. I.

The R. J. Reynolds Company, Winston-Salem, is returning to use of newspaper space, promoting Prince Albert tobacco. For a number of years billboards were being used exclusively. N. W. Ayer & Son handles the account.

"Advertising is the lubricant of the selling machine," Robert K. Leavitt, secretary of the Association of National Advertisers declared in an address before the Advertising Club of Lancaster, Pa., late last week.

"By increasing quantity of salts it makes large-scale production possible with resulting economies and reduction in manufacturing costs.

"Just one story will show the extent to which consistent advertising cuts the cost of distribution. It is the story of Campbell's Soup. In 1898 this company spent 14% of its gross sales in advertising. In the same year they spent 7½% for other sales expense. They persevered along the line of advertising, and kept on growing until today they spend more for magazine advertising than any other firm in the country, their sales have grown even more rapidly than their advertising. Today their advertising, great as it is, costs them only 3% of their gross sales as compared with 14% 27 years ago. Their other sales expense costs only 2% as compared with 7% in 1898. Thus today their total sales and advertising expense—5%—is less than one-quarter of the 21% which was their cost in 1898."

Increased use of advertising space in newspapers to promote good-will and business was urged at the seventh annual convention of the American Gas Association held in Atlantic City, N. J., this week. Delegates were unanimous in asserting that investments in newspaper advertising was the best way "to tell the story of public utility service."

Throughout the nation, in every city and town where there is a retail merchant's organization, there will be published in one of the leading newspapers a series of four advertisements to appear on alternate Sundays, beginning Oct. 26, according to plans announced this week by the Retail Credit Men's National Association. Copy will feature the slogan, "Pay Your Bill Promptly." Full-page space is contemplated for the larger centers.

A. Morales, manager of A. S. Hinds Co., and William B. Hay, advertising manager of the company, with Mrs. Morales and Mrs. Hay, narrowly escaped serious injury this week when a sedan in which they were riding failed to negotiate "Dead Man's Curve" at Bowdoinham, run up an embankment and overturned. Their injuries were only slight. Mr. Hay was driving. The sedan was considerably damaged.

The Ætna Insurance Company, of Hartford, Conn., announces the appointment of George E. Crosby, Jr., as its superintendent of publicity, and the selection of Reimers & Osborn, Inc., of New York, as its advertising agency.

Henry J. Kelly, formerly sales manager, has been appointed vice-president of the Donovan Motor Car Company, and W. E. Dermody has been appointed general manager, according to the report given out by President Donovan of that company.

The board of directors of the Eureka Vacuum Cleaner Company have declared the regular quarterly dividend on the common stock, payable Nov. 1.

Charles Freshman Company, Inc., radio equipment manufacturers, report gross sales for September of $690,708, as compared with $163,630 for the month of September, 1924.

Charles W. Myers, director of trade relations, Armour & Co., Chicago, declared newspaper advertising was "the greatest factor in making the buyer buy," in a recent speech in Kansas City.

A SINGLE ADVERTISING APPROPRIATION

Will cover the two publications that reach those who control the national advertising of the United States and Great Britain.

EDITOR & PUBLISHER
New York
and
ADVERTISING WORLD
London, Eng.

have entered into an agreement in respect to editorial and advertising representation in their representative fields and thereby afford a single source of information and service for those interested in international marketing and advertising.

MIMIC BALL GAMES HOLD CROWDS

Louisville Courier-Journal and Times Institute "Radiogame" Played by Semi-Professionals—Diamond Wired for Play

During the world's series ball games the *Louisville* (Ky.) *Courier-Journal* and *Louisville* (Ky.) *Times,* presented to the public "radiogame," in which the big league games were played off by local semi-profesisonals, simultaneously with the series games.

So faithfully were the big league plays duplicated that photographs taken at Forbes Field, Pittsburgh, and at Parkway Field, Louisville, were similar in nearly all respects.

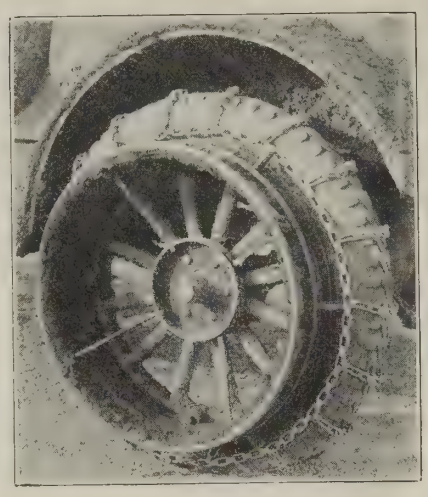
Baseball experts who viewed the opening game declared the "radiogame" as good entertainment as "regular" baseball. The radiogame was worked out mechanically by Credo Harris, director of WHAS radio station of the two papers and by Emmett Graft, chief electrician, from the idea supplied by Jos. A. Humphreys, Jr., news promotion, for the two papers.

Two Louisville semi-professional teams represented Pirates and Senators. The Kentucky & Indiana Terminal Co. furnished fifteen players who had won the Industrial League pennant while the Goldbergs, an independent team, furnished a similar squad. They were equipped with different uniforms, wearing W's and P's to distinguish them, used gloves, bats and masks. Two umpires were used in each game.

Associated Press reports of the play by play games in the big leagues were taken directly from the wire in The Courier-Journal and Times building and read over a microphone standing beside the key. A receiving apparatus in the press box at Parkway Field caught the plays. For the sake of accuracy they were not radiocast directly to players, but were taken on an earphone and copied. A second microphone was installed in the press box, into which the plays were read as fast as received, time being allowed, however, for each play to be completed before a second one was given. In this way a play could be held back if the local game was running even with the big league, or one or more balls or strikes could be eliminated if the Louisville game were behind.

Batters and base-runners could not hear plays, but were coached by players on the various bases, all of whom were equipped with earphones. All bases were wired together and all connected with the press box microphone. Each player was equipped with a complete wire device by which he received each play as called. This equipment could be detached when his team came in to bat and handed to the opposing player taking the field. Electrician was kept on the field at all times to examine connections at the end of each inning and insure all players being "alive" at all times.

So well were the final two games timed, that, starting a full inning behind the Washington game, the "radio" players caught up with the big leaguers in the last half of the seventh inning. During the eighth the announcer kept three plays behind Washington, in the ninth he sped up and kept one play behind. When the last Pirate batsman took his post the announcer caught up with Washington, and, by eliminating one ball and one called strike, announced the final play simultaneously with its reception.



The crowds at Parkway Field, Louisville, and at Griffith Stadium, Washington left the stands simultaneously.

Fans numbering 2,000 daily flocked to the local field to see the games, despite cold raw wind and overcast skies.

To Advertise Cremation

George W. Baldwin of Portland, Ore., recently elected president of the Cremation Society of America, has announced that he will head a national movement for an educational campaign of advertising on the subject of cremation.

NEW RIM ENABLES TRUCKS TO BUCK MUD

AFTER years of experiment by afternoon newspapers throughout the country to find some means of transportation whereby afternoon delivery service could be maintained the year around on the muddy rural routes, the *Springfield Illinois State Register* has perfected an attachment for a Ford automobile wheel which is said to take the machine through the mud.

Two rims are welded together and to their circumference at intervals of twelve inches mud hooks were welded. This device was bolted to the rim already on the car by lengthening the rim bolts. In order to solidify the entire wheel an old brake drum was bolted inside-out to the outside of the wheel. From this were run four iron rods which connect up with the third rim. When these rods are drawn up the wheel is capable of withstanding any ordinary jolts of a trip through mud or clay.

HE MET A SOLDIER'S DEATH

Reginald Kahn, Paris Temps, Shot Down on Moroccan Front

(*Special to* Editor & Publisher)

Paris, Oct. 7.—French newspapermen have to deplore the loss of one of their comrades in the war in Morocco, which is a real war and no mere border campaign as some far away might think. The *Paris Temps* correspondent with the French forces in Morocco, Reginald Kahn, hase met a soldier's death.

Reginald Kahn, who has been writing for *Le Temps* since 1907, had seen much campaigning in his life, having followed the Japanese Army in the war against Russia and been with the Serbs in the Balkan war. The Great War found him in the thick of the fighting from the start.

Kahn was both soldier and writer, and while his descriptions gave a graphic idea of what was taking place on the field of operations his technical knowledge made his articles of real value. His reports during the Russo-Japanese war were as valuable as military reports from a military observer could be.

He was among the first to realize the new conditions which came with that war, the need for closer co-operation between the different branches of an army, and his articles had great influence in military circles in France.

Kahn was born Dec. 15, 1876.

"UNCLE BILL" DEAD

Cuddy Was Pioneer Member of Portland Oregonian Staff

William J. Cuddy, known to newspaper men throughout Oregon as "Uncle Bill," died on Oct. 7 at Portland. He was a pioneer member of the *Oregonian* staff, having served as editor of the *Weekly Oregonian* before that edition was discontinued and since then as exchange editor and writer of editorial paragraphs.

Mr. Cuddy was 71 years old and had been a printer and newspaper man for 56 years, 35 of which were spent on the Oregonian. Mr. and Mrs. Cuddy were the parents of 12 children, and 20 grandchildren survive him. His love for children was one of the traits that endeared him to his fellows. He became a sort of godfather to most of the children whose fathers were employed by the Oregonian.

DAVIS WILL PROBATED

Publisher of Bloomington Pantagraph Remembered 25 Employes

The will of Hibbard O. Davis, late publisher of the *Bloomington Daily Pantagraph,* admitted to probate, directs immediate sale of all his properties, and bequeaths half the proceeds to his widow; a $5,000 bequest to Louis E. Davis post, American Legion, and directs that the remainder be placed in trust in the Peoples' Bank. From this fund $2,000 is to be distributed annually to a number of relatives, and the remainder of the trusteeship income divided equally among 25 employes of the Pantagraph, many of them associated with the paper since the elder Davis' death.

These annuities are not to exceed $500 under the will. In event of excesses from this fund, the remainder is to be divided between the Davis post and such charitable organizations as the trustee may designate.

Mr. Davis' interest in the Pantagraph consisted of a life estate under the will of his father, William O. Davis, and the son's share now passes to the older Davis' grandchildren, Adlai E. Stevenson, Elizabeth D. Stevenson, Davis Merwin, Herbert E. Merwin and Loring C. Merwin.

John Sturgis Ritenour

John Sturgis Ritenour, 75, a veteran newspaper editor and publisher died suddenly at his home in Pittsburgh on October 8 Mr. Ritenour practically all his life was engaged in newspaper work. He was editor of the *Uniontown Genius,* which he later owned. He located in Pittsburgh a number of years ago and was one of the founders of the *Pittsburgh Press.* He also served as managing editor of the *Pittsburgh Dispatch* and was active in the affairs of the Western Pennsylvania Historical Society. For the past ten years he had been superintendent of the Humane Society of Western Pennsylvania. His widow, one son and a daughter survive.

Obituary

GEORGE W. MASCORD, general works superintendent of the *London Daily Chronicle* and internationally known newspaperman, died in London, Sept. 25, according to word received by friends in Boston, where he was employed up to two years ago. He was recognized as a world authority on newspaper and printing machinery.

John H. Bentley, 63, mechanical superintendent of the *Plattsburgh* (N. Y.) *Sentinel,* died in Plattsburgh recently. He entered newspaper work from the printer's trade on *Plattsburgh Telegram,* that city's first daily newspaper.

Lloyd McCutheon, 50 years old, editor of the *Mount Vernon* (Ia.) *Hawkeye-Record* died Oct. 10 following an operation at Cedar Rapids, Iowa.

Col. E. C. Huckabee, for 25 years a member of the *Corsicana* (Tex.) *Daily Sun* staff, died at his home recently. The entire Sun personnel were pallbearers at the funeral of their late associate.

Robert K. Hamilton, 56, a veteran employe of the *McKeesport* (Pa.) *Daily News* died in Pittsburgh Oct. 7, aged 56 years.

Mrs. W. B. Johnson, wife of the former publisher of the *Elyria* (O.) *Chronicle,* died Saturday at St. Petersburg, Fla.

Harry I. Isted, 50, for 25 years a San Francisco pressmen died Sept. 9.

Things You Don't Want

STORED away in many Newspaper offices are pieces of machinery or other equipment that are not in use. They are in excellent condition and to-day have a value. A year from now that value will have lessened, and it will continue to depreciate until eventually the article will reach the junk pile.

To-day, commanding the highest price, is the time to dispose of unused material.

You can find a buyer by inserting an advertisement under "Equipment For Sale" in the classified pages of

EDITOR & PUBLISHER

IN THE FIRST THREE

Sixty-four papers have joined in preparing a survey of the eighty-one major markets of America. The list is given below—

These sixty-four papers represent the best selling opportunities in sixty-four of America's great cities. Here is what a tabulation of the figures shows—

Total city population served by these 64 papers	*Total city circulation of these 64 papers*
30,853,713	**3,753,651**

The average for these 64 papers is one paper for every **8.2** inhabitants. Get that into your mind!

For 64 of the leading markets in America the circulation of the dominant papers averages only one paper for every 8.2 people in those cities, and these are 64 of the most dominant cities in America!

In the entire list of 64 papers there are only three that sell *ONE PAPER FOR LESS THAN FOUR INHABITANTS.* These three are—

THE RICHMOND (VA.) NEWS LEADER
THE GRAND RAPIDS (MICH.) PRESS
THE KANSAS CITY (MO.) STAR

There are but *THREE PAPERS* in America that have a saturation of more than one *PAPER FOR EVERY FOUR INHABITANTS,* and THE NEWS LEADER is one of those three.

There are only two other papers in America—circulation and rate considered—that offer any such returns to the advertiser as THE RICHMOND (VA.) NEWS LEADER.

The Richmond merchant who uses THE NEWS LEADER knows that he is getting more customer prospects at a lower rate than any other merchant in America, except, perhaps, only two other papers.

Advertisers in THE NEWS LEADER reach every prospect every day in the great and populous city of Richmond, Virginia.

WHAT'S WHAT IN THE FEATURE FIELD

Ullman Feature Service Adds to Staff—New Love and Marriage Series on Market—Money Making Helps for Women

ULLMAN FEATURE SERVICE, Washington, D. C., has appointed Wellington J. Voss and W. J. Mealy members of its staff.

Mr. Voss, who was graduated from Catholic University, served on Washington newspapers for the last seven years, specializing in features and special articles. Because of his familiarity with the various governmental departments at the National Capital, he will devote himself in his new position exclusively to writing articles based on information gathered from the Bureau of Public Roads, the Bureau of Mines, the Bureau of Standards and other branches of the Government having a direct bearing on the varied activities of the Ullman Feature Service.

Mr. Mealy formerly was connected with the *Washington Times* as reporter and later with the *Houston* (Tex.) *Post* as automobile editor. He has made a special study of automobile sections of newspapers and will act as a contact representative, promoting such features offered by the Ullman Syndicate as "The Sunday Motorist," "John Smith and His Car," "That Car of Yours," etc.

Current News Features is offering a series of three stories entitled "Grooming Miss America" by Mrs. Emily Lanphier, mother of Miss Fay Lanphier, who was chosen as the most beautiful girl in America at the annual beauty contest at Atlantic City.

Frances McDonald, noted newspaper free-lance writer, is author of a new love and marriage series entitled "Are You Afraid of Marriage," which is being distributed by McNaught Syndicate, Inc., New York.

An addition to its list of Women's Page Features was announced this week by the Ledger Syndicate, Philadelphia, under the title, "100 New Ways for Women to Make Money". The series, designed to run a half a column daily is written by Ruth Leigh, author of "The Human Side of Retail Selling."

Sophie Irene Loeb has written a series of 19 articles telling what modern methods are accomplishing in the Holy Land. They are dated, Haifa, Palestine. Distribution is being handled by the New York World Syndicate, New York.

E. J. Clode has rejoined the staff of the Bell Syndicate, Inc., New York, as salesman.

"Gross Exaggerations" comic Yiddish feature by Milt Gross, New York World cartoonist, is now being nationally distributed by the New York World Syndicate.

Editor Killed by Crooks

Thomas Dovery, Kelso (Wash.) editor, who was murdered several months ago, was killed by a gang of petty crooks and not because of local politics, it has been announced by officials who have been working on the crime. Dovery was slain while a town row was under way in Kelso and his death was generally laid to his opponents in that controversy.

"FOR, OF, AND BY WOMEN—"

Is Policy of Shanghai (China) Women's Daily News

Chinese women are claiming a record over their eastern sisters in being first to publish a daily newspaper for, of and by women.

The *Shanghai Women's Daily News* started publication Aug. 21. Its staff is composed of the young intelligentsia among Chinese women. It is interested in collecting news of appeal to progressives among the gentler sex. Men are allowed only incidentally in the publication of the newspaper.

"We hope that our undertaking will help to promote and encourage the establishment of women dailies in the whole country," the first number declared.

Miss Liang Mon is editor and manager, and Miss Chen Shilu, associate editor and assistant manager.

DOCTOR RUNS AD COPY IN DULUTH HERALD

Unique Announcement Written by Dr. E. G. Hutterer Answers Affirmatively the Question "Should a Physician Advertise?"

"Should a physician advertise?"

Dr. E. G. Hutterer, a graduate of the Iowa College of Medicine, decided that he should, and in an advertisement in the *Duluth* (Minn.) *Herald* recently, outlined his reasons. He announced that he would charge $1 cash for consultations and on that basis only, asked that he be patronized.

His announcement follows:

"Should a physician advertise? No, says the American Medical association. So in writing this advertisement I fully realize that I am to be ostracized by the physicians and surgeons and their organization of Duluth and the United States.

"But, why should I not advertise? I spent years in preparing myself so I might properly diagnose and treat human ills. It is my stock in trade, and as a merchant advertises his wares, why should not I?

"I was educated at the Iowa College of Medicine and served my internship at St. Joseph's hospital at Sioux City, Iowa, and have practiced for eighteen years. I built a fairly good practice in general medicine, and was considered successful. That is, I was busy. But, as each year I watched a growing list of large and uncollectable accounts I realized I must make a change.

"A short time ago I opened offices in Duluth. I believe there are enough people here to want skilled medical attention and are willing to pay for each office call each time they call, and to make it an object for them to pay I have reduced my price to $1.

"My method of treatment is no different than any other skilled physician's. I claim no cure-all, I do not guarantee I can cure, but as a competent physician I do my best. I diagnose your ills, prescribe medicines and do all any physician can do—but at a flat office charge of $1—no charges. My only inducement is price.

"My reason for advertising is that I want to build a practice quickly, just as a merchant advertises so that he may become known. I invite you to call, and if I can help you, I will tell you, if I cannot, I will be just as frank. I leave the fairness of this plan to your judgment."

NEW TAMPA DAILY

Telegraph Starts Oct. 11 with 232 Pages in First Issue

The TAMPA MORNING TELEGRAPH started publication Oct. 11, its first edition numbering 232 pages and containing 303,674 lines of advertising. United News reports are being used.

W. O. Stovall is president.

One Man vs. Six Men

WHEN a representative of this newspaper sextette walks into the office of a space buyer he gives FULL VALUE for every moment of time that he takes up.

It is a case of ONE MAN equipped with facts and figures on SIX major markets and six newspapers instead of six men with six selling talks.

This standardized service, representing centralized and up-to-the-minute information, saves time for the space buyer and simplifies the matter of media selection in six highly responsive markets.

POSTAL SITUATION IN REVIEW

Speculation as to Outcome of Hearings and Publication of Voluminous Testimony

THE hearings before the Joint Postal Committee terminated in St. Paul on Sept. 28, and have recently been issued by the Government Printer and consist of over 1,100 pages of testimony. An announcement is now made that supplemental hearings will be held in Washington, beginning Oct. 26.

There has been considerable conjecture as to what subsequent action will be taken by Congress, and how soon. Undoubtedly several bills will be introduced into the coming Congress on Dec. 1, requiring changes in the new rates, all of which will be referred to the respective committees of the House and the Senate.

At the time of the creation of the Joint Postal Committee it was instructed to report back a measure at the opening of Congress that would embody permanent rates, or a readjustment of rates, as might be determined from the testimony submitted. The impression prevails, however, that the committee will request permission to postpone the presentation of such a measure until more complete returns are secured from the Post Office Department as to the increases that the present rates have brought about. This opinion is shared by those who are closely in touch with the situation.

Judging from the monthly statement of the increase in revenue from the 50 principal cities, it undoubtedly will show that an average of approximately 12 to 13 per cent will be established, and if one will compare that presentation with the total revenues, which for the last fiscal year were approximately $580,000,000, it will be seen that with the average increases, as pointed out above, there will be quite sufficient revenue to meet the increased rates of pay granted by the measure passed in the last Congress. It is well to keep in mind that the wage increases were made retro-active to Jan. 1, and that the new rates went into effect on April 15.

A quick review of the hearings as now printed, together with close observation of things during the course of the hearings held in the various cities from Atlanta to St. Paul, yields the following general impression: The feeling prevails that the newspapers, through the Southern Newspaper Publishers Association and the American Newspaper Publishers Association, made an unusually convincing case for a favorable consideration of second class rates. It was emphasized that their services to the country as a whole, both in the cities and in the rural districts, were of a character to warrant considerable flexibility, but that the methods employed in the ascertainment and allocation of the costs of various classes were of so inequitable a character as to show a serious loss on papers delivered, especially in the R. F. D. service. So far as the magazines and periodicals were concerned, their case was ably presented even to the extent of showing that a great many of the larger national magazines under the re-entry system were paying a good profit to the Post Office Department.

The briefs presented at Atlanta by the Postal Committee of the Southern Newspaper Publishers Association, and by the local Postal Committee of the American Newspaper Publishers Association at Philadelphia, New York and Boston, were enlightening as to the effect of the present rates upon circulation. In Chicago the A.N.P.A's case was presented by a representative of the *Chicago Tribune* and the line of argument swung around to a request for a bundle rate, somewhat parellel to the rate that the many metropolitan papers of the country are enjoying.

It is a well established fact that a great many of the papers are enjoying a low competitive baggage and express car rate and should the rate be calculated on a cost basis and compared with similar service on commodities which are under the supervision of the Interstate Commerce Commission, it might act as a boomerang in raising the rate which they are now enjoying by competition, should the Post Office Department make a recommendation for a rate at cost.

The zone system has been generally accepted as a permanent thing and it is most seriously advocated by the smaller newspapers, both daily and weekly, which are contiguous to the territories covered by the larger metropolitan papers, whose circulation extends deep into their territory.

This has always been the subject of endless discussion in associations composed of smaller papers, and in order to present a united effort for a reduction to the 1920 rate, which seems to have been generally agreed upon by all classes of users of second class mail, it would be well not to confuse the major issues by bringing up these different local problems that are particular to a few publishers.

If personal impressions are any indication of the attitude of the Committee, it is reasonable to anticipate that some consideration will be given by the Senate at the earnest request of the Postal Committee of the A.N.P.A. It seems probable too that the new rates will provide revenue to such extent that practically no difficulty will arise in the Department on this account. The essential problem before the next Congress will be as to the policy of the government in the postal service as it applies to the various classes of mail.

One of the outstanding features of the hearings was the harmony in which users of second class worked in presenting their cases before the Joint Committee. In fact there seemed to be little conflict between the various organizations represented. Undoubtedly there will be an early readjustment of the rates on postal cards, also on transient second class mail, but it is believed that it will be well into the next year, following the supplemental hearngs and the holiday business, plus a further investigation by the Joint Commission of the methods of bookkeeping employed in the Department and the allocation of the various expenses, before any definite measure will be submitted, keeping in mind that the popular issue of tax reduction and the essential discussion of appropriation bills always enjoyed the preference on calendars of both the House of Representatives and the Senate.

TRUTH IN REPORTING AND AD COPY STRESSED IN CANADIAN ETHICS CODE

THE following code of ethics was reported by the Editorial Committee of the Canadian Weekly Newspapers' Association at the recent annual convention in Winnipeg:

We believe that journalism is an honorable profession, essential to the welfare of society.

We believe that the success of democratic government depends upon sound public opinion and that the newspapers should aid in creating and maintaining sound public opinion by publishing significant news and editorial interpretation of news.

We believe that newspaper writers and editors should be adequately prepared for the great responsibilities placed upon them.

We belive that a newspaper should publish the truth, the whole truth, and nothing but the truth concerning all matters of importance to readers as citizens of the community, the state and the nation.

We believe that a newspaper that goes into the home should publish nothing which cannot be read aloud in the family circle.

We believe that news of crime, scandal and vice should be presented in such a manner as to deter readers from imitating the criminal and the vicious.

We believe that all persons and organizations are entitled to fair play in the columns of the newspaper.

We believe in the right of privacy of individuals in all matters not of public concern.

We believe that no propoganda or publicity matter should be published unless it contains information to which readers are entitled, and that whenever such material is printed, its source should be plainly indicated.

We believe that editorials should present the truth as the writer sees it, uncolored by bias, prejudice or partisanship.

We believe that neither the business interests of a newspaper nor any outside influence should interfere with the publication of the truth in news or editorials.

We believe that the purpose of newspaper advertising is to create a demand for commodities or services, to inform readers, not to mislead or to defraud them.

We believe that advertisements should be as clean and wholesome as news and editorials.

We believe that rates for subscription and advertisements should be sufficient to insure the publisher a fair profit.

We believe that all statements of circulation should give the actual number of bonafide subscribers.

We believe that only such newspapers as maintain the highest standards of truth, honesty and decency in news, editorials, and advertisements, deserve the support of the community.

We believe that newspapers, which find it advantageous to copy from other papers editorials or news features that have cost the writer time, effort and money, should give due credit.

Two Advertisements or Fifty-Two?

Why schedule advertising to overcrowd churches on Christmas and Easter and leave them half-empty the rest of the year?

Dr. W. S. Abernethy, a prominent Baptist pastor in Washington, D. C., gives this hint to newspapers:

"Washington newspapers (as do newspapers everywhere) make a mighty effort to get the churches to advertise their special day services,—Easter, Christmas, and so forth. Those are the days when we do not need to advertise at all. We always turn people away then.

"If the newspapers could find out, say on Friday morning, from the weather forecaster what the weather on the following Sunday was likely to be, and then call the ministers and say 'Rain is prophesied for next Sunday, how about an advertisement,' they'd be more likely to get it. I believe in advertising. The newspapers are a valuable aid."

This is the opportune time to start a church page. The churches are getting into full swing now for their winter's programs.

We will help you to start your church page.

NEWS QUALITY IN NEWSPAPER COPY MAKES IT DOMINATING MEDIUM

I. J. Hentschell of Minneapolis Tribune Ad Staff Answers J. G. Pattee's Attack—Cites Volume of Retail Business

IT is the *news* quality afforded by newspaper advertising which makes newspapers the most important medium for retail stores, I. J. Hentschell, of the *Minneapolis Tribune* advertising staff recently told members of the Minneapolis Salesmanagers Association, in answering the attack against newspaper space made several months ago by J. G. Pattee, sales director of the Newcomb-Endicott Company, Detroit department store. Mr. Pattee upheld direct mail advertising in an address and his remarks were later printed in booklet form and distributed. In answering Mr. Pattee's remarks, Mr. Hentschell said:

"I will certainly try to be more charitable to direct-by-mail, than Mr. Pattee has been to the newspapers, because, direct-by-mail is if used properly meritorious.

"Advertising is essential to all business. A business enterprise to succeed under present business competition, must advertise. And it is truly amazing what remarkable returns all forms of good advertising bring to the business that utilizes advertising properly. There are but three requisites to attain the pronounced success that advertising is certain to bring about—good merchandise, good organization and good advertising copy used in a good media.

"In 1923 there was spent in the United States a total of a billion dollars in all forms of advertising. Of this billion dollars the newspapers received $600,000,000. Newspapers were used most because, results considered, the newspaper is the least expensive form of advertising.

"What is a justified appropriation for advertising? Before the war, advertising experts said 3 per cent of the gross business. Today, the percentage cost of advertising will probably average about 4 per cent of the gross sales. The department stores, supposedly the most reckless in the use of advertising do not as a rule spend 4 per cent of their gross business in advertising, in my judgment the department store is nearer the 3 per cent mark and the reason for their small advertising cost must be attributed to a most careful selection of media. Eighty-five per cent of their advertising appropriation is spend in the newspapers. A Minneapolis department store advertising man attending the conferences of the big American retail stores tells me that such advertising experts as Mr. Black of Filene's, Boston, Mr. Appel of Wanamaker's and Mr. Brown of Marshall-Field's have time and time again expressed themselves on the fact that the newspapers should receive 85 per cent of a department store's appropriation and that all other forms of advertising media should receive the balance. In the 'other forms of advertising' I am including direct-by-mail.

"Why do the experts allot 85 per cent of their appropriations to the newspapers? There must be a reason. That reason is the fact that the advertising in the daily newspaper is news. Just as important, just as interesting as any other news in the newspaper. There is no other media that can or that has been able to inject news in its advertising to such a pronounced extent as the newspaper. In your morning newspaper appeared price reduction announcements of automobile manufacturers. Was that not news of the utmost importance? In the same issue a number of department stores make what they consider important announcements, some relate to special price offerings, others depict the new styles, the new arrivals in things that your wife and my wife is very much interested in. Take out the advertising from your favorite newspaper and you will take away from it a most interesting and most important news feature.

"Mr. Pattee states there is no such a thing as cumulative results from advertising. If that statement is correct then advertising is a fraud. There must be cumulative results from your advertising; if that was not true, you could not afford to buy advertising. Why is it that a page ad with surprisingly low prices, good values, when used by a non-advertising merchant will bring little or no response, when on the other hand the same copy signed by a merchant who has been a persistent advertiser, will unfailingly bring a big return? For example: Foster & Waldo, the biggest advertiser among the piano merchants of Minneapolis, announced the other day in the daily newspapers a removal sale. The response was so great that a squad of police were on hand to take care of the mob. Is it not a fact that the reason for the big success of the Foster-Waldo sale is primarily due to their big advertising programs of the past plus their good merchandise plus their good organization? Cumulative results from former advertising put the Foster-Waldo sale over and cumulative results are an absolute essential in the success of any present day merchandising effort.

"Every successful retail department store in America uses newspapers. The Newcomb-Endicott company of Detroit spends in the newspapers of Detroit 60 per cent of its entire advertising appropriation.

"We must not forget Mr. Pattee's reference to what he terms is too much advertising in the newspapers. He wonders how in the world people find time to read the mass of advertising that is contained within the folds of a big city daily. About four years ago the Powers' Mercantile startled Minneapolis by running nine pages of advertising in the interest of a one day sale. I hope I am not trangressing the ethics of an advertising man when I divulge the figures of Powers one day effort and the effect of the nine pages. The one day business amounted to a figure of more than $127,000. I recall the time that the Donaldson store objected when the paper that I am associated with, happened to place its grocery copy on the what is termed the market page—a solid mass of grocery and meat advertising. The point made by the Donaldson store was that its merchandise was so far superior to the merchandise offered by the other merchants on the page that the association was not wholesome to Donaldson's. But today you will find Donaldson grocery copy right alongside of the cash and carry stores on the market pages every Friday evening and Saturday morning. Donaldsons have found that four or five pages of grocery and meat advertising has a smashing attention appeal. And Donaldson's, because they have good merchandise, received a splendid return. If a three column ad could be made to do what a full page accomplishes why would not our good advertising experts use the smaller space?

"The reason for the large amount of advertising in the daily press is due to the fact that the advertising brings results; it is read because it is news."

CLASSIFIED ADS GROW

President Nax Furnishes Figures to Prove It

Classified advertising is growing in prestige and profits, according to Charles W. Nax, of the *St. Louis Globe-Democrat,* and president of the Association of Newspaper Classified Advertising Managers. Mr. Nax furnished figures to prove his assertion to the Associated Advertising Clubs of the World, and that organization made them public this week.

"The revenue of one newspaper increased its revenue from classified advertisements in a few years from $150,000 to $1,000,000 a year," Mr. Nax said. "Another newspaper's classified revenue is now nearly $5,000,000 a year.

"Small newspapers are awaking to the fact that classified advertisements produce two and often three times as much per line as display copy. Rate cards show 30 cents or 40 cents per inch for run of the paper advertising and one cent per word or six cents per line for classified or 72 cents an inch."

Edmonton Daily Resumes Publication

Edmonton (Alta.) *Daily Bulletin* was to resume publication Oct. 15. Charles E. Campbell, former newspaper proprietor of Vancouver, B. C., has announced he is sole owner. The Bulletin suspended last June 19, following a strike in its mechanical department against proposed wage reductions.

MERGER OF PRESS GROUPS

Maine Press Association and Typothetæ Unite

The main Press Association at its Annual Meeting on Friday, voted to merge with the Maine Typothetæ under the general title of Franklin Association. The national body of membership will include photo-engravers, paper dealers and employes groups as well as newspaper men.

Pres. L. P. Evans, of the *Piscataquis Observer* was delegated to express vehement objection of the Maine Association to Congress against the action of the Federal Government, through the printing bureau, in entering into competition with the private printing industry by printing envelopes.

President Evans was reelected. Charles F. Mann of Lisbon, was elected vice president and O. L. Evans, secretary-treasurer.

Each week men and positions meet in EDITOR & PUBLISHER classified columns. Read and act!

The New York Times

PRIZE FOR ESSAY ON ADVERTISING TYPOGRAPHY

The New York Times offers a prize of $100 for the best essay on the practical value of good typography in newspaper advertising.

This prize offer affords opportunity to all who can interpret the principles and value of good typography.

The essays submitted must be not more than 1,000 words in length and typewritten.

It is suggested that references be made in illustrating the points brought out in the essay, to the various entries in the recent Typographical Contest of The New York Times, 400 of which have been reproduced in the book "Newspaper Advertising Typography" by the Business Department of The New York Times. A copy of the book will be sent free to any person intending to write an essay.

All entries must be addressed to Typographical Essay Contest, The New York Times, 229 West Forty-third Street, New York City, and must be received before November 15, 1925.

The contest is open to all except members of the staff of The New York Times.

Greatest Volume in History of any New York Newspaper

The New York Times in September published 2,580,816 agate lines of advertising, exceeding its own record and reaching the greatest volume ever published in one month in a New York newspaper.

This large volume was attained notwithstanding the censorship of The Times which excluded thousands of agate lines of advertising as objectionable.

OVER FIFTEEN YEARS AGO A MERCHANT OFFERED $1000.00

For a list of every possible and favorable selling argument and purchasing appeal that could be used in a retail advertisement.

As the result of this offer

THE KNIGHT METHOD OF EFFECTIVE ADVERTISING

Is now offered to you.

It is a tabular analysis of retail advertising—so exhaustive, as to include, so far as lies within the reach of human effort, the total sum of retail advertising's possibilities.

It resolves retail advertising into both its verbal and conceptional elements and presents those elements under quick reference classifications for the ready synthesis of advertising ideas and expository phraseology.

Its suggestion-value is instantly apparent; and it will prevent the mind upon which unusual copy demands are made from slipping into a rut.

It will halt the unconscious habit of using threadbare words and phrases. It enables the writer to select the exact word or idea for the exact shade of meaning desired. It adds those deft touches of individuality and distinction, which lifts advertising above the common level. It epitomizes the complete list of retail advertising appeal and enables the copy writer to have absolute assurance that no applicable selling argument can be overlooked and yet tiresome repetitions are easily avoided.

It is a dictionary of retail policies; it is a bountiful source of merchandising suggestions; it is a table of retail service possibilities; it is a text book of oral salesmanship.

MAIN CLASSIFICATIONS

Prices
Bargains and Values
Quality
Styles
Service
The Store and Organization
Location of Store
Sales
Merchandise, Stock
Description of Specific Merchandise
Satisfaction
Miscellaneous and Human Interest Appeals

Each of the Main Classifications here shown are subdivided into from six to twenty-five Classification Plans. Over one thousand qualifications of "Prices" are shown. This is but one item. Prices, Bargains, Values, Styles, Sales, Credit Business, Community Building, Human Interest and even applied Psychology are included in easily understood non-technical language.

The possibilities extend to the construction of advertising which is to be conservatively dignified or radically sensational, or in between these two, according to the atmosphere and policy of the store.

It is more than a word-book, phrase-book or an idea-book. It is more than an advertising dictionary, thesaurus or encyclopedia. It is more than a system or service. It is now and will continue to be a standard work.

THE ADVERTISING HANDBOOK OF THE CENTURY

Over 100,000 different advertisements (during a period of over fifteen years) have been carefully analyzed in the compilation and creation of the

KNIGHT METHOD OF EFFECTIVE ADVERTISING

and it has taken over 200,000 record cards and a ten-foot pile of finely penciled notes on ordinary letter paper in the process.

All the daily newspapers of this country and Canada and many English dailies have been scanned; and several hundred books and treatises on advertising, salesmanship, retailing, merchandising, storekeeping, rhetoric, philosophy, applied psychology and kindred subjects have been searched for ideas.

The Knight Method of Effective Advertising is designed primarily to facilitate the production of retail advertising. But inasmuch as the basic principles which underlie all persuasive publicity are identical, the Knight Method offers parallel assistance to the producers of any kind of advertising.

The Knight Method will be issued within a short time as a monthly service; preparatory to which it was found necessary to have some complete copies available. It was therefore decided to publish a complete edition in book form for a limited distribution.

The book contains over two hundred and thirty pages, and is printed on heavy machine finished paper from new type, size 8 x 11 inches and about one inch thick, handsomely bound in durable black bookbinder's heavy linen cloth and lettered on face. Each of the twelve parts are arranged in sequence and cross references are easily and quickly found for outline and fill in work.

If results received by advertisers mean more income to a newspaper, because more space is used; and if a greater revenue enables publishers to produce a better newspaper in every department, then *every PUBLISHER and ADVERTISING MANAGER should have a copy.* The stupendous labor, the analytical concentration, the coordinated application of the English language, the correlation and finely shaded differentiation of every conceivable and favorable thing that can be said about merchandise, and the many new and otherwise hardly ever remembered angles of outline and presentation will undoubtedly make this work THE STANDARD FOR THIS CENTURY. PUBLISHERS seeking useful and practical CHRISTMAS GIFTS for their heavy space buyers will do well to consider THE KNIGHT METHOD OF EFFECTIVE ADVERTISING. The complete work can be furnished in limited quantities, provided that orders are received promptly. Write for further information and state quantity desired.

The following special price of the Knight Method in book form is about one quarter of its cost as a monthly service.

TERMS

Single Copy $35.00 less 10% cash with order..... $31.50
or $35.00—$10.00 with order; balance $25. upon receipt, less 10%, or $22.50..... 32.50

WICHITA EAGLE PRINTS 35,000 TAX RETURNS

Editor Victor Murdock Replies to His Critics: "Our Readers Are Entitled to the News"

Victor Murdock, editor of the *Wichita* (Kan.) *Eagle*, believing that his readers are entitled to all the news, discovered when the income tax books were opened, that there were over 35,000 individual taxpayers on the local list. This didn't deter Mr. Murdock from his purpose of letting the people know. He printed the entire list, devoting eight columns of the Eagle each day to this purpose.

From the list, readers of the Eagle learned a good many things regarding the wealth of the individuals and the state. It revealed that the large taxable incomes of Kansas are to be found in the county seat towns. The larger towns and cities appear to offer more advantages to the individual seeking investments and to the man with a family. Better schools in the cities attract many from the farms and small country towns.

A large portion of the tax aggregate for the last quarter was paid on the last day before the penalty was added. The total amount collected at the Wichita office was close to $10,000,000.

A better showing in prompt payments of the tax was made this year than during any previous year, and the prompt payment indicated the prosperity of the state at large.

When the first list of taxpayers appeared in the Eagle a "mighty howl" went up, but this had little weight with Murdock. He merely replied:

"Readers of the Eagle are entitled to the news," and the publication of the list went on.

WHAT OUR READERS SAY

Crusade for "Percent" One Complete Word

To Editor & Publisher: For years I wondered why newspapers differ so widely in their style of printing a short form of "per centum"; and for uniformity I adopted and have urged upon others the use of one word, "percent"—analogous to "percentage," which every publication uses as a single word. Besides the sign %, common in stock market and other financial reports, and in general articles in financial newspapers, we have:

(a) Per centum—customary with writers who would not use a term half Latin and half English. No objection to this.

(b) Per cent.—the period to indicate that "cent" is abbreviation of Latin word meaning 100 and is not intended for the English word for 1-100th of a dollar.

(c) per cent—the period omitted as being unnecessary because everybody knows what is meant, owing to longtime common use of "cent" for 100 when the word is preceded by "per."

(d) Percent—one word, no period: adopted in recent years by financial writers who evidently believe that it is high time to establish this for uniformity in the language. Many words now in general use were formed in this manner.

Persons familiar with the "mechanics" of editing and printing are aware of the troublesome ways of "per centum," which is rarely seen nowadays in full Latin form. In many offices the style for its shortening is left solely to the whim of some person in authority. Possibly the problem presented for copy-editors, for typesetters and for proofreaders by the variations of "per centum" causes more waste of time and labor than any other locution. And even then, sometimes the term appears in two or three ways in the same publication—in the same story!

"Percent," one word, solves it. Let all publications—books, magazines, down to the country weekly newspaper—adopt this form and there will be rejoicing in the craft—perhaps, too, detectible curtailment of expense for publishers! As one word I have seen it recently in several magazines.

A special convention of the American Newspaper Publishers Association to consider and act upon "the great per cent., per cent, percent imbroglio" might be in order! But a referendum would answer. At all events, why not get together on one style and thus do away with something that is a real nuisance to printers generally?

Will Editor & Publisher, palm-bearing champion of a recent orthographical reform, now exert its great influence in behalf of "percent"? Its triumph will be 100 percent satisfactory to the craft, I am sure.

J. Joseph Lawrence.

Twelve Sunday Sections

To Editor and Publisher:

Several days ago we mailed you a story, relating to changes in our Sunday editions, in which we inadvertently referred to "twelve pages of comics." As this carries the impression that we have a twelve page comic section, we request a correction as follows.

Beginning with its issues of September 20, *The Milwaukee Journal* has increased its Sunday editions from nine to twelve sections. The comic section was enlarged from four to eight pages, and the feature magazine from a tabloid to an 8 page, 7 column newspaper. There was added a tabloid magazine, in color, for children, a fiction story magazine, in color, newspaper size (supplementing the feature magazine), and a motoring and radio magazine. The sport drama section was doubled and space given to fashions, society news, real estate and building materially increased.

Yours very truly,
O. R. Smith,
Public Service Bureau, Milwaukee Journal.

Hub Writers in Golf Tourney

The annual golf turnament of the Newspaper Men's Golf Association, of Boston, Mass., was held last week at the Bellevue Golf Club. In Class A, A. M. Hoxie of the *Post* won first; J. A. Jones of the *Herald*, second; W. O. Nicoll of the *Christian Science Monitor*, third; and J. H. Kelly of the *Post*, fourth. In Class B, G. E. Burnham of the *Post* won first, and R. J. Kelly of the *Post* was second.

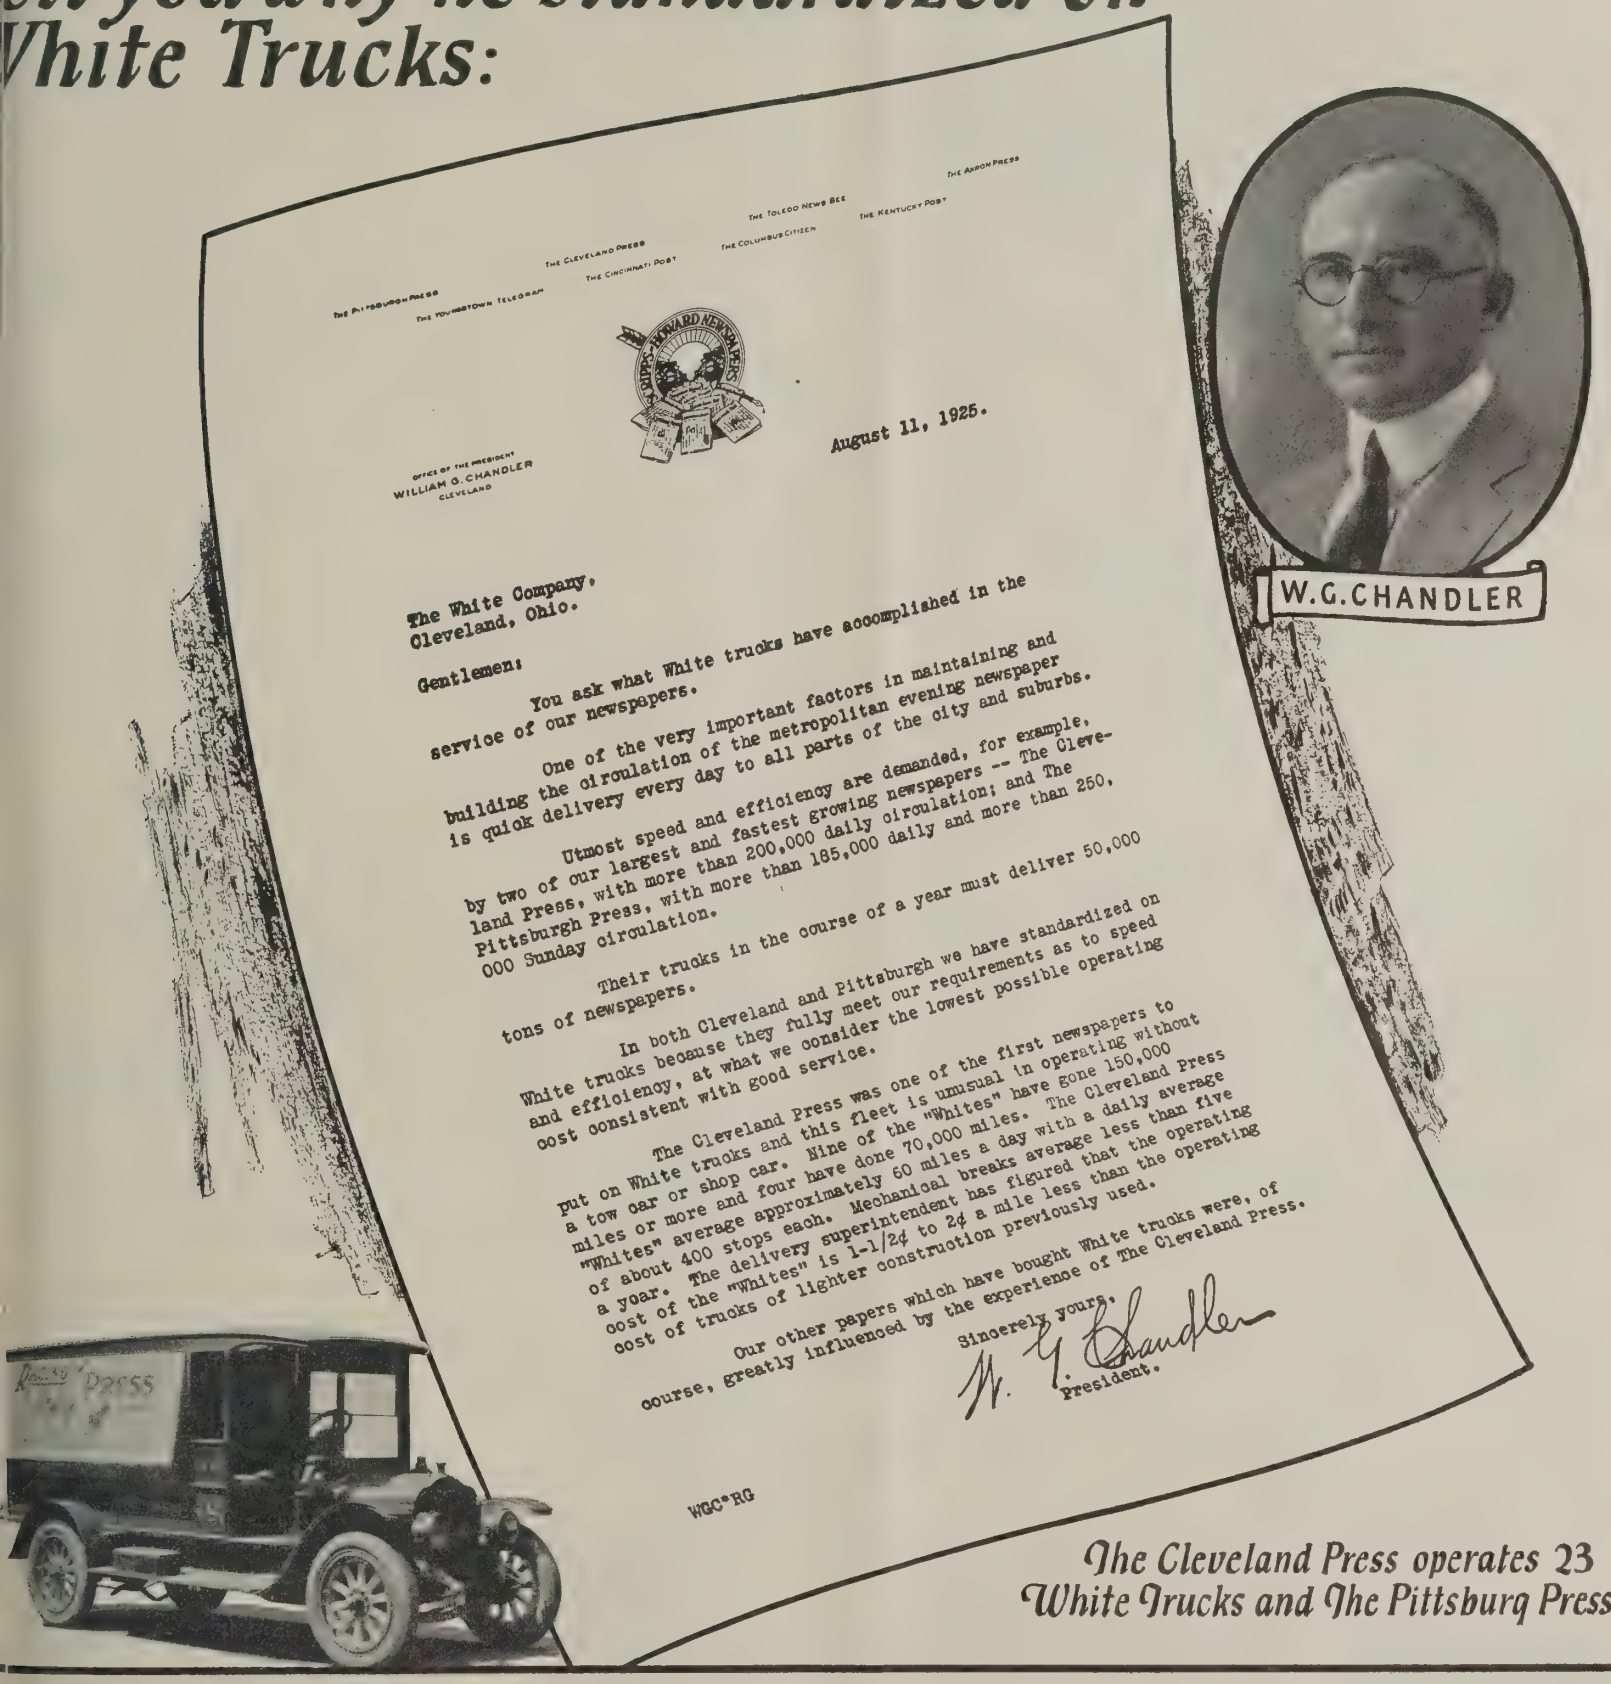
Coolidge is Impressed by Indiana

Dispatches from St. Louis to newspapers throughout the country, on October 5th, announced that President Coolidge's train had arrived on its way to Omaha, where the President was to address the American Legion convention the following day.

After describing the personnel of the Presidential party, the article continued:—



"President Coolidge appeared well satisfied with the evidence of industrial and farm prosperity he saw on every hand in his day trip through Indiana. Government reports have indicated an era of good times, with little unemployment and favorable crops. Agricultural Indiana verified the report as to an improved condition among the farmers. The corn fields appeared to be bounteous in their yields. The small towns were not without industrial activity. The smokestacks poured forth smoke indicative of production. All along the route farmers drove to the stations in automobiles."

There is an extraordinary buying power in Indiana and this prosperous market can be completely covered by a sales promotion campaign in the following newspapers at a remarkably low cost.

OFFICE OF THE PRESIDENT
WILLIAM G. CHANDLER
CLEVELAND

August 11, 1925.

The White Company,
Cleveland, Ohio.

Gentlemen:

You ask what White trucks have accomplished in the service of our newspapers.

One of the very important factors in maintaining and building the circulation of the metropolitan evening newspaper is quick delivery every day to all parts of the city and suburbs.

Utmost speed and efficiency are demanded, for example, by two of our largest and fastest growing newspapers -- The Cleveland Press, with more than 200,000 daily circulation; and The Pittsburgh Press, with more than 185,000 daily and more than 250,000 Sunday circulation.

Their trucks in the course of a year must deliver 50,000 tons of newspapers.

In both Cleveland and Pittsburgh we have standardized on White trucks because they fully meet our requirements as to speed and efficiency, at what we consider the lowest possible operating cost consistent with good service.

The Cleveland Press was one of the first newspapers to put on White trucks and this fleet is unusual in operating without a tow car or shop car. Nine of the "Whites" have gone 150,000 miles or more and four have done 70,000 miles. The Cleveland Press "Whites" average approximately 60 miles a day with a daily average of about 400 stops each. Mechanical breaks average less than five a year. The delivery superintendent has figured that the operating cost of the "Whites" is 1-1/2¢ to 2¢ a mile less than the operating cost of trucks of lighter construction previously used.

Our other papers which have bought White trucks were, of course, greatly influenced by the experience of The Cleveland Press.

Sincerely yours,
W. G. Chandler
President.

BONUS SYSTEM FOR ADVERTISING STAFF PAYS IN HEIGHTENED MORALE

Extra Compensation for Added Effort Has Beneficial Effect, Ad Manager Declares—Danger of Overselling Advertisers Small

By M. W. THOMPSON

Advertising Manager, *St. Paul Daily News*

OPINIONS seem to vary widely on the merits of bonus systems as applied to the advertising departments of daily newspapers. Judging from reports made recently on these systems, there seems to be an inclination toward forming opinions without considering various local conditions. In order to be successful, undoubtedly there must be wide differences in the application of the idea. Conditions vary greatly in large and small cities and between big, dominant newspaprs and second or third papers. Some papers are amply financed and can work for the future; others must make every dollar count and can use only such systems as will prove immediately productive.

In principle the bonus system should be simply a matter of extra compensation for extra effort. It is understood, of course, that extra effort means not only the effort but results. It is hard to understand why there should be any objection to this fundamental idea. Many of our most efficient manufacturing plants have adopted this idea. When factory workers go on a piece work basis it is merely an application of this same general idea. Practically all salesmen traveling in various sections of the country work on the basis of a fixed salary and expenses, with contingent commissions for extra production. Banks, insurance companies and similar institutions very frequently give a bonus at the end of the year to all employes, if the year has been successful. Retail stores are also adopting the same idea.

In some cases newspaper advertising managers have failed to make a thorough and careful survey of local conditions. The system has been put on and scheduled to go through a year or two years without variation. In the meantime, business conditions have changed, and bonus offers that may have been reasonable, we will say in 1923, become unfair in 1924, and untenable in 1925.

The ideal newspaper on which to operate a bonus system is a newspaper which is in healthy condition and which has an aggressive staff throughout the organization, where circulation is growing and where the desire is to take on a maximum but sound growth in advertising linage.

Given such a condition it should not be a difficult matter for any advertising manager to work out a scheme of bonuses, that will induce a high type of loyalty, guarantee hard work and give extra production on the part of the staff. Most any advertising manager should be able to make a survey of his newspaper and the city, and make a list of the things that he desires to accomplish. It may be new advertising accounts; it may be better copy writing; it may be a change in the division of linage on a certain number of accounts. He may have a weakness in a given group, such as shoes or furniture, or he may desire certain special features put across. The successful application of a bonus system is merely offering reasonable rewards for the accomplishment of these certain things which are desirable for the advertising department as a whole.

Our experience in the operation of such a system has been quite satisfactory, and has not run into an extravagant amount of money. The natural state of mind of the average salesman, regardless of the salary he draws, is to consider that he is underpaid. This whether the man is high class, medium or indifferent. The natural human desire is to make progress and have the better things in life. No matter how frequently raises may be distributed, there is always a tendency to desire more. I consider that the judicious distribution of a fair amount of bonus money gives the immediate day by day and week by week incentive to keep the staff on its toes and at peak production.

It has been said by certain executives that this may have a tendency to oversell the advertiser. This is rarely true if proper supervision is given to copy and occasional rewards are made for meritorious campaigns which are planned and written inside the department. A staff that affords intelligent service seldom if ever, oversells a prospect. With experience comes the knowledge that an advertiser who is grossly oversold will soon rebel and revert to a small amount of linage, while an advertiser properly sold, given good service and the right advice, gets production on his advertising and is satisfied. The account will then show development and a healthy condition both from the viewpoint of the store and the newspaper.

The question of staff morale is one of the most important in the handling of an advertising department. I have personally worked on staffs of a number of newspapers in different parts of the country and at times have seen a staff vary from what might be termed 25 per cent. to 95 per cent. efficiency. Many years ago, I was on one advertising staff where, under improper handling, efficiency could not be rated at over 25 per cent. This in spite of the fact that many of the men had exceptional ability. One of these men occupies today a prominent position at the head of one of the best known advertising organizations in the country.

The average advertising staff which is ordinarily rated as fairly good, probably does not operate at better than 60 per cent. efficiency. This is rather a surprising statement, and will probably be disputed by a good many executives. In contrast to this, there are perhaps a few staffs scattered around the country that are 80 per cent. to 90 per cent efficient. They get raises in salary as deserved, without solicitation. Many such staffs have extra rewards of some sort. In some instances in place of a cash bonus, the newspaper executives frequently entertain the advertising department at dinners. It is also equally true that on these high grade advertising staffs, where producers have a great deal of consideration, the inefficient man is soon eliminated and has to look for a position elsewhere.

WORTHLESS PROGRAM ADS

Portland Newspapers and Merchants Protest Against Ancient Graft

Merchants of Portland, Ore., with the support of the newspapers, are protesting against the "advertising program graft." The merchants take the position that money spent for program advertising is an absolute waste so far as any advertising value is concerned and complain that they are often forced into it on sentimental appeals to support the cause for which a program is issued.

The issue came to a head when it was announced that an advertising program would be issued by the Pacific International Livestock association. The project received the indorsement of the Chamber of Commerce on the ground that while the advertising itself was practically worthless the livestock exposition needed the money. Some of the business men and the merchants got busy and showed that only about one-half of the $7,000 it was expected to raise through the program would ever reach the exposition and advocated direct contributions to support the enterprise.

The Portland Rose Festival this year recognized the worthlessness of this type of advertising and issued a program from which all advertising was eliminated. The Portland Elks and the Odd Fellows, holding their national conventions in Portland the past Summer, also joined in the movement.

Three New A. P. Members Elected

The board of directors of the Associated Press, meeting in New York last week, approved the election of four newspapers to membership. The new members are *Stoughton* (Wis.) *Courier-Hub*, *Plant City* (Fla.) *News*; *Sanford* (Fla.) *Signal*, and *Vernon* (Tex.) *Record*.

Charles to Direct A. A. C. W. Program

H. H. Charles, president of the Charles Advertising Service, New York, has been appointed chairman of the international program committee of the Associated Advertising Clubs of the World, to plan for the 1926 convention to be held in Philadelphia, June 19-24, 1926.

Washington Correspondent Buys Daily

William D. W. Bishop, Washington (D. C.) correspondent of the *New Haven* (Conn.) *Register*, has purchased the *Washington* (N. C.) *Daily News* from J. A. Osborne. Mr. Bishop will be editor and publisher. He was with the Register six years.

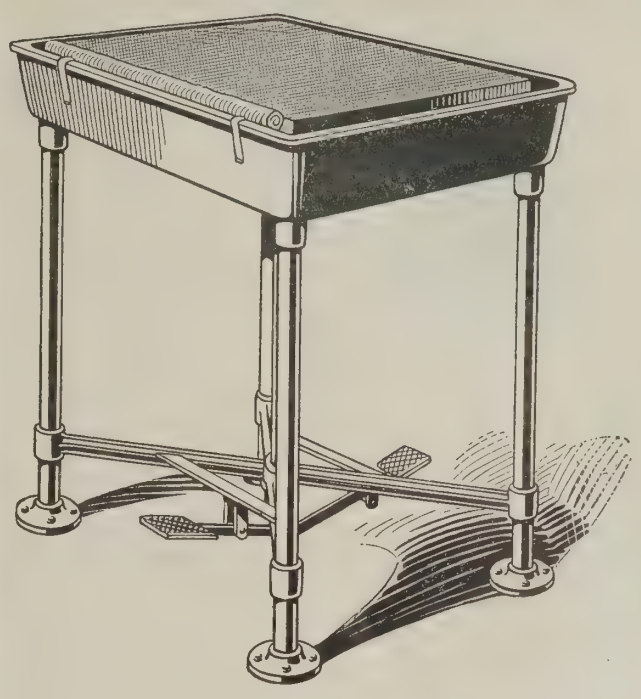
POWERS PERFECTION COOLER

Every Newspaper Photo Engraving Plant should have at least one

The Powers Perfection Cooler requires no water connection of any kind.



It can be moved at will by simply picking it up and placing it where it is wanted.

It has no mechanical parts to get out of order.

It applies cold water evenly and simultaneously to all parts of the plate—ON THE BACK OF THE PLATE only.

It cools the plate instantaneously to the exact temperature required and saves wiping, mopping and reheating.

The price of the Powers Perfection Cooler is $350

The *Powers Perfection Cooler* met with the instantaneous approval of both the workers and the owners wherever it was installed and tried. The men in the shops like it because it helps them in their work. They save time and effort, turn out more work and better work, and do it with very little physical labor. It is a clean, workmanlike way of doing what is otherwise a messy, sloppy task.

Proprietors like it because it saves gas, water, time and makeovers. These savings mean money and profits and that is what we all want. To satisfy yourself, go into your etching rooms and see what happens when the etcher tries to cool a large plate by dragging it over a roller wrapped in old towels and rags or a piece of burlap. Watch the plate buckle and then see him try to straighten it out. You know what that means in color work.

The use of the Powers Perfection Cooler does away with buckled and twisted plates, the splashing of water on the face of the plate and the constant work and worry connected with etching. A zinc etching is heated from 13 to 16 times by the etcher. That tells the story.

ANT-HILL POLITICS, RECORDS OF ROCKS, BIG NEWS FOR COSMIC REPORTER

Stories of Nature Strike a Common Chord, J. Otis Swift of New York World Declares—His Copy Runs Daily on Editorial Page

By MABEL ABBOTT

DO you subconsciously remember the time when you were a tree-dweller, or a cave-man? J. Otis Swift, of the

J. Otis Swift

Mr. Swift is the writer of the *New York World,* thinks you do. daily nature-articles, "News Outside the Door," which for three years have been running alongside the weather-box in the Morning World. He is a reporter of the building statistics of the birds, the politics of ant-hills, the business of beetles, the industries of grass and moss and lichens, the records of the rocks, the parades of the constellations.

Modest, inconspicuous and impersonal, these little sketches are the very opposite of sensational; yet the size of Mr. Swift's mail is proof that they touch some universal interest of men and women. A busy magnate will take time to write in about the bird that comes regularly to his window. Clerks, who know little more of nature than they find in crowded parks, write of their interest in the articles. Hiking clubs beg him to accompany them and tell them about the things they see. Housewives report their discoveries in the back yard. Commuters send in pebbles picked up as they dash for trains, and want to know what they are.

Mr. Swift writes his "News Outside the Door" in addition to the regular routine of newspaper work. That routine, however, has not subdued him to the usual mould of the profession. Small, wiry and tanned, with black hair that sticks up like the crest of a startled bird, and eyes that peer alertly through their spectacle-rims, he looks like a gentle eagle, caged at a typewriter desk, as he hammers out "stories," or "sits in" for some sub-editor who is having a day off. His pockets sag a little, because he carries arrow-heads in them,—sometimes old ones which he finds where others have overlooked them, sometimes new ones, which he makes in exactly the same way that the old ones were made, shaping them with a pecking implement.

His grandfather was the Rev. J. S. Swift, a pioneer county newspaper publisher of Maine and a lover of nature. His father, Sprague Swift, also was a newspaper man and a lover of the open.

Out of school hours, young Otis divided his time between inking forms, setting type, proving galleys and otherwise making himself useful in his grandfather's newspaper office, and building camps of spruce boughs, hunting bugs and butterflies, following the fox, dog and rabbit tracks that laced the snow on the hillside, playing Indian, fishing, swimming, and trying to make wild flowers grow in the garden.

When he was 12, he was publishing a little paper in Wilton, Me., which he wrote, set the type for, printed and sold —all himself. At the same time he was learning to make stone implements, using the exact method of the aborigines. He copied Algonquin stone axes, fitted them to split stick handles bound on with strips of rawhide from woodchucks caught in his traps, and became so proficient in throwing them that he could hit a small mark 50 feet away with the sharp blade.

He finished his apprenticeship as a journeyman printer in the office of the *Lewiston Journal,* and was for several years city editor of that paper. He came to New York in 1900 and joined the staff of the World. His wife is also an authority on nature subjects and was formerly connected with the Lewiston Journal. Their eldest son, Otis Peabody Swift, is head of the United News office in Chicago, thus carrying the family inheritance into the fourth generation.

Mr. Swift's explanation of the response to the "News Outside the Door" articles sounded simple enough, as he set it forth in answer to a question.

"For one thing," he said, "I make it a point to write about things which may have been noticed by the average man or woman. Almost everybody, even the city-dweller, gets outdoors more or less. They notice and wonder about the color of a rock, the structure of a leaf, or the wedge-shaped flight of birds, and they are interested in reading about them.

"But the source of the interest, I think, lies farther back than their own, perhaps very slight, observation. Men lived in trees for a much longer period than they have lived in houses. The experiences they had during that period are a deep layer under the shallow one acquired since civilization. We are all haunted by vague memories and instincts, and we all have to some extent, however slight, an intuitive knowledge of Nature.

"I think these forest things seem familiar because once our home was among them. You know it has been said that children pass through all the ages of mankind between babyhood and maturity. At first they creep like animals; at 10 years old, boys are arboreal like their tree-climbing ancestors. At 12 they dig caves. At 14 they are reaching the migratory age, I suppose, and they run away. At 16 they take to building shacks and shanties, in vague recollection of the beginning of life in towns and cities.

"Our primitive life was the longest, and its registrations are the strongest. And so anything that is connected with primitive life, such as rocks, trees, animals and their ways, crude weapons, and the feeling of the open, subconsciously interests every human being, because it rouses those ancient memories."

It sounded so reasonable that it was hard to regain the point of view from which newspaper men have expressed surprise at the popular appeal of the "News Outside the Door" idea.

"It isn't the kind of 'news' that is usually reported in daily papers," was as near as the interviewer could get to it.

Mr. Swift laughed. "I know," he said. "We usually think 'news' can only be found in court-rooms, at mass-meetings, in politicians' offices, or places like that. We ought to get over that. The whole world is full of news—the cosmos is full of it. I have been trying to report some of the cosmic news—that's all."

JUDGE HOLDS EDITORS TOO VALUABLE FOR JURY WORK

NEWSPAPER men have been barred from jury service in the district court in Sapulpa, Okla. L. M. Nichols, editor of the *Bristow Record,* called last week, was dismissed by Judge F. A. Speakman, who held that newspaper men were public servants and could not perform their duties when confined to courtrooms.

Better Sunday Paper in Aurora

The *Aurora* (Ill.) *Beacon-News* made an advance with its Sunday issue of Oct. 11, by adding a four-page comic section, two in colors, instead of a one-page in colors; and an eight-page tabloid magazine section.

Curtis Company Offers Stock

Curtis Publishing Company, through J. A. Sisto & Co., are offering a limited amount of common stock. The stock is not quoted on either the New York or Philadelphia Exchange. There are 900,000 shares of the common outstanding.

Minneapolis Tribune Sets Record

The *Minneapolis Tribune* on Oct. 9 printed the largest week-day newspaper in its history, the edition numbering 52 pages. It contained 271 columns of paid advertising, or 83,326 lines. E. P. Stewart, business manager, informed EDITOR & PUBLISHER there was no advance preparation for this issue. The size was not determined until 9 o'clock on the morning of publication. The papers were on the street at 12:45.

New Engraving Firm in Des Moines

A. P. Rainsburg, head of the engraving department of the *Des Moines Register-Tribune,* and his son, R. R. Rainsburg, have organized the Commercial Engravers Company and leased a 4,000 square foot space in the France building, 506-516 Seventh street. They will open an engraving plant about Nov. 1. The elder Rainsburg has been with the *Register-Tribune* 22 years and his son has been in the same department 14 years.

ASHTABULA Is a Big City

About sixty miles east of Cleveland there is a LIVE-WIRE city—ASHTABULA.
Among other up-to-the-minute industries, Ashtabula boasts a NEWSPAPER that is admired for its clean cut policy.
This newspaper has a wonderful city and county circulation and assures advertisers every reasonable co-operation. If YOU want to reach the people of ASHTABULA there is one SURE WAY of so doing and that is through the columns of

"Buy What You Can Use"

THE WELFARE COMMITTEE of the INTERNATIONAL CIRCULATION MANAGERS ASSOCIATION
Can supply you with competent circulation men of capacity and ability capable to take entire charge of your department or to fill important posts in the department.
Address the Secretary-Treasurer please, Mr. Clarence Eyster, care Star Building, Peoria, Ill.

In Pennsylvania Prosperity Is Permanent

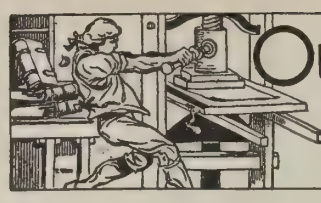
This great commonwealth is an excellent merchandising territory because of its density of population, its diversity of needs, its steadily increasing productivity and its wonderful financial position.

Pennsylvania is a market that is not dominated by a few great cities, and its production is as well balanced as its urban and rural population.

Obviously the consumptive capacity of Pennsylvania must increase to keep pace with its increasing population, wealth and production.

Pennsylvania folks await your message and are scanning the advertising columns of their daily newspapers for it. If distribution of your product is properly arranged to cover this territory, the newspapers are the logical contact between your dealer and the consumer.

The newspapers on this list are successfully carrying merchandising messages to their consumer readers, to the profit of national advertisers. Some of these advertisers are your competitors.



Don't neglect your business in this prosperous territory any longer.

LIBRARY U. OF I. URBANA

Our Own World of Letters

By JAMES MELVIN LEE

WITH the October issue of *The Writer* William H. Hills, a well known newspaper man of Boston, resumes the editorial chair and will direct that publication. An interesting feature of this issue is "The Forum" which gives several answers to the question "Is Newspaper Work Good Training for Writing Fiction?" Typical of the replies is that of Irvin S. Cobb who lists the following six points:

It teaches the beginner promptness.
It teaches the beginner to marshal his facts in their proper sequence.
It gives facility in acquiring local color.
It strengthens the powers of observation.
It is good mental discipline.
It gives facility with the tools of the writing world.

Another feature of this monthly is "Cases in Craftsmanship." Number I is "The Face in the Window"—A story by William Dudley Pelley in which the plot revolves around a newspaper office. The analysis is made by John Gallishaw who was at one time Assistant Dean of Harvard College.

* * *

A PRIZE of $100 is offered by the *New York Times* for the best essay on the practical value of good typography in newspaper advertising. Essays submitted must be not more than one thousand words in length and of course must be typewritten.

All entries should be addressed to The Typographical Essay Contest, The New York Times, 229 West 43 street, New York City, and must be mailed before November 15, 1925.

To supplement this announcement of the prize contest The New York Times has issued a pamphlet "Newspaper Advertising Typography." Those who write house ads for newspapers will find this pamphlet extremely helpful whether they compete for the prize or not.

* * *

CLARENCE S. BRIGHAM in the current "Proceedings of the American Antiquarian Society" continues his "Bibliography of American Newspapers, 1690-1820." Newspapers published between these dates are listed for Rhode Island and South Carolina. Bingham's bibliography includes only newspapers and omits magazines. In making the distinction the test has generally been the inclusion of current news. Neither in the historical sketches nor in the listing of files of the various newspapers is any account taken of papers published after 1820. After the bibliography has been completed in "Proceedings of The American Antiquarian Society" the material will be gathered into a volume with a suitable historical introduction.

FOR years "The Newspaper Worker" by James Philip MacCarthy has been an excellent book to put in the hands of the cub reporter who wanted practical tips on how to cover stories. MacCarthy worked on the *New York Herald* until that newspaper was sold by the Bennett executors. Then he went to the *New York Evening Telegram,* where he was employed until his life story reached "thirty."

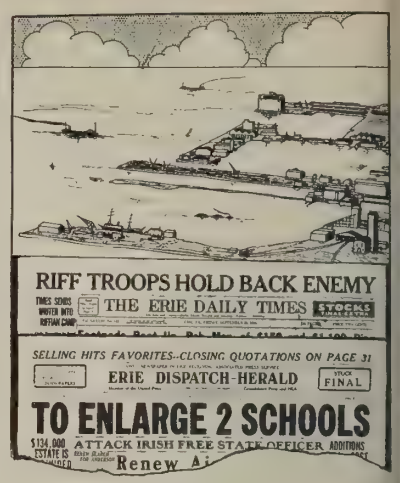
For years his book has been out of print and could be obtained only at second hand stores—and then only occasionally. The demand for the volume induced his friend, L. J. DeBekker, to compile a new edition which has just been brought out by Frank-Maurice, Inc., of New York City.

This edition contains a brief biographical sketch of MacCarthy by Mr. DeBekker and in addition has a treatise on "The Law of Libel" by William M. Wherry, Jr., of the New York bar and former counsel to the *New York Evening Post.* This treatise has been revised up to July 1, 1925. Francis Judson Tietsort, who at one time was the editor of *The Three Em Dash,* official organ of the Newspaper Club of New York—contributes an interesting discussion on "Tabloids and Pictorials."

The new edition is dedicated to Mrs. Jessie Howell MacCarthy with an appropriate note by Mr. DeBekker.

* * *

THOSE who furnish stories for the press for charitable organizations will be well repaid if they glance through "The Use of Case Stories in Newspaper Publicity" by Mary Swain Routzahn. It may be obtained upon application to the Russell Sage Foundation, 130 East 22nd street.



* * *

EDITORIAL writers and cable editors ought to find *Inter-America* a worth while publication. It is issued one month in Spanish and the next month in English. The Spanish numbers consist of articles translated from American newspapers and magazines; the English numbers print translations from South American newspapers published in Spanish and Portuguese. The magazine is issued under the supervision of the Division of Intercourse and Education of the Carnegie Endowment for International Peace, at 407 West 117th street, New York City. The subscription price is $1.50 per annum or eighty cents per annum for either the English or the Spanish numbers.

Erie, Pa. Joins the Rank of Plus Plan Users

WITHOUT any thought of self-praise we honestly believe that the Imperial Plus Metal Plan is approaching the point where it will be standard practice in the modern printing plant.

We reach the above conclusion after totaling the list of newspapers who rely on the Plus Plan and after considering the many cities wherein every paper is a user of the Plus Plan.

The latest Imperial City is Erie, Pennsylvania. The Erie Times and the Erie Dispatch-Herald both believe that it pays to stick to an economical, dependable plan for caring for their metal rather than haphazard methods.

The justification of the Plus Plan lies in a metal that is constantly at par and that works for its shop years after a metal not cared for under the Plus Plan is dead.

The Plus Plan for Profit's Sake

One sure way to increase profits is to decrease shop overhead. The Plus Plan decreases overhead by economically keeping your metal up to scratch and postponing the time when you will need a new supply by many years. Read the Plus Plan and be convinced.

J. O. Young Consultation and Service Company, Chambers Building, Kansas City, Mo. Now handling account of the Barbo Manufacturing Company, Kansas City.

LOOKING BACKWARD

"Reminiscence Copy" Used to Build Good-Will for New York Store

"Reminiscence copy" forms the keynote of a series of institutional advertisements started recently in New York newspapers, designed to build good-will for McCreery's department store.

Illustrations in one-column space show clippings from old newspaper files. One clipping, with a woodcut of old-fashioned bicycle racing, carries the headline "Six Hour Pedal Race Marred by Foul Play." It is dated 1877.

Text beneath states: "As great as the contrast between the sports of 1877 and 1925 is the contrast between the shopping facilities of that time—when the McCreery store was only twenty years old—and the present day."

Another clipping horse-car traffic and the familiar headline "Traffic Conditions Outrageous" is dated 1857 and is brought up to date with the statement:

"Although the traffic problem is still with us, McCreery's can be reached today, even from farthest Bronx or Brooklyn, in less time than the shoppers of 1857 required to get from the Battery to Fourteenth street."

CLUB OPENS SEASON

New York Newspaper Women Plan Weekly Luncheons

The New York Newspaper Women's Club held a housewarming, Oct. 9, at their new apartment. A series of weekly dinners at the Hotel Iroquois for club members was started, and Sunday afternoon teas will be held during the winter for newspaper friends of the club. The date for the annual ball has been tentatively set for March 12.

PRESS AGENT PREDICTS . DOOM OF HIS CRAFT

Joe Carmichael, Publicity Expert for Public Utilities Group, Says Newspapers Are Refusing to Be Imposed Upon in Atlantic City Talk

The doom of the press agent and the end of "free space grabbing" in American newspapers was predicted by Joe Carmichael, director of the Iowa Committee on Public Utility Information, before the convention of the American Gas Association, Atlantic City, N. J., Oct. 14.

"The newspapers are becoming less disposed to be imposed on," he said. "They are differentiating more carefully between what is legitimate news and what is advertising.

"The public utilities being industries which affect vitally the very core of our national economic organization, furnish much matter for news and editorial discussion. But they have come to realize that the burden is on them to explain the fundamentals of their peculiar organization to their customers through the advertising columns of the newspapers, as well as to use this means to increase the sale of their service, their appliances and their securities.

"These committees on public utility information were not organized as some others were to get free space to advertise theatrical or other amusement performances, or to promote the political ambitions of an individual or a party. Nor were they organized to sell more gas or electric or telephone service or to get more people to ride on the street cars.

"They were organized to make the people realize that public co-operation is absolutely necessary if good dependable public utility service is to be given and that without this kind of service the nation cannot advance industrially or socially."

Mr. Carmichael was disinclined to be impressed with the arbitrary "power of the press."

"This arbitrary power is frequently magnified," he claimed. "Newspapers are the vehicles through which the people learn what is transpiring rather than the makers of public opinion. Of course, there are efficient and non-efficient vehicles just as there are varying degrees of merit among gas engineers.

"But the public is not childishly credulous and generally knows how to judge a good newspaper from a poor one. The wise editor, therefore, plays fair with the public. He gives the news and lets the people be the judges."

BUYS BROTHER'S STOCK

L. J. Tarte Now Owns Most Shares in Montreal La Patrie

L. J. Tarte has purchased the shares held by his brother Eugene Tarte in *Montreal La Patrie,* making him owner of practically all the total majority stock, both common and preferred.

Eugene Tarte will remain connected with the newspaper as advertising manager. The two Tarte brothers have been associated for the last 35 years, with Eugene as vice-president.

No other change in the management of La Patrie is contemplated.

FINANCING BY TYPE FIRM

Amercian Type Founders Co. Offers $5,000,000 Bond Issue

The American Type Founders Company, through Lazard Freres and Lehman Brothers, New York brokers, last week offered a new issue of $5,000,000 fifteen-year six per cent sinking fund gold debenture bonds.

Proceeds of the present debenture issue will be used to retire debentures of the American Type Founders Company due May 1, 1926, to pay off floating debt and to supply additional working capital which the growth of the business requires. The bonds will mature in 1940, and provision is made for a sinking fund retiring $250,000 of the debentures yearly from 1926 to 1939 inclusive, under which $3,500,000, or 70 per cent., of the issue will have been redeemed by Oct. 1, 1939.

The comany has no secure funded debt and will agree to make no mortgage of its assets unless these debentures shall share in such security equally with the new indebtedness. The balance sheet of the company as of Aug. 31, 1925, adjusted to give effect to the present financing, shows $20,214,005 net tangible as applicable to the debentures to be standing. Net current assets are equa $12,713,799 and the ratio of current as to current liabilities is 14 to 1.

BETTER REPORTERS WANTED

Columbus Journal Editor Praises A.P. Man in Journalism Talk

"The world hasn't enough good reporters," A. E. McKee, editor of the *Columbus* (O.) *State Journal,* declared in an address before the annual convention of the Journalism Association of Ohio Schools, held here recently. More than 300 attended the gathering.

Mr. McKee's subject was, "Opportunities in Newspaper Work." "The reporter is the most important man on the newspaper," he continued.

He cited the work of L. A. Brophy, of the Columbus bureau of the Associated Press, who received the wire story of the Shenandoah disaster, to illustrate his point.

"This was probably the greatest piece of newspaper reporting in Ohio in the last 25 years," he asserted.

When Brophy telephoned string correspondents and member papers in the vicinity to get them to the scene, none knew of the wreck, not even those within a few miles of where the ship cracked in two, he pointed out.

Mr. Brophy went by automobile to the wreck, later in the morning. After five hours' work there, he sustained a fractured left leg, when an automobile in which he was riding to obtain another angle of the story, upset and turned over on him.

"A good reporter is not content merely to fulfil his assignment," the speaker continued. "He is on the alert for information which his city editor has not asked him to get. That kind of a reporter doesn't have to 'yell' for more salary. He gets it."

Others who spoke at the sessions included Prof. Joseph S. Myers, head of the department of journalism at Ohio State; Lester C. Getzlee, assistant journalism professor in the department, and Ray O. Evans, staff artist of the *Columbus Dispatch.*

DOLLAR $ $ $ $ PULLERS

ONE DOLLAR WILL BE PAID FOR EACH IDEA PUBLISHED

BUSINESS TICKLERS

NOW is the time for a "Prepare for Winter" page. Furnace and coal dealers are a sure tap. Roofing contractors, tinsmiths and painters also contributed considerable space to this feature run in the *Toledo News Bee*.—Clay Smith.

A column entitled "What to Make for Christmas," should appeal to retailers who sell materials from which gifts can be made, such as dry goods, stationery, hardware stores and lumber yards.—Fremont Kutnewsky, Box K-1, Santa Ana, Cal.

Get the wholesalers in your city to put on a special day or week in which they do everything possible to bring out-of-town buyers and customers to the city. To do this would be a good stunt for the wholesalers because in this way they would make more of their customers and prospects acquainted with their places of business. Get considerable quantities of advertising from the wholesalers in putting on the event.—Frank H. Williams, Santa Ana, Cal.

A life insurance agent was sold a contract for three S.C. 4 in. a week ads by suggesting that he use his picture in one corner of the ad. Sometimes he uses the space for his policies, but more often he announces civic events such as: "Concert, Masonic Temple, etc.," or "Catholic Woman's League Lawn Social, etc." After about six months use of this space he has gotten readers to look for his little ad for dates of certain "seldom advertised" events.—Louis DeArmand, Davenport, Ia.

Answers to advertisements are permitted to be phoned in as a feature of the classified columns of the Vancouver (B. C.) Province. Answers as well as ads may be telephoned to this department. This double service in ads is explained as follows to the readers:

"Readers are often interested in classified advertisements in the Province that do not carry the names or addresses of advertisers. These are known as 'blind addresses.' To answer them in the case of most newspapers, involves writing a reply and mailing it or carrying it to the newspaper office. For the accommodation of those readers who find this inconvenient and to serve the advertisers better the 'Want Ad Taker' will take answers to 'blind ads' over the telephone. They will note your interest in the proposition offered, your name, address and telephone number, and see that your message is delivered to the advertiser when he calls for his replies."

C. M. L.

Why not start a mail order section of advertising in your paper under the heading of "Home Shopping List." Play up the idea of buying from home and the goods delivered right to the house.—C. E. Pellissier, Boston, Mass.

The fall is an ideal time to take pictures. Why not play up this fact and run advertisements of camera houses, printing houses, supply houses, etc. Dealers would welcome this opportunity to bring their wares to public attention through such a specialized section.—C. E. Pellissier, Boston, Mass.

INTERTYPE NET $215,570

Third Quarter's Income Equal to 96 Cents on Common Shares

The net income of the Intertype Corporation in the third quarter of the year amounted to $215,570, equivalent, after dividends on the first and second preferred stocks to 96 cents a share on the 199,133 shares of no par value common stock.

The showing compares with earnings of $215,961, or 97 cents a share on the 181,031 shares in the third quarter of the year. Net income in the first nine months totaled $616,650, or $2.75 a share on the common, against $615,239, or $3.04 a share, in the same period of last year.

Change in Sunday Magazine Size

The *St. Paul Sunday Pioneer Press* is now putting out its magazine section in regular magazine form of 16 pages. With it goes a "Junior Magazine" of eight pages.

HUNCHES

ONE DOLLAR WILL BE PAID FOR EACH "HUNCH" PUBLISHED

A SUBSTANTIAL part of the population of every large American city is made up of people of foreign-born or foreign born parentage. In no other institution are the various nationalities brought closer together than in the public school. In Toledo a good feature was worked up on a school which has pupils representing seventeen nationalities and races. Cuts of children representing the various nationalities were run, with a large drawing of the American flag for background.—J. F. More, *Toledo News-Bee*.

A twofold contest started by a Madison newspaper among rural children in order to boost its rural circulation, in which prizes totaling $300 in value were distributed to winners, organized the children of the surrounding territory to: (1) compete with each other in sending in the most news of their school district, its people and institutions; (2) compete in sending in the most clippings from this newspaper published on the contest entrant's community, its church, club, farm clubs, school, and other organizations.—Anonymous.

A "Bureau of Missing Relatives" has been established by the *Seattle* (Wash.) *Star*, which "invites its readers to use this department as an aid in finding missing relatives or friends. * * * Other newspapers are invited to reproduce such items as will interest their readers." In this manner persons missing are reported directly to the newspaper office.—C. M. L.

One of the Indianapolis papers is running college yells on its sport page. This is about a stickful, containing the school yells of various high schools and colleges in the paper's territory.—J. A. Abey.

A Boston newspaper has just finished an interesting series on the experiences of a young woman seeking work in the city. "Sob-sister" stuff, of course, but was well done, and restrained.—C. W. Whittemore.

Determined to awaken its readers interest in a solution of the Indianapolis traffic problem, the *Indianapolis Times* for several days played up 8 columns at the top of page 1 suggestions made by readers submitted for a $50 prize for the best answer to the question: "How would you solve the traffic problem in Indianapolis so as to reduce the number of fatalities and other accidents?"—Robert L. Beard, *News-Sentinel*, Fort Wayne, Ind.

Are married men the flirts that they are supposed to be? Ask the waitresses in the various restaurants around town and see what they have to say. If anyone can tell the truth a waitress should be able to because it seems that men begin to flirt the minute they get into a restaurant especially if the waitress is a bit good looking. Might not be possible to mention names but there is a wealth of good feature copy here if it is worked up in the right way.—R. R. V., Miami, Fla.

Have you a night watchman in your town who makes the rounds of stores to investigate locked doors? How far does he walk in a year? What kind of people does he see about the streets at night? Are people careless about locking their doors? What is the most lonesome and fearsome spot in the town at night?—Earl Potter, Lawrence, Kan.

CREATORS OF LOCAL DISPLAY FROM A NEW SOURCE

Our Business Review and many other feature pages now running in more than 80 leading American and Canadian newspapers. Write or wire for our representative.

NEWS OF THE STORE IN

NEW ENGLAND

CREATES CONSUMER DEMAND

The advertising announcement of the local merchant is news of the store—spot local news — and must be conveyed to the consumer through his local newspaper.

Consumer demand for nationally distributed commodities must be created through the same medium.

National advertising in the newspapers receives the careful attention of the dealer who, to properly serve his clientele, must be prepared beforehand to meet the demand that the advertising creates.

The retailer of your commodity is catering to the wants of his locality by "stocking up" on the merchandise for which there is the most popular demand.

The use of newspapers for National advertising is ideal, for this very reason.

Have you surveyed the great territory of New England?

We have persistently, through advertisements in EDITOR & PUBLISHER, given you the vital facts.

You can get detailed information of the entire market from EDITOR & PUBLISHER on request; or any of the newspapers listed below will supply you with the necessary marketing and territorial information of their trading area.

Consumer demand is great in New England and these newspapers completely cover the six states.

NATIONAL ADVERTISING

For the first nine months of 1925, The New York Sun published over half a million lines of National Advertising more than the next New York evening newspaper—practically as much as the third and fourth New York evening newspapers combined.

For the first nine months of 1925, compared with the corresponding months of last year, The Sun showed a gain in National Advertising of almost half a million lines—a greater gain than the gains of the next four New York evening newspapers combined.

All advertisements published in The New York Sun are subject to censorship. The Sun will not knowingly print any advertisement of a doubtful, questionable or misleading character.

Popular!

The most talked of comic strip in America today is Little Orphan Annie. New York and Chicago have gathered Little Annie to their hearts and many a breakfast has been hurried to insure the reading of this strip.

A few territories can still be scooped by acquiring Little Orphan Annie. Wire for rates and proofs.

A phenomenal growth!

THE above chart was clipped from the October 10th issue of EDITOR AND PUBLISHER. It shows in vivid fashion circulation fluctuations of New York newspapers for the past six years. Conpicuous indeed is the remarkable growth of The News of New York; entering an already crowded field of newspapers and climbing swiftly in circulation until in record time it occupied first place. How did it happen?

Not by any publishing miracle but by established policies that have placed The Chicago Tribune first in morning daily circulation in America. The New York News uses *only* Chicago Tribune features. The New York News has the largest circulation of any newspaper in the United States.

The Chicago Tribune uses only Tribune features. The Chicago Tribune is the largest revenue producer of any newspaper in the world. Is it a coincidence?

These same features, comics and stories that mean leadership for The New York News and The Chicago Tribune can mean as much to other newspapers. *Buy leadership* in your territory!

Wire for rates and proofs.

THE WORLD'S GREATEST NEWSPAPER FEATURE SERVICE

Still GAINING *In Circulation!*

The New York Herald Tribune continues its remarkable growth without the aid of canvassers, premiums, clubbing offers, circulation contests, or other artificial methods of any character.

The Herald Tribune was the only New York morning newspaper of standard size to gain circulation during the six months ending September 30th, 1925, over the corresponding period of a year ago.

The New York Herald Tribune net paid average circulation increased 10,631 during the six months ending September 30th, 1925. *All the other New York morning newspapers of standard size LOST!*

In quantity of circulation, in quality of circulation, in concentration of its quantity of quality circulation—the New York Herald Tribune is the logical keystone for a successful advertising campaign in the World's Greatest Market.

The Herald Tribune is gaining readers because it contains *all* that a newspaper should contain in ideally balanced proportions. All the news well written and well edited *plus* just enough news features, just enough cartoons, just enough humor, just enough pictures to make it likeable, human, *complete.*

Selling Musical Goods IN PHILADELPHIA

"The City of Homes"

Philadelphia, having the third largest population in the United States, is an important market for the maker of musical goods and instruments.

With over three million people living in more than 520,000 separate dwellings in Philadelphia, Camden and their suburbs, it offers particularly attractive possibilities for the sale of things that make for home entertainment.

Philadelphia has had a very prosperous year, and the holiday trade in musical instruments and supplies will be large.

Every family, particularly those with children, is fertile soil for planting a love of music, and this can best be done in a locality such as Philadelphia where the home life is conducive to musical entertainment.

Send for a free copy of THE BULLETIN ROUTE LIST OF DEALERS IN MUSICAL INSTRUMENTS, etc., in Philadelphia and Camden. It will be of great help to your salesmen when calling on the Musical Trade.

DOMINATE PHILADELPHIA

Create maximum impression at one cost by concentrating in the newspaper "nearly everybody" reads—

The Evening Bulletin.

PHILADELPHIA'S NEWSPAPER

"In Philadelphia nearly everybody reads The Bulletin"

Mayor As Guest Editor of Pioneer Press Extols the Virtues of St. Paul

Crime News, Which He Deprecates, Fills Only Two Columns—Many Feature Stories and Pictures of Progress in City—Prohibition Editorial Contrary to Paper's Policy

By ARTHUR ROBB

THE *St. Paul Dispatch and Pioneer Press* as a general thing finds the official activities of Mayor Arthur E. Nelson of St. Paul worthy of favorable mention and frequently of commendation.

Also, if not likewise, Mayor Nelson thinks the Dispatch and the Pioneer Press deserve rank among the most competently edited newspapers in the country. But—the Mayor thought—both of these excellent newspapers followed too faithfully the theory that publicity for crime was a deterrent to crime; that in their zeal in exposing criminal affairs and activities, they overlooked opportunities to play the

Mayor Arthur E. Nelson at Pioneer Press Editor's Desk

happier melodies in the scale of St. Paul life. So did most other newspapers in other cities, in the Mayor's opinion.

The editor of the newspapers, H. R. Galt, and the publisher, C. K. Blandin, smiled. It was to appear later that they did not agree this time with the Mayor, either as to statement of facts or as to opinion. The editorial reply took the form of an invitation to His Honor to take complete charge of the Sunday Pioneer Press on Oct. 18. Mr. Nelson accepted, the news was published, the Mayor began assembling the big paper and his name appeared as "Guest Editor for the Day" in the editorial page masthead last Sunday. The Mayor presented "An Acknowledgment and an Apology" in a signed front-page editorial box, whose text, epitomizing his philosophy, follows:

"On invitation from the publisher and editor of the Pioneer Press and Dispatch, two of the greatest newspapers of this country, I have undertaken to edit this issue. I realize that a newspaper is among the most important institutions in any community, and I am free to confess that editing one of them is about the hardest thing I have ever tried to do.

"A sincere effort has been made to present news of a constructive nature. News of crime and kindred subjects is presented, but not magnified. In place of large headlines on the front page displaying the criminal news of the day, such news will be found segregated on another page.

"As a reader of metropolitan newspapers, I have been impressed with the fact that so many of them apparently believe that the public is more interested in news of crime and immortality than in that of a constructive nature. Stories of crime of every conceivable sort are displayed, in the minutest detail, on the front page.

"I do not agree with the opinion that publicity is a check to crime. It is true that the public should be advised of the existence of crime, but it is not necessary in doing so to present stories, which, in their gruesome details, are disgusting to the average reader. Nor is it necessary in presenting reports of crime to exploit the bravado of criminals, as is frequently done. The most recent example is that of Gerald Chapman, the story of whose life has been told in a manner which might lead the undeveloped mine of youth to believe that emulating his example would be romantic and interesting and not entirely objectionable. I sincerely believe that criminals are often led into the commission of crime through ideas obtained in press reports, and that many times new daring is inspired from similar sources.

"In presenting so much of this kind of news, it has seemed to me that newspapers fall into the ways of the 'Community Gossip.' It is out of this classification that I have attempted to remove the present issue.

"I have sought the best for this edition. Great care has been exercised in selecting stories to be published. I have endeavored to have the highest ideals reflected throughout all sections of the paper, believing that the public is inherently more interested, for instance, in a movie star who rises to success over great obstacles than in his or her domestic difficulties or moral lapses.

"On the editorial page I have taken the liberty to present my views on matters of current and vital interest. There has been added a page devoted to religious subjects.

"Able writers and artists have aided materially in getting out this paper, and to each one of them I wish to convey my sincere appreciation.

"To the publisher and editor, I am deeply grateful for the rare opportunity they have afforded me in this enterprise.

"The responsibility for this issue, with the exception of the advertising, lies with me, and I accept it. I sincerely trust it will prove of interest and value to the readers who will, I hope, overlook the shortcomings of one not skilled in the work."

The Pioneer Press on Monday had a long and scholarly comment by the editor on the Mayor's edition. It is of the highest interest to the profession, but not more so than a brief outline of what the Mayor held to be vital and current interest.

Page 1, reproduced on this page, speaks for itself to those who are able to read the reduced head-line type. Not a whisper of crime, and only one accident was featured. The edition which reached EDITOR & PUBLISHER evidently closed before midnight Saturday, for the burning of the S. S. *Comanche* is noted only to the extent of an A. P. bulletin. In this connection, it might be noted that the paper is magnificently free of typographical errors, by which many first editions can be distinguished.

"Big Features" were summarized on Page 1 by the Guest Editor as follows:

A group of signed statements by Governors of nearby States on business conditions in the Northwest.

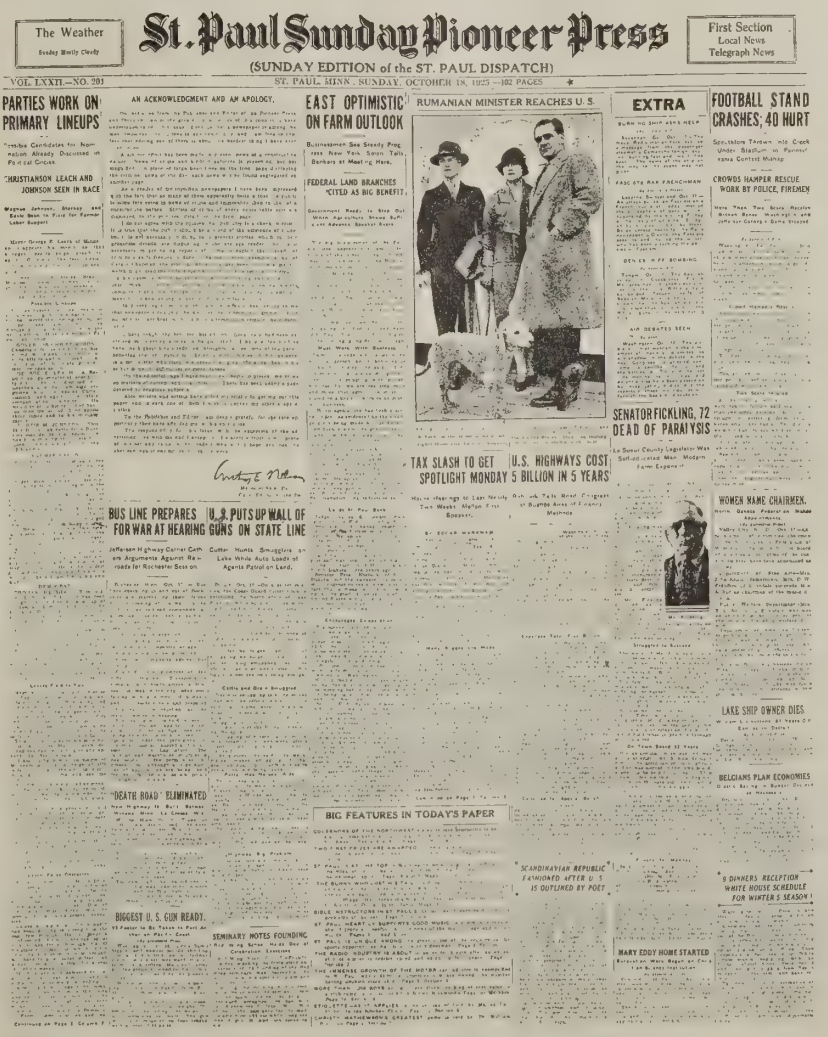
Two prizes awarded in the Cartoon Title Contest.

Activities of the St. Paul colony in Washington social and official circles.

Children's features in the Junior Magazine.

Bible Instructors in St. Paul institutions of learning discuss the problems of the day.

St. Paul heartily supports good music; a community theater should prove successful. Music, stage and screen news.



St. Paul is unique among the great cities of the country in the sports opportunities that lie at its very doorway.

The radio industry is about to pause for breath after an expansion of almost incredible speed and extent in four years.

The immense growth of the motor car industry is exemplified in St. Paul, where 61,000 automobiles now are owned, the number having doubled since 1920.

More than 1,200 boys and girls are

Front page news selected by the Guest Editor gives no prominence to crime and violence. Appeal to local, state and national pride and to the higher levels of human thought was Mayor Nelson's aim.

given teaching of real value in a club camp—a feature of the page for mothers.

Etiquette—as it applies to the serving of food.

Christy Mathewsons' greatest game is told by Dr. William Brady.

Such is the formula of Mayor Nelson, who apparently finds little of value or interest in repeating the destructive escapades of Princess Takemoff in her contacts with the crowned heads of the world; or of the giant flea, which clears Lake Superior in a leap and proceeds to demolish the Woolworth Building within the next hour; or of speculative discoveries in Maya ruins or the Tuscarora Deep. None of these for his magazine sections!

Crime is allotted less than two columns, including a boxed announcement of the Mayor's news policy, on Page 6, First Section. The Mayor declares that "as a newspaper reader I have felt that news of crime is frequently published on the theory that 'the more disgusting the crime, the more remarkable the criminal.' To this method of publishing news I take exception." The crime news includes four stories, chief of which is a history of the by-gone glories of a famous old and abandoned house selected by a degenerate for a revolting murder. Flanking it is the police promise of early arrest for a pair of bank bandits. A hold-up of a Muscatine (Ia.) grocery store, whose proprietor was severely wounded, was detailed in seven lines. The approaching trial of a South Dakota murderer received a stick and a half, with a brief summary of the killer's confession.

Page 2, in addition to taking to break-overs from the front page, features three children, triplets, who find eating ice-cream cones the best fun of all. The annual report of the American Red Cross, as summarized by the Associated Press, takes the lead position over a box-head story of an aid fund for destitute families of Ft. Leavenworth prisoners, and the election of officers by South Dakota Methodist laymen.

The focus of attention on Page 3 is a picture of Mr. Galt, published by the Guest Editor over the regular incumbent's "hysterical objections" and accompanied by the few facts that the Guest Editor knew concerning the chief of the Pioneer Press. Other stories concerned prison work and "Father-Son Week," also a brief about the Rockefeller family reunion at Pocantico Hills, and a Copenhagen dispatch on a Danish expedition to Greenland.

Page 4 featured the coming Masonic reception to members of a Duluth lodge, the latter furnishing eight half-column cuts as illustration. The gathering of Minnesota creamery men was noted to the extent of 800 words, or more than twice the space apportioned to the City Council's approaching consideration of a local street-car controversy. "Iowa Farmers Organize" and "Hospital Site to Be Inspected" headed two short items of self-evident import.

News on the opposite page concerned almost entirely the coming community chest drive by the American Legion and other bodies. Legion division captains got their pictures printed.

Page 6, as noted, was the crime area, and Page 7 told of the improvement of local juvenile delinquency conditions. A meeting of tax-payers to be held within a few days took 300 words, followed by 200 words on a future meeting of Montana wool-growers.

Page 8 noted the efforts of Red River Valley livestock men to improve the financing of their association's show property. The press dispatch on increase in Wisconsin taxable property values received the largest space. Also important were the plans of Northwestern Minnesota business and professional men to develop the "Arrowhead" district. Smaller items concerned several miscellaneous interests.

Page 9 was all advertising.

Page 10 featured three stories—Constitution Week; Missionaries From China on Visit; Library for Blind Termed Expensive—9,000 Volumes in Faribault School Said to Be Valued at $40,000. Many small items of regional appeal filled the page.

Page 11 was likewise a page of wide range. North Dakota's action on grade crossings, a new canning factory for Rochester, and an A. P. pre-campaign summary of South Dakota politics led the page. An increase in the number of Wisconsin farms received attention, as did a Knights of Columbus meeting schedule and the 1926 convention plans of Hibbing Legionnaires and the fact that Bismarck, N. D., took its name from the German Chancellor. The delver for scandal caught the words "petting parties" just north of the page's equator and took heart, only to learn that the Mankato police intended to prevent them next year.

"Hotaling Predicts 1926 Tourist Boom" leads Page 12. Then an excellent halftone likeness of a well-known actress who is to appear shortly under the auspices of the St. Paul Institute. Next (and this appears to belong on Page 6) "2,000 Gallons Wine Taken—Sacramental Drink Seized at Licensed Maker's Store," a three-line head over a 300-word story of an ordinary liquor raid. Outstanding on the page, though the Mayor had no part in making it so, is an illustration of the Golden Rule Store's advertisement of a hosiery sale.

The second section, devoted to drama, movies, music, the outing page, and radio, is attractively and interestingly assembled, the feature articles being those advertised in the Mayor's list of "Big Features" quoted above. The printing of half-tones in this section and throughout the paper is well above the average newspaper achievement. The largest half-tone is that of Oscar Baum, conductor of a local theater orchestra, who recently composed the music for a song entitled "Classified," the words for which were furnished by L. C. Hodgson ("Larry-Ho," bard of St. Paul and a former Mayor). The Pioneer Press, for whom the song was composed, is giving 20,000 capies to the public attending the theater where Mr. Baum performs. Radio news is edited deftly and with an interesting local touch in three pages.

The third section, which included the editorial page, builders' page and automotive page, had several characteristic features. The lead story compared the gasoline tax of Minnesota and its results and administrative cost with the statistics of several other States, the conclusion being highly pleasing to Minnesotans. Adjacent thereto is a blithe story by Miss Frances Boardman of her visit to the new Ford assembly plant. Another comparative story followed, showing that St. Paul's tax rate is lower than that of Minneapolis. Regulation of the smoke nuisance gets a 500-word news story, the prospects of wealth in idle Minnesota peat lands takes half as much more, the impending annual tests of automobile brakes gets 500 words, and the same wordage is shared by a new journalistic fraternity at a local college and the organization of the Christmas Seal campaign. Dominant on the page is a cartoon and story "A Dream Come True"—the growth to magnificence of St. Paul since its foundation in 1838.

Page 2 gave the local Bible instructors their opportunity to comment on current problems, a lofty viewpoint being characteristic.

School news and related educational topics took Page 3.

The editorial page was distinctly the Guest Editor's own. The leader in double-column space discussed "The City of Today," from the viewpoint of an able and enlightened municipal executive. He opened by quoting Bryce as to the failure of city government, continued by citing modern administrative procedure and its results, and concluded that "Our city governments no longer are failures." An appreciation of the administrative ability of the average American housewife takes a lengthy paragraph, followed by an editorial which deprecates membership of school teachers in the American Federation of Labor; another editorial which intelligently discusses the prohibition enforcement situation and sees a remedy for existing evils in "a vigorous campaign of public education—and less propaganda." Conservation of Minnesota's resources is urged in another editorial. A full column points out the need of an economic program for the Northwest, if that region is not to fall as a tributary agricultural province under the thumb of Eastern industrialism and subservient to it. Adherence to the World Court receives approbation in the last editorial.

Mencken, Simonds, and Lardner are three well-known writers for the Sunday press who grace the opposite page.

The builders' pages feature two plans for small homes, the stories being surrounded by abundant home-makers' advertising.

The motor page, as indicated, demonstrates the tremendous local growth of the industry.

The first eight-column streamer head so far noted appears at the top of the financial page—warning that "Artificial Trading Booms Stocks to Danger Point." The Consolidated Press Association dispatch bears out the caution. Other financial news is largely routine, with the exception of a four-column picture of the St. Paul engine shops which have been built in four months on a nearby swamp.

A page advertisement, presumably no concern of the Mayor's, but prepared by the newspaper's copy-promotion department, sets forth St. Paul as a city of good schools and colleges. It is attractive copy.

Sports are handled apparently by the regular staff of experts.

Society news and its adjuncts, features for women and club news, are edited with an expert's touch and carry a multitude of excellently printed half-tones. The section, however, does not differ greatly from those of a dozen first class newspapers throughout the country. It is a creditable job every week, whether the editor is the regular boss or an honored guest. The same is true of the eight-page comic section.

Featured in the gravure section is the new bridge across the Mississippi, which the Mayor described as "a structure in harmony with the surroundings, architectural frills being subordinated to the beauty of strength and simplicity." The pictures filled a page. Another page portrayed the results of the newspaper's weekly amateur photograph contest. The next graphically showed the good to be accomplished by a full Community Chest.

New school buildings erected or under construction by the city filled the double center, showing the tangible results of St. Paul's $8,000,000 appropriation. Several views of the city's new water supply station appear on another page. The back page pictures the rise of a new bridge, the excavation for a new belt-line sewer, a big paving job, a view of Corinne Griffith in the new film of a newspaper shop entitled "Classified." Representative Davey and his tree-saving campaign are noted in a one-column picture at the bottom of the page.

The "Junior Magazine" is nicely done, but does not show any of the Mayor's fingerprints, which last cannot be said of the Magazine Section.

The opening magazine story tells how S.t Paul's Bureau of Municipal Research saves dollars for tax-payers. The next is a straight Sunday feature of ghostly events in a New Mexican church.

Pages four and five are devoted to utterances of the Governors of Northwestern States on the region's present and future well-being. The next is a local cartoon title contest and the next is a page of syndicated features. The double center tells of St. Paul's fame and fortune in Washington. Children's pets among the barnyard animals and the annual junior livestock show take a page in colors. Then comes an interview with a Minnesota student just returned from a hiking and auto-bumming trip East, where he found a high appreciation of St. Paul and its citizenry. A syndicated serial fills the next two pages, followed by a syndicated story of the happy married life of the Italian royal family. A page of local humor and an interview with Dr. John Hyatt Brewer on jazz music complete the section.

After turning all the pages of the Guest Editor's edition, it may be said that he deserved the compliments showered upon him by the Dispatch and Pioneer Press staff. His paper was interesting throughout, but it did not differ greatly in fundamentals from the menu ordinarily offered by the regular editorial staff. One wonders, however, whether the Mayor suppressed the day's police budget, or whether the criminals took a holiday in honor of the occasion. One bootlegging arrest appears to have been the only noteworthy activity of the local law-enforcement agencies during the preceding 24 hours. The other crime stories are of prior origin or of events in other localities. The prevalence of news regarding the city's government is also noteworthy, probably praiseworthy.

All in all the Mayor did a good job on his one day's tenure. Probably Mr. Galt or Mr. Blandin would have done as well in a carefully arranged day as chief executive at the city hall. The Mayor's newspaper came on a day when the wires bore no pulsing tale of crime or disaster, when the local police apparently had no more trouble on their minds than the pursuit of two youthful bank bandits. Whether he would have done so good a job over the period of a week or month, or years, as Mr. Galt and his fellow editors have to do it every day and Sunday, is a question still unanswered. The business of editing a newspaper and forming its policies is not one of minutes or days, but of years and decades.

The Pioneer Press "staged a comeback" the next day in which it informed its guest editor of several instances in which it believed him in error. The editorial, which deserves the careful reading of all newspaper men, follows in substance:

Yesterday's edition of the St. Paul Sunday Pioneer Press which, as our readers are aware, was produced under the editorial direction of Mayor Arthur E. Nelson of St. Paul was, we think, a very creditable performance. Without the slightest previous newspaper experience Mr. Nelson assumed command of the far-flung and enormously complicated editorial organization of these newspapers and succeeded in publishing an edition which represented a clear-cut and definite newspaper purpose. This was a real achievement. It is not so difficult as it may seem, in this day of the telephone, the telegraph, the radio, the airplane, the linotype machine and the perfecting press, to gather and print the news of the world; but it is, as every editor knows, exceedingly difficult to present it all from a well-defined point of view. That Mr. Nelson succeeded in this is the highest possible testimonial to his ability as an executive.

"As a reader of metropolitan newspapers," said our distinguished guest in his front-page announcement, "I have been impressed with the fact that . . . stories of crime of every conceivable sort are displayed in the minutest detail on the front page."

What metropolitan newspapers, we wonder? Roger William Riis, a year or so ago, had a similar impression, and undertook to ascertain whether it was correct. He applied the footrule

(*Continued on page 24*)

CORRECTION

Through an error made in filling out a questionnaire forwarded to EDITOR & PUBLISHER for its issue of October 3, we were led into a misstatement regarding the total Sunday linage of the *Detroit Free Press* for the period January 1-June 30, 1925. The linage should have been 3,390,576, instead of 5,393,446 as stated. EDITOR & PUBLISHER was also misled in the same issue as regards the average number of pages composing the Detroit Sunday papers in a 1924-25 comparison. The correct figures are:

	News	*Free Press*	*Times*
1925....	128.	113.6	72.
1924....	109.2	99.6	80.4
	Increase	Increase	Decrease
	18.8	14.	8.4

Our apologies to our readers.

A. B. C. BANS HALF-PRICE COMBINATION SALE

Two Papers Sold Together Must Bring a Price Higher Than Either, New Rule Adopted After Sharp Argument States—Move to Abolish Publishers' Statements Voted Down—Harn Reelected

By WARREN BASSETT

SETTLEMENT in principle of a two-year fight over combination circulation of two newspapers at 50 per cent of the price of both, and rejection of the proposal to abolish publishers' statements—these were the outstanding accomplishments of the annual convention of the Audit Bureau of Circulations which closed its two-day meeting in Chicago, Friday, Oct. 16.

Drawing an attendance of 900 publishers, advertisers and agency executives the meeting was voted the greatest and most successful in the history of the organization.

O. C. Harn of the National Lead Company, New York, was re-elected president at a meeting of the new board of directors held directly after the convention adjourned. John Murray Gibbon, Canadian Pacific Railway Company, Montreal, member of the board of directors was elected vice-president. E. I. Mitchell, of the Mitchell-Faust Advertising Company, Chicago, was re-elected second vice-president; F. R. Davis, General Electric Company, Schenectady, N. Y., third vice-president; W. A. Strong, *Chicago Daily News,* secretary; E. R. Shaw, *Power Plant Engineering,* Chicago, treasurer. Stanley Clague was re-appointed managing director.

Looming above all other subjects discussed and acted upon at the various divisional meetings and characterized by Stanley Clague as the most important topic to come before the A. B. C. in years, was the question of combination circulation considered Thursday afternoon in the Newspaper Divisional meeting. For more than an hour lively debate swirled about this topic. Prominent publishers from all parts of the country joined in the discussion, which swept to a climax Friday afternoon in the general convention.

The following resolution on the question was adopted by the convention:

"Resolved, that where two daily or Sunday newspapers are distributed together, if the circulation of each is to be certified as paid, the price charged for the combination shall be greater than the price at which either may be purchased separately."

Since the sentiment of the convention as shown in the resolution was opposed to the present A. B. C. rule crediting as paid circulation copies of two newspapers sold for fifty per cent of the price of both, it appears certain that a new rule will be promulgated by the Board of Directors in the near future regulating this practice.

The question was brought to the convention for a "show down" by Harlan G. Palmer, publisher of the *Hollywood* (Cal.) *Citizen,* who for the past two years has been agitating against the present Bureau rule.

The text of the argument on this subject taking place in the Newspaper Divisional meeting Thursday afternoon and in the general session Friday appears elsewhere in this issue.

Two new directors were elected to the Board, W. S. Ashby of the Westclox Company, La Salle, Ill., and P. L. Thomson, Western Electric Company, New York, both from the Advertisers Division. Mr. Ashby succeeds E. E. Taylor, Postum Cereal Company, Inc., New York, while Mr. Thomson succeeds Ralph Starr Butler, United States Rubber Company, New York, resigned.

The following directors whose terms expired were reelected: Advertisers Division: F. R. Davis, General Electric Company, Schenectady, N. Y.; F. H. Bramble, American Chicle Company, Long Island City, N. Y.; L. B. Jones, Eastman Kodak Company, Rochester, N. Y.; W. K. Towers, Paige-Detroit Motor Car Company, Detroit; W. W. Wheeler, Pompeian Manufacturing Company, Cleveland.

Advertising Agents: Walter Hine, Frank Seaman, Inc., New York.

Newspapers: Walter A. Strong, *Chicago Daily News.*

Magazines: S. R. Latshaw, Butterick Publishing Company, New York.

Farm Papers: B. Kirk Rankin, *Southern Agriculturist,* Nashville, Tenn.

Business Publications: E. R. Shaw, *Power Plant Engineering,* Chicago.

The question of abolition of publishers' statements, which was expected to create lively discussion, was methodically voted down in each of the divisional meetings. Only perfunctory interest was shown. Each division passed a resolution recommending no change in the Bureau's present policy. The suggestion of a change came from a body of publishers in the Business Paper Division. The suggestion of a newspaper member of the A. B. C. that statements be issued quarterly instead of semi-annually was swept aside automatically with the resolution recommending no change in the established policy.

The difference of opinion between the Audit Bureau and the New York publishers (with the exception of the *Brooklyn Standard Union* and the *New York Times*) in regard to making all newspaper records available for inspection during an audit which was settled by special agreement in New York last March, did not crop up as an issue at the convention.

The agreement reached in March was that "when an A. B. C. auditor states to a publisher that real or seeming irregularities in the circulation accounts require the examination of records, ledgers or payrolls, outside the circulation records and related accounts upon the presentation of such statement by the auditor, any record, specifically designated in writing by him as necessary for his intelligent investigation of circulation, shall be provided."

Four of the five members of the New York Publishers Committee which negotiated this agreement were present at the convention. They were Edwin G. Martin, *Broklyn Eagle,* Howard Davis, *Herald Tribune,* James C. Dayton, *Evening Journal,* and Fred A. Walker, Munsey publications. J. F. Bresnahan, of the *World,* chairman, was unable to attend.

The Newspaper Division Committee assured the New York Group that the agreement as made last March continues intact.

The entire convention as a special mark of respect to Victor Fremont Lawson, late publisher of the *Chicago Daily News,* by a rising vote unanimously adopted the resolution eulogizing his career passed by the board of directors in September.

The report of the Treasurer, E. R. Shaw, indicated that the Bureau's finances were on a strong, sound basis.

Mr. Shaw stated that receipts for the year had been $5,882.22 over disbursements, that the Bureau has $74,000 invested in U. S. Government bonds and notes and $26,000 in Canadian Government bonds, a total of $100,000.

The amount of cash on hand was listed as $71,881.05, and accounts receivable $25,782.58.

The Bureau received from all sources during the year $500,585.04, and disbursed $428,703.99.

The treasurer's report was audited by Arthur Young & Co., certified public accountants.

Following the six divisional meetings Thursday afternon the general convention was called to order by President O. C. Harn, Friday at 10 a. m.

Managing Director Stanley Clague read his report, which was carried extensively in last week's EDITOR & PUBLISHER. He said that the Bureau had released in the past 12 months 1,401 audits, or an average of 117 audits per month.

No organization has a greater right or duty to pursue education against waste than the Audit Bureau of Circulations, President Harn declared in his annual address. Ignorance produces waste, he said. Facts combat ignorance, and the A. B. C.'s entire aim is to get at the facts. He endorsed Secretary of Commerce Herbert Hoover's campaign against industrial waste and pledged the support of A. B. C. members in the movement.

J. A. Wedda of the *Detroit Polish Record* spoke in behalf of foreign language publishers following Mr. Harn's address. He stressed the loyalty and Americanism of the readers of the foreign language press.

Reports of the Divisional Committees were then received.

W. K. Towers, secretary of the Advertisers Division reported that "on motion duly seconded it was resolved that the Division recommend that there be no change in the Bureau's present policy in regard to issuance of semi-annual publishers' statements.

"That the Division recommend to the Board of Directors that they authorize the Managing Director to engage one or more representatives on a commission basis to sell the Audit Bureau of Circulations to advertisers and solicit advertiser members.

"That it be recommended to the Board that Scientific Space Selection be republished and that a copy be supplied to each member who has joined the Bureau since the original distribution and that hereafter each new member be supplied with a copy

"That it be recommended to the Board that provision be made for a systematic promotion and advertising campaign for the purpose of placing the merits of the Audit Bureau of Circulations before prospective and present members and that a budget be provided for this based on a fixed percentage of the gross income."

The resolutions went to the resolution committee.

Ernest I. Mitchell reporting for the Advertising Agents Division stated that a motion had been passed requesting the Bureau to continue to do everything within its power to differentiate A. B. C. and non-A. B. C. publications, circulations and statements in directories. The division voted to appoint a committee to cooperate with the Bureau in the obtaining of more agency members.

Three resolutions were presented by the Newspaper Division, The first was that discussed above regarding combination circulation. The second was "Resolved, that in clubbing offers the amount received or total subscriptions turned in shall equal at least one-half of the advertised subscription rate for the total number of subscriptions."

Four hundred and nine members attended the newspaper divisional session.

The Magazine Division through Director F. W. Stone, *American Review of Reviews,* reported a large attendance. No resolutions were reported. The Board was requested to continue its present practice in regard to publishers' statements.

Director Marco Morrow, of the Capper Farm Press, Topeka, Kan., reported for the Farm Paper Division. The divisional committee, H. C. Klein, James Irvine, P. P. Mitchell, W. G. Campbell, and W. C. Allen, was reelected.

The Business Papers Division requested the A. B. C. Board of Directors to make occupational analysis uniform in the different trades, and to make it mandatory in each trade.

Director J. Murray Gibbon reported on the divisional meeting of the Canadian members. The only business was the election of an advisory board for the division as follows: Advertisers, J. M. Gibbon; Agent, William Findlay, Newspapers, Frank Burd, E. H. Macklin, G. E. Scroggie, J. R. Henderson, T. J. Drumme; Magazine, H. V. Tyrrell; Farm Papers, T. J. Tobin; Business Publishers, Acton Burrows, M. McKnight.

The meeting then adjourned until 2 p. m.

The afternoon session opened with the report of the resolutions committee pre-

NEWSPAPERS LEAD IN A. B. C. MEMBERSHIP AND FINANCIAL REPORT

DAILY and weekly newspapers, with a membership of 910, lead the various divisions making up the Audit Bureau of Circulation, the annual report of Stanley Clague, managing director, made at the Chicago convention last week shows. There are 884 U. S. and Canadian daily members of the A. B. C. and 26 weekly members.

Newspapers also lead in the amount of money paid for dues, the report shows, receipts from this division totalling $159,334.76 from dailies and $1,976 from weeklies, or $161,310.76 of a grand total of $316,275.50 paid by all divisions.

The membership report to Oct. 6, 1925, follows:

	U. S. Members	Canada Members	Total Members	Total Annual Dues
Advertisers:				
General	44	12	56	$ 10,800.00
Associate	65	3	68	4,080.00
Local	111	46	157	1,015.00
Total	220	61	281	$ 15,895.00
Advertising Agents:				
General	91	....	91	$ 32,760.00
Associate	74	15	89	8,842.50
Total	165	15	180	$ 41,602.50
Publishers:				
Newspapers	813	71	884	$159,334.76

Business Publications	205	25	230	20,222.80
Total	1,250	137	1,387	$258,778.00
Total Membership	1,635	213	1,848	$316,275.50

BRILLIANT BANQUET ENDS A. B. C.'S GREATEST CONVENTION

More than 1,000 A. B. C. members and their ladies attended La Salle Hotel Dinner on Friday evening.

sented by George M. Burbach, business manager of the *St. Louis Post-Dispatch.*

The first resolution read was that from the Newspaper Division stating that when two papers are sold in combination the price must be higher than either.

The ensuing spirited debate which ended in the adoption of the resolution by the convention is reported in detail in this issue of EDITOR & PUBLISHER. (See page 7.)

Resolutions were then passed expressing appreciation of the work of the Board of Directors and of Managing Director Clague and his staff. Directors were elected and the meeting adjourned.

The creation of a department of commercial areonautics under the Department of Commerce was urged by Postmaster-General Harry S. New, who was the first speaker at the annual banquet at the La Salle Friday night which closed A. B. C. week activities. He based his talk on the development of the air-mail service, giving a history of its growth since the world war.

"There is a great deal of work for such a department to do," he declared. "Pilots and aircraft should be inspected, there should be many more lighted airways for commercial planes and there should be allowances for experimentation.

"The development of the air mail has helped to counteract the almost fatal death blow that the government dealt the airplane factories when it canceled all contracts after the war. European countries subsidized their air lines, but we have followed no such practice. The postoffice department, by its air mail service, hoped to establish a useful public service and to demonstrate to private capital the possibilities of areonautics.

"New air lines are continually being installed. The effort has always been to have private capital eventually take over the lines. We have been opening bids on new routes rapidly. Bids of four new routes—from Chicago to Denver. Chicago to Detroit, Detroit to Cleveland and from Chicago to New Orleans—will be opened on November 21. On December 8 two bids will be opened, Chicago to Birmingham and Chicago to Minneapolis and St. Paul.

"With the total expenditure of only $12,000,000 the postoffice department has not only created a reliable air mail service, but has demonstrated the possibilities of commercial air transportation, which can be turned into fighting equipment should the need come."

The value of co-operation in such organizations as the A. B. C. was stressed by Former Governor Frank D. Lowden, who was the second speaker. He praised the organization as a strong influence for the good of newspapers generally.

"Let me ask one thing of you men. That is to do what you can to help foster the spirit of co-operation among the farmers of America. All industry is mutually interdependent and each must keep step with the other. I believe in co-operation rather than competition," he stated.

An appeal to the public to take an interest in government, as "the public's business is our business," was made by United States Senator Arthur Capper of Kansas.

"There is a need for a change in our machinery of government," he declared. "Much of it is antiquated and needs to be revised. There has been no great structural change in the last 100 years."

Henri Gagnon, managing editor of *Le Soleil* of Quebec, and an important figure in the Canadian newspaper world, told his audience of the part that New France has made and is making toward the progress of the American continent.

Following the banquet A. B. C. members and guests attended a midnight show of "Kid Boots."

POSTMASTER GENERAL NEW HEADS SPEAKERS AT A. B. C. ANNUAL BANQUET

Chief speakers at the A. B. C. banquet at the Hotel La Salle, Oct. 16. Left to right: Senator Arthur Capper, Postmaster General Harry S. New, President O. C. Harn, Former Governor Frank O. Lowden of Illinois, Henri Gagnon, publisher of *Le Soleil*, Quebec.

A. B. C. NOW EMPLOYING 41 FIELD AUDITORS

THE A. B. C. auditing force now numbers 41 field auditors, seven house auditors and two special investigators in addition to the chief auditor, assistant chief auditor and manager of the New York office, managing director Stanley Clague stated in his annual report.

The auditing staff of the Bureau follows:

E. W. Chandler, Chief Auditor.
A. R. Petterson, Assistant Chief Auditor.
W. F. Hoffmann, Mgr., New York Office.
Field Auditors—C. L. Adams, E. S. Arnold, M. H. Blakeley, R. C. Brodie, E. C. Burke, A. R. Charest, J. E. Curran, J. J. Devinney, W. T. Drury, J. K. Duffey, J. F. Farish, G. F. Felger, C. E. Feltes, S. H. Fleming, G. E. Gilliard, J. W. Graler, J. B. Haanel, Carroll Hanson, O. C. Homberger, Case Homoet, G. W. Howland, W. L. Howland, H. G. Johnson, E. R. Lambkin, J. N. Lewis, J. F. McCulloch, Frank McDaniel, J. M. McGowan, F. A. McNorton, W. J. Malone, M. W. Mitchell, R. G. Neeve, W. J. Nelson, A. A. New, V. J. O'Brien, L. F. Osborne, F. W. Peterson, J. J. Pittenger, F. F. Ploger, O. W. Pratt, C. E. Welborn.
Chicago House Auditors—N. J. Bauler, A. E. Bowman, Vernon Hanson, W. T. Lindgren, A. M. Moysey, P. O. Overgaard, E. M. Schnoeker.
Special Investigators—A. X. Morton, Jonathan Lucas, Jr.

ALLEGED NEWS SUPPRESSION

Springfield Republican Says Boston Papers Did Not Print Theatre Outrage

The following statement appeared in the *Springfield* (Mass.) *Republican*, of the issue of October 18, on the authority of that paper's Boston special correspondent:

"One of the most amazing instances of news suppression that has ever occurred in Boston came to light this week, with the detention of the man who for more than 10 weeks has been throwing missiles in a crowded (Keith's) Boston theatre, and at practically every performance. For more than a month the facts have been common knowledge in every Boston newspaper office, yet not a single paper had the courage to print the facts. Instead, innocent persons were permitted to attend every performance, with the practical certainty that a deadly missile would be thrown and the probability that some one would be hit. Many, in fact, have been hit, but happily none of the missiles has reached a vital spot, although several women have suffered painful injuries to their limbs. Some of the missiles were sharp pieces of steel, others were comparatively heavy junks of iron or lead. That no more serious injuries resulted is little short of miraculous."

FULL TEXT OF A. B. C. COMBINATION RATE DEBATE

'HARACTERIZED by Managing Di-
rector Clague as "the most important
oblem to come before the A. B. C. in
ars," the question of combination cir-
ilation created the most interest and
oused the best argumentative talent at
e annual convention of the Audit Bu-
au in Chicago last week.

The text of the argument on the ques-
on as it took place on the floor of the
ewspaper Division meeting Thursday,
id a resumé of the debate in the general
ssions Friday follow:

MR. CLAGUE: "No. 9 is a very im-
rtant topic. It reads: 'Should the Bu-
au's procedure in regard to the sub-
ription price of clubbing offers be
anged?'

"The Bureau's procedure in the past
s been that two publications can be
ubbed and sold and distributed if at
ast fifty per cent of both publications
collected. In other words, if two
agazines were clubbed together, one
10 cents and the other at 5 cents,
aking a total of 15 cents, and if 8
nts was collected, that would give over
per cent of the combined price of
th.

"If two daily newspapers were combined
d sold together, if one was priced at
cents and the other was priced at 2
nts, if 3 cents was collected, that would
over 50 per cent of the combined price
both publications, and therefore would
valid as circulation under the rules
the Bureau since we have been in ex-
tence.

"The situation has arisen in Califor-
a, particularly Southern California,
here two publications are being distrib-
ed together, and instead of reading the
rrespondence, it seems to me the best
ay in which to get at the net of the
tuation would be to ask Harlan G.
almer of the *Hollywood* (Cal.) *Citi-
n,* who objects to this practice to make
s presentation of the subject, and then
Ir. Kellogg, who has come on from
os Angeles to answer Mr. Palmer, can
ien answer the proposition.

"I think if Mr. Palmer could outline
ie situation, we could get it before the
eeting very clearly."

MR. PALMER: "Mr. Chairman and
entlemen of the Newspaper Division:
am here in furtherance of the following
esolution adopted Sept. 21 of this year
the Dailies Division of the Southern
alifornia Editorial Association, reading
follows:

" 'WHEREAS, When the subscriber to
the purchaser of one newspaper re-
ives another paper therewith, without
e payment of anything addition, there-
re the circulation of such additional
per is, in substance, free circulation,
id

" 'WHEREAS, A practice of the Audit
ureau of Circulations in certifying as
id the circulation of the newspaper for
hich the recipient pays nothing is in-
ical to the maintenance of the highest
andards by the Bureau and destructive
the policies to promote the best in-
rests of the advertiser; be it

" 'RESOLVED by the Dailies Division of
ie Southern California Editorial Asso-
ation, that the Audit Bureau of Cir-
lations be requested to so amend its
les and practices that the circulations
newspapers given with other papers
ithout additional charge will not be
rtified as paid; be it further

" 'RESOLVED that this association re-
est Harlan G. Palmer, publisher of the
ollywood Daily Citizen, to represent
id formerly request the Bureau at an-
al convention to make such changes
its rules, regulations and practices
will accomplish the desired results.'

"You are all doubtless familiar with
e Audit Bureau rule that that news-
aper shall be considered as having paid
rculation when the subscriber pays at
ast 50 per cent of the advertised price
f that publication. The rule appears
armless enough in itself. It appears
keeping with the Post Office rules as
to what shall be considered paid circulation, but when we stop to consider that one paper may be given away free with another paper, the regular price of the other paper being paid, we will say, 3 cents, and the price of the paper given free being three cents, making a total of 6 cents; if the recipient of the two papers pays three cents, it is therefore concluded that he has paid one and one-half cents of the money laid out for each of those two papers. In other words, if any of you gentlemen desired upon any particular day to increase your circulation by 10,000 copies and you would make an arrangement with the local distributor of the *Saturday Evening Post* to distribute your 10,000 copies with 10,000 copies of the Saturday Evening Post, making no charge to him and instructing him he was to make no charge to the recipients of that paper; if the price of your paper did not exceed 5 cents and the recipient of the Post paid five cents, thereby it would be construed that the circulation of your 10,000 copies of the paper given absolutely free, had become paid circulation, because the recipient paid 50 per cent of the total price of the two papers.

"That much for the example; now for the facts. If you purchase a copy of the *Los Angeles Express* at any one of a number of corners in the City of Los Angeles, you will pay 3 cents for a copy of that paper. If you happen to make that purchase at another corner, you will receive with that paper a copy of the *Hollywood News.* You might inform the newsboy you did not care for the second paper, whereupon you would be informed that it cost you nothing anyway, and you might as well take it; so you pay your three cents, believing you were paying three cents for the copy of the Los Angeles Express and getting the copy of the Hollywood News free.

"The Audit Bureau is obliged, as a matter of fact, to say you paid 1½ cents for the Express and 1½ cents for the copy of the News. If your purchase happened to be made at another corner, you would receive with your copy of the Los Angeles Express a copy of the Pasadena Evening Post. There might take place the same conversation which you had had at the previous corner. You would pay only the three cents believing that there you were getting the Pasadena Evening Post without paying anything. Again the Audit Bureau would be obliged to state, as a matter of fact you had paid 1½ cents for the Pasadena Evening Post.

"If you should buy a copy of the Los Angeles Express in the City of Glendale during the morning hours, you would receive for your 3 cents only a copy of the Express. If you bought a copy of the Express in the afternoon hours, after the local edition of the *Glendale Press* had been issued, you would receive a copy of the Glendale Press with your copy of the Los Angeles Express, and you would still pay the three cents.

"If you happened to be living within the territory of Monrovia and subscribed to the Los Angeles Evening Express, you would receive with your Express a copy of a paper, two pages of which would be labeled and dated as the *Monrovia Evening Post,* the balance of the pages would be labeled and dated as the Pasadena Evening Post, three papers for the price of one.

To support the statements I have made, unless there be no contradistinction, I wish to read at this time from the Auditor's Report for the period ending March 31, 1925. This is a twelve months' period. This is on the Los Angeles Evening Express, under the headings of 'clubbing offers recognized,' 'clubbing offers made of this and other publications.' The different papers are cited with which the clubbing arrangements are made, being the *Alhambra Post-Advocate,* Glendale Press, Pasadena Evening Post, *San Pedro Daily News, Venice Evening Vanguard,* Hollywood News.

"I will read just one paragraph. 'Pasadena Evening Post. The Express circulated in Pasadena, Altadena, South Pasadena, Michaldena, Monrovia, Arcata, Azusa, Baldwin Park, Carvain, Glendora, Locklin, Sierra Madre, at the Pacific Electric railway station, and the Post Office building in the city of Los Angeles. Price three cents per copy on the streets and newsstands, rates to subscribers sixty-five cents a month.'

"You will find the established rate of the Express is three cents per copy on the streets and newsstands, 65 cents per month delivered by carrier. Reading further: 'The following list of the newspapers thus circulated, were published by the same interests as the Los Angeles Evening Express. Records show the average net paid circulation in connection with the above described clubbing arrangements totalled an average of 18,281 copies per issue in the city territory, and an average of 30,720 copies per issue in the suburban territory, or a total of 49,001 copies per issue for the twelve months' period ending March 31, 1925.

" 'Similar combination offers were made by this publication in combination with newspapers published by other interests. Records show that the average net paid circulation in connection with the above described clubbing arrangement totalled an average of 1,345 copies per issue in the city territory and 3,530 copies per issue in the suburban territory, or total of 4,875 copies, which together with the 40,000 above copies makes 53,875 copies thus circulated, of the total circulation of 92,259.'

"I will read from the individual audit statement of the Hollywood News. Under the heading, 'Were clubbing offers made of this and other publications?' Answer, 'Yes.' Records show copies of the Los Angeles Evening Express, regular subscription rate of which was 65 cents per month or 3 cents per copy for the single issues, were distributed in combination with the Hollywood Daily News in the towns of Sherman, Beverly Hills, San Bernardino, Owensmouth, Vay Nuys, Bercano, Lankershim, Chatsworth, Gester Junction, Mishacres, Rio Nuys, Woostet, Zelzah, parts of the city of Los Angeles, between the Pacific Electric railway station on Hill Street, in the City of Los Angeles and boundary

PROCEEDINGS OF A. B. C. NEWSPAPER DIVISIONAL MEETING

DIRECTOR DAVID B. PLUM of the *Troy Record* presided at the meeting of the Newspaper Division. Jerome D. Barnum of the *Syracuse Post-Standard* was chosen as secretary for the meeting. The report of the divisional committee consisting of E. Lansing Ray, *St. Louis Globe Democrat,* T. R. Williams, *Pittsburgh Press,* Gardner Cowles, *Des Moines Register and Tribune-News,* Hugh O'Donnell, *New York Times,* and David E. Town, Hearst Publications, was read and approved. The present committee was reelected for another year.

The first resolution passed was one approving the resolution of the Board of Directors expressing the profound sorrow of the Audit Bureau on the passing of Victor F. Lawson.

The questions, "Should every newspaper carrying a Sunday date line be considered a Sunday paper?" and "Should an evening paper without a regular Sunday edition but following a pre-dating plan of carrying the following morning date line on a late editon be permitted to carry the Sunday morning date line for the late edition issued on Saturday evening?" were considered jointly. No resolution was offered, the sentiment of group being expressed by Louis Wiley, business manager, *New York Times,* that if a paper is issued on Saturday it is a Saturday publication despite pre-dating the time it arrives.

The membership shied from discussion of the questions "What is a morning paper?" and "What is an evening paper?" On motion of J. R. Smith of the *Indianapolis News* these were eliminated from consideration.

The next subject before the meeting was: "Should the total draw for each state be shown in addition to the total draw of towns receiving 25 or more copies?" It was moved that it be the policy of the Bureau hereafter to show the total net paid circulation by states as well as by towns. The motion was adopted.

The question "Should A. B. C. rules on city carrier arrearages be changed?" was tabled.

The key question around which the most important discussions of the convention took place was then taken up—"Should the Bureau's procedure in regard to the subscription price of clubbing offers be changed?"

The complete discussion on this question is contained elsewhere in this issue.

Following this the division voted to continue the present policy in regard to publishers' statements.

Questions concerning box sales and condition of collections were tabled.

The topic "What safeguard can be put around bonus and salaries to prevent eating of papers?" was left in the hands of the advisory committee.

It was moved that the present practice in regard to giving any reduction in subscription price when premiums are given be continued.

The next discussion was as to whether the Bureau should further restrict the time allowed publishers to render publishers' statements. It had been suggested to the Bureau that 15 days should be sufficient. A. R. Michener of the *Harrisburg* (Pa.) *Telegraph* moved that the 15 day period be adopted, and it was seconded.

Mr. Clague here rose to object. He declared that many statements are sent in incorrect and must be returned for revision. He said it would crowd the Bureau tremendously to handle the work in 15 days. Mr. Clague suggested a 21 day limit. W. A. Strong took the chair while Chairman Plum argued against the motion. Mr. Plum stated that to limit the time would cause hardship in many offices. It was voted that the present limit of 30 days be continued.

The suggestion that the rule governing the privilege of printing remarks in Paragraph 28 of the publisher's statement be amended so that certain newspapers carrying advertising in both morning and evening editions at one rate, could state that fact in Paragraph 28 in the following suggested manner:

"Advertising carried in the morning ————, appears also in the evening ————" and "Advertising carried in the evening ———— also appears in the morning ————, for one charge," was voted down and the present practice continued. A. G. Newmyer of the *New Orleans Item-Tribune* moved the adoption of the amendment so that such paragraphs could be included in the report.

Mr. Clague, opposing, stated that the place for the rate is on the rate card not on the A. B. C. reports. Chairman Plum took the floor and stated he was unalterably opposed to changing the present practice.

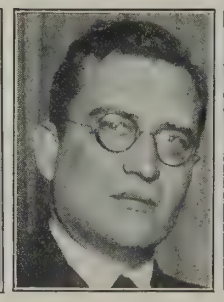
"If we let in advertising on these reports, we are opening the gates, and we are going to get into all kinds of trouble," he said.

On motion of Marcellus M. Murdock of the *Wichita Eagle* it was voted that the present practice be continued.

The meeting then adjourned.

NEW AND REELECTED OFFICERS OF AUDIT BUREAU

E. I. Mitchell



J. Murray Gibbon

O. C. Harn

P. L. Thomson

W. A. Strong

E. R. Shaw

Stanley Clague

F. R. Davis

of the Hollywood city territory described in paragraph 9 of this report, the combination being delivered by carriers for sixty-five cents per month and sold on the streets and newsstands at three cents per copy.

" 'Records show that the average net paid circulation of this combination for the period covered by this report was 9,642 copies per issue, lacking seventy copies of being the total of 9,712 copies —entire circulation credited to the paper.'

"Now, you may ask me what division of money is made as a result of this combination of papers, to which I must answer I do not know, inasmuch as the auditor's report does not make a statement as to the division. However, I have here a copy of the receipt which is received, which is given to those people who receive both the copy of the Los Angeles Evening Express and a copy of the Hollywood News. It reads as follows: 'Los Angeles Evening Express, Los Angeles, California. Route No. 801. Received from the Hollywood Citizen for five copies, subscription to Los Angeles Evening Express. Amount due $3.25; amount paid $3.25. Collected by Murray.'

"There is no reference whatever made to the fact that they were at the same time receiving five copies of the Hollywood News. Our natural assumption and the assumption of every recipient of that paper thereby was they were receiving a copy of the Hollywood News without paying anything therefor, to which the A.B.C.'s answer is that as a matter of fact each of them paid one-half of the 65 cents for the copy of the Hollywood News.

"In order to put further light upon this question of what distribution may be made of the funds, I find in the reports of the two papers, as to the prices at which the paper is sold at wholesale, the following, reading from the Express report: 'Records show for the period covered by this report the wholesale rates were as follows: Newsboys from downtown street sales paid $2 per 100 copies.' Reading from the copy of the report on the Hollywood News: 'Records show for the combination of the Hollywood News and Los Angeles Evening Express were as follows: 'City newsboys for street sales were supplied by district men, and copies were billed to these district men at $1 per 100 and they resold to the boys at $1 per hundred; $1 per hundred for two papers combined; $2 per hundred for one.'

"I may be criticized, or exception might be taken that the statement in the City of Monrovia instead of receiving two papers, you receive three. In order to eliminate any possible criticism, and in order that it might be assumed I am attempting only to get before you the facts, in order that you might reach a decision I wish to read a few extracts from the official court report in the Superior Court of Los Angeles County in the matter of the petition of the Monrovia Evening Post for a judgment of the Superior Court declaring it to be a newspaper of general circulation, or a newspaper with a bona fide circulation."

Mr. Kellogg was on the stand and was questioned by his attorney.

" 'Question: What is your occupation?'

" 'Answer: Publisher?'

" 'Question: What do you publish?'

" 'Answer: I publish various newspapers in Los Angeles County, including the Monrovia Evening Post.'

" 'Question: The Los Angeles Express, the Pasadena Evening Post?'

" 'Answer: Pasadena Evening Post and Glendale Press.'

" 'Question: Some 15 or 16 newspapers in Southern California?'

" 'Answer: Yes.' "

"I am now reading from the cross-examination:

" 'I have here defendant's Exhibit 1, a newspaper with a heading on the front page "Monrovia Evening Post" and dated "Monrovia, Cal., Thursday, July 17, 1924." Page Three of that paper contains the heading "Pasadena Evening Post, Pasadena, Cal., Thursday, July 17, 1924." Page Two of the same paper contains the heading "Monrovia Evening Post." Every other page of the paper contains a heading "Pasadena Evening Post," does it not, Mr. Kellogg?' "

" 'Answer: I think so.' "

"Mr. Kellogg's attorney here expressed willingness to stipulate that that statement was correct. Reading from cross-examination again:

" 'Question: On page 10 of this paper we have a heading "Pasadena Evening Post, F. W. Kellogg, publisher." That refers to this particular paper now known as defendant's Exhibit 1, does it not, Mr Kellogg?'

" 'Answer: That refers to what is known as a section of that paper.'

" 'Question: The Pasadena Evening Post is a section of the Monrovia Evening Post?'

" 'Answer: It is not.'

" 'Question: What is it?'

" 'Answer: The Monrovia Evening Post and the Pasadena Evening Post are circulated together.'

" 'Question: Then I have here what amounts to a paper known as the Monrovia Evening Post which consists of two pages, and a paper known as the Pasadena Evening Post which consists of 10 pages, making a total of 12 pages?'

" 'Answer: That makes two pages of the Monrovia Evening Post and 10 pages of the Pasadena Evening Post.'

"Question: What is the circulation price of the Monrovia Evening Post?'

" 'Answer: The price is 3 cents on the street and the price is 65 cents per month delivered in combination with the Pasadena Evening Post and the Los Angeles Express.'

" 'Question: If a person desires to buy the Monrovia Evening Post, what is the subscription price for the Monrovia Evening Post alone?'

" 'Answer: We deliver it in combination with the Express.'

" 'Question: It is not sold alone?'

" 'Answer: It is, if they want it, at 3 cents a copy.'

" 'Question: They pay the same price for the Monrovia Evening Post, if they insist upon getting those two pages torn away from the other?'

" 'Answer: They are not torn away from the other.'

" 'Question: The defendant's Exhibit 1 comprises 12 pages?'

" 'Answer: Yes.'

" 'Question: Two of those 12 pages are headed Monrovia Evening Post but you say it is a paper known as the Monrovia Evening Post?'

" 'Answer: That is correct.'

" 'Question: I asked you if the Monrovia Evening Post had a separate circulation price?'

" 'Answer: It has.'

" 'Question: You say if a person wants it, they can buy it at 3 cents a copy or 65 cents a month. Now I ask you, when a person is buying that paper separately, do you tear those pages off from the other pages?'

" 'Answer: We certainly do not.'

" 'Question: Then it is impossible, as a matter of fact, to buy a copy of the Monrovia Evening Post separately from the Pasadena Evening Post and the Los Angeles Express?'

" 'Answer: It is possible for them to tear it off if they want it torn off.'

" 'Question: After they buy it?'

" 'Answer: After they buy it.'

" 'Question: But it is not impossible for them to buy that paper separately?'

" 'Answer: No.' "

"I was visiting this morning with a publisher attending this convention and was telling him something of the purpose that had brought me here. He said, 'Do you mean to tell me that if I desire 5,000 increase in circulation to my paper that all I need to do is to go out to some of the outside publishers and request them to circulate those 5,000 copies with their paper, that the Audit Bureau of Circulations will certify that circulation as paid circulation?'

"I said, 'If the price of your paper is not greater than the price of the paper with which they are circulated. In other words, if the price of your paper is 65 cents a month and the price of the paper with which you give it away, is 65 cents a month, most certainly the Audit Bureau will certify that circulation as paid.'

" 'Do you mean,' he asked, 'if I want to help out some of the outside friends with their circulation, and if they send in to me 1,000 copies of their paper, and I distribute them with 1,000 copies of mine, that that will then be paid circulation?'

"I said, 'Absolutely; under the rules of the Audit Bureau, it can be construed as nothing other than paid circulation.'

" 'Then,' he said, 'have serious doubts about the future usefulness of the Audit Bureau if such a policy be maintained and such a practice be generally adopted by newspapers throughout the country.'

"I wish at this time to make it certain that I care not to have this matter appear as anything of a matter of dispute between competitors. Competitors must argue one way or the other, but I ask you at all times to disregard any thought of competition, but look only at the principle that is involved in the matter. I am perfectly willing during the course of this argument to have you gentlemen assume the strategy. Satanic horns may be found under my head and angelic wings may be found under the head of my competitor. This is not a matter in which only competitors are involved.

"At the last two conventions the circulation managers of California who represent every important daily newspaper in the state except the newspapers entering into this combination, have adopted resolutions unanimously expressing objection to this policy of the Audit Bureau. Following their last convention they took a poll of newspapers throughout the United States upon the matter. Two hundred and seventy newspapers took the trouble to reply. Of these 270 newspapers, 263 replied as being opposed to the practice.

"In asking you to disregard any thought that this is a matter between competitors, may I ask you to look at the matter of the A.B.C. standard? Mind you, I am a member and so is every California man who is opposed to this practice. We are members because we believe in the association. We are members because we believe through the association we can accomplish better results and we can build up better standards for the newspaper industry. We are members of the association because we believe that working with you men and with the officers of this organization, we can accomplish greater results for the advertisers and thereby bring greater benefits to ourselves. Therefore, look at the matter only from the question of standards.

"Are we maintaining a standard of which we are proud? Are we maintaining a standard which we are glad to point to as indicative of the high plane upon which our newspapers stand, when that standard permits one newspaper to be given free with another newspaper and yet the certification of that free paper is paid circulation? Are we fathering the interests of the advertiser when they permit any type of circulation to bear the A.B.C. stamp of high standard, a stamp of standard that each one of us has done much to advertise? We have published faithfully the advertisements that have been sent us by the Audit Bureau, setting forth that Audit Bureau membership means a newspaper with a circulation measuring up to high standards. Are we serving the advertisers then, when we as an organization permit the certification as paid of newspapers that are given away free with another publication?

"It may be said, and it has been said that every advertiser should carefully read all through the detailed reports of all newspapers in which he is placing advertising. If the advertiser will do this, if he will carefully read through the detailed reports of these papers, he will meet with no injury; but if he follows the practice I have been told the advertising men that they follow, then he will be led to injury, to this extent.

"He may place a national account

(*Continued on page 9*)

FULL TEXT OF A. B. C. COMBINATION RATE DEBATE

the Los Angeles Express. For example, he places it at $2.50 per inch. He is looking for other Southern California papers, and he finds papers with the Audit Bureau stamp of high standard upon them. He will select the Pasadena Evening Post. He will select the Glendale Press. He will select the Hollywood News, the San Pedro News, the Santa Monica Outlook. He will purchase also these other papers and possibly in purchasing them he will pay a price of $3.50 per inch. In other words, he has paid a price of $6 per inch. He has been led to his injury to the extent of $3.50 per inch, because of acceptance of a circulation statement that has the A.B.C. mark of high standard. This is not a matter of peculiar concern to California. It is a matter that is going to be of concern to every publisher in the United States. We hold and make no objection to the clubbing of newspapers together. We ask only that a price be charged so that it may be determined from that price that the recipient of two papers is willing to pay something, little though it may be, but that he be willing to pay something for the second paper.

"Coming here on the train, I read in EDITOR & PUBLISHER of the sale of an Elizabeth (N. J.) newspaper. The report stated that on the day of the sale the Elizabeth paper carried the announcement that in the future it was going to be circulated with a New York newspaper. So you see, gentlemen, it is not a condition that is peculiar to the state of California. It has now reached the East and is working from Coast to Coast. It is eventually going to come to the point where it will concern and affect each of us.

"Therefore, I move at this time, in order that the matter may be presented for further discussion, we recommend to the general session of the Audit Bureau of Circulations the adoption of this resolution:

"RESOLVED, that where two newspapers are distributed together, if the circulation of each is to be certified as paid, the price charged for the combination shall be greater than the price at which either may be purchased separately."

Mr. Clague: "I think we ought to hear both sides of the question and get all the angles. I would like to have something to say in regard to the effect of this not only upon the newspapers, but also upon the other divisions of the Bureau. Any such resolution as this, which must be sent to the general session, is then sent to the board of directors for recommendation."

Mr. F. W. Kellogg: "Mr. Chairman and Gentlemen: "I seem to be the guilty party in this matter, so far as Mr. Palmer is concerned. I can assure you, however, that after operating this newspaper combination during the past six years, the only objection I have ever had, or I have ever heard from anybody was from Mr. Palmer. Mr. Palmer has had this matter up personally with the Audit Bureau of Circulations. This matter was entirely thrashed out more than two years ago. The matter was considered by the board of directors of the A.B.C. at that time. Mr. Palmer presented his case at that time and the representatives of the Los Angeles Evening Express, E. C. Trowbridge and O'Mara & Ormsbee, presented our case.

"The result of that presentation was the issuance of this order on Nov. 27, 1923, addressed to me and signed by Mr. Stanley Clague:

" 'Mr. F. W. Kellogg,
" 'Los Angeles Express,
" 'Los Angeles, Calif.

" 'Dear Mr. Kellogg: At the meeting of the board of directors held in New York on Nov. 16 the following resolution was passed:

" 'Upon motion duly seconded, it was unanimously resolved that as both the Los Angeles Express and the local newspapers sold in combination with this publication comply with the fundamental requirement of the Bureau; at least 50 per cent of the advertised price of each publication being paid by the recipient, these publications conformed to the rules of the Bureau, and the circulation of each publication shall be counted as net paid.'

"Mr. Palmer has never asked me personally to make an audit of our books. I will say very frankly, gentlemen, had he ever asked me to make an audit of our books and discussed this matter with me personally, I would have been only too pleased to give him all the time he wanted, because it has disturbed him a great deal during the last few years.

"That question raises another matter. I want to ask Mr. Palmer how long he published a weekly newspaper in Hollywood before he made a daily?"

Mr. Palmer: "I think about 10 years."

Mr. Kellogg: "For ten years Hollywood had no daily newspaper. Most of the other cities of Southern California, and many of them far less important than Hollywood, had daily newspapers. I finally decided, after establishing the Pasadena Evening Post, investing over $100,000 in that property, in a plant, investing something like another $100,000 in real estate, and finding that our subscribers in Pasadena wanted both the Los Angeles Express and Pasadena Post, practically everybody in that community wanted either a local newspaper and also wanted a Los Angeles newspaper, I was inspired to do this thing. It wasn't something new with me. I had seen it done years before by the *Cleveland Press*, when the *Akron Press* was established. I had seen it done years before when the *Covington Post* was established by the *Cincinnati Post*. My first experience was with Scripps and the Cleveland Press, and for seven years I was with the *Detroit News*.

"The first issue and the maintenance and the growth of the *Grand Rapids Press* was a separate section of the *Detroit Evening News*. I saw it done by Col. W. R. Nelson in Kansas City when he gave away a morning newspaper to all of the subscribers of the *Star* as the same price as he had been charging for the Star. I have seen two newspapers in Iowa given away by Gardner Cowles, or sold for the same price that one used to be sold at. It has been very successful.

"When I decided to make a daily newspaper in Hollywood, because there was no daily newspaper there, in one of the most important cities of California, Mr. Dixon, who was my partner, and I invited Mr. Palmer to come and see us.

"Mr. Palmer has a very good address. He is a very estimable gentleman. He is a good citizen in his community. He is prominent in church work. He is prominent in public life, and we thought very well of him, and we told him that we were going to establish a daily newspaper and we would be very glad if he could conduct that newspaper for us.

"A few days after that I was telephoned by Mr. Perry of the California Bank in Hollywood to come out and see him, and I went out to see him.

"He said, 'Mr. Kellogg, I am awfully sorry to see you starting a daily paper in Hollywood.' He said, 'Mr. Palmer is a friend of mine, and he has run this weekly paper for a long time. I think he has concluded in the last few days to start a daily paper, and I wish you could let him start a daily paper instead of starting one yourself.'

" 'Well,' I said, 'we are going ahead to start a daily paper out here. We want to be interested in it because it enables us to give to the subscribers of the Los Angeles Evening Express through a local newspaper the local news that it is impossible for us to give through the Express.'

"Gentlemen, there are in Southern California, in Los Angeles County, outside of the City of Los Angeles, about 1,500,000 population. Los Angeles has about 1,000,000 population. There are about twenty very important cities there. Outside of Los Angeles, there are very few important cities in the State of California. You can number them on one hand. One is San Diego; one is Fresno; one is Sacramento; one is Oakland, and one is San Francisco. Los Angeles County has more population than all the rest of the state put together.

"In the days when Los Angeles was young, the *Los Angeles Times* used to devote a great part of its paper to the news of these communities, but as they grew it was impossible to cover all of these communities, and we have some cities out there in Los Angeles County that are just as important. If you will group all of the cities outside of Chicago, and bring them in within a radius of 25 miles of Chicago, all of the cities in Illinois excepting East St. Louis, you will have a situation very similar to what we have in Los Angeles.

"At the time I published the Pasadena Evening Post, the *Star-News* in that city had a circulation of something over 10,000 copies, and the Los Angeles newspapers, ten miles away, had a circulation as follows: The greatest circulation was the *Herald* of 1800 papers a day. Then came the *Time* of 1600; then the *Express* of 1200; then the *Examiner* at that time of 900, and the *Record* had between 300 and 400, as against 10,000 daily newspapers of a paper printed in a city only ten miles from the center of your city. Why? Because no newspaper in Los Angeles could give them the news that that community demanded.

"Gentlemen, you are all representatives of the leading sections of the United States, and I would say there is not one man represented here, but what his community sends a large amount of money into Los Angeles County to help support people that have retired. Those people coming into Pasadena, become very much interested in doing something, and there is far more individuality. There is a far greater number of churches and clubs and business men's association, and greater business activities in each one of these communities than there is in almost any other cities in the United States. I will say there is far more society in Pasadena than there is in Los Angeles, and there is far more society, and good society in Hollywood than there is in the City of Los Angeles. The moving picture business is a very small portion of Hollywood. If all of the moving picture business was moved out of Hollywood you would still have a great city.

"That brings me up to the time when this banker invited me to come and meet Mr. Palmer at his office. Mr. Palmer said to me, 'Mr. Kellogg, I wish you would leave this field alone, and let me have a daily paper.'

"I said, 'Mr. Palmer, I am very agreeable to that. What do you value your plant at?'

" 'Well,' he said, 'It probably isn't worth it, but it is worth it to us, $50,000 for our press and our machinery and our books and stationery stock.'

"I said, 'Without argument, we will grant it is worth $50,000. I will put in $50,000 in cash, and I will put you in general charge of this newspaper as general manager and editor, and on your desk you sell the controlling interest to me, but I will put up the cash, and we will put the daily paper in here. We will have an Associated Press membership.'

"Every newspaper I have got, gentlemen, in Southern California has an Associated Press membership. It has a Post Office entry. They have been members of the A. B. C. ever since they started. There has been no secret about the way we operate these, because on account of Mr. Palmer, I generally have to pay for about two audits in each one of my communities instead of one. I am probably paying more for the audit of my newspapers than any other member in the United States.

"Mr. Palmer accepted my proposition and he appreciated it, but I received a letter from him about two days later which read like this:

" 'July 29, 1921.

" 'Mr. F. W. Kellogg,
" 'Los Angeles Express.

" 'My dear Mr. Kellogg: After a careful consideration of the suggestion for combination of our forces, we have decided against it. From the business standpoint we believe it would be to our advantage to have but one daily in Hollywood rather than to own one of two dailies.

" 'However, I believe we can both prosper with dailies here, and at the same time we can preserve the individuality of the citizens, which is more prized by us than any income therefrom.

" 'We would be happy, of course, when we change to a daily, as soon as our basement can be put in shape, to co-operate with the Express in the combining of circulation. But we cannot bring ourselves to the point of parting with part of the controlling interest of the business.

" 'We appreciate indeed your courtesies in the matter and feel complimented that you would consider the suggested arrangement, and I assure you that as competitors, we shall do all possible to keep our relations pleasant.

" '(Signed) Yours very truly,
" 'HARLAN G. PALMER.'

"These so-called resolutions that have been passed by the Circulation Managers' Association, and the Editorial Association out there, have been inspired resolutions. We were never invited to join the Circulation Managers' Association, but we were sent a questionnaire, which, had we answered it 'yes' or 'no,' would have meant the same thing. We were not members, and we have never been invited to become members of the Southern California Editorial Association. Yet I have more Associated Press memberships, I think, than any other man in the United States, and I have built up for the Associated Press a great news-gathering organization.

"I will ask Mr. Chandler or Mr. Clague if in all the time that the Express or these other newspapers have been members of the Audit Bureau of Circulations, have I ever made a complaint against a single competitor? Do you know of any?"

MR. CLAGUE: "Not that I remember, Mr. Kellogg."

MR. KELLOGG: "I have figured the Audit Bureau of Circulations was amply able to take care of itself, and I was interested only in having a clean bill of health.

"When these various resolutions were passed, I sent to all the newspapers and all the members of the A. B. C. and to the national advertisers on Jan. 22, 1925, a letter which read as follows:

" 'To National advertisers and advertising agencies:

" 'Gentlemen—The Los Angeles Evening Express is aware that an association composed of representatives of other publications in California has been circularizing you with protest against the methods employed by the Evening Express and its suburban newspapers in the sale and distribution of these papers.

" 'These methods require no defense from the Los Angeles Evening Express. The facts are completely set forth in the documents published by the Audit Bureau of Circulations.'

"I don't believe that this association should be used at any time to help or injure a local newspaper fight. I think this Audit Bureau of Circulations was organized for the benefit of the national advertisers, and with the assurance that the publishers would be honest in their statements of circulation and organize their businesses according to the rules of the Audit Bureau of Circulations. I particularly asked Mr. Clague in the latter part of November that he would, after Mr. Palmer had made his complaint, consider all of the evidence, weigh it before a committee meeting or directors' meeting, and send me a statement of whether we were right or wrong, because at that time I was endeavoring to sell my interests in the Express to Mr. Earle and to Mr. Dickson, because the newspapers on the outside had grown to such great proportions. My investment in the outside papers (and they are not inserts, not little newspapers; they are big newspapers) now represents over $1,400,000 in eight plants. So as to determine whether I was right or wrong in the value of circulation, I asked for this ruling and I got this ruling, after the matter had been laid before this body through its directors.

"This year I disposed of all my in-

FULL TEXT OF A. B. C. COMBINATION RATE DEBATE

terests in the Express to Guy C. Earle, a gentleman who is here, and if he will stand up, you can look at him. He is a nephew of E. T. Earle, who owned the paper for many years. Mr. Dickson owns 5 per cent and Mr. Earle owns 95 per cent. I bought their interests in the outside papers, and I paid some $236,000 in cash for them.

"When we came to determining the value of circulation routes, I went to the Audit Bureau of Circulations. I went to the corporation commissioner, and he appointed a gentleman to determine the value of our circulation routes. Then I was very glad that I was a member of the Audit Bureau of Circulations, because that examiner made rather an exhaustive inquiry into the value of subscribers. When I showed them the resolution sent to me by Mr. Clague, they determined the circulation of the Epress was worth something over $1,000,000.

"To show you the value of subscribers, I will only say routes in Los Angeles County that are owned by the district men are sold now on the basis of a value of $13 a subscriber. In other words, a route out on the Los Angeles Times of 2,000 subscribers recently sold for $26,000, and that is the value to the carrier; that is the value to the publisher. I maintain the value to the publisher of circulations of 10,000 to 15,000 is $10 to $15 a subscriber. The corporation commissioner granted that on the strength of this evidence right here, and the fact that we had honestly been members of the Audit Bureau of Circulations for several years before Mr. Palmer even applied for membership. We have observed all the rules, and we asked them to be sure and tell us what the rules are.

"I don't believe that this body is going to be used by any individual to lightly set aside an investment that runs into hundreds of thousands of dollars and into the millions of dollars or to be used in the injury of interests of somebody that didn't do business with me. I don't know whether he wants to do business with me. I will only say, Mr. Palmer, I would very much like to do business with you. I think it would be better for Hollywood to have one daily newspaper, and I even offered to Mr. Clague, and shook hands with your representative in Colorado Springs to accept the very resolution that you passed. Mr. Clague asked me if I wouldn't do it, if we would raise our price so as to remove the objection.

"When I got back to California, I asked this young man if we should go ahead with the agreement we had made, and he said, 'No, Mr. Palmer won't let me do it.'

"Now, gentlemen, there are the facts of the case. We are members of the association. We believe this association is formed for the benefit of knowledge that the advertiser is entitled to. When the International Circulation Managers met last summer, they tried to bring this up for action, and it was laid on the table.

"I thank you, gentlemen, for your time. There are a great many people here whom I have known and have known me for, I think, very close to forty years. My record and honesty and integrity stand for themselves, and my methods stand for themselves. Gentlemen, I thank you."

GARDNER COWLES (*Des Moines Register and Tribune-News*): "I really don't wish to get into this discussion, but I am a little bit surprised that such a well informed newspaperman as Mr. Kellogg shouldn't know the Des Moines situation better than he seemed to, when he referred to me and to the Register-Tribune there. Out of something over 160,000 daily circulation, divided a little more than fifty per cent evening and a little less than fifty per cent morning, we have sold to the same people, as nearly as we can tell, only about ten per cent of each paper, and we do get an extra price from the people that do take the combination."

MR. KELLOGG: "I withdraw my remarks as far as your paper is concerned."

MR. COWLES: "I just simply wanted to get this straight. I had no thought of speaking on this, but I think we should keep this in mind. This resolution will vitally affect some other groups of publishers. The farm papers would be greatly affected, if you changed this matter of clubbing arrangement, which the A.B.C. board has adopted. I think while possibly it ought to be changed, there is a matter here that should be faced, and you at least ought to know how far it reaches if you vote for the resolution."

E. H. BUTLER (*Buffalo News*): "It seems to me this matter has two sides to it, one so far as the clubbing situation goes relative to magazines with newspapers, and the clubbing privilege of newspapers with newspapers. Under the present ruling of the A. B. C., the resolution which was adopted and read here, it would be possible in the future for one newspaper in any large metropolitan section to club with the small paper and so-called rural community on the basis that Mr. Kellogg has pursued, and gain circulation in that way, and credit it as net paid circulation which would stand as net paid circulation before the local advertisers of the community, and the district which that paper was published in, or the city. That, as I see it, would react detrimentally to the other newspapers in that vicinity who were publishing in competition with that newspaper, and who had no clubbing privilege with papers in rural communities.

"In discussing the matter, it seems to me the proposition and the problem of clubbing, such as the word implies, must be kept entirely separate and distinct and differentiated from the practice of clubbing newspapers and magazines. The magazines are circulated once a month, we will say, and the newspapers are circulated every day. The national advertiser in the newspaper gains a rural circulation. He always has his national circulation through the medium of the magazine.

"The local advertiser in the newspaper in the large communities which has not the clubbing privilege of the small newspaper in the rural community is gretaly affected. I think that is a matter which must be considered. It strikes me as very important."

W. O. CRESMER (*Los Angeles Times*): "Under instructions from the papers whose proxies I hold, I rise to second the resolution of Mr. Palmer on the part of the *San Francisco Chronicle*, the Los Angeles Times, the *Oakland Tribune*, the *Long Beach Press-Telegram* and the *Phoenix Republican*, all of California or Arizona."

MR. PALMER: "I have been asked by my neighbor to make clear this resolution. He asked if it would include in its wording two issues, a morning and evening of the same newspaper. I was very careful in framing this to frame it so that I could reach the conclusion it did not so include them, so it would not include magazines, and in any way involve any other situation than just such a situation as has been discussed this afternoon.

"The resolution reads 'where two newspapers are distributed together,' that, I believe, eliminates the consideration of a morning and evening issue of the same newspaper distributed at different times in the day. Specifying only newspapers, I think, eliminates any consideration being given at this time to magazine clubbing propositions. We ask only that a higher price than the price of either one be collected. In other words, the price of one newspaper is sixty-five cents a month; if they wish to club with another newspaper they ask seventy cents or seventy-five cents, some slight addition so it may be determined the recipient of two newspapers desires a second newspaper sufficiently to pay something, little though it may be, for that second paper."

MR. CLAGUES "Mr. Palmer, may I ask a question for information? Of course, in so far as I am personally concerned, I wouldn't express an opinion one way or the other except that we have the fundamental rule, and, as Mr. Cowles said, it affects not only us in this division, but will affect all other divisions and all recommendations should go to the general session and from there to the Board of Directors. This resolution says: 'If the circulation of each is to be certified as paid, the price charged for the combination shall be greater than the price at which either may be purchased separately.'

"In an endeavor to try to adjust the matter, when I attended the annual convention of circulation managers with Mr. Chandler at Colorado Springs, I brought your representative and Mr. Kellogg together. I understand Mr. Kellogg agreed to do exactly what the resolution called for. I may be wrong, so I am asking for information. He was agreeable to charging a price which was in excess of the single paper. Am I right or wrong?"

MR. KELLOGG: "In the interests of not embarrassing the Audit Bureau of Circulations in its rules pertaining to all other respects, I did agree. You said, 'Why can't you gentlemen get together and do something.'

"The suggestion came, and I said, 'I will do it, Mr. Clague, because if you undertake to pass that, it is going to embarrass the publishers all over the country. If you want me to, I will do it now and raise our combination price from 65 to 70 cents.'

"You turned to Mr. Palmer's representative and said, 'Is that satisfactory to you?'

"He said, 'It is bound to be.'

"You asked him, 'Is it going to be satisfactory to Mr. Palmer?'

"He said, 'It is bound to be, because we can't dictate the price.'

"We prepared to do that, and we did it in two or three communities. Then I was notified that Mr. Palmer wouldn't accept that situation, so we stopped right then and there, and the matter is just where it was before; I have tried to help the organization in every way I could."

MR. PALMER: "Mr. Chairman, since there seems to be an issue between Mr. Kellogg and myself, if he is willing to abide by the motion, let us carry it. It has been suggested to me, and I think the suggestion is good, that the motion should read 'where two daily newspapers are distributed' instead of 'two newspapers.' May I have the consent of the seconder to that change?"

Mr. Cresmer accepted the change.

MR. KELLOGG: "Mr. Palmer, I understood you to say this resolution is aimed particularly to take care of this particular situation in Southern California."

MR. PALMER: "Or any other section of the United States."

MR. KELLOGG: "I will say it is aimed to particularly take care of this section."

MR. PALMER: "I am not interested in any particular section. As I explained to the audience, I am interested in a principle. This resolution, I think, established that principle. The principle is that when two newspapers are circulated together, the recipient must pay something more than the price of one, if the circulation of each paper is to be certified as paid."

WALTER A. STRONG: "I think we have had here today the first real temperate understanding of the facts in this case. It is characteristic, I think, of many of the discussions that come before the board. We have put up to us some very difficult and close distinctions. The board has had great anxiety in this case to settle it fairly on both sides regarding property interests and all of the other facts that enter in the case.

"It seems to me now that we have approached the point where it has become more or less a matter of personal argument, and inasmuch as this matter has to be before the open convention tomorrow, I suggest that these two gentlemen with Mr. Clague get together and see if the resolution cannot be so altered, or so understood between them, that we can remove from further discussion in this meeting any of the differences of opinion based on purely personal reasons. I move, therefore, as an amendment to the original motion that that matter be referred to a conference between the managing director and the two members involved, and they will report to the convention tomorrow any alteration or agreement in regard to the disposition of this agreement."

The amendment to the motion was regularly seconded and lost.

CHAIRMAN PLUM: "We will now vote on the original resolution."

MR. WILEY: "Just as a matter of information, how does it affect the single street sale copy?"

MR. MURDOCK: "Somebody has brought up the question of daily. Why not Sunday?"

MR. CHANDLER: "I don't know why it shouldn't. If it applies to one, it ought to apply to the other."

MR. MURDOCK: "Do you mean daily and Sunday, or are you simply designating daily, as distinct from weekly, or do you mean daily and Sunday?"

MR. PALMER: "I mean daily or Sunday, if you wish it that way."

CHAIRMAN PLUM: "The words 'daily' and 'Sunday' are included in the resolution then. Is that correct, Mr. Palmer?"

MR. PALMER: "Yes."

MR. CLAGUE: "This makes almost a definite decision at the present time. Attention has been called to the fact that it conflicts with a fundamental rule of the Bureau in the clubbing proposition. All rules of the Bureau must be standardized and applied to each division, or else we would have decisions for one division that would conflict with decisions of another division.

"I recommend that inasmuch as the final decision would go before the Board of Directors: 'It is resolved to recommend to the Board of Directors that where two daily newspapers' etc., and then it doesn't make it mandatory on the Board of Directors to take action on this resolution."

MEMBER: "The *Chicago Daily News* sells for two cents, and they can make an arrangement with the *Kenosha News* to distribute the Chicago Daily News in Kenosha, and it would be sold at the Northwestern station for two cents. They can do that now, can't they?"

MR. CLAGUE: "Surely."

MR. KELLOGG: "May I ask a question? Can this rule be mandatory, and can this division compel the directors to adopt this resolution? Are they the directors of this association, or are we making recommendations to the directors?"

CHAIRMAN PLUM: "You are simply making recommendations not to the directors, first, as I understand it, but to the general convention, and the general convention then can recommend to the directors."

MR. KELLOGG: "It seems to me Mr. Clague's point is very well taken, that we recommend this to the directors."

CHAIRMAN PLUM: "The recommendation is to the general session. I think you will regard the history of the Bureau has been fairly successful. You are departing here to make mandatory resolutions, aside from the general session, aside from the Board of Directors, and putting it in a mandatory way that violates the by-laws of the Audit Bureau of Circulations. That is not the proper procedure, if you don't mind my telling you. It should go as a recommendation to the general session. If it is a recommendation of the general session to the Board of Directors, even then it almost becomes mandatory."

MR. PALMER: "May I call attention to the printed motion before the Chairman, which reads: 'We recommend to the general session the adoption of this resolution?'"

(*Continued on page* 42)

ADVERTISING TO CURB THE UNSCRUPULOUS

Boyce & Veeder Company and Tide Water Oil Corporation Investing in Newspaper Space to Protect Motoring Public from Gas and Boyceite Bootleggers.

NEW YORK and New England have a new bootleg problem, and advertising has been called upon to correct it.

Both the Boyce & Veeder Company, manufacturers of Boyceite, and the Tide Water Oil Corporation, with its Tydol gas, started this month daring newspaper advertising campaigns aimed to protect the motoring public against unscrupulous dealers, who, it is claimed, have been substituting inferior unadvertised products in the advertisers' containers and pumps.

Tydol gas is distributed only in New York, New England, New Jersey, Pennsylvania and the District of Columbia, and the drive, now limited to New York newspapers, will not extend beyond this territory. Boyceite on the other hand hopes to have national distribution.

"We are limiting our newspaper investment now to New York and New England," C. C. Pinckney, advertising manager of the Boyce & Veeder Company, Inc., informed EDITOR & PUBLISHER.

"But we mean to extend our market and extend it right, using newspapers in other areas as fast as we can open them up."

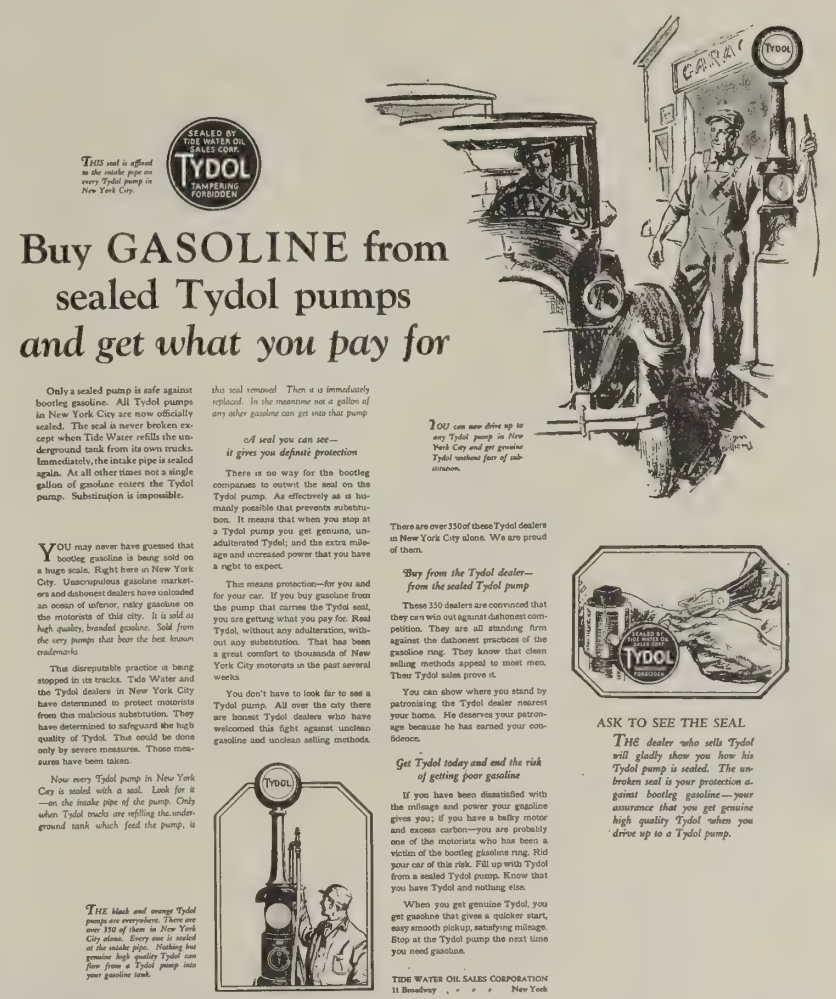
Explaining the situation which caused the start of the present intensive campaign in New York and New England newspapers, Mr. Pinckney said:

"By investigations we found unsuspecting motorists were being gyped by unscrupulous dealers. Our containers were being filled in some cases with nothing but kerosine and sold as the real product.

"Now we are advertising to educate the public to buy nothing said to be Boyceite which is not in our special non-refillable container. It has been necessary to undertake entirely new advertising methods and marketing plans to stamp out this substitution evil."

It was to be a "no newspaper year" for the Tide Water Oil Sales Corporation. Newspapers had been used extensively other years, but for 1925-26 the investment was to be in 300 billboards, as far as Tydol gasoline was concerned. Jobbers were supplied with advertising mats prepared by an agency, which they might place in their local newspapers, if they cared to pay the price themselves.

"We'll see what will happen," was the policy in effect.



What happened is described by Tidewater officials as "a nasty situation," which required what they claim to be "the biggest concentrated newspaper campaign ever run to advertise a gasoline."

Details of the "nasty situation" are best told in the text of the first advertisement of the campaign, which, using six New York newspapers, started Oct. 8, and is scheduled to continue for from eight to 12 weeks.

On the first day of the drive three full pages were used in the entire newspaper list, and the copy, under the headline "The Most Courageous Step in Gasoline History," went on to say:

"New York City is flooded with bootleg gasoline! Cheap, third rate stuff is being sold, *not* under its true colors, but through gasoline pumps which bear the names of well known, high quality gasolines. Every day thousands of New York City motorists ask for high grade gasoline and pay to get it. What they *actually* get is bootleg gasoline—unbranded, misrepresented, and flagrantly substituted. That is the unsavory condition that exists today in the sale of gasoline in New York City. It is time car owners knew the truth.

"A careful investigation disclosed that

To protect the public and 350 honest dealers, this educational copy on Tydol is being placed in New York newspapers.

Boyce-ite has changed its containers and improved its product to re-enter the market through newspaper pages.

numerous bootleg gasoline companies are operating in the city. You have never heard of them—nor of their products. At night, under cover of darkness, they distribute poor quality gasoline at cut rates to unscrupulous dealers who purport to sell well known, quality gasolines. These unscrupulous dealers sell the stuff to unsuspecting car owners at the market price of good gasoline. To cover their tracks, they are shrewd enough to buy each month a small quantity of the branded gasolines which they pose as selling.

"Car owners obtain poor results from this bootleg gasoline, and naturally enough blame these results on the high quality gasoline they *think* they purchased.

"This condition is intolerable to Tide Water and to Tydol dealers in New York City who have spent years building a reputation for fair dealing and for the quality of the service and the products they supply.

"Because of the extent to which these bootleg methods have invaded the sale of gasoline in New York City, Tide Water and the Tydol dealers feel that the public is entitled, to tangible proof that when they buy gasoline at a Tydol pump they get genuine Tydol and nothing but Tydol.

"With the cooperation of Tydol dealers, Tide Water has taken this step—to prevent substitution.

"Upon the intake pipe of every underground tank which feeds a Tydol pump in New York City a seal has been placed. This seal is controlled exclusively by Tide Water. After Tide Water has filled the tank with Tydol the intake pipe is immediately resealed. And it remains sealed until the pump again needs gasoline. Nothing but Tydol can go into that pump. Nothing but Tydol can come out of it.

"As effectively as is humanly possible that prevents substitution. It means that when you stop at a Tydol pump you get genuine, unadulterated Tydol; and the extra mileage and increased power that you have a right to expect.

"It virtually amounts to buying gasoline from a sealed container, just as you buy crackers and breakfast food and tobacco. It is your guarantee of Tydol quality. Ask your Tydol dealer to show you the seal on the intake pipe of the underground tank.

"Neither Tide Water nor the Tydol dealers have taken this step blindly. They realize that their decision to seal Tydol pumps treads hard and painfully on the toes of those who are profiting from the dishonest substitution of gasoline. They know that those concerned in New York's bootleg gasoline traffic will leave nothing undone to belittle and discredit this step. Acute pressure will be brought to bear on each Tydol dealer. Attempts will be made to convince him by every possible means that honesty does not pay.

"But you will find that your Tydol dealer is proud of the seal on his tank. It is tangible proof that he is fighting bootleg gasoline. It is proof, that in a market tainted with sharp practice, he is doing his part to promote clean selling. It is proof that he is a sound business man, building his success on the rock foundation of customer confidence rather than on the shifting sand of illegitimate profits.

"He is a good man for you—and for your family—to deal with. He deserves your support.

"We are giving New York City car

POSTAL RATE REVISION IS UNLIKELY BY INCOMING CONGRESS

Present Rates Which Went Into Effect Last April Must Have a Year's Test Rep. Kelly Believes—Sen. Moses Discontinues Hearings

By BART CAMPBELL

WASHINGTON, Oct. 22.—Postal rate revision at the approaching session of Congress is extremely unlikely.

This is the opinion expressed to EDITOR & PUBLISHER this week by members of the Congressional Postal Commission, as well as of the Senate and House Post Office Committees.

Indefinite postponement this week of further hearings by the Commission was accepted as an indication that the situation involving postal rates is to be permitted to drift well into next year.

The hearings were to be resumed on Oct. 26, but an announcement was made by Senator George H. Moses, chairman of the Commission, as well as of the Senate Post Office Committee, that the idea of continuing the sessions of the Commission in the immediate future had been abandoned.

Representative M. Clyde Kelly, of Pennsylvania, member of the House Post Office Committee, sponsor of considerable postal legislation, and father of the postal pay increase, told EDITOR & PUBLISHER this week that, in his judgment, the publishers would have to sit tight until the present second class rates had been in effect for at least a year.

Mr. Kelly predicted no postal legislation would be enacted at the coming session of Congress.

He expressed the belief, however, that eventually the present law would be so amended as to permit the publishers to return to the 1920 rates provided by the Kelly bill of that year.

As the present rates did not become operative until April 15 last, Mr. Kelly said he was certain the Post Office Department would have no recommendations to make to Congress until the present rates had been in operation until April 15 next.

"It should be remembered that the real test to which the Post Office Department is subjected is the Christmas holiday rush," said Mr. Kelly. "It is during the Christmas holidays that the overhead of the Department is at its highest peak. Until they are over neither the Department nor Congress will have an opportunity to determine definitely and finally just how entirely workable the present rates are. This is particularly true of the rates involving parcel post, which is, of course, the biggest burden the Department has to assume during the Christmas holidays.

"Until we know, therefore, how the present rates stand up under the holiday rush it would be useless for Congress to attempt any further rate revision. It will be February, anyhow, before the Department will be able to assemble complete reports on the Christmas rush, so it will be March or April, in my judgment, before any attempt can be made seriously toward changing the present law, if one is to be made that soon at all.

"I look for Congress to be in session until June, at least. The first part of the session we will be kept busy with tax revision. It isn't likely that we could interest Congress in postal rates then if we so desired. And I don't look for any postal legislation after tax revision is out of the way. I have looked over the transcript of the testimony taken by the Congressional Postal Commission during its hearings while Congress has not been in session, and I have failed to discover anything new or startling—anything, as a matter of fact, that has not been brought out before.

"I think these hearings have shed little or no fresh light upon a subject with which, in my judgment, we are already sufficiently familiar. The only thing to do now is to wait until we have before us a complete report of a year's test of the present law, and then get down to real revision upon a permanent basis. If Congress quits in May or June we might as well make up our minds that the present law will continue in effect until Congress meets again, and that no new law can be enacted or become operative until, say, the latter part of next year, or the early part of the following one. Then, in my opinion, we shall permit the publishers to go back to the 1920 rates, and in the meanwhile the publishers might as well sit tight."

It was also ascertained by EDITOR & PUBLISHER that Mr. Kelly's views reflect those of Senator Moses and other members of the Congressional Postal Commission with whom Mr. Kelly has conferred, as well as Senators and Representatives who are not identified with the Commission.

In every Congressional district, however, it was learned this week that the associations affiliated with the American Publishers' Conference are already organizing special committees to sell the proposed restoration of the 1920 rates to senators and representatives. It is the basic idea of this educational movement that the average member of Congress is in need of enlightenment by his local publisher as to the true postal situation so far as second-class rates are concerned.

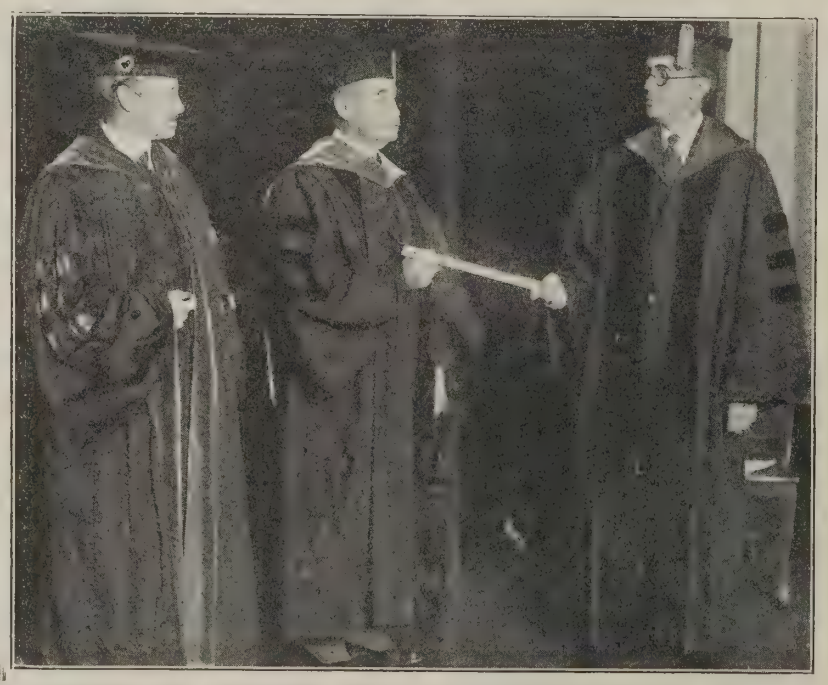
The American Publishers' Conference issued this week the following statement:

"The Congressional Postal Commission held hearings in various sections of the country during the summer months for the purpose of ascertaining the views of representative mail users. At that time various publishers testified before this official body and recommended certain postal policies for the consideration of the Commission and the 69th Congress. The 1920 rate would be a reduction affecting all users of second class mail, it was said, and would allow publishers to renew mail subscriptions with consequent increased business for the postal service.

"Briefly, all organized groups of the publishing industry presented arguments advocating the return to the 1920 rate schedules on second class matter, which are the rates which went into effect July 1, 1919, under the War Revenue Act of 1917. The arguments advanced by the publishers in favor of these 1920 rates were that the largest percentage of increase in the revenues derived by the Government from second class matter were received during the fiscal year these rates were in effect; that further increases which went into effect during the fiscal years 1921 and 1922 caused many publishers to seek other means than the Post Office Department for the distribution of their publications and imposed undue hardships upon those who were forced to use the Post Office.

"Spokesmen for associations of publishers and individual publishers generally, urged the retention of the present free-in-county privilege and the zone system in favoring reductions in the present second class rates.

"Representatives of the larger metropolitan newspapers recommended to the committee that in addition to the 1920 rate a special mail rate on bundles slightly in excess of the average baggage car rate be fixed by law. It was the contention of the metropolitan press that this special rate would bring back into the mails millions of pounds of second class matter now going by baggage or express.



"The testimony of the smaller publishers was to the effect that the bundle rate might answer the needs of the metropolitan papers, but would not help the thousands of small publishers whose publications are now 100 per cent in the mails.

"While the cost report of the Post Office Department shows a deficit of $74,000,000 chargeable to second class mail matter during the fiscal year 1923, publishers have contended that included in the allocations of expenses is the enormous expenditure for rural delively and city carrier service which were established primarily for the delivery of first class mail matter; that the number of carriers and the length of the route are determined independently of the weight or volume of second class mail and literally by the number of stops for first class mail and that practically the entire cost of the carrier service would exist for the handling of the present volume of first class mail if there were no second class mail. Second class is charged with a total of over $47,000,000 of the expenses for city and rural service. It was further argued by the publishers that if second class mail were entirely withdrawn from the postal service the saving in expenses that could be affected by the Post Office Department would be much less than the present revenue from second class.

"There were other examples similar to the foregoing brought to the attenion of the committee regarding the alleged deficits chargeable to second class mail, which indicated that the additional 'out-of-pocket' expense to the Post Office Department in the handling of second class mail was much less than the revenue paid.

"Testimony presented by the larger publishers showed that as a result of the increase in the postage rates a large amount of their publications were being distributed through agencies other than the Post Office Department, with consequent loss of revenue to the Government."

DR. NOYES—"FOR SPREADING INFORMATION"

THE degree of doctor of laws was conferred by George Washington University Tuesday upon Frank B. Noyes, president of the Associated Press.

It was awarded, the citation said, "in recognition of his contribution to American journalism as manager and editor of influential papers and of his constructive work on behalf of the wide dissemination of accurate and essential information as president for a quarter of a century of the Associated Press."

Dr. William Mather Lewis, president of the institution, conferred the degree.

Mr. Noyes was born in Washington on July 7, 1863, a son of Crosby Stuart and Elizabeth William Noyes. He received his early education at the Washington High School and the old Columbian University, now the George Washington Preparatory School.

From 1881 to 1901 Mr. Noyes served the *Evening Star* as manager. In 1902 he became editor of the *Chicago Record-Herald*, a position he filled until 1909. In 1910 he accepted the presidency of the Washington Evening Star Company. He has been a director of the executive committee of the Associated Press since 1894 and President of that organization since 1909.

In the photograph above, Mr. Noyes is shown receiving the degree from President Lewis, while at the left stands Frederick B. Robinson, Ph. D., Dean of the School of Business and Civic Administration, College of the City of New York.

ADS CURB UNSCRUPULOUS

(*Continued from page* 11)

owners the facts about the unscrupulous substitution of gasoline. We have taken a courageous step to fight it. The case now goes to the public for a verdict.

"We believe that New York City car owners want quality gasoline and want it honestly sold. If we have your support, you can endorse our decision by patronizing your Tydol dealer and telling him that you approve of his courage.

"On the opposite page are listed the Tydol dealers in New York City who are fighting bootleg gasoline.

"Pick the Tydol dealer who is nearest your home and get genuine Tydol today. That is the most convincing proof you can give him of your support. Tide Water Oil Sales Corporation, 11 Broadway, New York."

Results?

That question was asked this week of F. W. Clark, advertising manager of the Tide Water Oil Sales Corporation.

"The results were far in excess of what we anticipated," he said. "Because the oil industry is highly competitive, we cannot divulge the exact figures, but we are entirely satisfied.

"We found that absolutely the only means open to us to clean up the situation was the newspapers. In the newspapers an advertiser gets more attention than in the magazines, and the copy can carry a more detailed message than the billboards."

Answering the same question W. C. Gittinger, manager of Joseph Richards, Inc., the agency which placed the campaign, declared:

"The campaign wasn't designed to increase sales, although of course it will. It was launched primarily to clear up a nasty situation. It is too early to tell about increase in sales. But this I do know, that the Tide Water Oil Sales Corporation lost only three pumps through their action."

The campaign will not end until the first of December. It is operating on a declining gasoline market, Mr. Gittinger pointed out, yet he was confident that in six week's time he will be able to show big increases in sales.

Copy is scheduled to appear every Thursday and Saturday throughout the drive in the newspaper list which consists of the *American*, the *Herald-Tribune*, the *Jewish Journal*, the *Daily News*, the *Times*, and *The World*.

WORKS COUNCIL SOLVES EMPLOYE PROBLEM

"All Industrial Problems Can Be Thought Out; Not Fought Out" Is Maxim of H. R. Swartz, President, Intertype Corporation, Who Tells How Employe Representation Increases Efficiency and Morale

By PHILIP SCHUYLER

BEFORE H. R. Swartz, president of the Intertype Corporation, sailed for England this week on one of his many trips to that country, he was guest of honor at a banquet given by the Works Council, an organization of Intertype employes.

Since it was founded in 1919, operation of the Works Council has been a jealously guarded secret. Nothing has ever before been written about it.

Mr. Swartz this week, however, asked and was granted the right to tell at least the high spots for the benefit of EDITOR & PUBLISHER *readers.*

"Not that I am giving any advice to publishers," he said. I don't believe in that."

The story he told to EDITOR & PUBLISHER *was a story of "industrial democracy," a story of factory management which might be applied to any of the thousands of newspaper factories throughout the nation.*

"ALL industrial problems can be thought out, not fought out."

That is the whole theory behind the industrial constitution of the Intertype Corporation, according to President Swartz.

H. R. SWARTZ

Adopted by the employes of Intertype, the constitution, in its own words, aims "to secure cooperation and promote industrial peace and justice."

Under the constitution the factory becomes a miniature republic. For every 25 employes in each department a representative is elected to be a member of the Department Committee. No person with the power to hire or fire is eligible as an employe representative. Thus the factory's House of Representatives is organized.

The chairmen of these department committees, also elected by the employes, become members of the Works Council, which is also made up of three foremen, elected by the factory foremen, and three members appointed by the general management.

The council deals with the following matters:

"Appeals brought before it where a department committee is unable to reach a satisfactory adjustment with the Works Manager.

"Questions referred to it by the management or on petition of two-thirds of the employe representatives or three or more department commitees.

"The appointment of Special Committees.

"Amendments to the constitution."

One article of the constitution declares:

"The management and the employes believe in the peaceful settlement of all differences and that there should be no strikes, lockouts, or other kind of industrial warfare, when methods of adjustment provided for herein remain untried or when arbitration is offered the complaining parties, and they have therefore agreed upon the following methods for the adjustment of such differences as may arise:

2. "All questions must be taken up first with the foreman by the party in interest either in person or through the chairman of his regularly elected committees.

3. "If the foreman does not adjust the matter satisfactorily, the complainant may request his chairman from his Department to present the matter to the Department Committee for hearing. Said Committee shall meet promptly to consider such matter and if, in its judgment, such action is warranted, shall take it up with the Works Manager.

4. "If the matter is not otherwise adjusted to the satisfaction of the Committee, it may in its discretion bring an appeal before the Works Council. If no appeal is taken, the matter shall be deemed adjusted.

5. "If the Works Council is unable to reach a decision in any case on petition signed by a majority vote of the Representatives of either group, the matter may be brought before the President of the Corporation or those whom he shall designate. If no such petition is presented, the matter shall be deemed adjusted.

6. "If the President of the Corporation or his representatives do not finally reach an adjustment concerning any complaint presented by employes for decision, the Management may at its option offer arbitration.

7. "If, at any time, the Management has a complaint against the employes which is not adjusted by conference, the employes may offer arbitration.

8. "If, at any time, arbitration is offered and those interested cannot agree upon arbitrators, or the method of arbitration, this matter shall be settled by the Arbitration Committee of the Chamber of Commerce of the State of New York.

9. "The right of the parties to resort to a strike as a measure of last resort, where arbitration is not offered, shall not be deemed in any way impaired."

"We have had no strike and no question has been brought to me for arbitration since the constitution was adopted," Mr. Swartz declared.

"It is solely because the employes have a hand in the business. Every problem is looked at from the human side.

"Take the case of an ordinary manufacturer, whether he makes newspapers or fly swatters. He buys a machine, let us say, paying $10,000 for it. He has that machine insured against every element which might possibly injure it. He provides it with the best possible lubricating oil. He nurses it like a baby. And forgets completely the man he has employed to operate it?

"Don't you see his mistake?

"By the Works Council we seek to insure our working men. The council sees that the housing conditions are satisfactory, that sanitary conditions are the best available. It attends to hundreds of details of interest to employes. It 'humanizes' the business.

"We also urge our men to buy stock in the company. Thirty per cent of the preferred stock is held by people connected with the company.

"We let them buy this stock in any way they want, by cash or partial payment. And we set the price. Unusually we sell it at par, although the market price is at present 115. Under a rule we have made no employe can sell his stock to anyone but us.

"You have no idea," Mr. Swartz concluded, "what a humanized organization can accomplish.

"I could talk all day and not tell you all that has been done.

"I believe that in every instance where departments in any business come in contact, matters of policy, planning and scheduling work, sales and advertising problems, should be considered by a commitee of men representing each department interested, preferably the heads of the departments."

Mr. Swartz has been president of Intertype Corporation since 1917.

Like many heads of big businesses he has worked up from the ranks, and dates back his first employment to work on a newspaper.

"In one of the smaller cities of the State of Pennsylvania, where I lived in my early youth, I got a job delivering the morning newspaper before school hours," he said.

"After the school closed for the season I was promoted, and my new title was "Printer's Devil."

"After I had held that job for about a month, a circus, which had been widely advertised, came to town and upon its arrival I was on the circus grounds. I thought I might see Mr. Barnum but missed him and got into conversation with the man in charge of the steam calliope. After some negotiations he told me he would give me a ticket to the circus if I would carry water from the railroad station to fill the boiler.

"After emptying the twelfth bucket into the boiler, and beginning to get tired I told the calliope man I thought he also needed a boiler maker, as I felt sure that the boiler was leaking, but in a very encouraging manner he told me not to lose heart—that a few more buckets was all that was necessary. I have a very distinct recollection that it took 13 more.

"I felt quite relieved when I found the boiler was filled for I thought my job was completed, but much to my surprise I was informed that I would have to go into the parade and shovel coke into the boiler.

"I had not asked my boss for the day off, but my fear as to what explanation I should make when I presented myself the next morning was dispelled when I observed that the paper had printed a lengthy article about the wonderful circus parade and particularly about the steam calliope."

"The article went on to say that it was no wonder the steam calliope behaved so beautifully as it was fired by the office devil, and that was the very word that greeted me upon my arrival at the office, —"FIRED."

SONGS OF THE CRAFT

(*Written Exclusively for* EDITOR & PUBLISHER)

By Henry Edward Warner

TO A NOVICE

(One writes me for himself and a collaborator: "We are trying for magazine stories, but we don't know just what will appeal most to readers. Won't you suggest what we shall write about?")

Write about love, boys! Get in your hearts
The motif transcendent, the thing that compels!
Find where the thing they call happiness starts,
And catch it, and picture it there where it wells!
Let the cold cynic come scoff if he will,
But Love is life's mistress, who sits on a Hill!

High on her Hill, boys! . . Beckons you there,
And reads you a story that never grows cold!
High on her Hill, with her company fair,
Jeweled her crown, and her heart is of gold!
Write about love, boys, not hatred nor strife,
For love is immortal, and passion is Life!

LA PRENSA CELEBRATES

Four Banquets to Employes Mark Daily's 56th Anniversary

(*By Cable to* EDITOR & PUBLISHER)

BUENOS AIRES, Oct. 20.—In celebration of the fifty-sixth anniversary of the founding of *La Prensa* of this city, Dr. Ezequiel P. Paz, director, gave four banquets this week to his employes. All of the dinners were held in the richly decorated banquet hall in the LaPrensa. The first banquet was held Sunday night, Oct. 18, the fifty-sixth birthday of the paper. The others were given during succeeding days.

DR. EZEQUIEL P. PAZ

The first banquet was given to 300 members of the editorial staff and the heads of the business departments of LaPrensa. The only guests present were Karl A. Bickel, president of the United Press; James I. Miller, vice-president and South American manager, and J. Bryant Powers, Buenos Aires manager, of the United Press.

Dr. Paz, who had just returned from Europe to attend the annual banquets, in an address announced that LaPrensa was closing the greatest year of progress in the history of the newspaper. He said:

"Dean Walter Williams, of the University of Missouri School of Journalism, in a famous epigram once said: 'No one should write as a journalist that which he cannot say as a gentleman.' Inscribe this motto in letters of gold in a prominent place, so that it will always be in sight on your work tables."

LaPrensa recently ordered installation of a second rotogravure press. A large portion of the interior of the LaPrensa building is being remodeled.

MENCKEN "ON TRIAL"

Mock Court Held When Dayton Scribes Hold N. Y. Reunion

Henry L. Mencken, of the *Baltimore Sun,* was made culprit in a mock trial, when the "Grenadiers of Dayton, Tenn.," held a reunion in New York last week as dinner guests of the defense counsel in the Scopes trial.

Forty newspaper correspondents attended.

Mr. Mencken was accused of being the sworn enemy of the Rotarian.

Type Company Adopts Group Insurance

A $1,625,500 group life insurance policy and a group health and accident policy for $1,645 weekly benefits, covering 1,114 employees of the American Type Founders Company has been closed with the Metropolitan Life Insurance Company. The insurance is written on what is known as a cooperative basis, in which the company shares the cost with each contributing employe.

"NOT SERVILE MINDS, BUT SINCERE"

Lippmann Tells Teachers Majority Opinion Cannot Be Twisted—Must Look to the Facts to Find Truth

Commenting on the Scopes case in Tennessee Walter Lippmann, editor of the editorial page of the *New York World,* before the State Teachers' Association at Indianapolis, this week said: "The Legislature of Tennessee passed a bill to forbid the teaching in schools supported by public funds of what is popularly called the doctrine of evolution. We are not concerned here as to the truth of the doctrine of evolution. * * *

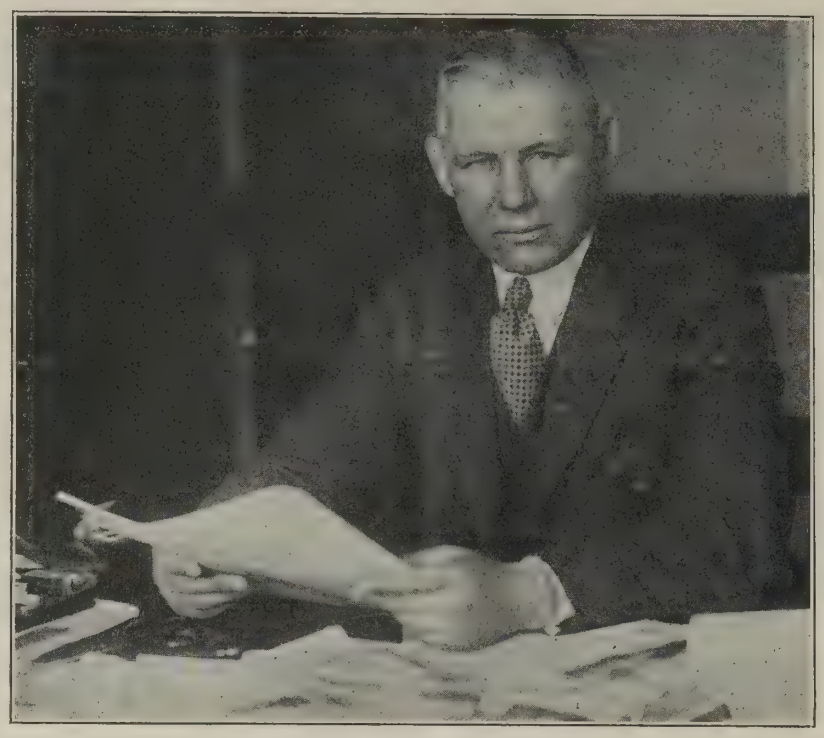
"We are concerned with a much more practical question—the question of the arguments used to justify the Legislature in exercising such power. Those who believe in the law argued that the taxpayers paid for the schools, and that therefore a majority of those taxpayers had the right to say how their money was to be spent. If they did not want their tax money to be spent on the teaching of a doctrine of which they disapproved, they had, acting through their Representatives in the Legislature, every right to forbid it. You have in this argument the doctrine of the absolute right of the majority to decide all questions. * * * According to this theory, science must look not to the facts and to reason for its conclusions but to the majority of the Legislature. The teacher, under this theory, becomes a mere transmitter of what the majority thinks the next generation ought to know.

"This same doctrine is widely held in my profession. There are newspaper men who feel that they have said the last word on any subject when they have announced that they are giving the public what it wants. The doctrine has produced the tabloid newspaper, it has produced yellow journalism, it has produced jingo journalism, it has produced stale and tepid journalism; it has produced all the journalism in which the journalist regards himself as a caterer to the multitude and not as a man bound to seek the facts patiently and honestly and to report them fearlessly. The statute passed by the Tennessee Legislature carries this servile doctrine into the fabric of the law. * * *

"If we owe any duty to society, it is to present ourselves as people who do not live with our ears to the ground, who do not ride before every wind, who do not, in short, sacrifice everything for the applause of the gallery. Majority rule is a device for governing certain institutions, but it is neither omnipotent nor omniscient, nor applicable to every phase of human life. If you are ill you go to the best doctor and seek his advice, and when you have that advice you don't care a plugged nickel if Congress and forty-eight State Legislatures all pass resolutions saying that he's wrong. If you want to build a home you go to an architect and an engineer, not to a mass meeting. If you read a newspaper you want the editor's honest opinion and not his opinion of what he thinks you would like him to think. If you go to school and study biology you want to know what biologists think and not what the Legislature of Tennessee thinks. For truth, for beauty, for friendship, for the things of the spirit, you do not go to the greatest number, for if you do you will not find them.

"The majority is a sovereign power which, like every other sovereign power, King, Prince or institution, is tolerable only if kept strictly within constitutional limits. I object to the theory of the Tennessee statute as I object to the doctrine of the divine right of kings, because it is an assertion of autocratic power which is incompatible with a free and ordered civilization. Men can no more tolerate an absolute majority than they can tolerate an absolute monarch. * * *

"It is no easy thing, I admit, to determine where the powers of the majority ought to end. But all constutional government is an effort to fix the limits of power, and we in this genceration can no more abandon the effort to set limits upon power than did our forefathers. They framed Constitutions and enacted Bills of Rights to limit the power of the sovereigns of their day. The American Constitution is perhaps the most systematic effort ever made by man to give weight to all the powers within the Nation and yet to prevent any one of them from mastering all the others. The very essence of the American Constitution is an attempt to keep all majorities in equilibrium, balanced, with none of them absolute. If we wish to preserve not necessarily the letter of the Constitution but its essence, we must be quick to detect and quick to resist usurpation by any kind of power.



"The power which we have to consider at this moment is the power of random majorities collected and directed by organized propaganda. These majorities, for which some men are now claiming the power to regulate our personal lives, our habits, our customs and our consciences, are produced by the conjunction of organized publicity and an incompleted education. The opinions of these majorities, for which such vast power is claimed, are not spontaneous judgments. They are worked up, stoked up, arranged and calculated by men, some of them sincere and some of them insincere, who have discovered this great and ominous fact: that popular education has made it possible to reach people with printed matter, but it has not prepared those people to discriminate as to what they receive from printed matter The little red school house has made it easy for the propagandist to flourish. The little red school house has not yet made a citizenship immune to the blandishments of those who want to put things across.

"How can it? How can you as teachers build up a resistance in your pupils against propaganda? How can we as newspaper men keep our pages clean against those who wish to use them not to report the facts and express their opinions but to create prejudice for something they wish to accomplish? I know of no way except by building up our own resistance to the propagandist.

"The fundamental way to build up that resistance is to clear our own minds of the sophistry, of the democratic fallacy, that there is any peculiar righteousness in majorities. Unless we can look to the facts for our truths and not to the opinions of majorities, unless we look for our authority to tested competence and not to collected crowds, unless we learn to follow truth wherever it leads and not to judge it by the amount of applause, we are not fit to teach schools or to conduct newspapers.

"We shall be failing in our highest duty to society, which is to contribute not a servile mind but a sincere one."

NEWSPAPER MAKERS AT WORK

A Bostonian in Montana—Joseph Markham

"A CASE of a small town newspaper coming through strong in a big town."

That was the claim made this week for his daily by Joseph L. Markham, general manager of the *Anaconda* (Mont.) *Standard.*

Anaconda is a city of 11,000 population, and the Standard, according to Mr. Markham, does 80 per cent of its business, both local advertising and circulation, in Butte, Mont., a city of 50,000, 26 miles distant.

"It is a case of two cities forming one market," Mr. Markham declared. "We maintain our advertising and editorial offices in Butte, although we print in Anaconda."

Private telephone and telegraph wires link the business and editorial departments with the mechanical plant. The situation dates back to 1889, when the Standard was founded by Marcus Daly, the then copper king. He wanted an Associated Press membership. His application was protested by Butte, and so he went 26 miles away, purchased a weekly, made it a daily, and built a special railway to carry copies of his paper into the rival city.

Mr. Markham disclosed an interesting sidelight regarding the foundation of the Anaconda Standard. Its first editor, he said, was J. H. Durston, now publisher of the *Butte Post,* but who before going West was associated with the *Syracuse* (N. Y.) *Standard.* Mr. Durston brought many of the New York state newspaper men with him to Montana, and there are still some members of the Anaconda Standard's staff who formerly worked for the Syracuse newspaper of the same name.

Mr. Markham has been connected with the Standard for three and a half years, coming there first as business manager. Prior to that he had been associated for fourteen years with the *Billings* (Mont.) *Gazette.* For the Gazette he had worked as reporter, editor, circulation manager, mechanical superintendent and advertising manager at various times.

By birth Mr. Markham is an Easterner. He started his business career as a printer, operating job plants in Holyoke and Boston, Mass.

EDITOR'S GOSSIP FINE SWAYS ELECTION

Covington, Ky., Judge Who Blocked Appeal of B. I. Susong of Kentucky Post, Defeated at Polls

As an interesting sequel to the story published in Editor & Publisher last June anent the attempt of Editor Bruce I. Susong of the *Covington* (Ky.) *Kentucky Post,* Scripps-Howard daily, to declare the Kentucky "gossip law" unconstitutional came in a clean cut popular victory for the freedom of the press at the Covington primaries held Saturday, Oct. 17.

At this election politics was forgotten in the issue raised by the Kentucky Post on the decision of Police Judge Louis L. Manson, who refused to raise the fine of $15 inflicted on Editor Susong, June 20, to a sum sufficient to file an appeal against the decision to the higher Kentucky courts. The purpose of this was to have the "gossip law" declared unconstitutional.

Judge Manson had been on the bench eight years and his record aside from the Susong decision was above the average. He came up for re-election in the primary and was defeated hands down. Manson's political sponsor Mayor Dan O'Donovan, Democrat, whose faction took the side of Manson in the primary fight, did not run himself, but his brother John O'Donovan who was candidate in the primary for city commissioner ran a poor eleventh. This was regarded as a repudiation of both Mayor O'Donovan and Police Judge Manson.

One of the strongest factors in the fight has been the unceasing satirical hammering of the Doc Conner column in the Kentucky Post which held up the Mayor "Figurin' Dan" daily to public ridicule and took sly cracks at Manson and the city commissioners who side with Mayor O'Donovan in the contest.

Commenting on the victory, Editor Susong said:

"The results of the primary were a clean cut victory for freedom of the press by the votes of the people of Covington, irrespective of politics. This devision was the only blot on the record of Judge Manson and the campaign was made on that issue as a means of bringing about a popular verdict on the question of the legality of the 'gossip law.'

"Following this popular victory, our attorneys filed an injunction suit today to prevent the collection of the fine of $15 and at the same time filed a declaration of rights appealing to Attorney General Frank M. Dougherty of Kentucky to correct the error of Judge Manson's court in refusing to raise the fine to a sum sufficient to allow an appeal. If we get a favorable decision from Attorney General Dougherty, we can then proceed to take steps towards declaring the 'gossip law' unconstitutional."

Editor Susong said that the publication of the facts in the case last June by Editor & Publisher had attracted the attention of editors in all parts of the country. Many had written him, he said, denouncing both the 'gossip law' and the decision of Judge Manson and he felt certain that the news of the popular verdict in behalf of the fight to declare it unconstitutional would prove of universal interest to the readers of Editor & Publisher.

Pillard Heads Ad Course

Basil H. Pillard, formerly of the William T. Mullally Company, Pratt and Lindsay, and now with Encyclopedia Britannica, has been appointed by the Twenty-third street Y. M. C. A. to conduct the Blanchard Course in advertising which opens Oct. 27. Mr. Pillard will succeed Frank Le Roy Blanchard, advertising expert connected with the Henry L. Doherty Company who began the course 21 years ago and has conducted it ever since. Mr. Pillard has assisted Mr. Blanchard in the course for the past three years. He is a graduate of Yale, Class of 1917.

ADVERTISING WOMEN HONOR VERNON

Dinner to Famous English Agent As Guest Prepares to Sail—McClelland Tells of Radio Advancement

C. Harold Vernon, honorary international vice-president of the A. A. C. of W., was guest of honor on the evening of his departure for England at the October dinner of the League of Advertising Women of New York at the Advertising Club on Tuesday.

Miss Minna Hall Simmons, president of the League, recalled the many courtesies and kindnesses received by the members of the League during the International Advertising convention in London last year at the hands of Mr. Vernon, and complimented him on the many friendships that he had won and the big results in an international co-operative way that he had achieved.

In a happy response Mr. Vernon told of the little dinner that had been given in his honor by the Thirty Club in London at the time of his departure for America, of the many courtesies he had received from the advertising people of the United States, of the successful outcome of his visits to Philadelphia, Boston and elsewhere, and expressed the opinion that Britain would be represented at the Philadelphia meeting by a delegation of two or three hundred. He said that Mrs. Vernon would accompany him on that occasion.

Other speakers were G. F. McClelland, of radio station WEAF of the American Telephone & Telegraph Company, who discussed the subject of "Broadcasting Good-Will"; D. S. Schenck, of the National Outdoor Advertising Bureau, whose subject was "A Few Phases of Outdoor Advertising," and E. R. Dunning, eastern advertising manager of the *Woman's Home Companion,* who discussed the subject, "Knowing the National Market."

The program had been arranged by Miss Minerva Harris, and the speakers were introduced by the chairman of the evening, Miss Laura Rosenstein.

Mr. McClelland gave some interesting facts with respect to the development of broadcasting. He said that WEAF now employs about 1,000 artists; that the payroll for talent on a monthly basis amounts to about $3,000; that there are about 1,000,000 sets in use in the WEAF area; that as many as 500,000 letters have been received in response to a radio request; that the annual budget for the maintenance of the station represents a sum very close to $1,000,000 a year; that there are twelve people regularly employed in the correspondents' department, and that the staff in the studio and station numbers about eighty-five; also that 140,000 charts had been distributed to those who were taking the setting-up exercises that are on at 6:45 every morning, and that the first Victor hour had produced more than 100,000 letters. At the present time there are about 576 broadcasting stations in the United States.

Mr. Schenck told of the "marvelous results" achieved by some national advertisers through the medium of outdoor advertising. He said that the annual expenditure in that department of advertising represents about $13,000,000 a year; that the most spectacular outdoor signs are to be found in the neighborhood of 42nd street and Broadway, in which district there are approximately 275,000 visitors a day. He spoke of the success attending the campaign of the Calumet Baking Powder Company, which concern had for years pursued an intensive outdoor campaign, working one county, one territory at a time, and on the profits derived from that territory taking on additional territory. He told one story of a salesman who worked three and a half years on one contract and finally put it over, his commissions on that one contract amounting to $300,000. He told about the outdoor effort of Camel Cigarettes. Said that Dodge Brothers had been using outdoor since 1916 with practically the same style of copy. Said that Goodyear had demonstrated through a ninety-day intensive campaign exploiting Wingfoot Tire the value of the medium, in fact had increased sales in that period something like 148 per cent.

Mr. Dunning illustrated his talk with the Crowell National Market Map, in which blue, red and yellow colors are used in counties and states to show population and purchasing power. He read letters from important national advertisers, stressing the importance of this map and other market data supplied by the Crowell Publishing Company to general sales managers and salesmen in the charting of markets.

BAD NEWS—ITS USE AND ABUSE

By Sir Ernest Benn

Director Benn Brothers, Limited, Publishers of English Trade and Class Journals. Written for EDITOR & PUBLISHER.

I have just returned home from a very wonderful five or six weeks in the United States and Canada. Time spent on the other side of the Atlantic is always wonderful to me. The air, and especially the economic air, is so exhilarating, but I come home very much worried on a question which wants more discussion by journalists and publishers than it has received—the question of the news about the nations which is exported to the other nations.

I went to America, as an Englishman always goes everywhere, with the old-fashioned feeling that England is the centre of the earth, that English ideas and English things are still rather better than others, and possessing a normal and natural supply of national pride and confidence in my social and political position as an Englishman and a Londoner. But I was at first surprised, then grieved, and finally pained, to find myself received on all hands with expressions of sympathy and condolences.

My American friends treated me as I should treat one of my acquaintances the day after he had buried his dearest relative, or the day after he had come through the bankruptcy court. I was an object of sympathy, of condolence, of anxious enquiries, and I soon found that public opinion on the other side of the Atlantic has come to the conclusion that the old country is down and out and practically done for.

It is almost as noticeable in Canada as it is in the United States itself. A working man at one of the Ontario Government Electricity Works told me that he would like to go to the old country to see his old mother before she died, but he felt he could not do so because "there was no food in England." That was the ignorant and exaggerated opinion of a working man at Niagara, but it sums up for me the opinion that has permeated the whole American continent with regard to Europe in general and Great Britain in particular. Of course that opinion is wholly false. We have our troubles in England but they are minor political troubles, and the solid rock of British commerce and the solid British business man steadily working on it, are as good as ever they were. There is a margin of trouble arising out of war and war's aftermath, but to allow that margin to masquerade as a whole, is to allow a totally false impression to appear.

It seems to me that the EDITOR & PUBLISHER might usefully develop a discussion on this question because there can be no doubt that the newspapers are to a very large extent responsible for this state of affairs. The troublesome fact is that from the newspaper's point of view bad news is good news, and good news is seldom regarded as good "copy." It is not peculiar to the American press. It is a weakness of the whole press. While London is entertained with lurid details of bootlegging and murder which are thought in England to be leading occupations in America, the American citizen is filled up with stories about Communists and Reds which to him are rapidly becoming typical of the English nation as a whole. Both views are equally wide of the mark.

The trouble is by no means confined to England and America. The last time that I visited Vienna my friends there were concerned for my personal safety because of the murders which they seemed to think were daily occurrences in Hyde Park. Meantime my people at home were prayerfully waiting for my return hoping that I might escape stray bullets from the Anti-Jewish riots which, from the information they could gather, were daily occurrences in the streets of Vienna. It seems as if no nation can get anything but bad news about other nations.

The reactions of this sort of thing on the peace movement must be very serious. You can have no understanding between the nations when each is taught that all the others are barbarians. But I am at the moment even more concerned with the reactions of this abuse upon the commerce of the world. You cannot conduct commerce with a people whose credit has been underminded by the impression that they are composed of murderers or communists. I am quite aware that I am raising a very difficult question. It is too much to expect an American newspaper to devote its wonderful head-lines to the simple, homely and unexciting fact that England, notwithstanding its politicians, is still the cleanest, sweetest and most lovely place on earth. Nor are the London papers likely to get excited in explaining to their readers that the American citizen is the most hospitable, generous and kindly creature that God ever made. The telegraph companies could never keep up their revenues on the repetition of the fact that the exhilaration of Canada is the nearest approach to pure delight that I know.

But it does seem to me that it is up to the press to make quite sure that in giving us our day by day sensation it does not undermine and destroy these essential, fundamental and all-important things.

EDITOR SAYS WEALTH INFLUENCING PRESS

Advertising Agencies Often Seek to Direct Editorial Comment, W. T. Evjue of Madison Capital Times Declares

"The press of America is not free; centralized wealth has wielded an influence that has gone to the very heart of the integrity of the American newspaper."

William T. Evjue, editor of the *Madison* (Wis.) *Capital Times,* delivered the challenge above, while testifying recently before a special committee of ten alumni of the University of Wisconsin, who were conducting hearings to determine the effect of endowments from incorporated foundations on the university, following the action of the board of regents rejecting such gifts in the future.

The Capital Times is the leading politically Progressive paper in Wisconsin, having fought since its inception for the continuation of Robert M. La Follette control. It has been repeatedly termed the "rebel newspaper" of Wisconsin, for its editor, Mr. Evjue, is one of the few remaining battlers on that frontier of personal journalism. His editorials are declared to be often the most vitriolic in the state, blazing with the energetic and caustic personality of the editor.

"I do not want to happen to the educational institutions of this country," he said, "that which has happened to the press of America. And I am speaking out of 20 years of experience in newspaper work.

"Still if you go to an average newspaper editor or publisher in this country today and endeavor to [illegible] influence wielded by centralized wealth through the great power it has in controlling millions of dollars in advertising, through the control of bank credit, and through the ability to instil in the average newspaper publisher the fear that if he does not do what the powers of wealth want to do, he will be faced with serious competition, you will find him very indignantly denying that these influences have had any part in moulding or shaping the editorial course of his newspaper."

To suport his charges, Mr. Evjue offered as evidence facts to show that ten days before the Wisconsin legislature planned to pass a bill to put a sales tax on tobacco, a New York advertising agency sent telegrams to Wisconsin newspapers, urging them to use their influence to defeat the bill. The appearance of editorials in Wisconsin newspapers soon after, opposing the bill, was ascribed by Mr. Evjue to the influence of the telegrams. He followed with another charge that advertising agencies sent telgrams to newspapers urging them to bring about the passage of the Mellon tax bill, some time ago.

"I can show you at the first time that the Mellon plan was before Congress, at a time when even the ways and means committee of the house had not received a copy of the Mellon plan bill, there were editorials in hundreds of American newspapers, favoring the passage of the Mellon plan, and the form of texation that it provided. Prior to the position taken by the newspapers of this country these newspapers had received telegrams from big advertising agencies of the country asking them to do everything in their power in an editorial way to bring about the passage of the Mellon plan."

Texans to Meet in Dallas Oct. 27

The annual meeting of the Texas Daily Press League will be held at Dallas, Tex., Oct. 27. Speakers on the program are C. E. Palmer, *Texarkana Four States Press and Journal;* Houston Harte, *San Angelo Standard;* Lowrey Martin, *Corsicana Sun;* A. S. Mayse, *Sherman Democrat;* W. C. Edwards, *Denton Record-Chronicle;* Bernard Hanks, *Abilene Reporter;* Shelley Tracy, Southwestern Advertising Company; C. O. Morris, of the Kellogg Company; W. S. Spotts, of Bonham, and J. L. Greer, of Denison, chairman of the League's Advertising Bureau.

Chicago Tribune Sued for $700,000

Suit for $700,000 against the *Chicago Daily Tribune* for alleged libelous articles published in 1923, was filed in the federal court in Kansas City, Mo., Oct. 17, by Charles H. Apple, president of the American Gasoline Company, with headquarters in Kansas City. Mr. Apple charges the Tribune articles wrongfully named him as father of Lila Lee, moving picture actress.

New Indiana Daily Launched

The *LaPorte* (Ind.) *Times* daily, started publication recently. The Times is being edited by Harold Van Trump, for 12 years editor of the *Rochester* (Ind.) *News Sentinel.* Arthur B. Stern, newspaper man of LaPorte, will be city editor. The paper will be Republican in politics. It carries international News wire and feature service.

Roe Buys Another Paper

Ludwig I. Roe, editor of the *Montevideo* (Minn.) *News,* has bought the *Thief River Falls Tribune* of J. S. Arneson.

It Should Have Been Memphis

The Intertype double page advertisement last week contained an error in the listing of branch offices. New Orleans was listed as the Southern branch, instead of Memphis. The Intertype Southern agency was in New Orleans years ago but was moved to Memphis because the latter city happened to be nearer the geographical center of the Intertype business in the South. The address is McCall Building, Memphis, Tenn.

FREE ART EXHIBITS TO FOSTER LOCAL TALENT

Milwaukee Journal Conducts Gallery for Display and Sale of Wisconsin Artist's Productions—Readers Show Lively Interest in Exhibitions and Newspaper Is Praised for Civic Enterprise

A GALLERY of local art, conducted by a newspaper!

Encouragement of the talented youth of a community, so often ignored by prosperous elements that might naturally be expected to foster the sensitive qualities of local creators in the interest of beauty and refinement that go to make life interesting.

A revelation of appreciation of color and form in pictures by the general public, relieving the drab of work-a-day life for many thousands of culture-thirsty persons.

This has been the unique enterprise of the *Milwaukee Journal*, executed with

"Hollyhocks," by Hettie J. Hoyt, exhibited by Milwaukee Journal

distinction and bringing to that newspaper deserved praise from its readers and particularly from a circle of distinguished citizens who place high value upon art as a civic influence.

Nearly a year ago the Journal began its crusade for the recognition of struggling or successful Wisconsin graphic artists. An exhibition was arranged in the lounge of the handsome new Journal building, open to the public throughout the day, free of charge. Many works of art bore price tags. Paintings and etchings on view were limited to Wisconsin artists, or artists who have previously called the Badger State home, with the further restriction that the exhibitor must have had a painting of his own showing previously in a recognized gallery.

The public was invited to view the pictures, and thousands of men, women and children were attracted. Exhibits were changed every three months.

The first exhibit was opened December 1, 1924, with 39 entries, the work of nine Wisconsin artists. The entries included works in oil, water color, crayon, and pen and ink. The second exhibit, opened March 2, 1925, had a total of 37 paintings by 12 artists. In both the first and second exhibit, the pictures represented a wide range of subjects. In the third exhibit, which opened June 3, with 52 pictures by 14 artists, there was a preponderance of flower studies. Dudley Crafts Watson, Rebecca Chase, Anne Belle Drake, Paul Hammersmith, and Ruth Holberg were among the artists represented.

On September 2, the fourth quarterly exhibit was opened. In this exhibit all previous marks were broken, for 31 artists filled the walls of the gallery with 105 pictures. There were paintings in water color and in oil, pen and ink etchings; pastels depicting Lake Michigan; and one cut paper silhouette.

Since the opening of the gallery, fifty artists have hung their work, a total of 238 pictures, on its walls. Ten per cent of the paintings hung have been sold while on display. Among them have been a goodly number whose names are well known in American art: Peter Rotier, Francesco S. Spicuzza, George Peter, Rebecca Chase, Jessie Kalmback Chase, Esther Christensen, Amy Cross, Raymond Stelzner, Emily Groom, Dudley Crafts Watson, Mrs. Christian Doerfler, W. T. Hickinson, Paul Hammersmith, and Ruth Holberg. Others were practically unknown until the Journal exhibits gave them an opportunity to show what they could do.

At some time during this winter, the gallery will be placed at the disposal of Carl von Marr, one of the most famous of Wisconsin artists, and former director of the Royal Academy of Art at Munich, for a display of his work. His painting, "The Flagellents" which now hangs in the Milwaukee Auditorium, was awarded honors at the Chicago World's Fair in 1893. "The Wandering Jew" which won honors in the international exhibition of 1879, at Munich, now hangs in the Metropolitan gallery, New York. "Thou Ring Upon My Finger," painted in America, was taken to Europe where it was purchased and sent to Edinburg.h Other compositions of Von Marr are: "The Children of Bunzlau," purchased by the Society of Historical Art; "1806," sold to the museum of Koenigsberg, and "Summer Afternoon," which was owned by the late Senator Hearst.

A number of native Wisconsin artists, sojourning in Maine, California, Florida, and northern Wisconsin, have sent their work to the gallery for exhibition. These artists are trying to depict little scenes which have never been sketched before.

The Journal gallery has not only given encouragement to the younger artists in Wisconsin, but it has also helped to stimulate interest in art on the part of the public. Fully 35,000 persons have visited the gallery since it was opened. Public interest has been further increased by special illustrated articles which appear

"Canal in Austria," by George Peter, type of art shown by the Journal

at regular intervals in the columns of the newspaper concerning the artists exhibiting and their work. Women's clubs in the state affiliated with the Wisconsin Federation of Women's Clubs used these articles as a basis of their study of Wisconsin art this past year, and the subject was included in the discussions at the recent Federation Convention in Green Bay.

Miss Charlotte R. Partridge, curator of the Layton Art Gallery, Milwaukee, is the chairman of the committee of judges, who pass on pictures submitted for exhibition. No school or style of painting is barred, the only requirement being that pictures have originality and artistic value.

Kresge Buys Jersey Weekly

Homer Kresge, for the past six years with the New York Times Company as circulation manager of *Current History* and *Mid-Week Pictorial*, has purchased the *Ocean Grove* (N. J.) *Times*, weekly. Mr. Kresge will assume his new duties about Nov. 15. He began his newspaper career in 1903 as a copy boy on the old *Scranton Republican* when Col. Joseph Scranton was still in active charge of that paper. He was graduated to the reportorial staff, serving as police and city hall reporter and on the desk; later to the *Philadelphia North American* and the promotion department of the *Saturday Evening Post* and *American Magazine*.

Adds Sunday Comics and Magazine

The *Aurora* (Ill.) *Beacon-News*, Sunday, Oct. 11, inaugurated a Sunday section which includes four pages of comics and an eight-page tabloid magazine. The paper recently installed a 64-page high speed press, which handles three color and magazine sections.

JUDGE LAUDS DAILIES; DISMISSES LIBEL SUIT

Canadian Jurist Holds It Newspaper's Duty to Give Facts to Readers in Deciding $100,000 Action

"I believe that a newspaper would not be worthy of the name of a newspaper if it did not feel it its duty to communicate the facts which it honestly believed to be true to its readers on such an important question as was agitating the public on the occasion of these publications; and once the occasion is established to be a privileged one, then the presumption of law is that the defendants honestly, bona fide and without malice, published them. . . . I dismiss the action with costs."

Above are the words spoken by Justice H. Y. MacDonald of the King's Bench, Regina, Saskatchewan, Canada, in dismissing the $100,000 libel suit brought by Aaron Sapiro against two newspapers in that province, the *Regina Leader* and the *Saskatoon Star.*

The suit was based principally upon the publication of a letter from Joseph Passonneau, former United States Department of Agriculture official and director of markets for Colorado, describing the methods employed by Sapiro in connection with the organization of the tobacco industry of Kentucky.

Similar suits are pending against the *Pacific Coast Packer* for the publication of the Passonneau letters. The defendent newspapers claimed through their attorneys that the letters were published upon a "privileged occasion," in other words, that a similar situation to that which confronted the tobacco growers, existed with regard to the wheat growers of Saskatchewan. This was denied by Sapiro's counsel, but the court held that the publication was justified, without hearing any witnesses for the defense. Sapiro has organized with many co-operative marketing groups.

TRY THIS TEST

Let us send you a dozen Certified Dry Mats free of any charge or obligation.

CONDITION them in your humidor WITHOUT steaming; season them in your storage box in the usual way and for the usual length of time.

MOLD them with your regular "squeeze" and note the deep, sharp, even impressions.

FORGET to chalk or oil them; cast them and note how they literally "pop" off the plates.

RUN these plates along with your others and then

COMPARE the printed pages.

When you have made this test you will know why Certified Dry Mats are today being used in several hundred stereotype plants.

And please bear in mind that Certifieds are NOW being used in all kinds of casting equipment, including, Autoplate, Duplex, Goss, Hoe, and Scott.

To know Certifieds is to use them; but you can't know them until you've tried them in your own plant under your own working conditions.

Now is the time to make this test.

CERTIFIED DRY MAT CORPORATION

N. Y. CIRCULATORS ELECT C. E. BLEWER

Binghamton Press Man Named President at Buffalo Meet—Rising Circulation Cost Discussed—Hatton Speaks

With the cost of operating circulation departments increasing steadily, the importance of this unit of newspaper publication is coming into greater proportions. This was emphasized repeatedly at the annual convention of the New York State Circulation Managers' Association in the Hotel Statler, Buffalo, the first three days of this week.

C. E. Blewer

At the final day's session C. E. Blewer, of the *Binghamton Press,* was chosen president. E. E. Decker, of the *Middletown Times-Press,* was elected vice-president; George Erb, Jr., *Buffalo News,* second vice-president, and Alfred W. Cockerill, of the *Utica-Times-Press,* secretary and treasurer.

These directors were selected: G. S. England, *Johnstown Leader-Republican;* Louis F. Gautier, *New York Morning Telegraph;* F. J. Clancy, *Buffalo Express;* John T. Calkins, *Elmira Star-Gazette,* and M. A. Miner, *Syracuse Post-Standard.*

Elmira's invitation to hold the 1926 convention in that city was accepted.

Roy Hatton, of the *Detroit Free Press,* president of the International Circulation Managers Association, was one of the principal speakers. He declared he could name a score of newspapers whose annual circulation cost now exceeds $1,000,000 annually, and declared that such outlays indicate the increased responsibility which is falling to the lot of circulation managers.

Marc A. Rose, managing editor of the *Buffalo Evening News,* was a speaker at the Wednesday luncheon of the association and emphasized the need of the utmost co-operation between the circulation and editorial departments of newspapers, pointing out how each can aid each other.

George Foster, of the *Buffalo Courier,* suggested that every circulation agency of newspapers be made a means of reporting news as well, particularly in the smaller communities where personal news is most desired.

Mayor Frank X. Schwab welcomed the convention visitors at their opening session, and told of his early employment as a Buffalo newspaper circulator.

A. M. Vincent, of the U. S. Post Office Department, gave helpful suggestions for the mailing of "singles."

George Erb, of the Buffalo Evening News, said a good newspaper is much easier to sell than a poor or only a fair one even if valuable premiums are offered with those of the latter type.

Edward H. Butler, publisher of the same paper, urged that the circulation managers become actively affiliated with the New York State Publishers Association.

The convention delegates were guests of the Buffalo newspaper publishers at a noon luncheon Tuesday, and on Wednesday evening had dinner at Niagara Falls and witnessed a special night illumination of the cataract.

CHARGED WITH MURDER

Reporters Declared Guilty of "Killing" Words by Misusing Them

Newspaper writers were subjected to trial this week, charged with having committed "journalese."

The judge was Charles Lee Bryson, former president of the Chicago Press Club.

"Words are being cheapened by misuse," he said. "It is a case of Wolf! Wolf! It is a case of murdering words.

"Have you ever noticed that a 'sudden explosion' always occurs, and that on such occasions numerous persons are invariably 'hurled from their beds'?

"Very often the misuse of a word can be traced to the desire of the reporter—and the copy reader and the editor as well—to make the story 'stand up'; to make it sound as exciting and as vivid as possible.

"The word 'fight' is a frequent victim. We read of the 'fight' a woman is making for a divorce; that a man is 'fighting' hard for office; that a bloc in Congress is 'fighting' to keep a bill from passing; that two lawyers are 'fighting' a case in the courts.

"Nowadays when we see the word 'fight' we have no expectation of reading of a battle between armies, a revolver battle with robbers, a clash between Senor Firpo and our ship-building Neanderthaler, nor anything else in which there is a real fight."

PRESS CONGRESS APPOINTS

World Body Names James C. Latimer Field Agent in New York

James C. Latimer, recently resigned as secretary and treasurer of the Virginia Press Association, has been appointed field secretary of the Press Congress of the World. He will make his headquarters in New York.

Closing of the Valley News Bureau of the *Richmond* (Va.) *Times-Dispatch* at Staunton, Va., of which Mr. Latimer was manager, made his services available to the Press Congress. He had been a member of the Times-Dispatch staff for 14 years, and for the past six years was an officer of the Virginia press group.

Mr. Latimer's appointment was announced by James W. Brown, publisher of Editor & Publisher, and secretary-treasurer of the Press Congress of the World. The field secretary's office will be at 1700 Times Building, 42nd street and Broadway.

Kansas Press Meet Jan. 23-24

Kansas newspaper men will hold their annual winter meeting at Salina, Jan. 23-24, the executive committee of the Kansas Press Association decided at a meeting at the University of Kansas, Lawrence, Oct. 20. The committee met during the annual round-table held by the Journalism Department of the University of Kansas. J. C. Denious, *Dodge City Globe,* and president of the Association, presided. More than a hundred newspaper men attended the round-table.

Chicago "Trib" Adds Realty Section

The *Chicago Tribune* has added a real estate section to its Sunday newspaper. Chicago is said to be in the midst of the greatest real estate market in its history.

Read Editor & Publisher for news of the newspaper and advertising fields.—$4.00 a year.

For The Six Months Ending Sept. 30, 1925

the average net paid daily circulation of The Baltimore Sun (morning and evening issues) was

239,198

The average net paid per Sunday circulation of THE SUNDAY SUN for that period was 183,814—a gain of 1,783.

LUMBER GROUP PLANS ADVERTISING DRIVE

West Coast Lumbermen's Association in Tacoma, Wash., Decides on Campaign with $475,000 Annual Investment to Extend Three Years

Setting a new standard for aggressive merchandising of their products, the West Coast Lumbermen's Association determined in its meeting at the Winthrop Hotel, Tacoma, Wash., to conduct a national advertising campaign for fir lumber to cost $475,000 a year and extend over a period of three years.

Support for the advertising campaign is to be voluntary among the lumbermen of the Northwest, but $100,000 a year was already in sight on the basis of 5 cents per 1,000 board feet of production as a contribution, while the lumbermen believed that they had another $100,000 in sight from another source they were not yet prepared to announce. It is expected that the number agreeing to the contribution of 5 cents per 1,000 feet production will be greatly augmented as the plan is made known during the coming weeks.

The national advertising plan was presented to the association by J. D. Tennant, vice-president and manager of the Long-Bell Lumber Company of Longview and also chairman of a trade promotion committee. On the committee are also Major Everett G. Griggs, president of the St. Paul & Tacoma Lumber Company, Tacoma; Charles S. Keith, of Kansas City; Charles R. McCormick, of San Francisco; R. F. Titcomb, of Snoqualmie Falls, and C. D. Johnson, of Portland.

As outlined by Mr. Tennant $250,000 a year will go to buy newspaper and periodical space. The campaign will be carefully and scientifically planned and organized. A large force of salesmen will be maintained in the field to lecture upon the use of fir and to interest architects, builders and material men in the Northwestern timber products. Dealers' aid will be supplied, and it is expected that large additional sums besides the associations' allotment will be spent by retail dealers in advertising in various publications.

N.E. GROUP'S NEW MANAGER

Frank E. Phillips' Appointment Ratified at Boston Meet

Appointment of Frank E. Phillips as new manager of the New England Daily Newspaper Association was ratified at the association's October meeting held in Boston, Oct. 20. James T. Bedford, *New Bedford Standard,* association president, presided.

Roy L. Wardwell, *Portland* (Me.) *Press-Herald,* was elected to the board of directors to fill the vacancy caused by the retirement of William H. Dow, of the *Portland Evening Express,* when that newspaper was purchased by the *Press-Herald.*

At the general meeting the *Chelsea* (Mass.) *Evening Record,* Samuel H. Robie, publisher, and *Portsmouth* (N. H.) *Herald,* F. W. Hartford, publisher, were elected to membership.

Labor, the white paper situation and press agent space grafting were among the high lights of the round table.

Publishers were urged to help as individuals and co-operatively in keeping wage scales within bounds.

Publishers were advised to insist upon better terms in 1926 paper contracts in view of the present possibilities of competitive offers from salesmen.

Editors were urged to use their waste baskets more fully in helping to curb the press agent evil with the certainty that when goods cannot be advertised in the reading columns the newspapers will be paid for advertising space to exploit them.

Crooks now meet their victims in hotels by appointment—which marks an advance in the dignity of the profession.—*New York Evening World.*

The INDIANAPOLIS NEWS

IT takes a generation, at least, for a newspaper to attain its largest measure of service to its community. Dominance is not won in a day or a year. For 56 years, The Indianapolis News has been Indiana's greatest newspaper. Its advertising dominance followed naturally.

CIRCULATION OF THE ST. LOUIS STAR

highest in its history!

THE St. Louis Star's sworn Government circulation statement of 115,807 net paid average per day for the six months ending September 30. 1925, represents the highest sustained average of any six months period in the entire history of The St. Louis Star. It is even higher by 4,845 copies average per day, than the previous statement required by the government, which included the series of articles by Ray Renard. The Chart reproduced below shows a graphic picture of the growth of The Star's circulation during the past ten years.

National Advertising Representative—THE S. C. BECKWITH SPECIAL AGENCY

INTERNATIONAL CUTS NEWS PRINT $5 A TON

Reduction to $65 a Ton Possible in View of Three Rivers, P. Q., Development, Vice-President Fearing Declares

Newsprint will be sold in 1926 at $3.25 per cwt. or $65 a ton by the International Paper Company, according to an announcement made Oct. 15, by J. L. Fearing, vice-president.

This is the same price previously announced by the Belgo-Canadian Paper Company of Montreal. Both quotations represent a $5 a ton price cut from present contract rates.

Many mills in the United States, in Mr. Fearing's opinion, will not be able to operate at this price. The reduction is possible for International in view of the development at Three Rivers, P. Q., he said.

Mr. Fearing's announcement to contract customers follows in full:

"Three dollars and twenty-five cents per hundred pounds FOB mill in carload shipments, effective Jan. 1, 1926, is hereby fixed as the price of this Company for standard newsprint in rolls, to its contract customers in the United States for the calendar year 1926.

"At this reduced rate, many mills in the United States will, in our opinion, be unable to operate at a profit. This situation will be emphasized if Canada should further restrict or prohibit the exportation of her pulpwood.

"But, with added low-cost capacity at Three Rivers, Quebec; which will soon raise our output there from 340 to 700 tons daily; together with the immediate construction of another equally efficient unit on the Gatineau River near Ottawa, we shall have ample capacity to care for all probable requirements on an expanding scale.

"After careful canvass, we find that conservative publishers do not consider it in their interest to have the price of newsprint paper too greatly reduced. They recognize that stability and fair profits for efficient paper mills are greatly to be desired: that too low prices for newsprint now, might involve a wide swing upward later on.

"It seems quite obvious that your interests and ours are largely mutual. Keeping this before us, we shall constantly try to improve both our efficiency and our service."

PAPER MILLS MAY MERGE

Property Owned by N. Y. World May Be Taken Over by International

Paper mill properties owned by the *New York World* may be merged with those of the International Paper Company, according to a report from South Norwalk, Conn., this week, where one World plant is located.

No official announcement has yet been made.

J. F. Bresnahan, the World's business manager, admitted negotiations were underway, but declared nothing definite had as yet developed. Joseph Fearing, vice-president of International, declined comment.

In South Norwalk it was reported negotiations had reached the stage where financial pulp and paper experts were going over the assets affected, and that definite steps in the merger are to be expected in a few days.

The World owns the St. George Paper Company plant in South Norwalk, with a pulp supply at St. George, New Brunswick, also the Hyde Falls Pulp & Paper Company at Chataugay, N. Y., together with its pulp supply, and the Degrasse Paper Company and woodlands at and near Pyrites, N. Y. The company's investment in timber lands and newsprint and pulp mills amounts to several million dollars.

Whether the deal includes the paper mills and supply of the *St. Louis Post-Dispatch*, another Pulitzer property, has not been revealed.

FORESHADOWED EVENTS

Oct. 26-28—Insurance Advertising Conference, fall meeting, Boston.
Oct. 27—Texas Daily Press League, annual meeting, Dallas, Tex.
Oct. 28-30—Direct Mail Advertising Assn., annual convention, Boston.
Oct. 28—Ohio Circulation Managers' Assn., meeting, Columbus, Ohio.
Oct. 29-31—University Press Club of Michigan, annual meeting, Ann Arbor.
Oct. 3-31—New York State Publishers' Assn., fall meeting, Syracuse, N. Y.

The World bought the Norwalk plant about five years ago from the St. George Paper Company.

"QUICK WATSON, THE NEEDLE!"

Search for It on Exchange Page Is N. Y. Graphic Whimsey

A new way to attract attention to the classified or exchange page is being given trial by the *New York Evening Graphic*, which started this week offering $1,000 a day to winners of what is called the "Shylock Homes" contest.

In 40 copies of each day's edition the phrase "quick Watson, the Needle," is printed among the advertisements on the Exchange Page. Each of these copies is worth $25 to the purchaser obtaining it.

Promotion copy on the stunt is signed by "Shylock Homes," the misspelling being used for obvious reasons.

Bethlehem Dailies Consolidated

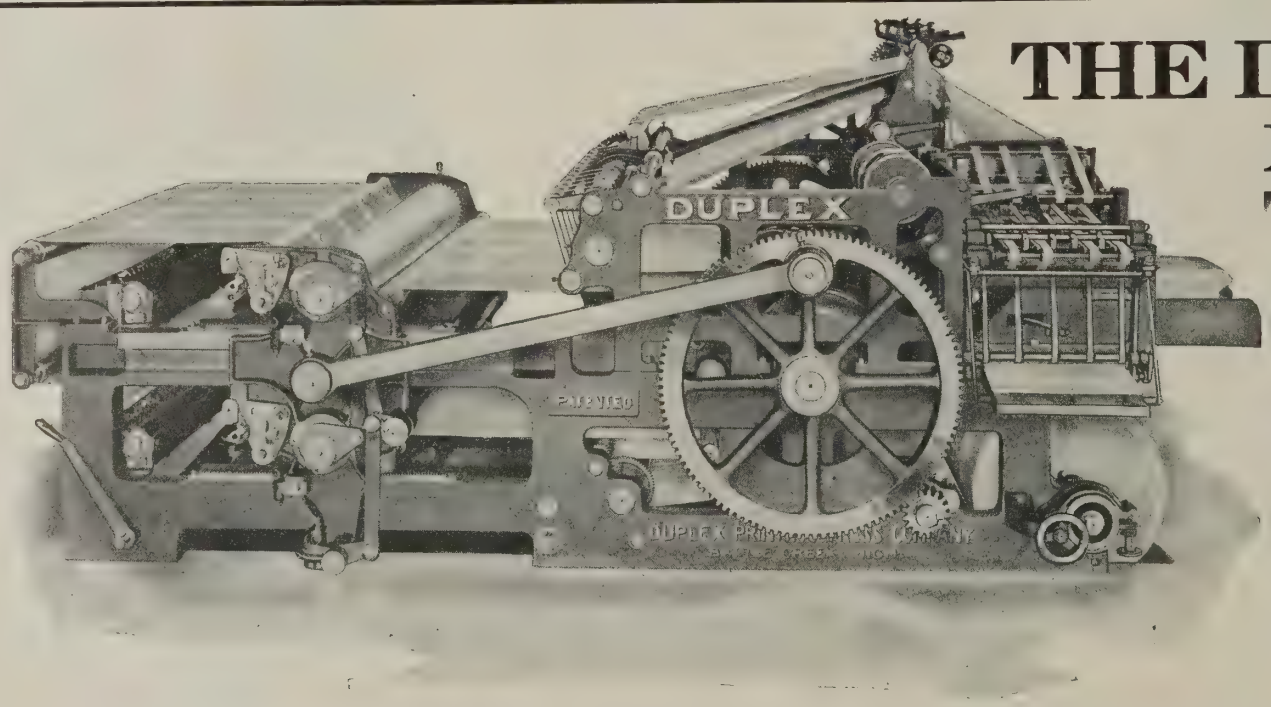
The *Bethlehem* (Pa.) *Globe* which recently bought control of the *Bethlehem Times* consolidated the two papers on Oct. 19., as the Bethlehem Globe-Times.

TO CURB CENSORSHIP

Soviet Authorities Considering Move, According to Cable Dispatch

Soviet authorities are seriously considering abolition of the censorship on foreign press telegrams, Walter Duranty, Moscow correspondent of the *New York Times*, declared in a special cable dispatch to his newspaper this week.

Stating that officials are realizing restriction of press liberty in Russia cannot fail to strengthen malicious reports from the Baltic states and other outside sources, Mr. Duranty adds:



In point of fact the censorship here is already much relaxed. During the seven weeks since my return here not one word has been cut out of my dispatches. Although more than once the censor has queried different statements, the reply that a correspondent was entitled to state his personal opinions without implying they are "officially" considered correct was sufficient to allow passage of the telegram without alteration. As regards mail copy the censor's stamp no longer is required.

Fostering Better Typography

To further interest in advertising typography, the *New York Times* business department has issued a booklet called "Newspaper Advertising Typography," containing 408 of the 700 specimens submitted in the contest held by the newspaper last spring. The same newspaper is offering $100 prize for the best essay on the practical value of good typography in newspaper advertising.

North Dakota Paper Changes Field

Percy M. Hanson, co-publisher of the *Jamestown* (N. D.) *Sun*, recently made a business trip to Minneapolis, where he announced his newspaper changed from the morning to the evening field Oct. 19. It receives the leased wire service of the Associated Press.

THE DUPLEX MODEL A

The Flatbed Web Press for the needs of the small Daily, the Semi Weekly and the Weekly Newspaper.

Handles perfectly tabloid work, posters, pamphlets and similar lines of job work. A press for *All-Day Service*.

The Model "A" prints 2, 4, 6, and 8-page papers at the rate of *3,500 per hour—cut and folded to either half or quarter-page, counted and delivered* ready for mailing or distribution.

"It is a Duplex." The model "A" embodies the built in folder, quick-adjustable to ½ or ¼ fold while running, and many other basic patent features exclusive with THE DUPLEX.

This Press prints directly from *Type, Halftones, and Flat Casts, on Roll Paper*—a very substantial saving in paper cost.

Page widths accommodated are 6 cols. 13 ems; 7 cols. 13 ems; and 8 cols. 12 ems.—standard 6 point column rules.

The movement of reciprocating parts on this press is such that forms can be placed, adjusted, or removed *without damaging the composition rollers.*

Write for fuller particulars—our sales and engineering staffs are glad to consult on production problems and give utmost cooperation in planning for fullest use of the many ranges of work.

MAYOR AS GUEST EDITOR OF PIONEER PRESS EXTOLS VIRTUES OF ST. PAUL

(*Continued from page 4*)

to the newspapers of the United States for several weeks, and found, to his obvious astonishment, that but 10 per cent of the news was concerned with crime and scandal. Ninety per cent of the reading matter in American newspapers is devoted to other subjects. "So many of them (the editors) apparently believe," says Mr. Nelson, "that the public is more interested in news of crime and immorality than in that of a constructive nature." Mr. Riis' footrule does not sustain the Mayor. Instead of standing at the head of the list as Mr. Nelson seems to suppose, crime and immorality stand practically at the foot.

Should such matters be suppressed altogether? Our guest of yesterday does not go quite this far since he permitted the appearance of some such news, carefully toned down and segregated. But he "does not agree with the opinion that publicity is a check to crime."

Let us see about this. Probably the chiefs of the police departments of American cities are reliable authorities. At their most recent convention, held in St. Louis last spring, they adopted a resolution protesting against proposals to suppress crime news on the ground that this would disarm the public and assist the criminal. We suspect that they are right. We suspect that a resolution calling for the supression of crime news would pass a convention of yeggmen with absolute unanimity. Again practical considerations seem to oppose Mr. Nelson's view.

But we are less interested in such practical considerations than in this paragraph from our guest editor's announcement:

> The most recent example is that of Gerald Chapman, the story of whose life has been told in a manner which might lead the undeveloped mind of youth to believe that emulating his example would be romantic and interesting and not entirely objectionable. I sincerely believe that criminals are often led into the commission of crime through ideas obtained in press reports and that many times new daring is inspired from similar sources.

The newspaper is less than 600 years old. Crime is as old as the world. There was, in other words, crime before there were newspapers to publish it. And there was more crime and worse crime in the tenth century, when it was secret, than in the twentieth when it is not. Among civilizing agencies we believe the newspaper must take high rank. If people are (and there is no doubt that they are) more humane, more considerate, more obedient to law than they used to be, surely the "dissemination of intelligence" by means of the printing press has had something to do with it.

It has always seemed to us that we form a very low estimate of the strength of human character when we adopt such a point of view. For ourselves, we do not believe that the men and women, the boys and girls about us, all are potential criminals and await only a printed word in order to violate the moral code. We do not believe that public criticism of what is believed by some to be a bad law makes people lawless, nor that open discussion of a scientific theory makes people godless. To believe such things would be to believe that the moral character of mankind is a flimsy thing indeed, and Christian faith a shallow and fragile vessel. And we dissent utterly and completely from the whole doctrine that it is the duty of the newspaper editor to assume the role of custodian of the manners and morals of his generation. What authority, we should like to know, has been conferred upon him to rewrite the history of the world as it passes across his desk and give to his readers only that which, in his by no means infallible judgment, is "good" for them? Are these newspaper readers that the Mayor is talking about the mental and moral equals of the editor, and as capable as he of distinguishing between right and wrong? Or are they moral morons, intellectual children of 10, who require a guardian in order to keep out of mischief?

It is necessary only to suggest such a pernicious doctrine in order to condemn it. Carry it, for example into the field in which Mr. Nelson is a recognized authority—the field of municipal government. Let us suppose that the editor gave to his readers only such information with respect to the city administration as he felt was good for them. Mr. Nelson, we suspect, would be the first to protest. He would tell us that the people of St. Paul are entitled, not to such facts as in the opinion of the Pioneer Press are good for them, but to ALL the facts. He would tell us that the people are quite as able to determine the truth as we are, and that when we have given them the facts, and have expressed our own opinion, we have gone as far as we legitimately may. And he would be right. Neither the Pioneer Press and Dispatch, nor any other newspaper, dare expose itself for a moment to the charge that it is denaturing and "selecting" the news in accordance with the opinions of its editors. Forfeiture of all public confidence would inevitably and very properly follow.

This is, of course, no argument for stark and brutal newspaper realism. It is the obvious duty of the self-respecting newspaper always to be the gentleman; always to soften, as much as is consistent with the truth, the rough edges of a life which unfortunately always has rough edges; always to maintain those high ideals to which our guest of yesterday referred. In the language of the canon of ethics adopted by the American Society of Newspaper Editors, to which we heartily subscribe, "a newspaper cannot escape conviction of insincerity if, while professing high moral purpose, it supplies incentives to base conduct such as are to be found in details of crime and vice, publication of which are not demonstrably for the general good." This, however, is very far removed from deliberate tampering with the history of the world in the supposed interests of a generation too impressionable and too lacking in moral stamina to withstand the temptations of the truth.

Mr. Nelson provided us yesterday with two cases in point. These columns in the edition over which he presided contained an argument in behalf of the prohibition law. As our readers know, we entertain the firm conviction that prohibition has been a serious mistake, and has done a great injury to the cause of genuine temperance. We have frequently argued this point, and probably will argue it again upon occasion. Yet we find it possible not only to endure a contrary opinion, but to give such an opinion wide circulation. We are accustomed to publish in our department of open letters a large number which dissent entirely from our own views; and we gave to our guest editor carte blanche to say what he liked on this subject. All of which we conceive to be in accordance not merely with sound newspaper practice but in the interests of truth. We have never felt, in this matter of prohibition that it is our duty to give the public only so much of the truth as sustains our point of view. We have endeavored, and we shall continue to endeavor, to give all the facts we can, to present our own view as capably as we can, and to accord to those who differ from us the same freedom of opinion we claim for ourselves. This is not altruism; it is simply doing what we believe our readers expect of us.

The other case in point is that of the intercity bridge at the site of the Ford plant. It has been our contention that the design of this bridge is bad—a contention which has been amply sustained by eminent architects in both cities. Mr. Nelson, as our readers know, entertains a different opinion, and again yesterday he expressed it in the Pioneer Press. In the rotogravure section he published an architect's drawing of what we still regard as an abomination in concrete, and described it as "a structure in harmony with the surroundings, architectural frills being subordinated to the beauty of strength and simplicity."

Upon Mr. Nelson's theory of selection we should not, of course, have permitted him to give publicity in this newspaper to something we look upon as wholly bad. Nevertheless we did, believing that the public which is to pay for this structure is entitled not merely to our own opinion of it, but to every worthwhile opinion, whether it happens to be in accord with our own or not.

If in what we have said by way of comment upon what we believe has been an interesting experiment in newspaper making we have seemed to deal severely with the distinguished gentleman who directed yesterday's edition of the Pioneer Press, we venture to suggest that our severity is probably the highest compliment we could pay to Mr. Nelson's achievement. A less able and vigorous personality than Mr. Nelson could not have left upon one edition of a newspaper so definite an imprint as he left upon this one. The fact that it capably represented a distinct newspaper philosophy is in itself evidence of the great talents which have made him by common agreement the best chief magistrate this city has had in a generation. And the fact that we dissent to a certain extent from his general conception of the province of the modern newspaper does not, in accordance with our own theory, prove that he is wrong. It merely proves that differences of opinion are what make newspapers as well as horse races interesting.

NEW YORKSHIRE PLANT

Bradford Papers Issue Handsome Descriptive Booklet

A handsome souvenir has recently been issued in the form of a cover bound pamphlet in honor of the spacious new publishing plant of the *Bradford & District Newspaper Company, Limited,* publishers of the *Yorkshire Observer,* the *Bradford Daily Telegraph,* and three other publications at Bradford, Yorkshire, England.

This publishing house has developed into one of the largest newspaper properties in the English provinces.

The souvenir has been sent out with the compliments of H. Casaubon Derwent, general manager and secretary of the company, and is one of the finest pieces of printing that has recently come to the desk of EDITOR & PUBLISHER. All departments of the huge new printing establishment are graphically displayed and attractive histories of the five publications presented.

The *Yorkshire Observer* was founded in 1834; the *Bradford Daily Telegraph* in 1868; the *Keighley News* and *Bingley Chronicle* in 1862; the *Yorkshire Observer Budget* in 1870, and *Yorkshire Sports* in 1900.

Sir James Hill is the chairman of the board of directors.

104,242

was the average net paid circulation of The Providence Journal and The Evening Bulletin for the six months ending September 30, 1925. This is a *net gain of 3,032* per day over the same period of 1924.

These great newspapers, with their responsive reader influence, offer advertisers coverage of the great majority of English speaking families in Rhode Island.

ATTEMPT TO BOYCOTT MUSSOLINI FAILS

Three Hundred Correspondents at Locarno in Protest Move Only Partially Successful—Dramatic Scene with London Man

Attempt on the part of 300 correspondents at Locarno, Switzerland, to boycott Premier Mussolini of Italy on Oct. 16 was only partially successful.

When Mussolini, who, although the world's best copy provider, is not popular with all the correspondents, announced that he would receive the foreign writers, a movement was started to boycott his reception as a protest against the unenviable lot enjoyed by journalists, both Italian and foreign, under the Fascist regime.

The agitation met wide but not general support, many feeling that duty to their newspapers required that they report the happenings and views as such covered and that attendance could in nowise be interpreted as displaying lack of sympathy for their colleagues. They held that under all the circumstances and especially as enjoying Swiss hospitality, participation in a boycott would be inadvisable.

There was a dramatic scene when Mussolini was leaving the conference with the press. He walked straight to the correspondent of the *London Labor Herald,* who wears an aggressively red beard and asked:

"Does communism still exist?"

"I don't know, as I am not a Communist," the correspondent replied.

"Perhaps I am mistaken," the dictator replied.

"You frequently are," the correspondent rejoined. Mussolini turned on his heel and left in silence. When he first heard of the proposed boycott Mussolini said he hoped that the protestors would send him an address, as he had a large waste paper basket.

Plaintiff Drops $25,000 Suit

Thomas Mohn has dropped his $25,000 libel suit against the *Red Wing* (Minn.) *Daily Eagle,* which he charged with printing court records containing derogatory remarks directed at himself by opposing counsel.

COAKLEY JOINS NEWARK NEWS

Star-Eagle Washington Correspondent Takes New Post

John P. Coakley has resigned as Washington correspondent for the *Newark* (N. J.) *Star-Eagle,* of which he was formerly managing editor, to become associated with the *Newark News.*

Coakley began his newspaper career as a member of the old *Hamilton Sun* staff, and was connected subsequently with the *Toledo* (O.) *News-Bee, Times* and *Blade* He later was Washington correspondent for the Scripps-McRae League, and then Ohio legislative correspondent at Columbus for that organization. He finally wound up in the Newark newspaper field.

Coakley's addition to the News staff is another step toward the strengthening of its editorial organization begun by Arthur J. Sinnott, until recently its Washington correspondent and now its directing editor. Robert P. Lane, a veteran newspaper man, has succeeded Sinnott at Washington.

INSURANCE PREMIUMS OPPOSED

Utah Life Underwriters' Association Condemns Practice

The Utah Life Underwriters' Association has just passed a resolution in which it strongly condemns the practice of offering insurance policies as premiums in connection with newspaper subscriptions or merchandise.

The president, Major Sam. Parker, was authorized to get in touch with the head of the casualty insurance association of the state with the view of drawing up a joint resolution of protest to be sent to the State Insurance department, the insurance company issuing the policies in the state and others.

It is not contended that the policies are worthless, but that they frequently mislead, especially those not acquainted with the principles of insurance underwriting.

Reporters' Wires Crossed

The wires were crossed for Floyd Taylor during that *New York Herald Tribune* reporter's recent sojourn at the New London submarine base. Taylor was dispatched to cover the shore angles of the S-51 disaster in so great a hurry he couldn't notify a certain young person in advance. Neither did he have an opportunity to decline with thanks an offer of employment from another New York newspaper. In New London, Taylor sent off two messages. One, to the certain young person read: "Ordered to New London on submarine disaster. Will write. Much love." It was signed Floyd.

The other, to a rival newspaper editor, said: "Sorry cannot accept offer. Present employer meets terms. Thanks." This was signed Taylor. The wires were crossed. Two days later Taylor volunteered to make a perilous submarine dive near the S-51's grave on one of her sister ships.

No More Type Shortage for Lansing Capital News

IN a recent letter from Publisher Brewer of the Lansing (Mich.) Capital News was the following interesting comment:

"The Ludlow played a conspicuous part in getting out our 56-page Anniversary Edition. The entire elimination of type shortage was a big labor saver, in fact, I do not believe we could have gotten the issue out if we had used the one-type-at-a time method."

Ludlow Typograph Company

LUDLOW QUALITY COMPOSITION

Continuous World leadership

As shown below, the Miami Herald leads the greatest newspapers of the world in total advertising lineage for the first nine months of 1925. This phenomenal record proves the Herald's claim to CONTINUOUS world leadership . . . and indicates the tremendous business activity now in progress in Florida, and the possibilities of this rich and prosperous market.

"Florida's Most Important Newspaper"

FRANK B. SHUTTS, Publisher

EDITORIAL

Enter ye in at the strait gate: for wide is the gate, and broad is the way, that leadeth to destruction, and many there be which go in thereat:

Because strait is the gate, and narrow is the way, which leadeth unto life, and few there be that find it.—St. Matthew, VII; 13, 14.

CELEBRATION

WHO says there is no progress in the affairs of the nations?

This week you saw the publication in the press of the full texts of the treaties of Locarno, blows aimed at the vitals of international suspicion, jealousy, hatred, banker and merchant greed, unrest and the monster spectre of the world—fear which leads to war.

Published in full in our press, gentlemen!

Published for all eyes and all minds, prior to ratification by the governments!

Open covenants!

If you have pride in the printed news page this event stirs you to your depths. It is a vindication of the high claim of journalism. It is the greatest single practical triumph of the principle of free press in this generation.

Our newspapers met the event with distinction. The texts were delivered with amazing speed and every newspaper of every city and sizable town not only carried the full documents, but many displayed them in such conspicuous and interesting fashion as to attract the eyes and satisfy the minds of persons not used to reading the stilted terms of diplomacy.

The background of the old world's misery was strewn with agreements of secret diplomats! The war revealed the skeletons. Clandestine parcelling of territories and natural resources, rapacious trading behind the shutters of government palaces, unscrupulous intrigues leading to rivers of innocent blood! That dread power has been outlived. It is dead and done. Government by the consent and *with the full knowledge of the governed* has been born in the wide sense, as a practical fact.

We celebrate the news that the powers of Europe are outlawing war; the fact that their terms are definitely and freely published to the world calls for equal song and rejoicing.

Full, free, honest publicity, that all may read and know, is a pillar upon which civilization may be reared to the clouds. Trust it! It responds to a high principle in democracy. It has never failed.

Investigation has shown that "letters to the editor," when selections are good, interesting discussions are fostered and writers are permitted to have reasonable freedom of expression, rank in the first tier of popular features.

ACCURACY! ACCURACY!

IT is saying nothing new or surprising to experienced newspaper men that inaccuracy is the greatest single source of waste and injury in journalism. Careless mistakes, faulty systems, excessive speed, ignorance and stumbling in all departments are the boll weevils that plague the newspaper field.

EDITOR & PUBLISHER believes that if any publisher will make an analysis of his operations for a year to discover "leaks" he will find that the bulk of his losses are directly attributable to unconscious, meaning stupid or erratic errors of individuals.

Newspapers rarely are damaged by mistakes in premeditated policies but every editor almost every day is anxiously engaged in trying to explain away faults that have crept into the columns through typographical mistakes, often attributable to careless or rush editing, or senseless inaccuracies of reporters or persons from whom reporters have taken information. In business departments it is likewise true that most of the stumbling is due to the reckless abuses of systems by incompetent or sloppy workers.

Strange things happen and every office is stocked with legends of queer press errors. Just the other day in Ohio, a low-minded newspaper compositor sat idling on the key-board of his typesetting machine, when a foul thought caused him to set up a line of type so vulgar that it cannot be repeated. The careless wretch meant to throw the line away. Next day, to the amazement of the office and thousands of readers, it appeared in the obituary column, following the pathetic public announcement of a widow thanking her neighbors for kindness during her late husband's illness and death. How can such a thing be explained? The weight of such a "mistake" falls upon the newspaper.

Reporters get their notes mixed and make bankers speak in the name of burglars. Names are misspelled constantly. Proof-rooms permit commas to run for periods, changing the meaning of figures, with heavy embarrassment to institutions written about. Desk editors, to catch editions, write illegibly and printers guess their way through the mazes of poor copy.

EDITOR & PUBLISHER, like every other publication, is not immune to errors although we have more time to prepare our matter than daily news publications. During the past week, to our intense unhappiness, three complaints were brought to this editor's attention by indignant subscribers. In every instance, as it turned out, EDITOR & PUBLISHER had accepted information from individuals who were really the best sources of such information but each had been, in these instances, wholly mistaken. They could not explain. All were sincerely sorry. The damage, however, had been done. We have explained our embarrassment, but still there is a lingering and sort of hopeless feeling that nothing that we have said or could ever say would fully restore confidence.

Accuracy, accuracy, accuracy! It is the cry of all sincere men in journalism. Indeed, it is our highest ideal. Rules may be written, staffs may be held in the closest discipline, extraordinary expenditures may be made for the best systems, but errors continue to creep in. Perfection, of course, is unattainable. The fallibility of the printed page calls for the sincere sympathy of all who understand the complex problems of publishing.

The best rule that has ever been devised to prevent error is as follows: Surround yourself with men and women of conscience and understanding and give them orderly system and ample time in which to operate.

New York's foulest centers of crime and depravity were wiped out by a news reporter, the late Jacob Riis.

October 24, 1925 Volume 58, No. 22

GOOD WORK, CHARLIE

OLD Charlie Post, the well-known New Yor press agent, is out with a challenge to deba with EDITOR & PUBLISHER, in a hired hall, t press agent graft system. Charlie says that it "news," no matter how many times it has been pu lished, that his client is building the fastest and large steamship ever built in the United States, and he in favor of republishing the fact in news columns, tir and again without number, nor ceasing, now a evermore.

Charlie Post names distinguished newspaper a advertising folk, who, he thinks, would listen to debate on the question of how many times a ne announcement may be published before a press age gets his fill. If Charlie would induce all the tho sands of press agents in New York to attend, say a dollar each, and split the gate it might mend o financial fences, but we fear the music would be cr and inhuman punishment for the referees. For o part we are unwilling to inflict it. Another excu is that we have heard Charlie Post defend his m ticket so often that the subject is all worn out a frazzled and not half so interesting as Kelly pool the Newspaper Club.

Charlie Post may now formally advise his stea ship clients that he upped and dared us, but we w a pack of cowards and wouldn't fight. If he lands bonus for conspicuous enterprise we shall say: Go work, Charlie.

Florida Chamber of Commerce takes space in magazines to promote the sale of land and then sends the magazine proofs to newspaper editors as publicity.

The St. Paul experiment with Mayora editing is interesting, but does not prove muc the editor's problem is not of a single day, b of long periods of time amid all sorts vicissitudes.

PERSONAL

KENT COOPER, general manager of the Associated Press, left New York his week on a two weeks' trip, during vhich he will visit Boston, Indianapolis, St. Louis, Kansas City, Oklahoma City, Dallas, Tex., and Chicago. He will address meetings of A. P. members in most f these cities.

FOLKS WORTH KNOWING

HENRI GAGNON, publisher of *Le Soleil,* of Quebec, Canada, who was one of the four principal speakers at the Audit Bureau of Circulations' annual banquet in Chicago last week, is prominent in social and political circles of the Dominion, as well as among newspaper men.

HENRI GAGNON

In addition to editing and publishing Le Soleil, he is a director of the Canadian Press, a news association, and a director of the Canadian Daily Newspaper Association.

Born in Montreal, he started his career with *La Presse* of Montreal in the advertising department. He left that position to become manager of *La Tribune* of Sherbrooke. From there he came into his present position, where he has served for 12 years.

Mr. Gagnon is interested in the farm paper field as well as the daily press and is president of *Le Bulle Tim de la Ferme,* a weekly agricultural paper published in Quebec.

Mr. Gagnon is a member of the board of governors of Leval university in Quebec and a member of the board of directors of the same institution. He is a delegate in Canada of the Touring Club of France and is an honorary colonel of the Levis regiment. He is also a member of the mess of the Loyal 22d regiment.

One of his greatest honors is that of commander of the Order of St. Gregory the Great. He is an officer d' academie, an honor conferred by the French government. He is also a patron of the Great War Army and Navy Veterans for the Quebec district.

I. Schaefer, graduate of the University of Washington School of Journalism, Seattle, has joined the editorial staff, *Tacoma* (Wash.) *News Tribune.*

C. Neill Baylor, editor of the *Hagerstown* (Md.) *Morning Herald,* is ill at his home at Charles Town, W. Va.

Bert Huddleston, of the *Healdton* (Okla.) *Herald,* is now city editor of the *Bristow* (Okla.) *Record,* succeeding Bryce Foster, resigned.

H. G. Sutter has joined the staff of the *Newark* (N. J.) *Ledger.*

Wilbur W. Judd is back on the copy desk of the *St. Paul Pioneer Press* after an absence of six weeks due to illness.

George E. Masters, managing editor of the *Sioux Falls* (S. D.) *Press,* is spending his vacation in Kansas City, Mo.

HOLDING NEW POSTS

LEE R. KOLB, from *Hudson Dispatch,* to staff *Newark* (N. J.) *Ledger.*

E. W. Neese, from advertising department, *Janesville Gazette,* to *Milwaukee Journal* staff as promotion copy writer.

Albert C. Nute, from copy desk, *Toledo* (O.) *News-Bee* to copy desk, *St. Louis Globe-Democrat.*

D. H. Harris, from copy desk, *Tacoma* (Wash.) *News Tribune,* to *San Diego Tribune.* He is succeeded by F. M. Lockerby, former Olympia correspondent for the News Tribune.

Henry Scharer, from *New York World,* to *Newark* (N. J.) *Ledger* staff.

George Kercher, from City News Bureau, Chicago, to radio department staff, *Chicago Evening Post.*

Tyrrell Krum, from *Chicago Herald and Examiner,* to *Chicago Daily Journal.*

Ben Kartman, from director of the laboratory, journalism school, University of Illinois, to copy desk, *Chicago Daily Journal.*

George Wright, from City News Bureau, Chicago, to staff, *Chicago Tribune.*

MARRIED

STANLEY KOHN of the *Cincinnati Enquirer* Sunday art staff to Miss Theodora Brimberg, New York artist, in Cincinnati recently.

Andrew L. Carmical, director of promotion of the *Chicago Evening American,* to Miss Jean R. Ervin, formerly of the *Houston* (Tex.) *Post-Dispatch,* in New Orleans, Sept. 28.

Miss Mary Rosanna Finniff, of the circulation department, *Hagerstown* (Md.) *Herald-Mail,* to Guy E. Hoffman, of Hagerstown, Oct. 16.

Charles Dwinell Whidden, Harvard '23 and on the staff of the *Boston* (Mass.) *American,* to Miss Ethel Blackwell Jones, Vassar '23 recently at the bride's home in Elizabeth, N. J.

John Chase, representative of the *Shoe Retailer* and son of Harry Chase, associate editor of the *Rochester* (N. Y.) *Herald,* to Miss Mary Elizabeth Hill at Rochester, recently.

CHANGES OF OWNERSHIP

JAMES W. LEBELL, of Van Horne, Ia., editor of the *Van Horne Record,* has purchased the *Vinton* (Ia.) *Eagle* from Wallace E. Sherlock, who three weeks ago combined the Eagle with the *Shellsburg. Advance.* The Van Horne Record will merge with the Advance.

Giles Farris, former state printer of Oklahoma, has purchased the *Sperry* (Okla.) *News* from D. T. Smith and the *Sperry Advocate,* owned by C. A. Bingham. He will combine the plants, the paper to be known henceforth as the *Star.*

PRESS ASSOCIATION NOTES

HARRY K. REYNOLDS, formerly of the Washington office of the International News Service, is now in charge of the I. N. S. London office, replacing Harry Flory, transferred to Paris, succeeding Frank Mason, who has joined the Universal Service.

John Mutox has joined the Washington staff of the United Press. He was special correspondent for the U. P., covering the Dayton trial. He was formerly connected with the *Knoxville News.*

W. G. Stevenson has been appointed Associated Press staff correspondent at Ann Arbor, Mich.

T. M. Dell has been appointed staff correspondent at Tampa, Fla., for the International News Service. He goes there from the I. N. S. Atlanta office.

John J. Ryder has resigned as assistant news editor in the Northwest bureau of the Associated Press in St. Paul to enter other work. Mr. Ryder at one time was industrial commissioner of Nebraska and commissioner of public safety and city librarian in Omaha.

NEW PLANTS AND EQUIPMENT

THE *Scranton Times* this week was shipped the first of two new Hoe octuple presses to be installed by that paper.

W. H. Greenhow Company, publishers of the *Hornell* (N. Y.) *Tribune-Times,* will dedicate their new home as a memorial to the founder of the company, the late W. H. Greenhow. A tablet will be placed on the building, which will recall Editor Greenhow's service to Hornell from 1870 until his death in 1918. A formal opening will be held about Nov. 1.

Ludlow Typograph Company recently put machines in the plants of *La Critica,* Buenos Aires; *La Presisa,* Havana, and *Dunedin* (New Zealand) *Otage Daily Times.*

ASSOCIATIONS

WACO (TEX.) ADVERTISING CLUB was formally presented with a membership in the Associated Advertising Clubs of the World at a banquet Monday, Oct. 12. J. J. Hutchinson, managing news editor of the *Waco Times-Herald* was toastmaster.

Norman Lewis, elected first vice-president of the **Advertising Club of St. Louis** has been advanced to the presidency; George C. Stohlman and George E. Gayou have been advanced to first and second vice-presidencies, and Arthur E. Schanuel has been elected third vice-president. The change was necessary because the office of president was not filled on the slate prepared for the annual election on October 5. These officers and Frank Fuchs, treasurer, and Douglas V. Martin, Jr., secretary were presented to the membership last Tuesday. Mr. Lewis is manager of the merchandising division, Chappelow Advertising Company. Mr. Stohlman is in the office of the president of the Missouri Pacific. Mr. Gayou is vice-president, Advertising Slide Company. Mr. Schanuel is a member of the firm of Roeder & Schanuel, advertising. Mr. Fuchs is advertising manager for the First National Bank, and Mr. Martin is publicity manager for the *Globe-Democrat.*

St. Paul was chosen as the meeting place for the spring semi-annual meeting of the **Minnesota Associated Press Editorial Association,** which will be held April 3, with the *St. Paul Pioneer Press and Dispatch* as hosts.

Southeastern conference of the **Iowa Press Association** will be held at the University of Iowa, Iowa City, Oct. 23 and 24. Dr. C. H. Weller, director of the University School of Journalism, has arranged a list of speakers including Edward Watson Howe, the "philosopher of Potato Hill."

Miss Margaret Koons, of the business development department of the First National Bank in St. Louis, was elected president of the **Women's Advertising Club of St Louis** at the recent annual meeting.

Representatives of the **Iowa Associated Newspapers** met in Nevada, Oct. 16, to complete organization of the newspapers, which have united in sale of advertising space in 90 Iowa counties and are working as a unit to prevent duplication in coverage. Ed M. Smith of the *Winterset Madisonian* is president of the association and Don Berry of the *Indianola Record* is secretary.

SCHOOLS

JOURNALISM course of the University of Wisconsin opened its 21st year with 556 students enrolled, of whom 280 were registered for the full four-year term. The freshman class numbers 83, and the senior class, 53.

A printing trades extension course, which may serve as a model for high schools throughout Indiana, has been introduced in the vocational department of the Central High School of Muncie. The course was started at the request of the Muncie branch I. T. U.

H. H. Herbert, director of the school of journalism at Oklahoma University, has been designated by Frank O. Edgecombe, publisher, *Geneva* (Neb.) *Signal,* and president of the National Editorial Association, to judge entries in the association's annual contest for selection of the paper performing the greatest community service. A cup will be presented the winner at the annual convention.

Dates for the seventeenth annual Journalism Week at the School of Journalism of the University of Missouri have been set by the Board of Curators of the University for May 9 to 15, inclusive, 1926.

CIRCULATION PROGRESS

Selling Automobiles Helped Him Sell Newspapers

Leonard Shepherd

"HE doesn't make much noise but he gets results."

This tribute was paid Leonard Shepherd, circulation manager of the *Sandusky* (O.) *Register* by his editor, E. H. Mack.

And Mr. Mack added:

"He figures for tomorrow just as well as for today. He has a happy faculty of handling his men with kindness and consideration but keeps them working."

Several years ago Leonard Shepherd was selling automobiles in Sandusky, and the Register offered him a position as assistant circulation manager. When the circulation manager left not long afterwards, the new man was promoted. It was thought then that the field had been worked to the saturation point, but Shepherd disagreed. To prove he was right, he has increased the Register's circulation materially.

WITH THE SPECIALS

ROBERT S. FARLEY, New York financial advertising representative, has been appointed to represent the *Toronto Mail and Empire* in the United States.

ON THE MECHANICAL SIDE

C. M. SIMMONS, formerly of Alliance, O., is now head of the job printing department of the *Ypsilanti* (Mich.) *Daily Press,* filling the vacancy caused by the recent resignation of F. A. Bryce, who has entered the publishing business at Grand Ledge, Mich.

Statistics show that fewer and fewer people are being killed by automobiles. Is our pedestrian going the way of the buffalo?—*Arkansas Gazette.*

HONORS ADOLPH OCHS

University of Chattanooga Makes N. Y. Times Owner Litt. D.

Adolph S. Ochs, owner of the *Chattanooga* (Tenn.) *Times* and the *New York Times,* was made an honorary Doctor of Letters by the University of Chattanooga on Oct. 15.

Dr. A. A. Brown, University president, conferring the degree, said:

"Adolph S. Ochs, this college honors itself in honoring you today. * * * You and your colleagues have been creators of educational values. Your slogan, 'All the News That's Fit to Print,' has set a standard which every newspaper should adopt. Your insistence that the interpretation of the news shall not be controlled by advertisers or other powerful groups has shown your moral courage as well as your love for truth. Thoughtful men may differ with you, but they will always respect and honor you.

"In conferring this degree the University of Chattanooga is acting in behalf of your neighbors and fellow-townsmen. If they had higher honors in their power to bestow they would award them."

The New York Times publisher is now the recipient of several honorary degrees from large American universities. Last spring Columbia made him an honorary Doctor of Laws.

Vandals recently entered the office of the *Drumright* (Okla.) *Journal* and completely wrecked the press and other equipment. Sapulpa publishers have offered the use of their plants until repairs can be made.

Newspaper Advertising

—*A factor in Church Development*

Rev. Lawrence B. Walker of Saco, Maine, in an address before the New England District Convention of the Associated Advertising Clubs, the other day, stated:

> "Newspaper advertising is a tremendous factor in the success of the modern church. . . . The money my church puts into newspaper advertising comes back in the evening collection!"

Many ministers who have had experience in the use of newspaper advertising have expressed this same thought.

More and more advertising men are giving their services to the churches. Will the newspapers join them in the development of effective church advertising? Will yours?

Write us for copy and plans for developing church advertising in your locality.

ADVERTISING AGENCY AFFAIRS

Agency Building Designed for George Harrison Phelps, Inc.—Lyddon & Hanford Company Appoints—Buffalo Firm Incorporates

GEORGE HARRISON PHELPS, INC., Detroit agency, is building a new home for its own exclusive use, which, according to present plans, will be ready for occupancy early next year.

In drawing plans for the building, care was taken to develop a structure suitable to the needs of a national advertising organization and in addition produce a building, distinctive, interesting and beautiful. The architects are Smith, Hinchman & Grylls.

On entering the building through the vestibule one steps into a public reception room, finished with Travertine marble floors, antique plaster walls and a beamed ceiling treated with polychrome stencils. This room provides for an information desk in an alcove and a waiting space for visitors. It gives access to the business offices on the first floor and to a stairway leading to the studio and second story offices.

At the head of the stair is a library and office of Mr. Phelps's secretary, as an ante-room to the studio, the room which by nature of its use, location and size gives to the exterior a dominating feature. It is two stories high, having a barrel vaulted ceiling, with penetrations along the side and decorated in full color.

In addition to the special rooms just described, the first and second stories contain a dozen private offices for the various executives, with a mailing and magazine room on the first floor, and library, conference and dining room with pantry on the second floor.

The third floor provides for the bookkeeping and clerical forces, vaults, the auditor and artists. The basement has besides the usual heating plant and store rooms, a five-room apartment for the caretaker, and a regulation size squash court with dressing, locker, shower and rubbing rooms. In connection with these athletic facilities is a volley ball court at the rear of the building.

Owing to financial difficulties the Robbins & Pearson Company, Inc., agency of Columbus, O., has reorganized. The change makes W. H. Robbins, president of the Williams Manufacturing Company, London, O., the active business head of the agency. Mr. Pearson is no longer connected with the agency.

Louis H. Sebbes, formerly editor of the directories division of the Chilton Class Journal Company, publishers of Philadelphia, has resigned to become account executive in the automotive division of the Reincke-Ellis Company, agency at Chicago.

A. J. Amos, recently editor of the automotive division of the International Harvester Company, Chicago, has joined the staff of Crosby-Chicago, agency Chicago. Prior to his connection with the Harvester Company Mr. Amos was advertising and sales promotion manager of the Garford Motor Truck Company, Lima, O.

Alfred E. Fountain, Jr., will become associated with the New York office of the Lyddon & Hanford Company, New York, effective Nov. 1. To accept this new position he has resigned as secretary of the Tuthill Advertising Agency, New York.

Joseph R. Ater has resigned as secretary and publicity director of the Tavares (Fla.) Chamber of Commerce to take over management of the Lake County branch of the Saffer Advertising Agency.

Walter C. Cole, formerly secretary of the Detroit Board of Commerce, has formed an advertising agency to be known as Cole-McDonald-Wood, Inc., which will be located in the twelfth floor of the Metropolitan Building, Detroit. Associated with Cole in the new enterprise are Edmund D. Wood, automotive expert; A. H. McDonald and Paul H. Bruske, former advertising manager of the Studebaker and Maxwell automobile companies. A staff of about 30 persons will be employed at the start.

The E. P. Remington Advertising Agency, Buffalo, has been incorporated for $50,000 and has purchased the advertising agency formerly conducted under the same name, but as a partnership. These officers have been elected by the new company: President, Addison F. Vars; vice-president, Frederick W. Kendall, Jr.; secretary, E. K. Emerson; treasurer, William F. Richard. Henry W. Comstock has joined the organization as production manager.

RAGAN HEADS FINANCE GROUP

George E. Roberts Predicts Long Period of Prosperity at Columbus

The Financial Advertisers Association closed its annual convention in Columbus, O., Oct. 16, with the election of Carroll M. Ragan, U. S. Mortgage and Trust Company, New York, as president, and the selection of Detroit as the place of meeting next year.

Officers in addition to Mr. Ragan are: vice-presidents, H. G. Hodapp, New York; Clinton F. Berry, Detroit, and Kline L. Roberts, Columbus; secretary, Preston E. Reed, Chicago; treasurer, Carl A. Gode, Chicago:

George E. Roberts, vice-president of the National City Bank of New York, declared in a paper that a long period of good business with only moderate price fluctuations is ahead for the country and that the entire business situation today is much improved. He said the outstanding feature of the business situation is the restoration of normal price relationships, with the improvement in agricultural lines. He declared that much depends upon the continuance of a conservative business sentiment. Mr. Roberts' paper was read, as he was unable to be present.

More than 30 subjects were discussed at the convention, these being grouped under several department heads. The convention was declared to be the most successful ever held by the association.

THE TRUTH

ABOUT THE

RODGER'S STORY IN HAWAII!

It was the service of The Honolulu Advertiser and foresight of its management that made it possible for the Associated Press to beat all other press services by nearly an hour in flashing the news of the rescue of Commander Rodgers and crew of the PN9-1 on the Island of Kauai, to the world September 10th.

It was exclusively an Advertiser beat, the plans being laid a week in advance for just such an emergency. These plans had not the slightest relation to any arrangements made by the Associated Press officials sent to Hawaii in August or to any made by the A. P. Honolulu correspondent.

The Associated Press had no plans that protected it on Kauai in case the rescue story broke there, except the plans of The Honolulu Advertiser.

The first news was not picked up by an amateur radio operator nor did the Advertiser get its flash of the rescue from the U. S. Navy. The Honolulu Advertiser had a staff correspondent on Kauai who was first to meet the wrecked aviators at Nawiliwili. The Advertiser established wireless communication with Kauai through a broadcasting station in its plant in Honolulu, and its correspondent, later reinforced by three others sent 100 miles by fast steamer and Navy plane, for ten hours kept the wireless sparkling with the personal stories of Commander Rodgers and his crew.

That's how the Associated Press beat the world on the Rodgers story. Because The Honolulu Advertiser had every possible angle of the story covered from the time the planes left San Francisco until they were picked up 15 miles off Kauai.

To the service resulting from The Advertiser's enterprise in having men where the story broke, the Associated Press is justly entitled, but not to any credit whatever for being responsible for the first flash of the rescue or the service from Kauai, either through its executives or employes in Honolulu. That belongs solely to The Honolulu Advertiser.

When news breaks in Hawaii, The Honolulu Advertiser prints it first and prints it all.

* * *

NATIONAL ADVERTISERS:—

Honolulu merchants consistently place *more* of their advertising in THE HONOLULU ADVERTISER than in any other paper in the Territory. *This is a vital fact.*

THE HONOLULU ADVERTISER has continuously carried the largest volume of advertising week-days or Sundays of any medium in Hawaii.

The Sunday issue leads all other papers in advertising and circulation.

These are facts that you should seriously consider in planning your campaign in The Hawaiian Market.

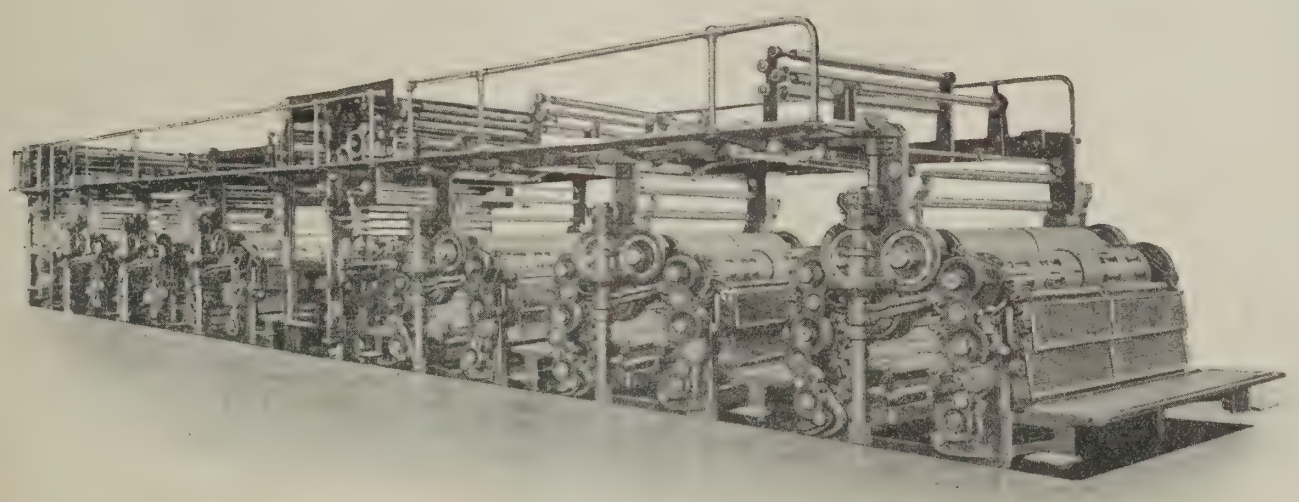
The Honolulu Advertiser

Hawaii's Territorial Newspaper



Mr. John Evans has just assumed the position of Managing Editor of The Des Moines Capital. Mr. Evans has been for eleven years in the service of the Associated Press and for six years has been second in command at Paris under Mr. Roberts, Dean of the Associated Press Foreign Department.

Mr. Evans was born in Des Moines and started his newspaper work on The Des Moines Capital. He is forty-two years of age, and has served the Associated Press in Los Angeles and San Francisco.

Mr. Evans has the spirit, training, and capacity to raise the News Department of The Des Moines Capital to new heights.

Things are stirring in the Capital establishment. A new engraving plant has just been installed, permitting the use of more and better pictures. The financial pages have been enlarged by the use of the complete New York stock and bond market. The sports pages have been amplified by the employment of Fred Turbyville from the National Newspaper Service, Knute Rockne, Tad Jones, and Glenn Warner from the Christy Walsh Service. A contract has also been made for a 12-weeks serial by Hurry Up Yost, entitled "Thirty Years of Football"; also "The Life Story of Ty Cobb" to run twelve or thirteen weeks.

Some weeks ago the Capital ordered new press room equipment entailing an expenditure of $135,000. This included a double sextuple Goss Press printing in black and one color, and a 3-deck Goss color press. The delivery of these presses will begin in the month of December.

The Capital is a good newspaper—a big influence in Des Moines and central Iowa. A good newspaper is always a good advertising medium—Let us send you a week's copies of the Capital without expense to you for your examination.

WHAT'S WHAT IN THE FEATURE FIELD

Williams, "Out Our Way" Creator, Signs New Five-Year Contract with NEA—Metropolitan Offers Some Chinese Adventures—Lessons in Dancing

JIM WILLIAMS, creator of "Out Our Way" has signed a new five-year contract with Nea Service, Inc., Cleveland. This syndicate started handling the Williams' daily cartoon several years ago.

Williams was born in Nova Scotia and his parents moved to Ohio where Jim was sent to Mt. Union College art school. A drawing board proved a tedious work bench so Williams went to firing an engine on the Pennsylvania railroad. Then he decided it was high time to go West, shoot Injuns, rope cattle and pick up gold.

Came several years of real cowpunching in New Mexico. He had such a weakness for art however that he always carried a pencil handy. Jim later joined the American cavalry.

When his enlistment ended Williams started north to join the Canadian "Mounties" but Fate stepped in—Jim fell in love and was married. For several years he worked as a machinist. All the while he kept drawing and in time NEA Service was attracted to his work. Williams was asked to become a member of the NEA art department and in a few short years his work has become nationally known.

Josef W. Hall, former American newspaper correspondent in China, has written a series of four weekly articles on his adventures in the Orient for the Metropolitan Newspaper Service, New York. Mr. Hall uses the pen name of "Upton Close," in order, he says, "to conceal my identity in critical situations." The writer claims to have taken an extraordinary part in public events. At one time, he writes, he was temporary minister of foreign affairs for four days, and at another he participated in a plot to kidnap a statesman for the presidency. Mr. Hall is now a lecturer in Oriental languages and literature at the University of Washington, Seattle.

A. L. Wilbert, M.A., is author of "The Mental Daily Dozen," a new feature being distributed by King Features Syndicate, Inc., New York. Twelve questions are asked each day, with the answers the following day.

"Who's Zoo Wise Quacker" is the title of a new comic strip by Tom Dibble, Jr., which started this week in the *New York Evening World,* and will be ready for national distribution shortly through the New York World Syndicate.

The Ledger Syndicate, Philadelphia, announces "The Starkenden Quest" by Gilbert Collins as its latest mystery serial. It has been arranged in 36 daily installments.

Ted Cook's "Cook-Coos" column which made its debut in the *New York American,* has now been taken over by King Features Syndicate for national distribution.

Metropolitan Newspaper Service announces for November and December illustrated short stories by Mary Roberts Rinehart, Gouverneur Morris, Melville Davisson Post, P. G. Wodehouse, Gerald Beaumont, Courtney Ryley Cooper, Alice Duer Miller, Frank Swinnerton, Fannie Kilbourne, Zona Gale, H. De Vere Stackpoole, Stephen Avery.

"Radio Doings" is the title of the new one-column radio page feature, added to the list of Audio Service, Chicago. Propaganda, advertising, and technical matter has been deleted, the editors claim.

Arthur Murray has prepared a series of dancing lessons which will be distributed by the McClure Newspaper Syndicate, New York. Mr. Murray is advertised as the instructor who taught the new dances to the Prince of Wales.

"Beauty" by Mme. Qui Vite, (a nom de plume) is a new King Feature Syndicate offering.

"Antics of Arabella" a physical culture strip made from photographs of chorus girls, is a new offering from the Graphic Syndicate, New York.

The autobiography of Earl Sande, America's premier jockey, written in collaboration with James R. Crowell was announced this week by the Putnam Syndicate, New York. It has been prepared in weekly installments of 2,000 words each.

William Smith has been appointed head of the art department of King Features Syndicate, Inc.

Pair of queens writing for newspapers, through Famous Features Syndicate New York, showing at right, Queen Marie of Roumania, and Zoe Beckley interviewer and columnist of the New York Evening World, who convinced Her Highness Americans would be interested in reading what she cared to write

KANSAS EDITORS MEET

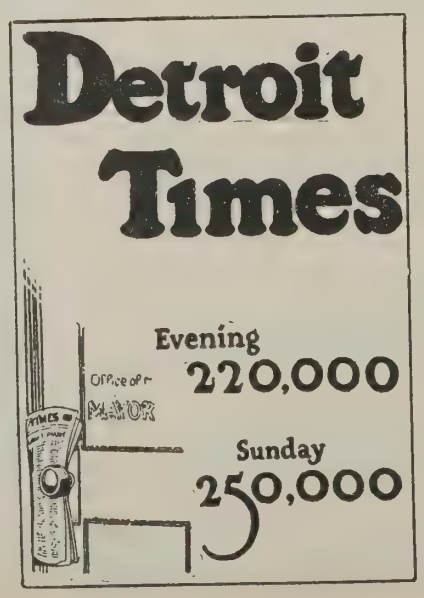
Start Move to Publish School District Financial Statements

A movement to advocate a state law requiring that financial statements of school districts be published as legal notices was started at the annual round table conferences held Oct. 16-17, by the University of Kansas Department of Journalism, Lawrence, Kan.

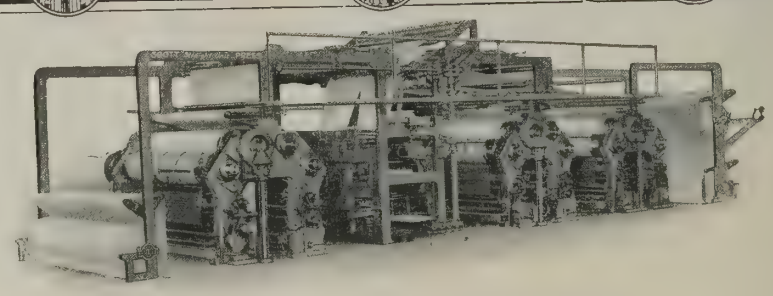
Lou Valentine of the *Clay Center Times* declared the school tax was the highest of any paid by the citizens of his town, and they knew the least about how the money was spent. Will Townsley of the *Great Bend Tribune* declared his belief that school board meetings should be reported regularly as matters of news.

O. W. Little, field secretary of the Kansas Press Association warned the editors lest too urgent action for the proposed legislation might be misconstrued by the general public.

Charles F. Scott, editor of the *I* *Register,* fresh from a tour of the I East, told his impressions of the Orie



Frank Edgecombe, president of National Editorial Association, addres one of the sessions briefly.



The University gave a dinner for editors the first day of their confere and the Lawrence Chamber of Comme gave a luncheon Saturday noon.

A Kansas College Newspaper Asso tion was organized, and Dick Math of the University Daily Kansan elected president.

Minister Sues Finnish Daily

The *Eteenpain,* a Finnish daily lished in Worcester, Mass., is defen in a $50,000 damage suit brou against the paper's publishers by John E. Lillback, pastor of the Golg Congregational church of Brooklyn, Y. It is alleged to have published att on the minister's character.

"Straight-Unit" SEXTUPLE PRESS

—with intermediate folder. This, and every other type of Scott "Straight-Unit" or "Multi-Unit" Press, is constructed to provide the greatest printing speed without the slightest sacrifice of printing quality.

Newspapers Won When Direct Mail Failed in Case of Auto Accessory—Seven Companies Start Drives—Krekell With Gold Dust Company

NEWSPAPERS won when direct mail failed, according to a story told this week by Will Rose, publisher of the *Cambridge Springs* (Pa.) *Enterprise-News*.

Mr. Rose, in addition to his newspaper, owns a factory which controls the American rights of an invention called the Satterlee Gas Amplifier. This invention applies a scientific principle to the ordinary gasket between the intake manifold and carburetor of an automobile, so as to neutralize the over charge in the manifold.

"I thought I had an ideal mail proposition," Mr. Rose said. "But three mail campaigns were duds."

Then Mr. Rose decided to test newspaper advertising. Employing the regular jobber and dealer channels in the Erie, Pa., territory, he took 110 lines of advertising in an Erie newspaper. In 23 days, 31 distributing points sold nearly 900 amplifiers at retail prices of 50 cents and $1.

Success of the Erie test sold the proposition to W. Bingham Company, of Cleveland, according to Mr. Rose. The Bingham concern will open a newspaper campaign in Cleveland, Nov. 1.

Seven firms within the last month have started newspaper campaigns through one advertising agency, the Kling-Gibson Company, Chicago. They are: the Marola Company, using more than 900 newspapers; Edna Wallace Hopper Company, using 600 newspapers; F. A. Stuart Company, Marshall, Mich., 400 newspapers; the Pyramid Drug Company; Northwestern Yeast Company; Reliance Manufacturing Company, and the Williams Oil-O-Matic Heating Corporation.

Harry G. Krekell is now sales promotion manager of the Gold Dust Corporation. He was formerly advertising manager of the American Molasses Company.

The Pacific Coast office of the Advertising Bureau of the American Newspaper Publishers Association, reports the following advertising activities in its territory this week:

The Puget Sound Power & Light Company is planning to increase its newspaper campaign. The Puget Sounders Associated has decided to enlarge its advertising schedule. Edgecombe-Newton Shingle Company, Vancouver, will increase its newspaper schedules beginning next year.

R. A. Brown, of the Standard Advertising concern of New York, is resigning to become advertising manager of Montgomery Ward & Co.'s seven retail stores. Mr. Brown is a veteran of the advertising field. Before joining the Standard advertising concern he was advertising manager of Lord & Taylor's and previous to that held a similar position with Marshall Field & Co.

The Hupp Motor Car Corporation reports gross sales of $32,061,604 for the nine months ended Sept. 30, 1925. After allowing for all operation expenses, and reserves, for depreciation and Federal taxes, the company reports net profit of $2,235,746, against net profit of $1,182,342 for the same period in 1924.

J. M. Botsford, advertising manager of Famous Players-Lasky for four years, will leave that post Nov. 1. From that date on he will head the advertising department for the Famous Players theatres. Russell Holman, who has been Botsford's assistant in the production advertising department, has been appointed by S. R. Rothafel to succeed him.

Botsford in his new berth will direct the individual advertising of all the theatres as well as inaugurate an institutional campaign for all of the houses. This is the first time that anything of this sort has been attempted in so extensive a manner for any circuit or chain of theatres in the country.

Devoe & Raynolds Company, Inc., New York, has purchased the Wadsworth, Howland Company, Inc., Boston, and will continue it as an independent organization. J. S. Robertson, assistant advertising manager of Devoe & Raynolds, will be advertising manager for Wadsworth, Howland Company, Inc.

Grafton B. Perkins, associate advertising manager, has been promoted to advertising manager of Lever Brothers Company, Cambridge, Mass., maker of Lifebuoy, Rinso, Lux, Twink, etc.

J. M. Hopkins appointed advertising manager of the American Press Association last February has been made northern manager of the New York-Florida Land Syndicate. John H. Perry, president of the American Press Association and owner of three Florida newspapers and a director in several Florida banks, is the director of the Syndicate. George A. Riley, vice-president of the American Press Association has taken over the duties of advertising manager.

The S. A. Conover Company, advertising agency of Boston, has been appointed by the Charles N. Miller Company of that city to handle the advertising and merchandising of its various lines of confectionery which have national distribution. Five-cent Bar candies are among the first products to be featured.

Telegraph Withdraws from City News

The *New York Morning Telegraph* will next week withdraw from the New York City News Association and will organize its own staff to cover sports and theatricals, it has announced.

What Are the Facts

about Food and Grocery advertising in the St. Louis market? What IS, and has been, for years, the determining factor in their sale?

For years the Post-Dispatch has carried more Food and Grocery Advertising than all other St. Louis newspapers—morning, evening, Daily and Sunday COMBINED. This supremacy is one of many years' standing. The first six months of 1925 again, as usual, finds the Post-Dispatch overwhelmingly in the lead. No new factor has developed in the field, notwithstanding the deceptive information given out by a St. Louis newspaper.

Food and Grocery Advertising

First Six Month of 1925:

	Agate Lines
POST-DISPATCH	597,710
Globe-Democrat	277,698
The Star (No Sunday)	190,060
The Times (No Sunday)	69,228

The Post-Dispatch exceeded the Globe-Democrat by 320,012 lines, or more than *one hundred fifteen per cent.* The Globe-Democrat, The Star and The Times COMBINED failed by more than 60,000 lines to equal the lineage of the Post-Dispatch alone.

Persiflage cannot alter the lineage record. Assertions of rapid growth in volume of Food and Grocery Advertising, when an actual loss was experienced, is an intolerable and unworthy deception. Claims of relative standing with first newspapers in other cities, while a weak second in its own, does not influence advertisers who know—or inquire—about St. Louis.

Present-day conditions in St. Louis emphasize the marked and continued supremacy of the Post-Dispatch in Food and Grocery Advertising.

Post-Dispatch — The Strong Favorite With the Retail Grocers in St. Louis

To determine the popular choice for a "one-newspaper" campaign, a recognized Advertising Agency sent an impartial questionnaire to every retail grocer in St. Louis. Of the 372 who stated their preference, 266 selected the Post-Dispatch, 80 the second newspaper, 16 the third newspaper and 10 the fourth newspaper.

First in Total Paid Advertising! First in Local Advertising! First in National Advertising! First in Classified Advertising. First in St. Louis Circulation! First in Everything!

DAYTON CITIZENS HONOR NEWSPAPER MEN KILLED IN PLANE CRASH

Verne F. Timmerman, Dayton (O.) Journal-Herald photographer. Lt. George H. Burgess of McCook Field, Dayton, and Maurice C. Hutton, aviation editor of the Journal-Herald, who were killed near East Salem, Pa., while returning from the Pulitzer Air Races at Mitchel Field, N. Y.

Public homage to the memories to Maurice C. Hutton, aviation editor of the *Dayton Herald* and the *Dayton Journal,* and Verne F. Timmerman, staff photographer of the same newspapers, was paid here Tuesday by an entire city and the air service of the United States government.

Hutton and Timmerman were killed Oct. 16 when an airplane from McCook field, Dayton, the Honeymoon Express, piloted by Lieut. George H. Burgess of Wilbur Wright field, crashed to earth near East Salem, Pa., while the pilot was returning the two newspaper men from the International Air races at Mitchel field, New York. Lt. Burgess also was killed in the crash.

The crash was the one fatal accident that resulted when 44 airplanes were forced to land while flying westward from Washington, D. C., that day.

A joint funeral service was held for the men in a downtown church, which several thousand persons attended. Ministers of four denominations and a male chorus participated in the last rites.

Hutton was a pioneer writer on aeronautical subjects, although at the time of his death he was but 23 years old. He had "cubbed" for the Herald and the Journal and grown up with the papers, turning to aviation after he was discharged from the army.

Hutton was acquainted with every man of prominence in aviation. He was the first civilian to ride in the Barling Bomber, the world's largest airplane, and he likewise was the first newspaper writer to take a typewriter into the air with him and land with a completely written story. He had covered the St. Louis, Dayton and New York air races and it was with government permission that he, along with Timmerman, had made the trip to New York in the Honeymoon Express.

Inventor of Stereotyping Dies

Brig. Gen. Thomas Heath, 91, one of the last of the Civil War generals, who was with General William Tecumseh Sherman on the march to the sea, and was credited with the invention of the system of stereotyping by which newspapers are printed from molds made from matrices of full pages of separate type, died Sunday, Oct. 18, at his home in Lockland, O., a Cincinnati suburb. General Heath was one of the founders of the Hamilton County (O.) Bar Association, being an attorney as well as a printer and inventor. He was breveted a brigadier general for gallantry in the Battle of Waynesboro, Georgia, and was flag escort at the surrender of Lt.-Gen. Joseph E. Johnstone in 1865.

Obituary

HARRY E. ROBERTS, advertising manager of the *Lexington* (Ky.) *Leader,* died suddenly at his home there, Oct. 4. He was a native of Ohio and was a graduate of Miami University.

J. RAY SARGENT, 55, for 21 years on the staff of the *Boston American,* died at Sydney, N. S., Canada, on Oct. 6, of cerebral hemorrhage. With other New England newspapermen he had gone to Sydney on the previous Sunday to cover the return of the MacMillan Arctic Exploration party. He was born in West Virginia and began his newspaper career on the *Newburyport Morning Herald.*

LLOYD MCCUTCHEON, 49, Iowa newspaper man 34 years, publisher of the *Mt. Vernon Hawkeye-Record,* died Oct. 10 in Mt. Vernon, Iowa, following an operation.

WALTER W. GOUDGE, for the past 35 years accountant with the *Acadian Recorder,* Halifax, Canada, died Oct. 7.

ALEX J. LAWSON, 44, foreman of the composing room of the *Warren* (Pa.) *Tribune,* died recently after a short illness.

HENRY C. EARLES, 60, editor and publisher of the *Penn Yan* (N. Y.) *Democrat* since 1909, died recently. He was stricken two months ago while at work in his newspaper office and had been ill since that time.

ROLLIN B. HUBBARD, 56, half owner of the *Boonville* (Ind.) *Enquirer,* and well known among newspaper men and printers in Southwestern Indiana, killed himself by shooting in Hartford City, Ind., recently.

CLINTON J. SMITH, for the past three years a linotype operator for the *Santa Maria* (Cal.) *Times* was killed recently in an automobile accident.

ROBERT C. MYER, 71, clerk of the Belmont County, Ohio, board of elections for ten years, and former editor of the *Fostoria Times* and *Bellaire Herald-Tribune,* is dead.

FRANK L. SCHOONMAKER, 66, who worked with President Warren G. Harding when he was operating the *Marion* (O.) *Daily* Star, died at his home in Minneapolis, Oct. 15.

ZENO C. MARRIOTT, formerly with the *Corning* (N. Y.) *Journal* and more recently with the printing staff of the *Rural Life,* Rochester, died recently.

WILLIAM ELLIOTT GRAVES, president and founder of the William Elliott Graves, Inc., advertising agency, Chicago, died Tuesday evening at the Illinois Central Hospital, failing to rally from the effects of an emergency operation for appendicitis. Mr. Graves specialized in financial advertising and organized his business five years ago in Grand Rapids, Mich. Most of his work was done for bankers and in four years he had 1,000 such clients. A year and a half ago Mr. Graves moved to Chicago.

MRS. ELLA ZERBEY ELLIOTT, newspaper writer, author of several books and musician, of Pottsville, died Oct. 17 of pneumonia. She was the sister of Joseph H. Zerbey, editor and proprietor of the *Pottsville Evening Republican* and *Morning Paper,* and was for a number of years a member of the staff of those newspapers. She was the widow of Charles D. Elliott, former newspaper man, founder and editor of the *Schuylkill Republican,* a weekly.

Things You Want and Don't Get

PERHAPS last month you realized there was a piece of equipment you needed. Looking at the price and thinking it over you decided your need was not great enough to justify the expenditure.

Have you considered that some other publisher may have in storage the very piece of machinery or equipment you need and that he would be glad to sell if a buyer was presented?

Look over our classified page and see if the particular thing you want is offered for sale. If it isn't, you can insert a small advertisement, stating your needs.

Results are secured through the classified page of

EDITOR & PUBLISHER

Rapidly Increasing Population Makes THE SOUTH A VIRGIN FIELD FOR EXPANSION

THE South is moving forward to a higher plane of business activity. It has awakened to some realization of its boundless resources. It has determined that these shall become known to the world. It has thrown its whole heart and soul into the utilization of these resources by local men and money, while extending the heartiest welcome to brains and brawn and capital from other sections.

The spirit of development and industrial advancement is seen throughout the South.

In these vast activities are an ever-increasing demand for all kinds of materials, equipment, clothing, foodstuffs and luxuries.

National advertising in a carefully selected list of newspapers will efficiently and economically bring your sales message directly into the home of the consumer. And it can not be so thoroughly done by any other means.

The newspapers listed below offer you merchandising and sales promotion cooperation

LIBRARY U. OF I., URBANA-CHAMPAIGN

IMPROVING QUALITY OF RETAIL COPY A TASK FOR NEWSPAPERS

Chicago Wholesale Firms Finds Copy Writing Department a Necessary Corollary to Sales Department— Small Store Ads Often Ineffective

By MURRAY E. CRAIN

IN the opinion of many advertising experts, daily newspapers can add to their revenues and prestige by co-operating more actively with retail advertisers to the end that retail copy shall be more effective.

Among those who hold this belief and whose ideas are entitled to consideration are most of the advertising executives of the wholesale department of Carson, Pirie, Scott & Co., of Chicago. This company maintains a large department store in the Windy City, but the wholesale department, so-called, is a separate institution which sells only to retail merchants throughout the Middle West.

This wholesale organization found that an advertising bureau which would provide its retail customers with advertising copy and ideas was a necessary corollary to its sales organization. It was discovered that the majority of merchants, particularly those in the smaller cities, were not getting the right kind of assistance from their home newspapers, which of course were the beneficiaries under any newspaper advertising plan adopted.

The Chicago wholesale house, therefore, was almost forced to create an advertising organization which considers the specific problems of its retail customers, and not only sells them merchandise, but assists them in re-selling the goods to the public, usually through newspaper advertising.

The advertising bureau of Carson, Pirie, Scott & Co., has devoted its efforts during the last year to the creation of retail advertising copy which will feature merchandise and ideas rather than "sales." It operates on the principle that the word "sale" has been used and abused for so many years that the memory of man runneth not to the contrary, with the result that a sale no longer means anything to the public.

There are many high-class merchants who have confined their sales to two a year, late summer and late winter, when certain seasonable items might properly be reduced in price to the benefit of both store and clientele. So many other dealers in all lines, however, stage "sales" almost steadily throughout the year that the small minority which clung to the twice-a-year idea are now almost unnoticed, when they do stage their semi-annual specials.

The wholesale house referred to is doing what it can to stem the tide by developing new store events for the retailer which can be called something beside a sale. While "something doing all of the time" is the slogan of every energetic and astute retailer, Carson's believes that this aim can be realized without the constant repetition of sales.

On or two other Chicago wholesalers, who act as advertising manager for hundreds of retailers scattered throughout the Middle States, and in some cases over the entire country, feel much the same about the present situation. The question before the house is whether these jobbers, forced to be interested in advertising because of its effect on their volume of business, shall be left to view the situation with alarm by themselves, or whether the newspapers of the country will assume a share of the burden of educating retailers to better advertising copy.

Nine newspapers out of ten, of course, are willing to provide advertising copy for retailers who ask for it. Probably not one of these nine who are willing to give this service where it is requested, assume an aggressive attitude in the matter. While the members of newspaper advertising organizations undoubtedly are struck with the sameness of the retail advertising which appears in their columns, and particularly with the fact that four out of five advertisers are announcing sales of one kind or another, the usual feeling is that the paper should wait for an S. O. S., rather than offer unsolicited advice.

This attitude is perhaps justified in the larger cities, where almost every retail store of any consequence maintains either an advertising department, one man who writes the copy, or pays an independent organization to handle its advertising. The owner of stores of this type must be approached diplomatically when anyone wishes to suggest that it might be possible to improve the arguments which go into his newspaper advertising.

On the other hand, if anything is ever to be done to improve retail newspaper advertising, the present seems to be the time. Retailers themselves are finding that their "sales" don't seem to be pulling as of yore. The public is growing more and more skeptical of these sales, but seems to be willing to enrich the merchant who uses real selling copy in his advertising. The average dealer knows that something is wrong with his copy, and he would like to be able to place his finger on the weakness.

A scrutiny of the advertising columns of a Chicago newspaper of Sunday, Aug. 30, indicates that there is plenty of room for improvement. With August and its clearance and mid-summer sales out of the way, and September hovering in the offing, it might have been assumed that the advertising on that day would be filled with glowing descriptions of the new fall merchandise to be found in the stores. Such an assumption would have been too optimistic. Many of the dealers who had been advertising August sales merely changed one word and launched their September sales.

Even the department stores having copy usually far more appealing than that of smaller establishments, filled most of their space with talk of sales. One told of "the September sales of home furnishings," at the same time announcing "a stupendous underpriced sale of boys' 'lumber jack' long pants suits."

There was a "factory piano sale," a number of fur sales, a "no profit sale" of hosiery, and numerous sales continued into September from August, "by request."

On the other hand, there was evidence of a determined effort by a few of the most intelligent merchants to get away from stereotyped and conventional advertising and to strike a fresh new note. Maurice L. Rothschild, operating one of the big clothing stores, took large space to tell its big clientele: "You'll look taller in your new fall suit," a statement which was certainly interesting to the average man, even if his bump of vanity has been reduced in size through constant contact with the spiked club of circumstance.

O'Connor & Goldberg, big shoe house, told of "four exquisite new advance models for fall," while a piano house hooked up its story with the golf craze, telling of "The Ampico—an indoor hobby for the golfer."

Even where summer merchandise was yet to be sold, there was an obvious effort to avoid the use of the hackneyed "sale." One store contented itself with "Final! All summer dresses reduced to $9.75."

The rank and file of merchants in Chicago, as elsewhere, however, are desperately in need of new ideas and words with which to express them. There seems to be a real opportunity for the modern advertising department of a Twentieth Century newspaper to create new advertisers and to bind its present clients to it more closely by extending a definite effort to make its space more productive by putting brains into the copy which occupies that space.

NEW "MIXER" MACHINE

Intertype Corporation Announces a Standardized Product

The Intertype Corporation has announced a new standardized machine of the "mixer" type—that is, a machine with which matrices from two or more magazines can be assembled together in the same line, with automatic distribution.

The new machine carries two "main" magazines, and two "side" magazines can be furnished with it. The main magazines are standard and interchangeable on all standardized Intertypes. The side magazines are extra wide, with 34 channels, and matrices from both can be mixed in the same line with matrices from both of the main magazines.

The assembling mechanism of the new machine is quite like that of other standardized Intertypes, excepting that by means of two sets of escapements and escapement rods the machine is designed for instant changes from one magazine to the other. The changes are made with convenient light-touch levers; the magazines can be removed from the rear.

The sorting of mixed fonts is done by the single distributor box, which automatically moves back and forth from one distributor bar to the other, controlled by simple font notches in the matrices, placing each matrix on the right bar for its magazine.

With this new "mixer" four different faces of 90 characters each can be carried on two-letter matrices in the two main magazines. Two cap fonts of display or head letter matrices, 34 characters each, or one full caps-and-lowercase font, of characters, can be run in the side magazine.

This Intertype "mixer" is the result of careful planning on the part of the Intertype Corporation. They spent much time and effort in finding out first of all what kind of machine was wanted by printers and publishers. They even employed an outside agency for research work. A man familiar with slug casting machines was sent into plants.

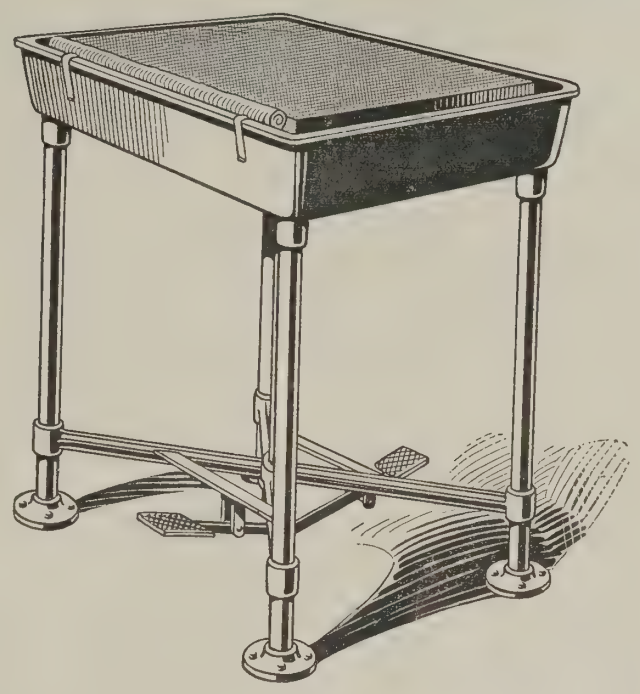
POWERS PERFECTION COOLER

Every Newspaper Photo Engraving Plant should have at least one



The Powers Perfection Cooler requires no water connection of any kind.

It can be moved at will by simply picking it up and placing it where it is wanted.

It has no mechanical parts to get out of order.

It applies cold water evenly and simultaneously to all parts of the plate—ON THE BACK OF THE PLATE only.

It cools the plate instantaneously to the exact temperature required and saves wiping, mopping and reheating.

The price of the Powers Perfection Cooler is $350

The *Powers Perfection Cooler* met with the instantaneous approval of both the workers and the owners wherever it was installed and tried. The men in the shops like it because it helps them in their work. They save time and effort, turn out more work and better work, and do it with very little physical labor. It is a clean, workmanlike way of doing what is otherwise a messy, sloppy task.

Proprietors like it because it saves gas, water, time and makeovers. These savings mean money and profits and that is what we all want. To satisfy yourself, go into your etching rooms and see what happens when the etcher tries to cool a large plate by dragging it over a roller wrapped in old towels and rags or a piece of burlap. Watch the plate buckle and then see him try to straighten it out. You know what that means in color work.

The use of the Powers Perfection Cooler does away with buckled and twisted plates, the splashing of water on the face of the plate and the constant work and worry connected with etching. A zinc etching is heated from 13 to 16 times by the etcher. That tells the story.

STORY OF FAMOUS WHEELOCK'S NEWS EXPLOITS TOLD FOR FIRST TIME

Noted Correspondent of Defunct Wilson (N. C.) Mirror Skipped from One Side of Globe to the Other All in the Day's Work

THE following account of the "world's greatest newspaper correspondent" written by Carl Goerch former editor of the *Wilson* (N. C.) *Mirror,* reprinted from the *Raleigh* (N. C.) *News and Observer* recently, tells for the first time the inside story of how "H. D. Wheelock, Jr.," gained his newspaper fame.

This is the biography of the greatest newspaper correspondent the world has ever known; greater than Mark Sullivan, Irvin Cobb, Frank Simonds or Ben Dixon MacNeill; a man who, during his brief but meteoric career, wrote up more important events and interviewed more prominent personages than any correspondent that ever lived. He travelled hundreds—yes, thousands of miles in a day; was never weary and never fell down on an assignment. He corresponded for only one paper, and that was the *Wilson Mirror,* of which I was editor for two years. His work attracted wide attention and much comment throughout the state and there undoubtedly were many other papers who would have been glad to have had him on their payrolls, but he rejected all offers.

This man was H. D. Wheelock, Jr., the super-correspondent of all times here's his story.

When I first went to Wilson, the paper was handicapped through it inability to scure the Associated Press membership. This meant that we could obtain very little state, national or foreign news and had to depend almost entirely upon local events to interest our readers. Of course, a newspaper couldn't expect to make very much headway or progress under those circumstances, and it didn't take me long to realize that fact. I decided that if we wanted to hold the subscribers we already had on our list and if we wanted to get additional subscribers, we'd have to get "outside" news.

And then one morning the Mirror came out with an important news story. I think it was an account of Clara Phillips breaking jail at Los Angeles. At the top of the article appeared the line "By H. D. Wheelock, Jr., Special Staff Correspondent." The people of Wilson read the story of Clara's escape several hours before the *Raleigh News and Observer* or the *Greensboro Daily News* reached the city.

The next day there was an earthquake in Italy. The Mirror carried a graphic description of the flight of terrified peasants down the mountain-side, fleeing from the streams of lava that flowed in their wake. The article was written by "H. D. Wheelock, Jr., Special Staff Correspondent." Once more the Mirror had given its readers an important event before other newspapers could reach the city.

The following day, Mr. Wheelock was in Indianapolis, covering the automobile races, and the day after that he sent out a snappy interview with Governor Al. Smith, of New York.

Various papers in the state were beginning to observe the work of this remarkable correspondent. Oscar Coffin, of the *Raleigh Times,* wrote up a column-long article, commenting on the speed with which Wheelock travelled. Charlie McDevitt, down at Kingston, also carried an interesting story in the *Kingston Free Press* on the correspondent's wonderful work. A number of other papers did the same. Wheelock's travels were watched closely. And the longer he travelled, the more proficient he became.

And then, one night, two important stories broke. One was a big flood out in Ohio and the other was an uprising of some kind in Brazil. The Mirror carried a detailed story of both happenings and the name of H. D. Wheelock, Jr., appeared at the head of each article.

That caused quite a sensation. It caused a sensation particularly in the Associated Press office in Raleigh. Robin King was manager of the office at that time. He had been watching Mr. Wheelock's work and he was struck with the similarity of his writings with dispatches sent out by the A. P. In other words, Robin smelled a mouse. He knew that the Mirror was receiving no authorized press service and he was somewhat skeptical about Wheelock's ability as a traveler. Furthermore, he figured out that correspondent's traveling expenses must be in the neighborhood of two or three thousand dollars a day, to say nothing of his board bill and telegraph tolls.

Robin sat down in his office and began to think. He decided that the Mirror must be getting its news from some other newspaper which, of course was strictly against the rules. His first suspicion was Goldsboro, so he began to watch the paper in that city; but all of his watchings resulted in nought. Then he cast his suspicious eye upon Kinston, with the same result. He kept a watch on every paper that was getting Associated Press dispatches, but apparently all of them were entirely innocent of furnishing the Mirror with its news.

In the meantime, H. D. Wheelock, Jr., continued his writings. A jump from Japan to Sweden was a matter of only a few hours for him. He attended a meeting of the prison board at Raleigh on a Tuesday and also covered a murder trial in Seattle the same day. By means of his dispatches, the Mirror was kept supplied with all the important news that was going on.

It began to get on King's nerves. He had done all in his power to find out where the "leak" was in his news service but had been unable to accomplish anything toward stopping this leak. Several weeks passed, and there was never a day but that Wheelock didn't have one or more stories in the Mirror.

One night, a couple of State College boys had an automobile accident. Their car was smashed up, one of the youths was fatally injured and the other also was seriously hurt. The accident happened just before midnight. It occurred near Raleigh and news of it reached the News and Observer office about half an hour before the first edition went to press. It was too late to send it out to other papers in Eastern Carolina that were supplied by the Associated Press, but it wasn't too late to get it in the News and Observer.

And it wasn't too late for H. D. Wheelock, Jr., either. When the Mirror came out the next morning, there appeared a complete story of the wreck, as sent in by Mr. Wheelock.

Mr. Robin King received his copy of the Mirror that day and read Wheelock's story. He discovered an important fact, and that was that the News and Observer and the Wilson Mirror were the only two papers in the State that had carried that particular story.

Evidently someone in the News and Observer office must be supplying the Mirror with its news. Robin kept his eagle eye more alert than ever before. He trailed practically every member of the News and Observer force.

Absolutely nothing developed; he could find no leak anywhere. However, he continued his investigation and one night he took notice of a young man who came into the News and Observer office regularly every night at about midnight, bought a copy of the paper and then walked out again. Robin watched him for a few nights before his suspicions crystalized to a sufficient extent to cause him to shadow the youth.

The next night, when the young man came in to buy his paper, Robin and another Associated Press employe were on the lookout for him. They let him get his copy of the News and Observer and, when he went out the front door they followed him into the street, He made his way to a public telephone pay-station. Robin and his partner watched him enter the booth and then stole up to the sides. They heard him ask the operator to connect him with the Wilson Mirror. In a moment the connection was completed and they heard him unburden himself somewhat as follows:

"The first headline is about Premier Venezuelos eating grapefruit for breakfast....All right, I'll read you the first two paragraphs....Here's a story about E. E. Britton singing tenor in a church choir....Oh, you don't want anything on that——Well, here's one about President Harding laying down some kind of an ultimatum....It's pretty long but I'll read all of it if you want it....And here's one about Albert Cox being at the University of Virginia baseball game....Don't want anything on that either, eh?"

And so on. The two listeners heard him read every heading on the front page and then turn over to the sporting page and continue with the baseball score.

They took notes of everything he said. So did I, because I was at the other end of the wire, transcribing on a typewriter the news that he was supplying me. Finally he finished, hung up the receiver and left the booth.

No sooner had he left when Robin and his friend pounced upon him. They informed him that he had committed a penitentiary offense and that he had ten years in prison ahead of him unless he made a complete confession of everything he had done. The poor chap was scared out of his wits. He told them all they wanted to know and he promised on bended knees, that he'd never do it again. Then they turned him loose.

The next day Robin called me up over the telephone.

"I believe I'd fire H. D. Wheelock, Jr., if I were you," he suggested.

"Why?" I asked.

And then he told me how he had trailed the young fellow out of the News and Observer office and had caught up with the entire scheme. He made it impressive that unless the system were abandoned, a lot of serious trouble would arise for somebody or other.

The youth was an employe at the Seaboard yards and got off duty at midnight every night. He also was a cousin of one of the printers I had working for me at Wilson and through whom I was able to employ his services. As soon as his work was over in the shops, he'd head for the News and Observer office, get one of the first papers that come off the press, rush to a telephone and read the headlines to me. I'd tell him what stories I wanted. For this service he earned the munificent sum of one dollar a night.

Well, anyway, King's detective work interfered quite considerably with H. D. Wheelock's activities. Somehow or other, he still managed to shoot across a good story occasionally, but as I can't explain how he did this without getting somebody else into trouble, the matter must be withheld from publication. No further discovery ever was made as to his method of operation. In the course of a couple of months, I obtained the Associated Press service and after that, of course, I had no further use for the famous correspondent's services. Two days later, a horrible tragedy occurred. I carried the story in the Mirror. No other paper in the entire country had a word on it. It told of how H. D. Wheelock, Jr., renowned newspaper corresondent, had been walking along the main street of Neyosha, Minn., when the balcony of the Hotel Robin King collapsed and caught him in the wreckage. The poor fellow was killed instantly. I gave him a fine write-up and also ran his picture with the article. Nobody noticed, so far as I know, that the picture was that of Luis Firpo, the Argentine heavyweight boxer.

Wheelock's body was sent to his old home in Mazuritz, Ill. There an impressive funeral service was held. E. E. Briton sang "Oh, Promise Me," while Oscar Coffin got off some snappy jokes. Several other well-known North Carolina newspaper men were in attendance at the funeral, according to my story, and all of them had a thoroughly enjoyable time. The body of Wheelock was laid to rest 'neath whispering elms and is being lulled in its long sleep by a babbling brook, which flows close by the side of his grave.

And thus, after only a few hectic months, came to the close the career of a correspondent whom every newspaperman in North Carolina regards as without a peer in his profession. Wheelock covered untold thousands of miles in supplying the Mirror with its news. He also gave Robin King a most interesting experience and enabled the latter to develop a hitherto unknown ability as a detective. He believed in getting the news —regardless of the labor or cost involved —and he never fell down on an assignment that was given him.

Not long ago I was in Greensboro, and one of the scribes in that city brought up Wheelock's name. He wanted to know how I happened to hit upon such a cognomen for my correspondent. Quite a number of others have asked that same question from time to time.

The real H. D. Wheelock, Jr., is the son of a carpenter and lives in Tarrytown, N. Y. I went to school with him. When I decided upon a name for my newsgatherer, the name of Wheelock popped into my mind, so I tacked it on to him. He carried it to his grave without dishonor or disgrace.

And that's the story of "H. D. Wheelock, Jr.," the most famous correspondent North Carolina ever had. There's no question but that he will hold long-distance traveling records for all time to come.

PRICE-CUTTING SCORED IN COURT DECISION

American Tobacco Company's Refusal to Sell to Price—Slashing Jobbers Upheld by U. S. Appeal Court

The American Tobacco Company's refusal to sell its products to certain wholesalers, who resold to retailers at prices showing less than a "legitimate profit," was upheld yesterday by the United States Circuit Court of Appeals. A "cease and desist" order by the Federal Trade Commission, charging restraint of trade by the tobacco corporation, was reversed by the Appellate Court.

An opinion written by Federal Judge Henry W. Rogers and concurred in by Judges Martin T. Manton and Learned Hand, held the tobacco company acted to protect its own interests and the interests of the trade, "to enable jobbers to make a reasonable profit and to avoid demoralization of trade."

The Trade Commission's order was entered in March, 1922, against the Wholesale Tobacco and Cigar Dealers' Association of Philadelphia, the American Tobacco Company and the P. Lorilard Company. The commission acted on complaints that the first-named defendant had issued list prices and prescribed certain discounts which were not to be overstepped by its members, and conspired with the other defendants to prevent lawful competition by maintaining certain prices through intimidation.

"What the American Tobacco Company did," wrote Judge Rogers, "was to refuse to sell its products to wholesalers and jobbers who, having bought its products at a price fixed by it, thereafter sold them to retailers at a greater trade discount than the wholesalers' association had agreed upon.

"The facts showed that where wholesalers allowed a greater discount than that which they themselves had agreed upon in their association, the business in their particular localities was demoralized and they were deprived of a legitimate profit. We see nothing unlawful in the policy which the American Tobacco Company pursued."

Officers of the tobacco company yesterday called Judge Rogers's opinion "a decision of far-reaching interest to all manufacturers who believe in price stability."

"DESIGN" AD EXPENDITURERS

Is Advice of A. M. Staehl to Industrial Advertisers

Addressing the fourth annual convention of the National Industrial Advertisers' Association at Atlantic City this week, A. M. Staehle, industrial advertising manager of the Westinghouse Electric and Manufacturing Company, declared that an advertising appropriation of millions, covering a wide range of products in a diversified sales field, may be as scientifically designed as a modern office building or bridge.

By a clever system of classifying industries, Mr. Staehle showed how it was possible to give each market an advertising rating for the percentage of appropriation to be allotted to advertising in that field.

ADVERTISE IN

Illinois

WITH ASSURANCE

Illinois is enormously wealthy in agricultural and industrial products—assurance of great buying power.

Illinois has (in addition to a remarkable mileage of riverways) 12,030 miles of railroads, and has the heaviest railway transport tonnage in the United States—assurance of ideal distribution facilities.

Illinois newspapers offer cooperation of the highest order to the advertising manufacturer and his agency representative through their merchandising and advertising departments. They form a convenient and economical means to convey your announcement directly to this prosperous territory — assurance of efficient sales promotion.

National and territorial advertising in the following list of newspapers will quickly and surely reach the Illinois consumer, with a reasonable assurance of ready response:

FULL TEXT OF A. B. C. COMBINATION RATE DEBATE

(*Continued from page* 10)

MR. CLAGUE: "I withdraw." (Laughter and applause.)

MR. KELLOGG: "Mr. Palmer, I can only say I will work for that motion before the general session, because it is exactly what I agreed to do with Mr. Clague in Colorado Springs." (Laughter.)

The resolution was unanimously adopted.

MR. ANDERSON (Macon, Ga.): "Germane to this subject, we have in our territory (I am trying to protect publishers against themselves) subscription prices. Where the subscription price of a newspaper is $10, I think, or $9.50, they offer at the head of their proposition five newspapers for the price of four, or five newspapers for $20. At the bottom of the proposition they say if you send any club of four with $20, you will be sent a subscription free. I would like to recommend that we pass to the general session a suggestion that they change that rule to read that no clubbing offer shall be made where the total amount remitted for the four subscribers or the total number of subscribers sent in shall be less than one-half the subscription price. In other words, the five subscriptions should bring in one-half of the subscription price, $22.50 instead of $20.

"I think the tendency of publishers is to get the price just as cheap as they can, and inasmuch as we have one-half the subscription price, it seems to me, we should protect it so that our circulation managers can't argue when some publisher in the territory cuts his price too low.

"I, therefore, move we change the rule to read, or we recommend that the rule be changed to read that all clubbing offers shall in the total remitted be at least fifty per cent of that entire subscripion price of the newspaper."

The motion was regularly seconded and unanimously carried.

The combination circulation resolution went to the resolutions committee of the A. B. C., George M. Burbach, chairman, and the committee's recommendation was eagerly awaited when the entire membership met to take up new business in general session, Friday afternoon. Mr. Burbach reported that the resolutions committee recommended that it be referred to the board of directors for immediate and proper action, on the basis that the proposed rule had many and serious ramifications involving other divisions.

Guy Osborn, special representative, rose to demand what the effect of such a rule would be upon other than the newspaper division.

In a moment the entire membership was electric with the shock of argument.

Mr. Clague in an earnest address urged that the convention "make haste slowly" in adopting a rule for one division which might seriously involve other divisions. He said it involved millions of dollars in property rights and needed minute and careful consideration.

Mr. Palmer, sponsor of the attempt to change the rule, objected strenuously to further delay, declaring that the matter of combination circulation had now been before the Board of Directors for two years and no action had yet been taken. He said buyers of the *Los Angeles Express* have little use for the second surburban paper they receive with each copy, that it is waste of paper, advertisers' money, and distribution expense.

The sentiment of the meeting was clearly with Mr. Palmer. It appeared that the members would take matters in their own hands and pass the resolution.

Mr. Burbach here urged that no hasty action be taken which might indicate a lack of confidence in the Board or Managing Director Clague.

Mr. Clague, indicating that he was personally in favor of the proposed new rule, read a tentative rule on the subject which he had prepared following the meeting of the Newspaper Division, Thursday. It read:

"When two or more publications are sold in combination, to qualify as paid circulation, the price must be at least ten per cent higher than 50 per cent of the highest price of an individual publication sold in such combination, plus 50 per cent of the price of an added publication. This applies to mail, carrier and street sale circulation on all publications, newspapers and periodicals."

O. V. Fragstein, circulation manager, *Milwaukee Journal*, declared that combination sales were not auditable since the desires of the purchasers were not ascertainable. He affirmed that the proposed rule making the combination price higher than the price of either paper would allow the buyer to show his preference. It he desired the two papers he would pay the higher price and it would be bona fide circulation.

F. A. Walker of the Munsey Publications here engaged Mr. Clague in a verbal duel, asking what was the original intent of the present rule adopted about 10 years ago, which allows as net paid circulation papers sold in combination for 50 per cent of the price of both. He asked if it were true that the Directors had in mind the clubbing of newspapers with magazines when the rule was adopted.

Mr. Clague replied he could not state offhand the original intent, but that at the time of adoption San Francisco and Oakland papers were being distributed in combination. He made it clear that he approved the principle of the proposed new rule, but that he was opposed to hasty action which might involve other A.B.C. divisions. After further argument the resolution was put to the convention in its original form by Mr. Burbach.

Mr. Palmer's amendment was put to substituting for the expression that "it be referred to the Executive Committee," that it be adopted by the convention.

Mr. Palmer's amendment was put to vote and carried. The resolution had been passed by the convention.

LOCARNO PACT CABLED ENTIRE TO NEW YORK

More Than 5,000 Words Sent Direct Without Relay From London to New York A. P. Office—3,000 Mile Circuit

The complete text of the security pact signed at Locarno by the western European powers was transmitted by direct cable today from London to the offices of the Associated Press, 383 Madison Avenue, New York, Oct. 19, the second time in the history of trans-oceanic communication that a cable wire has been operated directly into a newspaper or news association office.

The dispatch, totalling more than 5,000 words, was sent over a circuit 3,000 miles in length, without relay, and was available for publication in the United States almost simultaneously with its appearance in Europe.

This feat in communication, considered by the Western Union as one of its outstanding accomplishments, is rivalled only by the transmission of the Dawes report, totaling 44,000 words, to the Associated Press and United Press from Paris in April, 1924. In the latter case the dispatch was filed in Paris over four direct cables.

Monday's message was filed in the London office of the Western Union by an A. P. correspondent and was sent over a direct circuit to the cable department in New York. The circuit ran from London to Lands End, Valentia, Ireland; Hearts Content, Newfoundland, Canso, Nova Scotia; Rockaway Beach and thence overland to New York. The dispatch was copied at the rate of 50 words a minute by the syphon recording system by which the message was traced in a code system on a narrow tape, being transcribed simultaneously by skilled operators. Even the punctuation of the original text was adhered to throughout the despatch.

The entire circuit was set up within 10 minutes after the arrival of the equipment at the A. P. office, under the direction of T. F. Foley, cable superintendent of the Western Union.

ISSOURI GROUP HITS PRESS AGENTS

solution Passed at St. Louis Meeting Urging Members to Beware of Advertising Masquerading As News—Officers Elected

Press agents were attacked in a reso-ion passed by the Missouri Press Asso-tion in annual convention at St. Louis, t. 15-16.

Text of the resolution was:

'In justice to our readers, we urge the itors of Missouri to scrutinize propa-nda with the greatest care, that the pub- may not be imposed upon by advertis- matter masquerading as news."

More than 350 were registered at the eting, which elected E. H. Winter, tor of the *Warrenton* (Mo.) Banner, sident.

Other officers chosen were: George S. ms, editor of the editorial page of the *Louis Post-Dispatch,* vice-president; ss Pearl Winters of the *Monett Times,* retary, and Mrs. Frances J. O'Meara, tor of the *Martinsburg Monitor,* asurer.

Eugene B. Roach, editor of the rthage *Democrat,* retiring president, l E. E. Swain, editor of the *Kirksville press* were named as directors for ee years.

Prof. Frank L. Martin of the Missouri iversity School of Journalism attacked ss agents and publicity committees as ie of the greatest menaces of journal-s to-day." He advised the newspapers spend money for reporters. The ined reporter will build up good will, ance the newspaper's prestige, and in long run sell both advertising and cir-ation.

. L. Caswell of Ames, Ia., field man-r of the Iowa Press Association, and Buck, of Harvard, Neb., field man-r of the Nebraska Press Association, ussed their work. Fred Naeter, edi- and co-publisher with his brother of *Cape Girardeau Southeast Miss-ian,* declared that 25 years ago the ntry newspaper subsisted on charity, scriptions being traded for cordwood, le now the rural editor is a citizen of ding, equal in rank with the banker, merchant and the lawyer.

rank Edgecombe, publisher, *Geneva b.) Signal* and president of the National torial Association told of the fight to p down second-class postage rate and Government printing of envelopes. he Free Publicity Evil" was discussed W. V. Tufford of Clinton, Ia., secre- of the Inland Daily Press Associa-, along the same lines as his address hicago before that association.

Valter B. Weisenburger, vice-president he National Bank of Commerce, urged the editors boost the State. "Adver-g can do for Missouri what it does California and for Florida and the thwest for we have more than they dvertise," he said.

he *St. Louis Times* issued a special ion for the editors.

three-cornered gridiron discussion newspapers was one of the fea-s of a dinner given by the *Post-Dis-h,* Friday evening, at Hotel Chase, 0 members of the association. "Out-d" and "inside" views of newspapers e given by Eugene H. Angert, an at-ey, and Clark McAdams, editor of the "Just-A-Minute" column of the Post-Dispatch and teacher of journalism at Washington University, whose serio-satirical talks were answered by Dean Walter Williams, of the Missouri University School of Journalism.

Angert expressed his purpose to discourse "upon the viciousness of the press, with malice toward all and charity to none."

He referred to the easy lot of the small-town editor, of the city paper seeming to be "operated on the basis of doing the most harm to the most number," and jocosely referred to the size of the Sunday newspaper.

McAdams asked several times, "Is journalism a business or profession," without getting an answer. "We run newspaper factories," he said. "We have outwoolworthed Woolworth. We have given the world the 2-cent store. Who is the editor of the newspaper today? The circulation manager." Circulation schemes and service enterprises of city newspapers were put on the griddle.

Both speakers so strongly overemphasized their points, especially Mr. McAdams, that Dean Williams chided them both, and stood up for the newspaper, large and small, as a watchman of public rights and an expression of the civic soul.

PRESS TASK SET

Must Work for Understanding Between Nations, Says Mlle. Weiss

It is the newspapers, with their "army of correspondents and wireless system," that can bring about co-operation between nations, Mlle. Louis Weiss, editor *L'Europe Nouvelle* of Paris, who visited in New York this week.

"The task of the press now I believe is to work for better understanding between nations," she said in an interview.

"Newspaper correspondents are like eyes in all parts of the world. They see everything."

Printing Company Sues Klan

The Iowa Printing Company, Des Moines, has brought suit for $10,000 against the Ku Klux Klan and the Empire Publishing company and the plaintiff corporation for the printing of the *Klan Kourier,* former Iowa Klan publication. The suit is based on contract to purchase a press from the printing company. Two months after the contract, it is alleged, the Kourier was moved to Washington, D. C.

The Washington Newspaper Reborn

The *Washington Newspaper,* official publication of the Washington State Press Association, formerly published by the state at the University of Washington, and recently killed off in an economic campaign, has been taken over by the State Press Association and will be issued without losing a number. It will carry some advertising. Dean M. L. Spencer, School of Journalism, University of Washington, will continue as editor.

WHAT OUR READERS SAY

We Are Silenced

To Editor & Publisher:

You are doing a great harm to the daily press by your discouragement of the press agent. I am surprised by your lack of understanding. If you really had the interest of the newspapers at heart you would cease. Man, don't you know that there has been a falling off of fully 85 per cent of the free metal that these charitable gentlemen have been handling to the newspapers for years, since you started in to muzzle the moochers. We used to receive weekly dozens of very nice plates that went into the metal pot at the expense of advertising concerns that meant to rob us of our space. Now we are compelled to buy our metal.

Naturally, we appreciate the fact that your diatribes are intended to penetrate the domes of editors who cannot distinguish between a news item and an advertisement, but we have never needed your advice and you have succeeded in spoiling one of the pleasantest little grafts it has ever been our pleasure to indulge. We have always sent back the "enclosed post card" ordering sterotypes, electros and even mats. We cannot use the latter, but it is always so pleasant to count the dollars in cancelled postage stamps, and sometimes we are able to make use of the reverse side of proofs for copy paper. Editor & Publisher, lay off!

W. L.

Religious Magazine Supplement

To Editor & Publisher: I have had an inspiration which may be very old, and yet, which I do not believe has been widely used. I wonder what you think of it. I refer to a suggestion for a Sunday Magazine Section which would contain a hymn, a scripture selection possibly from Moffatt's translation, a short and practical sermon from some noted minister, and one or two pertinent prayers. It might be that shut-ins would enjoy it and little groups here and there, deprived of church privileges, might utilize it.

The wide use of the radio by people who have not been attending church, convinced me that we are on the verge of a new day for religious culture. This magazine section would carry brief articles, giving the history of the denominations, the story of some strong and old hymn, the biography of a past or present renowned religious leader, with brief, brisk and vital general church news. A great many details would occur to the practical newspaper man, but I would try to secure for the magazine a group of advisers consisting of prominent and active church working laymen.

I believe that we must recognize the fact that the Sunday newspaper is here, and it is too bad to allow it to be wholly secular and often disgustingly vile. Yours faithfully,

Christian F. Reisner.

JOURNALISM SCHOOLS AIDING PRESS IN ATTAINING ITS IDEALS

They Have Already Improved Status and Character of the Professional Journalist, Making for Better Newspapers, Cunliffe Reports

SCHOOLS of journalism will improve newspapers by improving newspaper men, Prof. John W. Cunliffe, Director of the School of Journalism of Columbia University, endowed by Joseph Pulitzer, says in his annual report to President Nicholas Murray Butler.

Prof. Cunliffe images an abler newspaper profession educating the public to a more excellent press. Summarizing, he asserts:

"In short, the schools of journalism have already improved the status and character of the professional journalist, and it is upon the professional journalist that we must depend for the improvement of the newspapers.

"Ultimately, no doubt, the public gets the kind of newspaper it is willing to pay for, but the education of the public is a long and slow business which has to be undertaken largely by the newspapers themselves. In spite of the triviality of many of our papers, which sometimes discourages earnest seekers after truth, the outlook is not disheartening; there are still excellent newspapers for those who are willing to buy them.

"The way to the education of the public lies in the education of men who are to make the newspapers of the future, and in this responsible and difficult task the schools of journalism of the better sort have made a degree of progress which is not only a substantial promise, but is already considerable, in view of the short period of time during which the more important schools have been organized."

Newspaper jobs, although relatively fewer because of the multiplying numbers of graduates, still seem plentiful, according to Prof. Cunliffe, who in this finds evidence to disprove the charge that a large number of men and women trained in schools of journalism do not enter the newspaper field.

"In spite of the considerable increase in the number of students graduating, they seemed to find places without any increased difficulty," he says. "This is the more noteworthy because, as was pointed out in the last annual report, the number of newspaper positions vacant is not increasing.

"It follows that the number of graduates of schools of journalism in professional positions is increasing steadily from year to year, and that they will in course of time constitute an important factor in the direction and administration of newspaper policies. This is contrary to the belief of some critics of schools of journalism who have asserted that a large number of graduates did not go into newspaper work.

"So far as the Columbia School of Journalism is concerned, a systematic effort is being made to ascertain actual facts. The Advisary Board has voted a sum of money to meet the expense of investigation into the employment of the graduates of the school from its foundation, and with the loyal cooperation of the alumni there is every reason to believe that definite results will be obtained in the shape of information which will command unquestionable confidence."

All schools of journalism, Prof. Cunliffe points out, have not been successful in teaching their students how to carry on in a newspaper office, the results in many cases being "painful." He does not sympathize with those who condemn as unproductive instruction in newspaper practice and sees in the views of H. L. Mencken justification for his own.

"The very rapid extension of the teaching of journalistic technique, not only in colleges and schools or departments of journalism, but in high schools, has brought about an inevitable reaction," the report declares.

"There are now more than 200 colleges and universities and some thousands of high schools in which an attempt is made to teach journalism, and the result has been that many of the young people who thought they had learnt it have ventured into professional work with painful results to themselves and others.

"The upshot has been some discouragement—unreasonable but not unnatural—in the minds of those engaged in professional instruction in journalism, even where this instruction was of adequate scope and given under suitable conditions.

"There is no question but that practical experience is absolutely necessary; on the professional side there is no substitute for it, but on the educational side it may not be particularly helpful. A very good newspaper man may prove on trial to be a very poor teacher.

"Some of those now teaching journalistic technique had never taught anything until they faced a crowd of eager youngsters who wanted to be instructed in the art of reporting and copyreading; to talk to them once or twice on the mysteries of the craft was easy; but to meet them for continuous instruction two or three times a week, for the larger part of a year, to retain their interest to the end and to make them feel that it was as worth while at the end as at the beginning—this was a task of which the difficulties have not always been appreciated.

"The duty laid upon these pioneers in the teaching of professional journalism is not merely to devise methods for themselves, but to work out a sytsem of technical teaching which can be handed on to their successors and improved in the light of experience. A good teacher of technique will produce other teachers of technique who will carry the fruits of their instruction and of their own professional experience into other schools.

"I look forward to the time when one would no more think of saying that the practice of journalism can best be taught in the shop than of saying that the practice of law can best be taught in the law courts."

CANADA INCREASES EXPORTS

Million Dollar Increase in September in Paper and Pulp

According to the report issued by the Canadian Pulp and Paper Association, the total value of pulp and paper exported from Canada in September was $13,686,006 an increase of $1,085,396 over the total for August and of $2,029,540 over September, 1924.

The value of wood-pulp exported in September was $4,843,226, an increase of $1,021,069 over the previous month and the highest monthly total recorded since the year 1920.

Exports of paper in September were valued at $8,842,780, an increase of $64,327 over the previous month.

For the first nine months of the current year, exports of pulp and paper were valued at $111,519,865 as compared with a value of $103,050,333 in the corresponding months of 1924, an increase for this year of $8,469,532. Exports of pulp for this period amounted to $34,181,917 while exports of paper accounted for $77,337,948.

Exports of pulpwood in September were 117,715 cords valued at $1,237,132, a decline from the previous month when the total was 148,672 cords valued at $1,566,479.

Pulpwood exports for the first nine months of the year amounted to 1,185,495 cords valued at $11,775,969, compared with 1,090,425 cords valued at $11,140,838 exported in the first nine months of 1924.

Our Own World of Letters

By JAMES MELVIN LEE

ELSON ANTRIM CRAWFORD, president of the American Associa-n of Teachers of Journalism, discusses chools of Journalism Today" in *The erican Mercury* for October. Pro-sor Crawford has done an excellent ce of work. He comments not only ut the purely technical courses, such reporting, editorial writing, prepara-n of special articles, history of journal-, the ethics of journalism, and the of the press, but also about the ally important courses in politics, tory, government, economics, sociol-, literature and philosophy.

he remarkable thing about this ar-e is how closely present day instruc-n in journalism follows the plan out-d by the late Whitelaw Reid in an ress which he delivered on "Schools Journalism" at New York University April 4, 1872. So far as I have been le to learn, Mr. Reid was the first iat editor to advocate special instruc-n for journalism. Early in his ad-ss he emphasized that one of the best lts of the proposed collegiate train-would be the fostering of the pro-ional feeling. Professor Crawford sses the same point.

n outlining the work for such a ial course in journalism Mr. Reid first in the curriculum the history of tical parties in this country. Second, Reid added that no young man fitting self for journalism should fail to add this a comprehensive knowledge of entire history of his own country. rd, Mr. Reid insisted that with these ld come an acquaintance with the eral history of the world.

nother indispensable requirement sug-ed by Mr. Reid was a fair general wledge of common, institutional, and rnational law.

specially does Mr. Reid insist upon need of political economy in such a se.

ne subject which I regret to say is often overlooked in the curriculum of school of journalism was thus men-ed somewhat in detail by Mr. Reid:

om the weary plash of watery argumenta-on these topics that carries us nowhere, the flabbiness of reasoning, and incoher-of premise with conclusion, and general nsequence, who shall deliver us? Might th sixth subject of the most careful study course of training for journalistic work be found in some such essays on exact reason-gs should make our popular writing conform ble to the severe processes of logic?

rofessor Crawford on the other hand ntioned this menace which obviously not obtain in the days of Whitelaw e.

Here remains, however, a serious menace to ssional instruction in journalism: the in-tion whose president has introduced courses urnalism primarily in order to gain pub-for his college and incidentally, perhaps, himself. He employs a young go-getter to the department, and this modern type of ssor devotes most of his attention to ng "contacts" with newspaper editors, press spondents, and other persons who can se-favorable mention and suppress unfavorable ion of the institution in the public prints. He utilizes his students to the same end. All his assignments to them are directed to getting publicity stories about the institution.

Professor Crawford concludes his article with a little statistical information. For example, the total number of American institutions of higher education offering instruction in journalism is now approximately 250. But of these not more than 50 make any pretense at professional instruction. Professor Crawford ventures the prophesy that as standards become more rigid the number of these professional schools will probably diminish.

* * *

ANY newspaper man who picks up *The Nation* for Oct. 21 simply can't miss the article "The Picture Papers Win" by Jo Swerling who during the period of which he writes was connected with the *Chicago Herald Examiner*, the *New York American*, and the *New York Mirror*, tabloid. The blurb on the cover says that this article tells "what these newsless newspapers are doing to American journalism."

To the members of the working press the article gives little that is new except possibly the information that the tip for the tabloids came from Lord Northcliffe who is quoted as saying to Mr. Patterson of the *Chicago Tribune*:

> New York's simply begging for a picture newspaper, like *The Sketch* and *The Mirror* here. It's amazing none of you chaps seem to realize it. I'm tired of waiting for you fellows to do it. New York's got to have a picture tabloid. I don't care who starts it. If the rest of you don't see the light soon, I'll start one myself.

But newspaper workers may miss a little letter headed "Down With the Editors," which is used as a filler on page 463. According to the writer of this letter, a letter to the editor is the first thing to be read by the average reader.

* * *

MOST of the September issue of the *Bulletin of the New York Library* is devoted to "Chemistry and Manufacture of Writing and Printing Inks—A List of References" compiled by William B. Gamble, Chief of the Division of Science and Technology. The issue is worth a place in the morgue for sources about how waste paper is used in paper mills, how printer's ink is removed, influence of acidity of paper on the fading of ink, etc.

* * *

A NUMBER of newspaper men contribute to *McNaught's Monthly* for November. Jay E. House, the well-known columnist of the *Philadelphia Public Ledger* and the *New York Evening Post*, opens the issue with a personality sketch "The Mayor Who Tried to Dry Topeka." Mr. House was for more than 18 years a member of the editorial staff of the *Topeka Capital*.

Alfred Battle Bealle, an editorial writer on the *Birmingham News*, contributes a charming skit "Folks on Our Square." Clinton W. Gilbert, Washington correspondent of the *Philadelphia Public Ledger* and the *New York Evening Post*, heads his discussion of the great airplane question with "Let Henry Do It!"

Don C. Seitz of the *New York World* tells about "The Rise and Fall of Boss Tweed." When Mr. Seitz takes up the alleged movement of the *New York Sun* to raise a statue in honor of Boss Tweed he mentions how the *New York Times* exposed the scandal and pays a fine tribute to the pen of Thomas Nast, the cartoonish for *Harper's Weekly*.

Isabel Paterson of the *New York Herald Tribune* answers the rhetorical question "Why is Alimony?"

* * *

ADVERTISING managers of newspapers will find a smile or two in the editorial "The Question of Technique" in *The Publishers' Weekly* for Oct. 3. This editorial answers certain criticism brought against publicity for books in newspaper columns.

* * *

TWO features in *Oregon Exchanges*—published by The School of Journalism, University of Oregon—attract attention as one turns the pages of the current issue. Paul Cowles, Superintendent of the Western Division of the Associated Press, tells "How The Associated Press Gathers and Distributes News." He is most specific in his outline of how that great newspaper gathering organization walks the tight rope during presidential elections.

The other feature consists of the remarks of Kate W. Jameson, dean of women at the Oregon Agricultural College, on "What Should be the Attitude of the Newspaper Toward the Flapper and Jazz and Other Things That Go With Her, Which We Men Deplore, But Like?"

EXCHANGE editors are familiar with that "pithy, pertinent, and peppery" column which James H. Thompson conducts on Sunday, Tuesday, and Thursday in the *Rochester* (N. Y.) *Herald*. He has brought together in a booklet some of his verse and a little of his prose and borrowed by way of title his column heading, "Green Sauce," with the addition of the word "Rhythms."

Some of the verses which most appeal to me are "Fishing," "Fireworks," "The Demiurge," "Viewpoints," "An Old Man in a Toyshop," "The Unequal Bargain," "The Street Preacher," and "The Perfect Friend." These compare very favorably with the verse that Eugene Field once put in his column, "Sharps and Flats," of the *Chicago Daily News*. The philosophy of Mr. Thompson if not so whisical as that of Field is more human. Some may say that Mr. Thompson is too high brow but the fact remains that he has developed a large following among the readers of the Herald.

"SKIPPY"

By PERCY CROSBY

The best juvenile comic strip. Combines great humor, excellent drawing and emphatic adult appeal.

EDITORIAL RESEARCH REPORTS supply accurate information upon the major problems which call for frequent editorial comment.

The reports are for the information and review of editors and publishers, rather than for publication.

They are in use by the leading American newspapers and magazines.

The cost of this service, based upon circulation, is compatible with every moderately liberal editorial expense budget.

N. Y. WORLD INSTALLS NEW EQUIPMENT

Two Octuple Press Being Erected and Two More Ordered—Typesetting Battery Being Enlarged by 27 Linotypes, Model 8

Work started this week on installation of two new Duplex octuple presses in the main press room of the *New York World*. It is expected they will be ready for operation by Nov. 15.

Last week the World placed an order with the same manufacturer for 12 units and three double folders, the equivalent of three octuple presses, according to J. F. Bresnahan, business manager. These presses, to be delivered in January, will make a total of 28 units and seven double folders furnished the World by Duplex since August last year.

L. E. Owens, production manager, also announced this week that due to the volume of classified advertising carried this fall an order has been placed with the Mergenthaler Linotype Company for 27 model eight linotypes. Fifteen old model five linotypes will be replaced by the new model machines, thus giving an increased capacity of 12 machines. Four model nine linotypes were also ordered to be used for composition of advertisements.

The first Duplex press equipment ordered by the World, two octuples specially designed, were installed in August last year in a new building erected for the purpose, which also houses the color presses, the job printing department and the supply paper storage.

Twelve new units and three folders will likewise be erected there. Two of the twelve units will be used to augment the two octuples under erection thus making them decuple presses. Later, these two decuple presses will be further added to, making them nine unit presses with three double folders each.

The other ten units and three folders will be installed in line to operate as two decuple or octuple presses, three sextuples, or as one five or six roll press and a three roll press. Subsequently, two more units and a folder will be added to this group. This equipment will displace six old Hoe presses, four sextuples and two octuples, which have been operated day and night on the evening, Daily and Sunday World for about thirty years of the modern generation.

PLAN NEW RESORT DAILY

Atlantic City Times May Start Soon as Tabloid

The News Publishing Company has been incorporated in New Jersey to begin publication shortly of the *Atlantic City* (N. J.) *Times*, possibly in tabloid form. The new company will absorb the *Ventnor News*, an Atlantic City weekly publication.

George F. Goldsmith, for the past 15 years connected with the *Philadelphia Public Ledger*, is president of the new publishing firm, which is made up of Atlantic City business and banking interests.

Other officers of the new company are Lionel Scheuer, John D. Scheuer and Arthur G. Walker of the Amusement Publishing Company which owns the guide publication known as *Amusements* and operates a printing plant, and George Goldsmith, Jr., who has been in the newspaper field for ten years as a representative of the Public Ledger in New York and as business manager of the *Japan Advertiser* of Tokio. On the Board of Directors, H. Walter Gill, attorney and banker, and Elias Rosenbaum, vice-president in charge of the Atlantic County Trust Company, of Atlantic City, appear as additional names.

Another Florida Daily Gets Under Way

The *Fort Pierce* (Fla.) *Record* has started publication as a seven-day morning newspaper, using the United News report. Robert E. Falls is publisher.

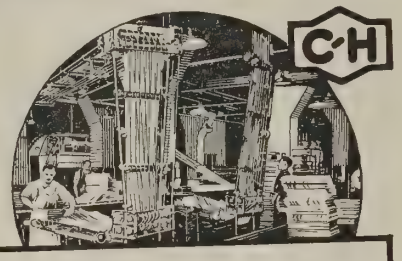
Daily for Plant City Due Nov. 1

The *Plant City* (Fla.) *Courier* will start publication as a daily newspaper Nov. 1. It leaves the semi-weekly field to become a morning newspaper with the United News wire service. Arthur G. Ivie is the publisher.

San Antonio Light Takes Up Radio

San Antonio's second super-radio station, WCAR of the Southern Radio Corporation, was dedicated Oct. 21 by the *San Antonio* (Tex.) *Light*, under whose broadcasting program auspices the 5,000-watt capacity station will operate.

Bohemian Daily Half Century Old



August Geringer, editor of the *Chicago Bohemian Daily Svornost*, recently celebrated the 50th anniversary of the founding of the newspaper. Mr. Geringer is 83 years old, and has published more than 200 books, chiefly to acquaint his countrymen with American ideals. He also edits five semi-weeklies and a comic paper.

New Pittsburgh Circulator

The *Pittsburgh Chronicle Telegra* announces the appointment of a new c culation manager, V. Snyder, succeedi Joseph M. Aylward, who becomes circ lation promotion manager for both t Chronicle Telegraph and the *Pittsbur Gazette Times*. Mr. Snyder was form ly associated with the *Cincinnati Post* circulation work and served for 17 ye as assistant circulation manager with *Indianapolis News*. He was recently c culation manager of the *Baltimore Ne*

BUSINESS TICKLERS

ALMOST every man likes "puttering around," and advertisements of tools, work benches, etc., should attract many citizens who would find it possible to spend the long winter evenings profitably. Materials and tools to make radio sets,, desks, book cases and an untold number of other things should sell readily if correctly advertised.—Robert E. Dickson, *St. Paul* (Minn.) *Dispatch-Pioneer Press.*

Why not find out the names of books on the working desk of the leading citizens in your community and write articles about the results. This could be used as a blanket for some book ads.—Arthur A. Young.

Small establishments in a suburban section of Duluth are advertising heavily each Friday in the *Duluth Herald* through the cooperation the Herald is giving by having an advertising solicitor in that section who can write the copy for the small stores and who knows merchandising. Also, the editorial department supplies the suburban section of the paper with considerable social and other news.—S. K. D., Duluth.

Children's Book Week is to be celebrated Nov. 8 to 14 this year by schools, parent-teacher associations, public libraries, and bookstores. Every bookseller is a good prospect for advertising during the Week.

The *Trenton* (N. J.) *Times-Advertiser* has carried a full-page advertisement for the past two years during Book Week, with the heading "Do Your Children Read Good Books?" This ad was paid for by a group of public-spirited organizations: The Library, Y. M. C. A., K. of C., Board of Education, Kiwanis, Lions, Rotary Club, and Business Women's Club.—M. G., New York.

The main essentials for a dandy winter evening are: A fireplace well equipped with wood box, andirons, etc.; attractive book cases filled with good reading; "comfy" chairs; a floor lamp or reading lamp that distributes the light just right; a good pipe and good tobacco; warm and comfortable slippers and a smoking jacket. Wouldn't you like to sit in that picture yourself? Have a good photographer get a good picture of such a scene. Center it among advertisements of stores selling these things, and you will have an unusually attractive page that should please the merchants buying the space.—Robert E. Dickson, *St. Paul* (Minn.) *Pioneer Press.*

The *Santa Ana* (Cal.) *Register* regularly runs a three-column by eight-inch advertisement advertising its own advertisers. In this ad the paper tells about some of the attractive offerings mentioned in the various ads appearing in that issue of the paper without, of course, giving the names of the advertisers. This stimulates the interest of the readers and makes them want to look through the paper to find the ads.—Frank H. Williams.

GIRLS EDIT DAILY

Junior League Members Edit New Rochelle Standard Star for a Day

Girls under 21 of the New Rochelle Junior League of Women Voters wanted to study politics.

"We'll give you a chance," said executives of the *Daily Standard Star,* and turned over the newspaper to them for a day on Oct. 21.

Girls covered police. Girls covered courts. In fact they wrote and edited the entire edition of 22 pages. Other girl league members solicited and wrote advertisements, while still others sold the finished product on the streets.

Circulation, according to claim, doubled for the day.

HUNCHES

ONE DOLLAR WILL BE PAID FOR EACH "HUNCH" PUBLISHED

THIS is the age of stunts for a daily newspaper. We kept on the alert for criticisms good and bad relative to the town then ran them as a story under the boxed head "The Visitor." The pannings were severe but they made the readers think about their town.—A. R. Buckingham, *News,* Austin, Minn.

Keeping the public informed of and warned against the favorite bunco games of confidence men and the new wrinkles in these games is one of the problems of your chief of detectives. Have a reporter get the details on how some of these are worked. A police official will be glad to explain them. The information is good for either a Sunday article or a series daily.—L. M. Kennelly, Worcester, Mass.

A leading New Hampshire newspaper prints an editorial daily on some current topic of interest to women, written by a woman solely from the feminine point of view. A standing head is used and the same space daily—the top of the third column of the regular editorial page, hitherto monopolized by men writers. The woman editorial writer picks her own subjects, but plans to have the series maintain a consistent trend toward humanitarianism, and appeal strongly to the feminist groups seeking self-expression in their new field of politics and governmental science.—C. L. Moody, *Lynn* (Mass.) *Telegram-News.*

An ingenious editor seeking an out-of-the-ordinry method of getting names in the paper finds this a good plan: Each day a woman feature writer visits a different block in the city. She picks up human interest material about what the children are doing, whether staging a home talent show or running lemonade stands, mentions the children who first started to school this fall, and into the remainder of the space alloted weaves an interesting yarn about the grown-ups.—Max Hahn, *Blade,* Toledo, O.

An old police docket at headquarters furnishes an itneresting story. Have the desk sergeant dig it out of the dust—if you stand in with him—and go back to the record of 50 years ago. Were our forefathers all sober and industrious folks? Not much. Draw a parallel—"them" days and the present. For instance, 50 years ago Williamsport was a town of 17,000 inhabitants. Today it has 50,000. Fifty years ago two men were arrested for fighting and throwing stones at each other in the downtown streets. Would two men do that today? No, siree. They couldn't because the streets are paved. A man was robbed of all his valuables and then the robbers stripped him of all his clothing. Fortunately it was July. Omit names because some of the ne'er-do-wells of 50 years ago might be living today.—John Summer.

In connection with a daily story of interesting interviews with out-of-town arrivals at hotels, the *Philadelphia Bulletin* publishes two boxes. One gives "Today's Best Story, (Told in Philadelphia Hotels)", and the other gives the name and address of "The Philadelphian-for-a-day-or-two Who is Farthest from Home."—J. H. A. K., Norristown, Pa.

THEY'RE MAKING MONEY IN
New York State
AND THEY'RE SPENDING IT

NOT only are more workers employed in the factories throughout New York State but the average wage is 76 cents above a year ago. The increase extends to practically all the industries of the state. This is based on reports from more than 1,600 manufacturers employing 480,000 workers.

This increase in earnings is shared equally by men and women and means that factory workers in one-third of the manufacturing establishments of New York have $364,800 more to spend for necessities, every week, than they had last year.

The evidence of commercial progress is an indication that this extra money is being spent and there is every promise of further gains in the sales of commodities.

These industrial workers constitute an army of consumers that depend on their newspapers for advertised offerings of the very things that are necessary for their existence, comfort or enjoyment. This should be good news to manufacturers of commodities that are distributed for sales promotion in New York State.

Your nationally advertised product is of local interest to these wage earners when the offering is made through their home paper, whether in city, town or village.

This great, lucrative market is thoroughly covered by the following high grade daily newspapers:

A Bigger Newspaper Dollar

IN these days of the shrinking newspaper-dollar we proclaim one instance where a hundred cents will buy *more* for a newspaper than it used to buy.

Your 1925 newspaper-dollar buys less labor in the composing room than it did ten years ago.

It buys less white paper.

It buys less headwork on the desk and less footwork on the street.

BUT the newspaper-dollar invested in the service of *The Consolidated Press* today buys MORE—

—more words of telegraph delivery

—more in variety, quality and volume of copy

—more of the services of the country's best reporters.

What you can get now at a nominal figure would have been prohibitive in price for tolls, service and material, ten years ago.

Let our representative tell you about *our bigger newspaper-dollar.*

How Advertisers of Food Products and Grocery Store Sundries Establish and Increase Business in Chicago

Below are listed advertisers of products sold through grocery stores who advertised in The Chicago Daily News in the first nine months of 1925. The list is an inspiring one for manufacturers and distributors of similar products who desire to enter the Chicago market or increase their present sales in Chicago. Only the fact that this advertising is profitable explains the large amount of space used by these advertisers in The Daily News.

Advertisers of Products Sold Through Grocery Stores, and Their Lineage in The Chicago Daily News for the First Nine Months of 1925

	Agate Lines

How to call up Baltimore—

¶ Let's say you've made that mouse-trap of which Elbert Hubbard wrote — the finest mouse-trap in the world. Would you wait for the world to make a path to your door?

¶ Not today, you wouldn't. You'd put a nice big ad in the papers and say that though this mouse-trap was being made back home in the woods, it was being handled by all the leading mouse-trap dealers in the country.

¶ Then you'd ask the dealer to get in touch with your prospects—if possible, to call them up on the phone.

¶ In Baltimore that would mean calling 111,249 telephones—which would be pretty expensive—and take time.

¶ That's why you will use the Sunpapers. Not only are they more economical. They are infinitely more effective. They cover more territory. They reach more homes—delivered by almost twice as many exclusive Sun carriers as there are regular letter carriers in Baltimore.

¶ Just figure it out for yourself—for every 100 telephones in Baltimore, 215 copies of the Sunpapers are sold every day.

CHAPMAN'S PALS KILL MAN AND WIFE WHO BETRAYED HIM

Dying Farmer, Who Harbored Notorious Bandit, Then Exposed Him, Accuses 'Dutch' Anderson and Companion of Murder at Muncie, Indiana

ANDERSON ESCAPES POLICE
BUT CONFEDERATE IS CAUGHT

Chapman and Anderson Long Linked In Crime

New York, Aug. 15.—Gerald Chapman and George Anderson, who now is alleged to have wreaked vengeance in his name, have been inseparably linked in crime for years.

Their biggest job was their holdup of a mail truck on lower Broadway, this city, in October, 1921 in which they took about $2,000,000 in cash, securities and jewels. Captured, they were convicted and sentenced to Atlanta penitentiary for terms of twenty-four years each.

Chapman escaped April 6, 1923, fifty one unsuccessful breaks in which he was shot three times. With a trail at liberty he promised did not long hold Anderson, and he kept it by borrowing under the prison wall.

Police officials believe the two will get together again and that both were concerned in planning the holdup of the Lincoln Highway mail truck near Bound Brook, N. J., in which Gerald Chapman, notorious bandit, was captured, and Lloyd Anderson, a policeman, James Nevin, Chapman was arrested at Muncie, Indiana by Anderson, a former police officer, at whose home Chapman was living. Charles (Dutch) Anderson, Hance went to Herald Chapman, notorious bandit, accused to die for the murder of New Britain, Conn., policeman, struck down Ben Hance and his wife near here yesterday.

The Hances were shot to death on the Anderson-Muncie highway. In a dying statement Hance laid the crime to the door of George (Dutch) Anderson, pal of Chapman, and Chapman (One Arm) Wolfe, of Muncie.

It was at the Hance home that Anderson and Chapman lived after their escape from Atlanta Penitentiary, after Chapman attempted the murder of a New Britain, Conn., merchant in establishment which he was employed as a policeman. Chapman was one of the principal figures in the $2,000,000 Liberty bond robbery of the Lincoln Highway mail truck near Bound Brook, N. J., in which Gerald Chapman, notorious bandit, was captured, and Lloyd Anderson, a policeman, James Nevin, Chapman was arrested at Muncie, Indiana by Anderson, a former police officer, at whose home Chapman was living. Charles (Dutch) Anderson, Hance went to Herald Chapman, notorious bandit, accused to die for the murder of New Britain, Conn., policeman, struck down Ben Hance and his wife near here yesterday.

How Editorial Laxity Nibbles Profits

Newspapers Can Save Many Thousands a Year by Proper Preparation of Copy for Printers—Present Bad Practices and the Remedy

By EDWARD H. EDWARDS

(*Copyright* 1925, *by* Editor & Publisher Co.)

I—STEPPING STONES

FROM time immemorial omissions, misstatements, exaggerations and transgressions against grammatical sense and typographical decency have been common in the daily press.

The limited time in which the news of the day must be gathered and the stories thereof written, the rapidity with which the articles pass through the hands of the copyreaders to the composing room and the cutting of the articles into "takes" for the compositors account for many annoying discrepancies.

When an error of a serious nature occurs, calling for an apology or retraction, the most convenient excuse, of course, is "owing to a typographical error." It would not be tactful to state that the writer's unreadable chirography was responsible for the incorrect statement or regrettable error.

Bad handwriting is the bane of the newspaper compositor, always has been and will continue to be unless a remedial solution of the problem is applied.

One of the most difficult hands with which a printer ever had to contend was that of George D. Prentice of the *Louisville* (Ky.) *Journal*. It is said of him that he could not read his own manuscript unless he began at a sentence where he knew what he had intended to say.

Many of the best editorial and special writers of the present day give very poor imitations of penmanship, but most of them have come to the conclusion that it pays to have their articles typed rather than to take chances with the intelligent compositor.

This, of course, makes for greater legibility, but does not necessarily mean that the copy is perfect.

An instance is recalled of a linotype operator on a great newspaper which specialized in financial news, who, in correcting a typographical error in a revise proof of a Reserve Bank statement, discovered a difference in the figures amounting to thousands of dollars. The operator took the proof to his foreman. He had some difficulty in making him understand the discrepancy, but after grasping the ridiculousness of the figures, the foreman grabbed the proof, compared it with the copy and rushed off with loud acclaim to the editor to have corrected the serious discrepancy he had found. Just an instance of a compositor doing his duty.

Another instance of a similar nature was the case of a compositor who noticed a statement in an editorial that was not borne out by facts and would have placed the paper in the position of commenting on a subject upon which the writer was not posted. The compositor called the matter to the attention of one of the editors, who, apparently not considering it within his jurisdiction, did nothing about it. The compositor, not satisfied, carried the matter to a higher authority. The incorrect statement was changed to conform with the facts and the paper was saved from possible ridicule.

To obtain the best results, every employe of a newspaper should be encouraged to be on the alert for errors of every description. No error, however trivial, should be allowed to pass without an effort to correct it.

INTRODUCTION

The reader of these pages should not jump to the conclusion that the writer is trying to prove a vague theory. On the contrary, the theme is a simple one and the suggested solution the result of many years' experience in the composing room. The aim is to deal with defects wherever found and suggest a means of placing the whole organization on a high plane of efficiency and keeping it there.

A superficial reading might give the impression of a brief for the composing room; but, while the author acknowledges his apparent leaning toward that department, a study of the problem as a whole will show the possibility of betterment of the entire personnel and product, which ultimately will reflect itself in the improved typographical standard of the newspaper and in augmented dividends to the stockholders.

Anticipating that some of the statements made in the following pages might be considered exaggerations, if not downright fiction, the writer presents actual specimens of work from various newspapers to illustrate points under consideration.

It is well for a man to respect his own vocation, whatever it is, and to think himself bound to uphold it and claim for it the respect it deserves.—Charles Dickens.

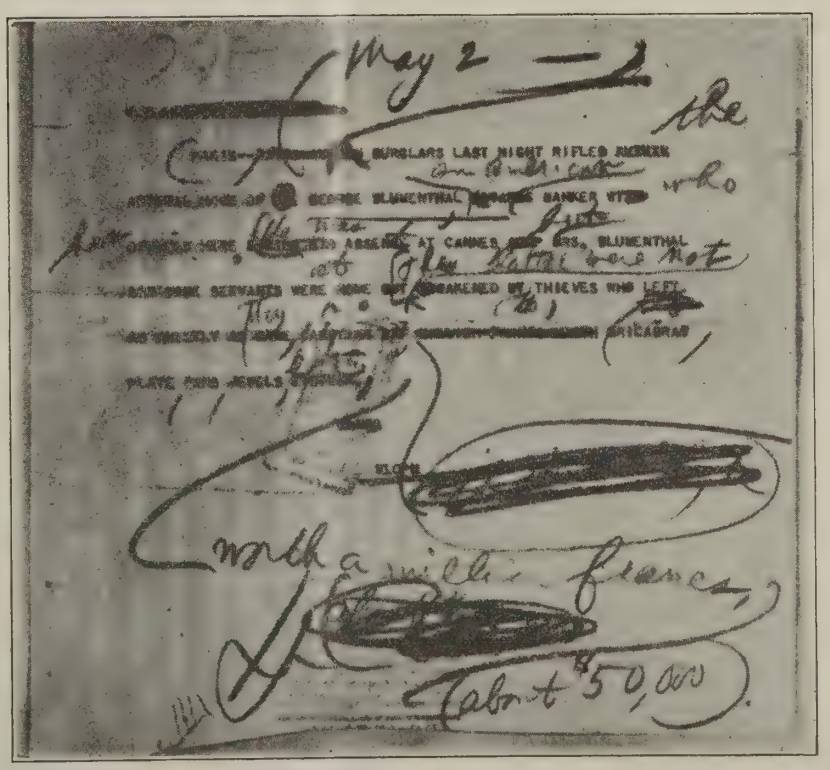

Exhibit D—After the desk had produced this translation of a Paris cable, the composing room had its innings. Only two errors were scored against the printers.

II—DANGER SIGNALS

SINCE the advent of the linotype machine in the newspaper composing room, constant complaint has been made of lack of sufficient production, of the slipshod product of the linotype operator and of the uncorrected matter in early editions.

Much of this criticism is reasonable. The problem is to place the blame and apply the remedy.

The employer who gives an equitable compensation is entitled to a fair return, that is, the best an operator can deliver, in amount and quality. His product should be as nearly perfect as possible within the time and at the speed required of him. In short, he should do his full duty to his employer and himself.

In order that he may do this, the general working conditions must be sanitary, lights good and properly shaded, chairs comfortable and copy good.

It will no doubt be conceded by the average employer that these conditions are reasonable and necessary.

While the general conditions in an office are very important to the employer as well as to the employe (and a wise manager will see to it that they are as near perfect as possible), the purpose of this treatise is not to deal with the physical working conditions, but to direct attention mainly to what many employers and managing editors may consider an abstruse question, but what, if patiently considered, will be found to be a serious condition that exists in almost every newspaper plant, and is at once the chief factor in the lack of production and the main cause of "dirty" early editions.

The output of the linotype operator can be materially increased and the matter set in a vastly more presentable shape if this one bad condition is remedied.

The management almost invariably places the blame for errors on the composing room. Granted that the charge is only too often correct, the trouble is seldom traced to its source. In almost any other business the defect would be sought, found and the remedy applied.

The assertion is here made that the composing room is not responsible for a great proportion of the aggravating errors that creep into print.

In considering the duties of the linotype operator there are several things that should be borne in mind, to wit:

He is always under more or less tension;

He gets a "take" from the copy desk and is expected to follow the copy;

He more than likely has only a part

of the article, and cannot know what precedes or follows his "take";

He must set what he has before him. When the proof returns he may find that, while he followed copy, a name has been misspelled, that John "Smith" should have been John "Smythe"; that his capitalization was not what the sense of the whole article plainly indicated; or that by following the writer's punctuation or changing it to what, to the operator, seemed correct, he has given a sense not intended;

He has no means of interpreting the writer's meaning other than the meagre part of the manuscript before him, in which names are misspelled or so indistinctly written that they must be guessed at. (See Exhibits A and B).

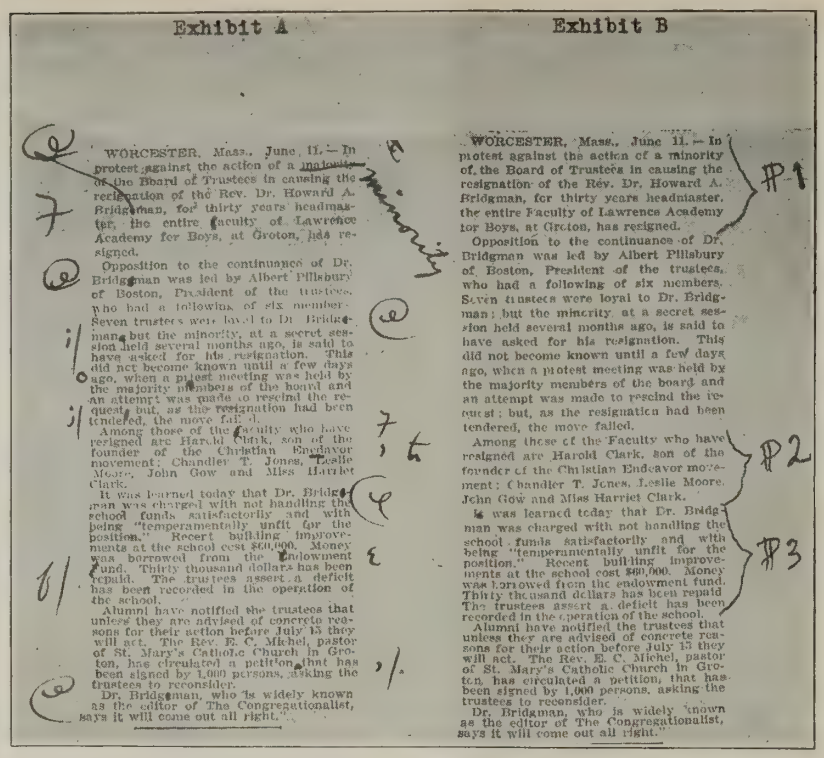
Here we have a proof sheet in which the operator followed copy in the spelling of the name of Dr. Bridgman, in which an "e" appeared. The same error occurred in the headline, making six lines which first had to be reset and then handled by the correction bank man. When this proof reached the proofroom to be read, the proofreader's knowledge or instinct told him the name was not correct. He no doubt took time to investigate, and then corrected the spelling. It may have consumed five minutes to be sure of the proper spelling of the name. When the proof reached the linotype operator for correction it required at least one minute of his time to do his part of the work. Then, the man who places the lines in the galley must have consumed four minutes in carefully reading and placing the six lines in position. Result: About ten minutes' time of one man was taken up in rectifying an error that should not have occurred in the copy. The writer or the copyreader should have seen to it that the name was properly spelled in the copy. It should be borne in mind, too, that as proofreaders usually work in teams, when one is verifying a suspicious statement or spelling in copy his desk partner is idle, thus doubling the time lost.

This proof sheet furnishes further examples worthy of consideration. The linotype operator, unfamiliar with the style of the office in which the matter was set, followed copy in capitalization in four instances. If it may be charged that the operator should have known better, it can be said that the writer or copyreader also should have been familiar with the style of the office. Each of these persons is a cog in the wheel, and, as a matter of fact, the latter two occupy the more important positions in the wheel.

A reference to the revised proof of this same article (Exhibit B) will disclose that in Paragraphs 1, 2 and 3, the operator in making the corrections eliminated wide spacing which occurred in the original setting. Thus, the article was shortened three lines. This is good printing and should be encouraged.

The same conditions that confront the linotype operator are met by the proofreader, who, as a rule, has an advantage over the operator in having the whole article before him, together with convenient reference books. But as he has the last say, an error that escapes his notice is not likely to be detected at all.

The composing room is supposed to follow copy and at the same time is expected to make changes to conform to office style in grammar, punctuation and spelling.



This is manifestly impossible. The compositor cannot follow copy and at the same time edit it.

As long as the copy is not properly prepared, the only reasonable rule that should apply to the compositor is that he set his take correctly, regardless of copy. The solution of this problem is to have the copy properly prepared and then say to the operator "Follow copy." This will allow the typesetter to devote his full time and thought to his own duties instead of wasting precious moments editing copy.

A compositor who continually sets a "dirty" proof is considered incompetent.

Why, then, should not the same rule apply to a writer who does not properly prepare his copy?

As the source of supply, the writer should have facts and know how to state

Exhibits A and B—Ten minutes extra time in the composing room were needed to correct errors which should not have passed the copy-readers.

them, just as much as the compositor should know how to do his part of the work, or give way to some one who does know his business.

With the possible exception of punctuation, there is a right and a wrong way to use every word or phrase, and the writer of an article is in the best position to know the sense he intends to convey and is, therefore, in the position of responsibility. He should prepare his copy just as he wants it to appear in print.

There is no disposition here to reflect upon or discredit the writer who attempts to prepare his copy according to the rules of an office; but, on the contrary, the purpose is to show the necessity of bringing all up to the standard of the best if the growing laxness of writers is to be halted and a serious drawback to the efficiency of the composing room is to be eliminated.

The fact that a writer is careless in his work is reflected in the operator and instills in him a carelessness that is akin to neglect of duty. On the other hand, if the compositor is given properly prepared manuscript he takes pride in doing his work in a manner that will reflect credit upon himself and the matter will be sent to the forms in proper shape. In theory, the writer's part is mental, the linotype operator's physical.

The publisher, manager or editor who takes pride in his publication, typographically and otherwise, should require that every employe do his part to the end that when the paper appears it is as nearly perfect as possible.

To obtain the best results it goes without saying that it is necessary to have competent and suitable heads of the various departments. To these, of course, falls the duty of selecting suitable persons to perform the multifarious duties of their departments, and in this they should have untrammeled authority.

If a reporter is wanted, the city editor no doubt would select a wide-awake, observing and genteel man who impressed him with confidence in his ability to carry out an assignment in a proper manner, reasoning, perhaps, that if the copy is not up to the standard at first the copyreader will remedy the defects, and that an observing reporter would soon grasp the literary style and learn to avoid the pitfalls that lead to libel suits.

On the copyreader, then, rests the final responsibility for the proper preparation of the copy.

Not infrequently an operator encounters one or more words so illegibly written that he must pause for a minute or two trying to decipher his copy, then ask his neighbor to assist him (two idle men); perhaps they give it up and he takes it to the copycutter or proofroom in an effort to perfect the work. Obviously he is not to blame for the loss of time. The fault does not belong in the composing room.

The use of the typewriter, of course, assists the operator greatly, but even in apparently good typewritten copy errors of grammar, spelling of names, etc., occur and tend to delay the operator if he corrects them. If he does not, the proofreader takes a hand; then, again the editor, glancing over the proof sheets, discovers the same faults found by the proofreader and proceeds to make corrections according to his ideas. It is not infrequent to have three or four proofs marked somewhat differently, consuming time of the operators, bank correctors and make-ups, all of which could have been avoided at the copyreader's desk.

As a part of the general scheme to advance composing room production and efficiency, making possible "clean" early editions, the following suggestions should be observed by the writer and copyreader:

Carefully spell correctly all proper and geographical names. In manuscript, PRINT all names not in common use, especially the first time they occur in an article, and every time if the article is so long as to necessitate cutting into "takes."

Careful formation of "a" and "o," also "n" and "u" will prevent much guesswork and many consequent errors in the composing room.

Carefully punctuate matter as it is expected to appear in print.

Comply with the rules set forth in the office style book.

The observance of these suggestions, with the text generally in a clear, readable hand, will be a long step toward stimulating production and efficiency.

A writer who makes a good article out of an assignment, however trivial, is encouraged by receiving the commendation of his superior, and, on the other hand, should accept in good part constructive criticism.

This same principle should apply in the composing room, proofroom or any department of the organization. Thus deserved criticism may be turned to good account by the recipient.

The following note received in the composing room of a newspaper shows the appreciation by a "higher up" of the efforts of a make-up to carry out the wishes of his superior:

"The paper looked fine this morning. Thank you, it was absolutely O. K. in every particular. Thank you again."

This meed of commendation served not only as a word of thanks but acted as a stimulant to further endeavor, and placed the sender and the recipient on a good working footing.

III—COMMON STUMBLING BLOCKS

TO emphasize the importance of good and bad copy in the newspaper composing room, it seems necessary, in order to give a true conception of a widespread evil, to give a few specimens, collected from various sources, together with such criticisms as may be of constructive value. The exhibits should not be considered rare exceptions, for such is not the case.

It has been said that the haste with which late stories must be written will not permit the writer to prepare his copy carefully. That view seems absurd, and never was the old saying "make haste slowly" more applicable than to the preparation of an article which may be inserted without reading and correcting—"railroading," as it is called.

If it is important that an article get into a certain edition, it is equally important that it be made intelligible. If sent to the composing room in good shape it will most likely reach the forms promptly and in printable style. On the other hand, bad copy causes delays all along the line, with the result that it may be "railroaded," with errors so ridiculous that it would be better if the article had not been printed.

As masterpieces of headwriting and copy-editing exhibits C and D are hung in our art gallery with the thought that they may serve as valuable examples for aspiring young newspaper men.

To speak mildly of these exhibits, they cannot be said to be conducive to speed and accuracy in the composing room. As a matter of fact, the head was set without an error, while the compositor read the text correctly but had the misfortune to make two mistakes of a minor nature.

These examples are given, of course,

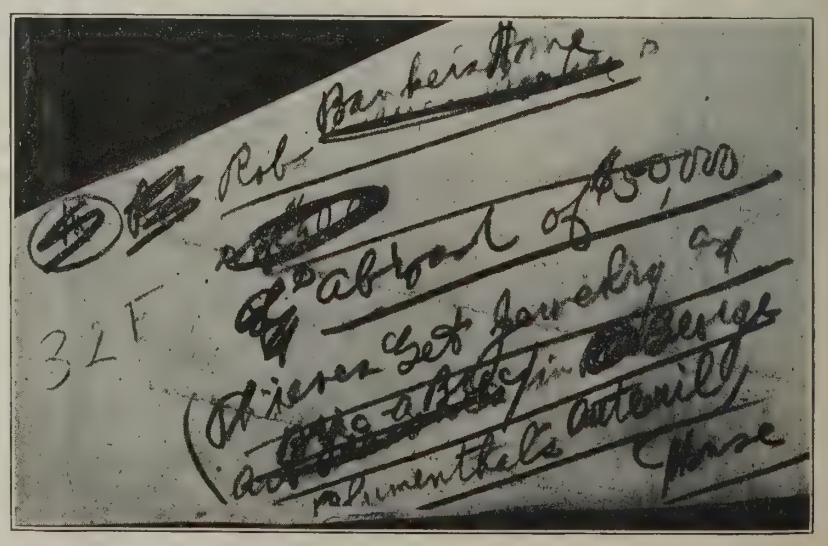


Exhibit C—This is the head for the copy illustrated on page 3. The operator followed its windings without a mistake.

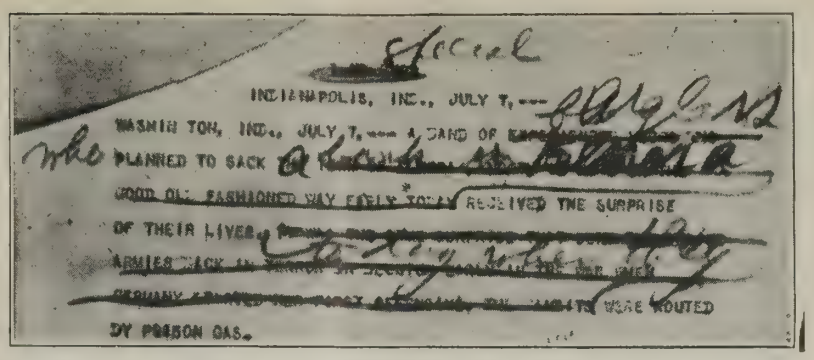
to accentuate the difficulties and hurdles that lie in the path of a speeding operator and to show why so many exasperating "bulls" appear in early editions.

Exhibit E is a fair sample of copy received with instruction to "rush" for edition. The first question in the operator's mind was which date to use. That settled, all he had to do was set the four or five lines. That may seem a simple thing, but it was necessary to read them first. The operator guessed the right date line to use and was also able to decipher the rest of the matter. His part of the work was done properly. Can the same be said of the copyreader?

Exhibit F would seem to indicate that the writer of the head is a firm believer in evolution, and, taken in connection with Exhibit G, the theory would seem proven so far as head-writing is concerned—at least a perfect head was evolved. To read the manuscript without reference to the head as set, it will be found that it is not in such shape as to insure accuracy and speed. Such erasures, indistinct characters and misspelling are calculated to retard the head-setter. He likely knew nothing of what the writer was driving at, but managed to produce Exhibit G. For the head-writer, it must be said he gives evidence of intellectual grasp of his work that would be greatly improved by a course in penmanship.



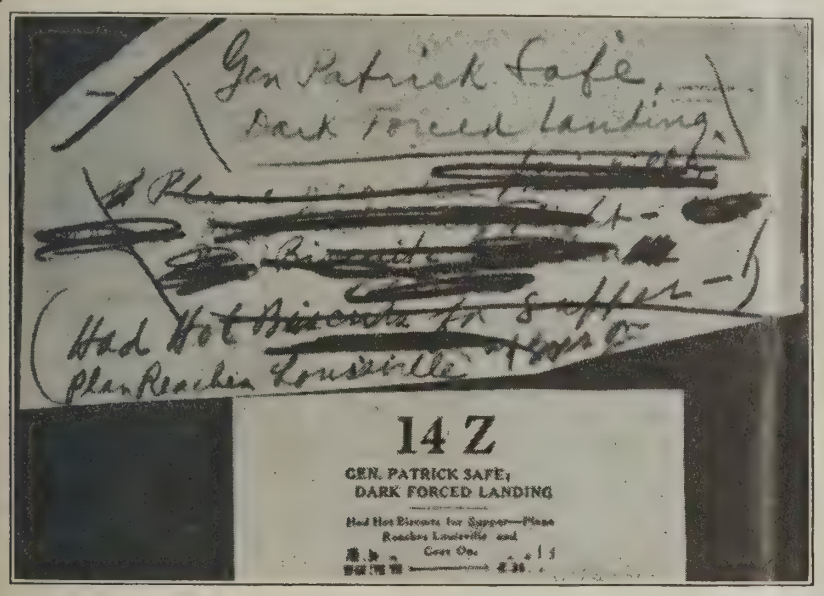


Exhibit E—The correspondent's verbiage was reduced by the copy-desk, but two date-lines and a handwriting puzzle remained for the operator to solve. This was "rush" copy for the first edition.

Exhibits F and G—The evolution of a headline.

It is distinctly refreshing to come upon what appears at first sight to be a well-written and clean-cut piece of typewritten copy. One such specimen examined in reality was above the average typographically and in literary style. And yet if the linotype man had followed it literally he would have found when the proofsheet returned that it looked like a "map of Ireland," as the comp. is wont to refer to a dirty proof. As a matter of fact, the compositor made nine corrections in capitalization, punctuation, etc. But, alas, he overlooked the most serious error. How was he to know that the writer's reference to the "Theatre Sarah Bernard" meant the theatre named for the immortal Sarah? This was left for the alert proofreader, who, of course, made it Theatre Sarah Bernhardt.

To commend the compositor for correcting the minor defects of the copy would seem gratuitous, for he did nothing more than his duty. Should he be condemned for following copy in the spelling of the name, even though it was that of a foreign theatre? *Emphatically yes, for the memory of Bernhardt belongs not to France but to the world.*

Had the proofreader overlooked the spelling of the name the friends of the writer of the article would have been justified in asking him where the "Theatre Sarah Bernard" is located.

When an operator receives instructions to rush a piece of copy, as a page is waiting for it, his only thought is to comply with the request. He bends his energy, mind and body, to meet the requirements of the occasion, and feels a just pride when his work is well performed. Exhibit I was given to a head-setter with instructions to rush, as the form was waiting.

His first thought was a natural one—what is it all about? It took some minutes to decipher it, but it was set without an error (see Exhibit J), reaching the page slightly late, but it would not go into the space. The top was supposed to make only one line, while the "bank" should have made only three lines. The editor had to rewrite the head to meet the exigencies of the occasion. Then the operator, of course, had to reset it, consuming more time. Result, the page was held ten minutes after it should have gone to press. Had the writer of the head taken pains to do his work properly the linotype man would have performed his part of the work and the head would have reached the form on time.

Exhibit K is an example of the unnecessary difficulties that are continually placed in the way of the composing room. These corrections, if properly written, could each have been made in perhaps one minute. Exhibit K, as originally sent for correction, was half a page of the paper. The operator was required to turn and fold the exhibit into seven positions to read it. When the corrections reached the page the make-up also had to shift the sheet into seven positions in order to verify the linotype operator's work.

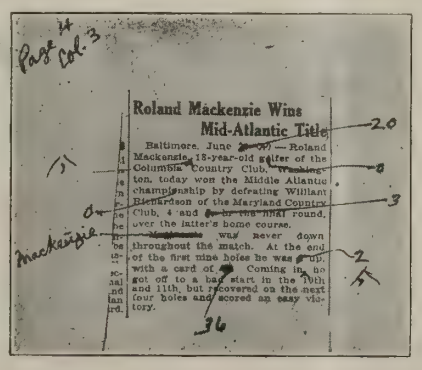

Exhibit L—How proof should be marked

The editor should have cut the item out of the page and pasted it on a piece of paper and marked it "Page 12, Col. 2," and proceeded to make the corrections in horizontal lines with the clipping, as in Exhibit L, and not perpendicularly.

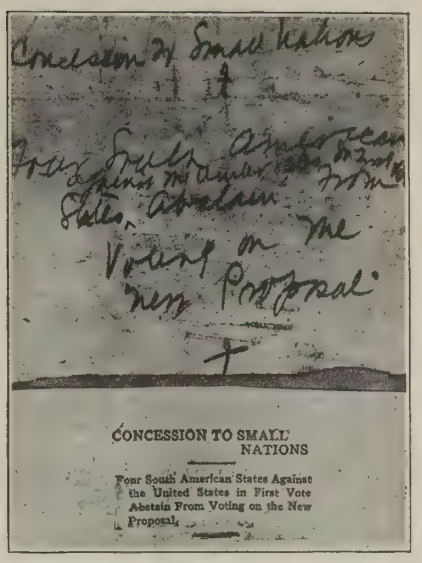
Often it would seem that the editor deliberately wrote each of the corrections at a contrary angle to the proof-sheet and at variance with the other corrections so that it was more difficult for the corrector than it should have been. There is plenty of room to make corrections in horizontal lines on the proof-sheet, so that the operator can place the proof-sheet on his copyboard and make the corrections without the necessity of turning it into several positions in order to do his work.

The case cited is not an isolated example, but is such as are of common occurrence in daily newspaper offices.

Another common habit with editors in scanning first editions is to make a correction some twelve or eighteen inches from where it is intended to be inserted, draw an indistinct line and, more often than otherwise, write it perpendicularly to the lines of the matter, tear off a whole page and send it to the composing room for correction.

The linotype operator has a copyboard about 8 by 12 inches on which to place his copy. A page proof requires folding and turning to suit each angle, and thus more time is consumed than the correction would require if properly marked.

Exhibit M is a facsimile of a part of an article set by a linotype operator on one of the metropolitan newspapers. At first glance it would be taken for a good piece of copy, but close inspection will reveal that it is little more than the skeleton of an article. By close comparison of the manuscript with the accompanying clipping it will be seen that there are fifteen more words in the printed matter than in the original, to say nothing of the differences in the punctuation. It is fair to assume that the compositor consumed some of his time editing the copy, thus reducing his own production.



There was a time when it was part of the compositor's duty to fill in skeletonized copy, but since the employment of copyreaders it would appear that the latter fail in their duty unless the copy is properly edited. The exigencies of machine typesetting have at least modified the linotype operator's responsibility, and, by converse reasoning, placed the major responsibility on the writer and copyreader.

There are many minor causes of confusion and delay of production that might be removed without detracting from the sense of the manuscript.

It goes without saying that commercial matter, which usually is set in smaller type than the reading matter of a paper, should have a style of its own; that abbreviations should be permissible to any degree necessary to minimize space, because those interested in that class of matter soon learn the abbreviations and obtain just as much information as if the general style of the paper was used.

Allowing the writer of such routine matter whatever latitude necessary, so long as the uniformity is preserved, all other departments should conform to the general style shown in the style book.

Many papers allow one department to abbreviate the word "St." and another

Exhibits I and J—The form was held 10 minutes to make this head conform to the paper's typographical requirements.

to spell it out "street." Some departments may even use figures, "10th St.", another "Tenth Street."

One department may insist on using the abbreviation of the State in a date line, while another does not use it except in towns of minor importance, to wit:

"Indianapolis, Ind., March 11" may be insisted upon in one class of matter while "Indianapolis, March 11" is used in other matter with equal force.

The habit of having one style for one department and another for another is confusing to the linotype operator and the proofreader, and not infrequently causes the resetting of lines to conform to the idiosyncrasies of various writers and departments.

The same may be said with regard to capitalization, punctuation and other matters of style.

The style once fixed should be conformed to regardless of the whim of some particular writer.

The only exceptions should be in the routine commercial matter and, perhaps,

(*Continued on page* 39)

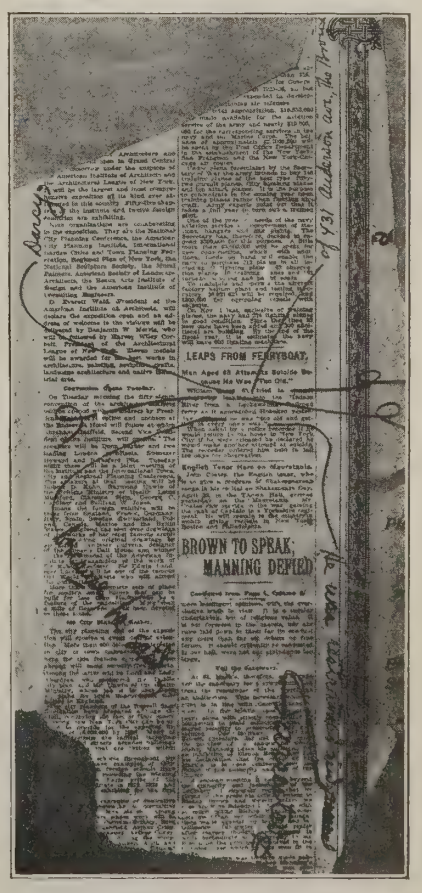


Exhibit K—The operator had to turn this page to seven positions to set the corrections as marked.

BASEBALL-MAD TOKIO GETS ITS FIRST AMERICAN-STYLE SPORTS EXTRA

Newsboys, Used to Handbill "Gogais" of Native Press, Protest 4-Page Weight of Japan Advertiser, But Hot Noodles Strengthen Their Arms

By JOHN R. MORRIS

TOKIO, October 8.—While the University of Chicago's baseball team was in Tokio and the enthusiastic reception given them was demonstrating that baseball is now the foremost sport in Japan, an American newspaper here published the first "American-style" extra ever sold in Japan.

Japanese extras never take the form of newspapers but are merely hand-bills, usually about 6 by 10 inches, and carry in the most condensed form possible only the "extra" story. They are distributed throughout Tokio, Yokohama and suburbs by newsboys who have no connection with the delivery or sale of regular editions but who sell only extras. The Japanese word for "extra" is "gogai."

The plan of the *Japan Advertiser* to issue a four-page gogai for sale after each of Chicago's games with Japanese university teams aroused all the opposition and elicited all the objections which any departure from custom is certain to bring in Japan. The gogai boys, through the "master newsy" who acted as their spokesman, protested against the great weight of four-page papers. They considered it very doubtful whether they would be able, carrying such tremendous burdens, to cover the usual territories assigned to them. This objection was over-ruled successfully, when it was agreed to bolster them up with a bowl of noodles each, a half-hour before the first papers were to come from the press.

Other obstacles facing the "American-style" extra were numerous, but the most serious was the custom long observed here of waiting until the entire extra edition had been run off before dispatching the first newsboy with his lot. As it was intended that the Japan Advertiser's gogai should meet the baseball crowds returning from the Waseda park, such a system would have been ruinous to carefully laid plans. Against the vehement admonitions of the master gogai-man and all his friends and relatives, it was finally arranged that the boys should draw lots to decide the order in which they were to receive papers, and that they should leave the plant as soon as they had been supplied them.

The plans were destined to work, it seemed, despite those little gods who so jealously guard against the introduction of anything new here. While the "records" established during the publication of these extras seem pitifully slow by comparison with the most ordinary extra schedules at home, they are still the talk of publishing circles in the Japanese capital. The master gogai-man was on the verge of committing hara-kiri when, 35 minutes after the game ended, the first 1,000 extras containing a play-by-play account and two action pictures snapped during early innings were on their way to meet the home-coming crowds. The taxi-cab carrying these papers and four boys met the main body of the crowd when they were a little more than half-way to town.

Chicago played games in Tokio with teams from Waseda, Keio and Meiji universities and attracted attention comparable to that created by the world series in America. As Japan's 20 years of baseball history have developed no professional teams, the university nines always arouse much more interest than in the United States. The games with Chicago were a university world series in the real sense of the word and the fact that the local and foreign teams were so evenly matched that three of the first four games were tied lent so much more to public enthusiasm. The fact that students and University graduates are among the most ardent baseball fans in this country (added to fact that English is studied compulsorily in all schools) made it practical for the Japan Advertiser to issue an extra in English.

To show the pronunciation of the American players' names, however, and for the benefit of readers who would not undestand American box-scores, the line-up and box-scores were printed in the extras in Japanese. The front-page of the regular morning edition was made over for the gogai. The three other pages were 2, 3 and 10 of that morning's 10-page edition. For the first time in its history, the paper carried eight-column lines oftener than once in six months or so. The play-by-play stories of the game usually ran, with the lead, between two and three columns. As there were no telephone wires running into the press box at the ball park, the stories were written out in long hand and phoned into the office from a silk store about 300 yards away.

On the second day an extra was to be published, and after the forms were already on the press in good time for a new record, it was discovered that the pressman had forgotten how many pages were published the day before and had put on a six-page roll instead of a four! To say the least, the next few minutes ensuing were among the most interesting periods of the week.

H. Francis Misselwitz, formerly of the *St. Louis Post-Dispatch,* and Oland D. Russell, until a few months ago assistant sports editor of the *New York Evening Post,* alternated covering the games and on the telephone in the office.

The experiment was so successful that it is being followed, beginning today, with gogais on the world series games in America. The cabled report of Washington's first victory over Pittsburgh was received here this morning and published in an extra which was being cried on the Ginza at 11:30. The United Press and Associated Press both carried the lineups and stories giving the high lights of the games—at the present cable rate of around 31 cents a word.

Cartoon Republished 18th Time

John T. McCutcheon's famous cartoon, "Injun Summer" was republished for the eighteenth time this week by the *Chicago Tribune* in response to numerous requests. It was originally published in 1907 and was one of those which helped to make McCutcheon's name known throughout the country.

JAPAN'S PRESS TO SEEK LOWER CABLE RATES

Visit of Roy W. Howard Renews Interest in U. S. News—Cheap Nauen Radio Dispatches Now Favored

By John R. Morris

TOKIO, October 1.—The hope of increased cable news service from the United States to the Far East has been given Japanese editors and readers, and the American exiles in these oriental countries, by Roy W. Howard, who is now making a trip through Japan, China and the Philippine Islands.

The chairman of the board of directors of the Scripps-Howard newspapers came to the Far East with Mrs. Howard primarily on a pleasure assignment, but Mr. Howard has been unable to restrict his activities here to the personal investigation of conditions in the Far East which he had expected to combine with his pleasure jaunt. The distressing lack of an adequate foreign news service for distribution in Japan, with particular regard to news from the United States, has led him into a series of conferences with publishers here which may be expected to bear fruit in the near future.

For several years past the United Press has been distributing through Nippon Dempo an abbreviated news service which provided Japan with practically the only sport news received here from America through an American agency. The *Japan Advertiser's* correspondents, who supply the only other cable news service received from the United States through American channels, confine themselves largely to interpretations of the outstanding news of the day.

The volume of news received through the United Press has been restricted in the past partly by apathy and limited interest in American news on the part of a good many journals here, but principally by reason of the high cost of transmitting news by either cable or radio across the Pacific. Under these circumstances, the United Press report is held at present to 300 cable words daily.

The Associated Press news is available in America to the correspondents of the Kokusai Tsushin Sha, the oldest Japanese news agency, which has a similar arrangement with Reuter. The bulk of this agency's American news, however, is selected and filed in New York by a Japanese correspondent and the dispatches usually are fragmentary.

The most unrestricted flow of news into Japan is through the Trans-Ocean Radio Service, subsidized German report broadcast from the Nauen radio station and distributed here at a low rate. A great deal of this service is used by papers here but the French report broadcast from Bordeaux is so obvious in its propaganda aspect that it commands little attention anywhere.

By the time Mr. Howard returns to Tokio from China and the Philippines, early in November, it is expected that Japanese publishers may have reached a definite decision regarding their attitude which will affect the amount of American news distributed here in the future.

During his vist in Tokio Mr. Howard had long interviews with Baron Shidehara, Minister of Foreign Affairs; K. Debuchi, Vice-Minister of Foreign Affairs; E. Hioki, former Ambassador to Germany and Japan's chief delegate at the Customs conference at Peking, and other prominent officials and leading business men. He was the guest of honor at several large dinners and luncheons, given by newspaper men including H. Mitsunaga, president of Nippon Dempo, and by the America-Japan Society. Since leaving Tokio, Mr. Howard cabled from Mukden a long interview with Chang Tso-lin, Manchurian war-lord.

INTO THE RING OF CIRCUS JOURNALISM

Philip Payne, New York Mirror Editor, Tells How to Crack Whip and Make Circulation Figures Jump —Took Tip from Joseph Pulitzer—Wants His Tab Discussed

By PHILIP SCHUYLER

ALONG Broadway after dark a short time ago a fat man drove, seated conspicuously cramped in the small space of an open Ford. A jacket and jeans fashioned of silk dyed to the semblance of greenbacks, covered an expanse of anatomy, which weighed easily 400 pounds.

This Falstaff, when halted by traffic, talked nonsense and clowned to the crowd. As a sign showed, he was the "circus parade" of the *New York Daily Mirror*. He was a moving advertisement for one of the Mirror's latest circulation building stunts, the brain child of Phil Payne, managing editor. He was the "Big Dough Man," distributor of $100 in prizes daily for gags like this: "My friend is a big necker from Spooner, Wis."

Almost every other day, it seems, some new stunt like this springs full grown from one of New York's tabloid tents, the *Graphic, the News* or the *Mirror*. It is a continuous battle of wits, this tabloid circulation warfare.

I went down to Payne's "tent" this week to find out his view of what it is all about. He told me a whip cracking story of how, in his opinion, mass circulation is made.

Mr. Payne summed up his ideas of what the great masses of newspaper readers are interested, detailed the secret of circulation building stunts, told how he judged feature values, how he played pictures, why he conducted crusades, and finally his ideals of the tabloid newspaper. He defended picture journalism hotly against its critics.

In the spotlight of his shaded desk lamp, he sat, a young man seemingly tingling to the fingertips with interest in his work. As he talked he pushed his hands nervously now and again through his mop of black hair, waving above his green eye-shade. He is 33 years old.

"The tabloid stunt feature," he began, referring to the "Big Dough Man," "dates way back in newspaper history. But I connect it particularly with Joseph Pulitzer.

"It was said of Mr. Pulitzer that nothing pleased him more than to hear his newspaper discussed. When he overheard someone say, 'Did you see that damned story in the World?' Mr. Pulitzer was delighted. He wanted plenty of word-of-mouth advertising, the most valuable in the world.

"We want people talking about our tabloid in the same way. Thus we send out a fat man for thousands to see, laugh at, and talk about on Broadway. Thus we try often to lead off the paper with something we know no other newspaper will play.

"It may be a triviality, yes. But it will be interesting and it will not be so overplayed that the news suffers.

"The success of a tabloid, as well as the standard size newspaper, depends upon its complete, if compact, coverage of the news. Leave out the news, and circulation will drop.

"In building mass circulation, however, trivialities are exceedingly important, because so frequently they are more interesting than the current great events.

"Trivial things make or break the big news stories of each day. Take for instance the baseball stories. With one exception New York sports writers talked of the 'old veteran Walter Johnson,' without mentioning his exact age. My own man fell down on this. The one exception (this was in accounts of the first series game Johnson pitched) was the *New York Times*. To me, and also I think to the great masses, the Times story was therefore the most interesting, the one most likely to be remembered and discussed, all on account of this one triviality, it gave Johnson's age in addition to all the usual stuff about 'Old Barney,' and 'the veteran of baseball.'

Philip Payne—"Tabloid Ringmaster"

"How pictures are played counts a great deal in attracting the masses. An apparently simple order I try to enforce, for example, is that whenever possible, pictures of well-known women be reproduced full-length. Then the women readers will be able to see and talk about how many inches from the ground she wears her skirt, just how her buckles are placed on her shoes, whether she prefers light or dark silk stockings.

"Imagine this conversation between two stenographers:

"'I'm going to have my new dress 16 inches from the ground, Mamie.'

"'Oh, I'm not so sure, I saw in the Mirror yesterday a picture of Mrs. Astor returning from Paris. Her skirt was just about 12 inches up.'

"Comparison pictures are also ones that are talked about. Whenever possible, I believe, it is a good stunt to print two pictures, showing how the subject, especially a woman, has changed in a year or so."

After this introduction, Payne turned to specific comment on those frisking animals of the tabloid circus, the "circulation building stunts."

"Many editors," he first cautioned, "Make the mistake of putting on these stunts before their paper is solid enough to hold the circulation gained. It doesn't pay to add readers, if the majority can't be kept.

"The big secret, I think, of successful circulation building stunts is that they be based on some colloquialism, particularly popular at the time with the public.

"When I was managing editor of the News, as an example, the phrase 'Did you ever' was on thousands of lips and we started our 'Didjever' contest. It went over big. In one day we got as many as 77,000 letters on it.

"At present, 'You Big Butter and Egg Man' is a popular expression, and in consequence we have put it in contest form as the 'Big Dough Man.'

"Before we run a contest in the paper, we test it out to see if it will be as interesting to readers as to those contesting for the prizes. Also of utmost importance, we test a contest to find out if it has what we call 'repeater value.' In other words we consider that contest best for which the average person can easily submit at least 20 or 30 answers.

"It is also advisable to have some seeming educational purpose behind a contest. Thus we tell readers of the Big Dough Man contest rules to 'study your automobile map. Study your atlas. 'Hunt up your old geography. Get a guide book of places and streets in New York and Brooklyn.'

"But above all, we look for the cumulative interest in the contest which permits many different answers."

Mr. Payne called for his secretary to bring him a handful of replies to the Big Dough Man stunt. Virtually every one of a large bundle examined had sent in more than a dozen answers for prize consideration.

A large staff of girls is employed to weed out ones that are alike and help pick the day's winning gags. Hundreds are alike. These are thrown away. Originality is stressed.

"I suppose we have had at least 14,000 send in the gag 'My friend is a big delicatessen man from Hamburg' and just about as many have written 'My friend is a big hat man from Derby, Conn.'" Mr. Payne said.

One day this year when Mr. Payne left a taxi, he offered a $2 bill in payment.

"Aw, ain't you got two ones?" the driver grumbled.

That morning Mr. Payne had been reading in the New York Times a story on efforts to popularize the $2 banknote.

"If you got fifty of them, you'd take them, wouldn't you?" he joked.

"You bet your life," the taxi man replied.

Thus was originated the "Lucky Two Spot" contest, which, while under Post office ban at present, was in its heyday copied by more than 150 newspapers throughout the country. It is said to have increased the circulation of the *Boston Advertiser* by 30,000.

In this contest serial numbers of banknotes put into circulation are published, and the person getting them receives $100 for their luck.

As we talked about how widely this feature was copied, Mr. Payne ventured the opinion that too few editors attempt to obtain an index on the real local value of a feature. They buy on the say-so of a syndicate salesman, who tells them it has built circulation for other newspapers.

Mr. Payne, however, said he sends men out to watch people as they buy the Mirror from newstands, follow them, and ask them casually what features they like best. He also sends men out to school playgrounds to interview the children on their favorite comics.

"I make my men bring me names and addresses of people they talk to, too," he declared. "It makes it a little harder for them to fake. I consider 100 names gives me a good index.

"I also think editors, seeking mass circulations, might well profit from successful theatrical ventures—Abie's Irish Rose, for example.

"Then, a year ago, I never would have printed the picture of the 'Dog-faced Man,' which we published in the Mirror a short while ago. But I learned that the biggest box office returns of the year in the Loew's vaudeville circuit came from the act put on by the Siamese twins. It was obvious that if freaks so interested theatre crowds, pictures of freaks would interest tabloid readers. And, true enough, our picture of the 'Dog-Faced Man' stirred up all sorts of comment.

"There are also editorial lessons from the department store advertisements in newspapers. Ways to sell to women are not very different from way to write for women.

"Not so very long ago I read an article in the *Saturday Evening Post* on real estate values. The author pointed out that the rental value of a store opening right on the pavement was much higher than that to which it was necessary to climb two steps.

"There's a splendid tip to editors. Simplify all your stories. Make it easy for readers to get into them."

Mr. Payne is a believer in crusades for tabloids. He considers that crusades do not make for immediate circulation gains, but he said they are very necessary to "build prestige" for a newspaper.

When he was editing the News, Mr. Payne campaigned for the conviction of Walter S. Ward, around the slogan "Can a Rich Man Kill a Poor Man and Get away with it?" Now the Mirror is crusading against the freedom of Harry K. Thaw on the idea of how is it rich lunatics are allowed at large.

Handling this crusade has its thrills. Whenever Mr. Thaw comes to New York from his Pittsburgh home the Mirror, of course, and other newspapers too, assign men to trail him. One night not long ago this trailing process was in progress until Thaw got to a New York night club in which the newspaper men were not allowed. The Mirror reporter called up Mr. Payne. He is a member of the club, and immediately went there.

The headwaiter, asked by Mr. Payne to seat him near the slayer of Stanford White, didn't comprehend the situation fully, and he placed the editor, well known as a crusader against Thaw, at a table with his back turned to that gentleman. Immediately many guests in the restaurant became tense. Each move made by Thaw brought out gasps. Would he turn and shoot the editor?

Payne was far from comfortable, until Texas Guinan, famous hostess of the club, came over and whispered to Payne that she had "frisked" Thaw when he entered the restaurant, and that he was unarmed.

Later in the evening, Mr. Payne had an opportunity to meet and talk to Thaw. This talk, he said, further convinced him that the man is insane and should be locked up.

HERALD-POST OPERATING IN NEW BUILDING

Louisville Morning Paper Goes Tabloid as New Plant and Equipment Is Shown to Public in Two-Day Housewarming—Agency Men Also Inspect New Home

OPENING of a magnificent new plant by the *Herald* and *Post* of Louisville, Ky., a few days ago was accompanied by and has been followed by several unusual newspaper events. The plant itself, to be described and illustrated on this page, has a number of noteworthy features and its opening led directly to the first of the events referred to:

The "New Kentucky Edition," a special number which told the reader and the space-buyer in story and picture what Kentucky is and why.

Hardly had the mails finished distributing this edition across the country when the management invited a large group of advertising space-buyers for an inspection visit, which ended last Saturday.

That same day came the announcement that the Herald, the morning paper, would become a tabloid with its issue of Oct. 31, under the name of the *Herald-Post* and that the afternoon paper under the same title would continue to be issued in standard size. The Sunday issue will combine elements of both forms, also under the Herald-Post title.

Occupancy of the new home was marked by a house-warming for the public Oct. 6-8. The site was taken over about 18 months ago, shortly after the purchase of the Herald and Post by James B. Brown, then a leader in banking and business, now editor, publisher, and president of the publishing company. The papers began operations in the unfinished building on Sept. 1.

Facade of the new Herald-Post Building

The exterior is finished with white stone, and the greater part of the first floor front is given over to huge display windows, permitting a fleeting glance or the lobby just inside the main entrance.

The lobby presents one of the most beautiful pieces of decorative work in the city. The style of the decorations is strictly Italian Renaissance. The walls and pillars in the lobby are an imitation of Roman travertine marble. A warm yellowish brown background prevails in the ceiling while the beams are treated in darker tones than the panels. Both are decorated with an after-coat of glaze to deepen and antique the colors.

The lobby is entered through large double doors in the centre of the building and through a door on each side. Six large chandeliers, each of which holds twelve electric lights, are suspended from the ceiling, and single lights are placed in a number of the ceiling panels.

The business part of the lobby is separated from the front by a black Italian marble counter, more than 200 feet long, which extends across the room. Back of this counter are the display advertising department, and the auditing and bookkeeping departments, while along each wall, set back under the balcony, are private offices for heads of departments. Each of these offices is decorated after the general scheme of the main office. In front of the counter is a tile floor, carrying out the color scheme of the walls and ceilings.

The balcony, which extends across the front and along two sides of the lobby, appears to be suspended from the ceiling by twenty-one spiral columns, which are also of imitation Roman travertine marble. On the balcony are the foreign advertising department, the telephone exchange and the classified advertising departments. Private offices are located along two sides of the balcony.

Three large decorative windows in the rear wall of the lobby permit the visitor to look back into the composing room where 27 of the latest model type-setting machines are in operation.

A complete job printing shop, in which all of the Herald-Post letter-heads, envelopes and other office printing can be turned out, is located on the balcony over one side of the composing room.

Bound volumes of the Herald and the Post, dating back 50 years to the time each of the papers was founded, are on the balcony over the other side of the composing room.

A locker-room with individual lockers, also equipped with a rest room and shower baths, is along one side of the composing room.

The composing room is equipped with 23 Intertypes and four multi-magazine Linotypes; four Monotype casting machines and one Thompson type-caster.

The room is lighted with special Cooper-Hewitt mercury-quartz lamps.

The ventilation system in the composing room, as well as in the stereotyping and press rooms, changes the air completely every two minutes.

The stereotype room includes job machinery for making almost anything that is made of type metal. In the centre is the melting pot which is kept heated to 750 degrees Centigrade at all times with Paws system of heating, a mixture of air and gas under a 65-pound pressure. Connected with the pot is the double pony autoplate machine with two casting boxes and two finishing machines and coolers.

The presses are equipped with all of the latest improvements and safety devices. They are the Scott multi-unit double octuple combination presses, divided into eight units, each of which can be operated separately, or all together. The presses are operated by the Cutler-Hammer control system.

From the press room, the printed papers are carried to the mailing room on the second floor by a conveyor, which deposits them on large steel wrapping tables. These wrapping tables have a continuous belt running down the centre and after the papers have been wrapped and addressed to the carriers or customers they are carried by a chute directly into trucks at the loading platform in the rear.

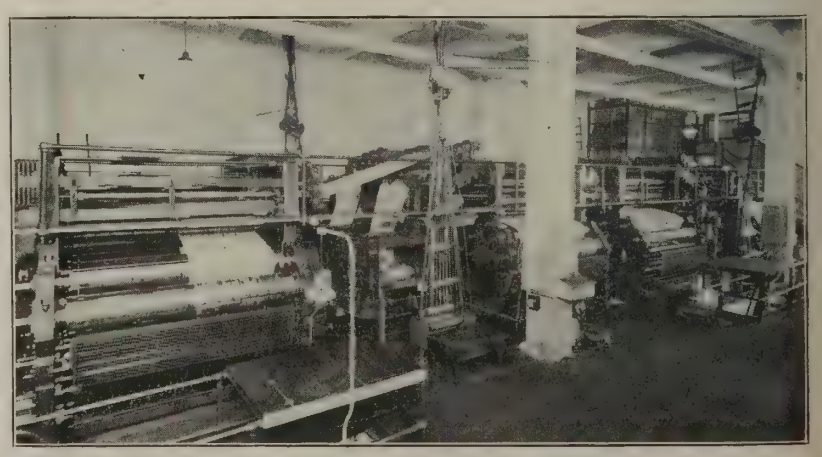
Comfort is the dominant note in the publisher's office

Rolls of white paper are stored in the basement and are fed to the presses up through the floor. The rolls are handled on a miniature railroad system.

The greater part of the second floor of the building is given over to the offices of the higher executives of the paper and to the news-gathering and handling departments.

The second floor is reached by a stairway and hall which opens both on the street and into the main office or lobby on the first floor, and onto the balcony before reaching the top of the building. The stairway is decorated with stained marble and a walnut banister, while the steps are of composition tile.

Six offices, including those of the general manager, the business manager and Mr. Brown, are located along the front of the second floor. Each of these offices opens into the editorial room which serves for both papers. Offices of the managing editors of both papers and the sport department and art department are located on each side of the editorial room.



The walls of this room, as well as those of the offices and banquet room are tinted in delicate tan, while the woodwork is of walnut. All offices in the building are furnished with new desks and chairs, while the editorial room and advertising department are furnished with new type, all steel desks with linoleum tops. The floors, excepting those that are finished in tile, are covered with battleship linoleum.

Mr. Brown's office which is located in the northwest corner of the second floor, is decorated along the same lines as the main lobby, with beamed ceiling, highly decorated and laid out in coffered panels. The walls are also in imitation Roman travertine marble. All decorations in the office, including the ceiling and beams, are hand-painted, and are carried out in a color scheme of brown. A large fireplace is located along one side of the room.

Pneumatic tubes, through which copy is carried to and from the composing room and advertising departments, are located in the centre of the editorial room.

The banquet and assembly hall is located on the second floor of the building in the rear of the editorial department. This hall is to be used for all get-together meetings of the newspaper workers, for banquets, dances and other forms of entertainment, and is to be offered to outside clubs and organizations as a meeting place and convention hall. The banquet room is finished in a delicate brownish yellow with blue ornamental borders and blended walls.

A complete photographic department with a studio and a dark room for developing pictures also is located on the second floor of the building, in the rear, and en-

Height and light and plenty of space for the latest machines in the pressroom

graving room has been installed adjoining the photographic department.

In the extreme rear of the building, on the second floor, in a room that is always under lock and key, is located the galley room, where the name and address of every subscriber who receives the paper by mail, is to be found in type, from which the mailing lists of the paper are printed.

The issue which commemorated the new building consisted of 140 pages in 11 sections besides the space devoted to regular news. Two sections were devoted to minutely detailed descriptions of the plant and building, histories of both papers and reminiscences of former staff people.

Other sections told in word, picture and statistics the stories indicated by these titles:

"Louisville, a Financial Centre," "Kentucky's Pride, the Thoroughbred," "Public Utilities," "Building the Greater Louisville," "The Printing Industry in Louisville," "Tobacco, the Kentucky Farmer's Money Crop," "The Coal Industry in Kentucky," "Real Estate and Home Financing," "Health and Welfare," "Kentucky Stands High as a Pure Food Market."

Two parties of advertising men, from New York and Chicago, were entertained by the Herald-Post in the new building last week, the publishers and the Kelly-Smith Company, their advertising representatives, making the arrangements. Inspection of the plant, a tour of the city, an afternoon at Churchill Downs racetrack, a dinner as the guests of Mr. and Mrs. Brown, an a night at West Baden Springs, made up the program. The groups included:

E. T. Wells, Morse Agency.
L. T. Bush, Blackman Company.
F. M. Lawrence, D. R. Hathaway, George Batten Company.
Jake Stahl, Richard A. Foley Agency.
Ben Duffy, Barton, Durstine & Osborn.
Frank Kaus, Federal Agency.
Jim Beatty, Harry Porter & Co.

Thirteen issues a week keep the composing room hustling

H. M. Bullerbeck, Barrows & Richardson.
Andy O'Flaherty, Wallerstein Agency.
Roy Burrell, Hoyt Agency.
Harry Reardon, Albert Frank & Co.
C. F. Kelly, M. B. Holmes, M. E. Rogers, Kelly-Smith Company.
C. C. Kahlert, New York.
Frank D. Webb, Baltimore.
George Pearson, J. Walter Thompson Company.
E. E. Bullis, Lord & Thomas.
B. G. Wasser, Potts-Turnbull Co.
R. N. Cushing, Vanderhoof & Co.
C. J. Eastman, Brennan Phelps Advertising Company.
E. C. Vining, Shuman-Haws Advertising Company.
E. Ross Gamble, John Sturdivant, Erwin, Wasey & Co.
Kenneth Gordon, Charles Daniel Frey.
F. B. Avery, McJunkin Advertising Company.
A. J. Grobe, Green-Fulton-Cunningham Agency.
G. F. Ganser, Henri, Hurst & McDonald.
C. B. Patterson, H. L. Hulsebus, Stack Agency.
H. P. Leffingwell, Mitchell-Faust Advertising Company.
D. P. Paus, Brandt Advertising Company.
H. C. Glidden, Coy Glidden, Fred M. Randall Company.
F. H. Marling, Benson, Gamble & Crowell.
Albert R. Callies, Charles H. Touzalin Agency.
Walter W. Hall, H. W. Kaster & Sons Company.
C. J. Cooly, Varier Oats Company.
H. S. Peterson, Guenther-Bradford.
Sam McWilliams, Sheffield Pharmacy Company.
F. H. Kenkel, Gardner Advertising Agency.
Joe Brown, Charles F. W. Nichols.
Edwin Polkoski, Sehl Agency.

ALTER NAME AND FORM OF LOUISVILLE PAPERS

Herald and Post Titles United, With Tabloid Morning Edition and Enlarged Evening Paper

Announcement that the *Louisville Herald* and *Louisville Post* would be known as the *Louisville Herald-Post* after Oct. 31 and that the morning paper would be tabloid was made this week.

"The two newspapers will be consolidated under the title of the Herald-Post and will be one great newspaper, ordinary size greatly enlarged, in the afternoon, tabloid size in the morning, and the Sunday Herald-Post, a combination of both" the announcement stated.

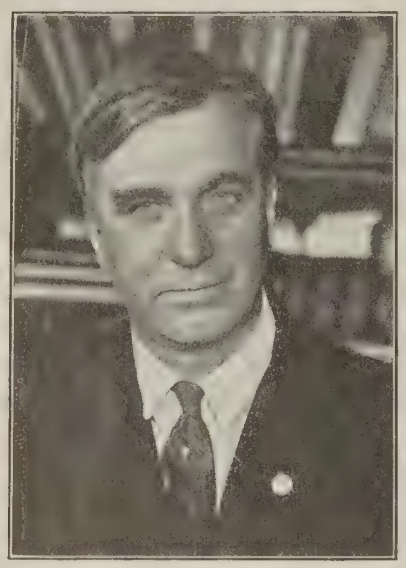
"The tabloid Herald-Post will be a complete newspaper in every way," it continued. "It will carry all the news. It will have the complete report of the Associated Press. It will have the magnificent full wire report of the Universal Service. It will have a full staff of editors and reporters. It will give the markets in compact detail. It will publish the news of sports in the most attractive form, all the best features and the comics. But the news will be told in a style crisp and sparkling.

"The Herald-Post in the afternoon will retain its present form, which is that possibly best adapted to the afternoon newspaper.

"The Sunday Herald-Post will be published as hitherto."

Advertising in the Herald-Post will not be sold in combination. The morning tabloid rate will be 12 cents per line flat, which will also apply on the Sunday paper. The Evening Herald-Post rate is 10 cents per line.

Either the morning or evening paper will be delivered at 15 cents per week by carrier. The carrier rate on the Sunday issue will be 8 cents.



Italian Renaissance design in the lobby is carried out with Italian Travertine marble effects

ITALIAN "IMMORAL PRESS CENSORSHIP" DENOUNCED BY U. S. NEWS MAN

Augustin McNally Says New Italy Would Emerge Given a Fighting Editor—Blames Foreign Writers as Well as Mussolini for Gag

AUGUSTIN McNALLY, American newspaper man of nearly 30 years experience, fresh from seven months' visit in Italy, this week disclosed the inside story of Mussolini's relations with the Italian and the world press.

He denounced what he termed "the immorality of news suppression in this enlightened 20th century," and at the same time found fault with the work of foreign correspondents in Rome and with the editors of anti-Fascist newspapers, editions of which are being methodically confiscated under the iron rule of the picturesque dictator, whom the American news man was inclined to defend as "a necessary evil" under present conditions in Italy.

Augustin McNally

Banishment from Italy of George Seldes of the *Chicago Tribune* for cabling news reports unfavorable to Mussolini occurred during Mr. McNally's Italian visit, and the dramatic incident served as a focal point for his contention there are two sides to the Italian censorship story.

Mr. Seldes cabled purely political stories which would not have done the government any harm, according to Mr. McNally.

"But it is also my opinion," Mr. McNally declared, "that the Fascist government was justifiably irritated by Mr. Seldes' unfavorable comments. It was the case of a newspaper man new to the country, news of which he was trying to cover, attempting to tell the majority leaders how their country should be run. He simply was not attending to his business.

"I believe he came to the country biased in opinion, and declined to see anything but unfavorable news.

"A free press cannot ever be one sided," he continued in explanation. "Both sides, the press and Mussolini, are at fault, in the present situation.

"Mussolini wants only news favorable to him published. The opposition press will publish only that which is unfavorable.

"Certain of the correspondents, the Americans included, are only seeking means of attacking the dictator. Publishers are expecting these correspondents to make the news suit editorial views.

"The anti-facist press refuses to publish both sides of the current political story.

"What the Italian press needs," he said, "is a Pulitzer, an Ochs, or a Hearst—some publisher who understands the necessity of printing both sides of every question. What Mussolini must learn is the utter stupidity of news suppression. And what certain of the correspondents, notably representatives of a section of the British press, and representative of at least three American newspapers, must learn is the folly of unnecessarily irritating the present government and of writing with chips on their shoulders."

Mr. McNally said he had investigated the Italian news situation carefully while he was a visitor in that country as a writer for the *Baltimore Sun* and as a free lance. In addition to his emphatic assertions that all three parties to the dispute were at fault, it was his opinion that "no extraordinary Italian news" was being withheld from the world.

At the same time he said:

"No editorial writer in America can understand the Italy of today or its politics through the news that comes into his office from correspondents abroad.

"If he would learn the reasons why of the present regime, he must visit all Italy in person and investigate for himself.

"Personally, there is no doubt in my mind now that Mussolini is necessary to his country today. The stern rule he is handing out is absolutely vital to the welfare of his people. He saved Italy from chaos. He came in the nick of time. The majority of Italians favor his policies.

"But one great fault damns him. It is the crime of all dictatorships. It is the same old story that goes back to the days when the Old Testament was being written—the story of news suppression."

And that story of news suppression, as particularized in Italy and told by Mr. McNally, resolved itself into a discussion of the Latin mind.

"The Italian is not educated to the point where he can either give or take two sides of a question," he explained. "To the Italian his party is entirely right, the other party is entirely wrong. It is this age-old psychology.

"It is Mussolini's great mistake. By it he is gaining no political advantage, and it is resulting in grave injury to the rest of the country. It is the case of a dictator anxious to show the power of government rather than its usefulness.

"To combat it Italy needs a fearless fighting editor, a man who will discover a new leader and back him by publishing both sides of the story."

As described by Mr. McNally, haphazardness is the outstanding characteristic of Italian censorship. No set rules have been made. The correspondents have not been informed what they can or cannot put on the wires.

Government news is obtained from a press bureau in the state department. Apparently it is obtainable with the greatest ease. Anti-Fascist news is equally easy to uncover.

It is often more than three weeks after correspondents have cabled dispatches that they learn whether or not the stories written were censored.

Editors of anti-Fascist newspapers accept placidly the treatment they are receiving at the hands of the dictator. During the entire time Mr. McNally was in Rome, police under orders of the censorship department guarded the composing room of *El Mundo's* plant.

First copies of each day's paper as it came from the press were seized by policemen who rushed them down to the censor, who took his time about deciding whether or not the edition should be suppressed. Meanwhile, police remained on guard to see that no copies left the plant without government permission.

"Italy needs Mussolini," Mr. McNally concluded, "but it is certainly difficult to understand the utter stupidity of Latin dictatorship.

"If the 20th century spirit of the unbiased press could be taught Italians, there would be a new political Italy in 25 years.

"Now priest, politician and editor considers the mob of the populace as little children. They must be told this and not that. And as long as the people swallow that principle Italy will never develop the way it should."

For the last three years Mr. McNally has been free-lancing. Always keenly interested in religious news, he went to Italy primarily to report the Holy Year, and his impressions are to be published in book form shortly by Nicholas Brown.

Born in Scotland, Mr. McNally studied for the priesthood, spending one year as a student in Rome, before he came to this country, changed his mind and entered newspaper work as a cub reporter on the *St. Louis Republic*. Later he spent three years on the *Pittsburgh Dispatch*. Coming to New York after this experience, he first worked for the *New York American*, and then the *New York Times*, before joining the staff of the *New York World* where he remained for 19 years.

COVERED WAGON DAYS OF ADVERTISING

New Mexico general store in the good old days, interesting now because the gentleman to the left of the perilous store pipe is none other than Author Pancoast, then known to Southwest as "Scoops."

THE first installment of "Trail Blazers of Advertising," Chalmers L. Pancoast's new book on the humorous and wildly adventurous publicity schemes of a generation ago in our country, will appear in next week's EDITOR & PUBLISHER.

It will thrill thousands of newspaper and advertising folk who, although perhaps in middle life, were actual participants or witnesses of these events which are related to the golden romance of the covered wagon, gold rush, Indian, stage coach, pony express era in American history.

Young people in newspaper and advertising work will follow this serial presentation of a story which was enacted in the lives of their daddies, but in the light of the present development of the science of advertising seems strangely quaint and distant.

Mr. Pancoast, now vice-president of the Charles C. Green Advertising Agency, is perhaps the best equipped man in the country to write this historical statement of early day advertising. He went west as a runaway boy, and known as "Scoops Pancoast" slaked his thirst for adventure in pioneer newspaper offices and played a thousand games with the old-time schemers. Many of the incidents he relates are written from firsthand knowledge.

Here is a partial list of chapters in his book: Indian Medicine Ten Show; Publicity in the Wild and Woolly West; Rolling Stones; Special Edition Blowhards; Mexico's Thieves Market; Advertising A Bull Fight; An Arizona Saloon Opening; Goats and Ghost Towns; Street Fakers—Masters of Gag and Free Schemes.

"I have written a book about P. T. Barnum, Buffalo Bill, Myself and a lot of Other Old Schemers and the schemes they worked," said Mr. Pancoast.

"It goes back quite a way. It is not exaggerated. Many an old timer will meet himself face to face in some one of the chapters. I made my first appearance as an advertising man by having my picture taken with a cow I wanted to sell. The picture sold the cow.

"Looking backward is not going backwards—but it gives us a better perspective on the importance of present day methods. It is always an enjoyable mental relaxation to glance over our shoulders and have pleasant reminiscences about the days that are past—and of another period—a period of colorful romances and daring adventure."

Canadians Tour Daily's Plant

The *Detroit Free Press*, Oct. 23, entertained members of the Young Men's Section of the Board of Trade of Winnipeg and 100 members of the Senior Board and the City Councils of Winnipeg and St. Boniface.

ITALIAN PRESS ASSOCIATION DISSOLVED BY GOVERNMENT

THE Italian government this week dissolved the Italian Press Association, another drastic step in connection with censorship of the press.

According to news dispatches from Rome the following notice was issued:

"Whereas the tendencies and acts of the Managing Board of the Italian Press Association provoked very serious dissensions to the detriment of that object which is essential for the realization of the lofty aims of the association and the Journalists Provident Fund, the Prefect of Rome by decree today has dissolved the Managing Board, the bodies controlling the association's other social institutions and the Board of the Journalists Providend Fund and has appointed three journalists to administer the association and a treasury official to administer the fund."

MAKING PRESSES PRODUCE TO CAPACITY

Rigid Inspection and Close Attention to Important Details Needed for Perfect Press Work—Fourth of a Series of Articles on Newspaper Plant Efficiency

By HARRY L. CLARK

Mechanical Superintendent, *Los Angeles Express*

MODERN newspaper presses are constructed for high speed and in order that they may be made to produce up to their capacity they must be kept in perfect running condition. The blanket or impression cylinders must be exactly the right circumference and the impressions kept even and the cylinders parallel. The composition rollers must be set exactly right in the amount of impression on both the inking cylinder and the surface of the stereotype plate on the plate cylinder. All working parts must be kept thoroughly oiled and greased. The ink fountains must be kept clean, otherwise the flow of ink will be uneven and the dirt from the fountains will be carried to the composition rollers, resulting in poor production.

Suppose we take a press which has been properly installed, dress it with rollers and blankets and get it ready for every day use. If the press is new, each blanket, plate and inking cylinder will be the same size as all others in the press of the same kind and we will have to figure the blanket packing for only one cylinder. We will also have the information from the manufacturer as to the thickness of the stereotype plates which are to be used on the press. Modern presses carry plates which are 7/16 of an inch thick. Some older models use half-inch plates. I always get the diameter of the plate cylinders without plates and add to this twice the thickness of the stereotype plates to be used. I then caliper the blanket cylinders without blankets and subtract the diameter of the blanket cylinders without blankets from the diameter of the plate cylinders with plates on and this will give the amount of blanket packing which must be put on to bring the blanket cylinder up to the proper size to work perfectly with the plate cylinder. The difference between the daimeter of the plate cylinder with plates on and the blanket cylinder without blankets will be twice the thickness of the amount of blanket necessary.

I always allow 62/1000 of an inch more diameter with the blankets on than on the plate cylinder with the plates on. This makes a perfect running condition as the extra size on the blanket cylinder will give the proper amount for impression, will make a perfect surface feed for the sheets of paper passing through, and the cylinder gears will be running true on their pitch line.

The following is an example of how we arrived at the proper amount of blanket to be placed on the blanket cylinders of our Scott press.

	Inches
Diameter of plate cylinder bare	12.875
Twice the thickness of 7/16" plate	.875
Diameter of plate cylinder with plates	13.750
Diameter of blanket cylinder bare.	13.500
Difference in Diameter	.250
Add 62/1000 for impression	.062
Total to be added (divide this by 2)	.312

The packing on any press should never be under-size or over-size enough to cause the cylinders to be moved so that the gearing runs off the pitch diameter.

If the press has been used in some other plant it is advisable to caliper all cylinders before they are placed in the press as this will give exact information as to the diameter of all cylinders and in this way you can discover if any of the cylinders have been turned down to correct damage from some accident to the press. For instance I installed a press in one of our plants and by measuring the cylinders found one blanket cylinder 1/16 of an inch smaller in diameter than the others. In checking back through the firm from whom we purchased it I found that this cylinder had been sprung by a plate coming off and in order to make it perfectly round a cut had been taken off it. This was easily overcome by adding more packing.

After the press has been properly dressed with blankets the impression must be set and the cylinders paralleled. If the cylinders are not kept parallel, uneven wear will take place in the cylinder bearings and they will be constantly run hot. Cylinders not parallel will also make an uneven pull on the sheet passing between them and many web breaks will result. After the impression has been correctly set the next operation is the placing and setting of all composition rollers. In order that a roller can be properly set the roller sockets should be right—not worn so that there is play which will allow the roller shaft to wobble. I set all rollers with 3/8ths of an inch impression on the ink drum and the same amount on the plate on the plate cylinder. The inking cylinder is the driving force for the form rollers and if the impression is the same on the plate as on the ink cylinder you have a roller that is rolling perfectly between two surfaces. The ink picked up off the ink-cylinder will be deposited on the plate evenly and with no drag to mar sharpness.

We now have the press with the blankets on and the impressions set and the rollers all placed and properly set. We are now ready to thread the paper through the press. First set all trolleys which pull the sheets into the folder and then bring the sheets through and line them up perfectly running straight into the folder or folders if the press is double width. After the sheets are in perfect alignment running straight into the folders and the compensation is right—that is, the head and tail margins are the same—we will transfer the section from the left hand folder to the right hand one (if a double-width press) and get the compensator which is between the two folders set so that the two sections come out together and the head and tail margins are right. We will then transfer the other way and take the section from the right hand folder over into the left hand one and do the same, marking the compensator in the first position and resetting it for this transfer.

If the press is double width, it will be equipped with angle-bars and we will now slit the sheets after the second impression and carry one half of each sheet over the angle bars and bring all sheets out in one folder. The angle bars must be set so that the sheets passing over them will run in perfect alignment with the sheets coming straight through the press and the compensating rollers over which the angle bar sheets pass must be set so that the head and tail margin on these sheets will be the same as on the straight leads. The formers over which the sheets pass and which make the first fold in the papers must be set to the right angle and the nipping rollers, which are right under the former, set so that the sheet will be combed in smoothly without any cracking or breaking on the edges. The pins in the folding and collecting cylinders must be set out of the cylinders the right length, which is 1/4 of an inch for the folding cylinder and 5/16 of an inch for the collecting cylinder. We now have a press which is ready to print any size of paper up to the capacity of the machine and in any kind of combination which the press will handle.

The two principal items in newspaper printing are paper and ink. Newsprint paper should be of at least 32 lbs. basis and should be of good body and with sufficient finish to make good printing of cuts and all illustrations possible. It should be of sufficiently long fibre to make it strong enough to stand the strain of high speed on modern presses. News ink dries from absorption and has no dryer. If it had dryer it would set fast on the rollers and ink cylinders between shifts. News ink should be of a fine even flowing substance and have sufficient density of color to cover the black portions of the printing surface without flooding. The ideal printing combination is a paper that has enough strength to stand the strain of high speed with sufficient finish to allow the printing of solids with an ink that will cover perfectly without in any way having the paper look mussy or the printing show through.

There are many different kinds of cylinder packing. Some use rubber next to the cylinder and felt on top, others use "Tindeck" next the cylinder and felt on top, others use two pieces of "Tindeck" and others two pieces of "Monocork." The last is the type of packing I use. This gives a very fine printing surface, has plenty of resiliency and is long wearing. It does not bolster until long service has been had from it and by using the two pieces the bottom blanket will last the life of two top blankets.

There are many things in newspaper printing which will cause the paper to have a poor appearance and which are charged against the pressroom which can be corrected in other departments, but not in the pressroom. Cuts which are not properly etched and are either shallow or undercut will not print properly. If the copy furnished the engraver is not properly retouched in the art room and the engraver makes a perfect etching he will reproduce the picture exactly as the copy was. If the linotype machines in the composing room are not turning out slugs that are type high in every case, the high and low slug will cause an uneven printing surface which will be reproduced on the stereotype plate and on the presses.

All ink should be washed off type and cuts after proofs are made, as any ink left on the form will cause the matrix to be shallow and this will also show in the printed product. Newspaper presswork is all done in a rush and there is no time for make ready or corrections after the plates reach the presses. For that reason attention given to the things above mentioned will give a greatly improved appearance in the printing of any paper.

SONGS OF THE CRAFT

(Written Exclusively for EDITOR & PUBLISHER*)*

By Henry Edward Warner

THE BURDEN LIFTER

(To a borrowed baby who lives in my house.)

Helen, with your eyes of blue,
Here's a little song to you;
Just a little song, to sing
How you sweeten everything! . . .
How you cheer a weary Dad,
How you make him feel so glad
When he leaves the job at night,
Five-year-old, with smile so bright!

Back of me the presses roar;
Upward from the press room pour
Papers by the thousands, coming
From the whirling cylinders humming!
Back of me the vats of ink,
Back of me the metal's clink,
Back of me the fret and worry,
Back of me the rush and hurry.

Back of me the toiling, too,
As I hurry home to You!
Oh, the day is long, my dearie!
Oh, the day is long and weary,
Battling in the world of men
Till I play with you again! . . .
Long the day, but sweet the ending
With our nursery pretending!

I pretending I'm a horse,
You a rider bold, of course;
You pretending you're a Queen,
I your knight, in armor sheen!
You a famous dancer; I
In a box, adoring, sigh!
Till upon my knees you creep
And Daddy rocks you off to sleep!

With the dawn, again I wend me
Where compelling forces send me
Back again, to feel the stress
Of the shop and printing press!
Tell me, Babe who smiles so brightly,
Why does toiling sit me lightly? . . .
Love mist lift my burden through,
Knowing, Girlie, it's for You!

Business Enters Europe

With the incorporation of Business Research Services, Ltd., in England, A. L. McCredie, director, the Business Bourse, International, New York, research headquarters, headed by J. George Frederick, will carry the American research idea to Europe. Representatives will travel from London and Paris to various parts of the Continent. Research work will be done both for Continental manufacturers interested in the American market and American manufacturers interested in the Continental market, Mr. Frederick stated.

BANKERS TO VOTE ON $268,000 AD PROGRAM

President of Investment Group Expects Definite Action at Florida Meet —To Choose Media

Program of the Investment Bankers Association of America to spend $268,000 in an advertising campaign to educate the public in investment matters in all likelihood will go into effect with the beginning of 1926, according to Thomas N. Dysart of St. Louis, president of the I. B. A.

President Dysart was in Cleveland last week and addressed the Northern Ohio Group of the I. B. A. at a dinner in the Mid-day Club. He was asked by a representative of EDITOR & PUBLISHER what the outlook was for the advertising drive decided on at the national convention in Cleveland last year, and made the statement outlined above.

Although it was decided at the 1925 convention to spend $250,000, Mr. Dysart said $268,000 had been pledged immediately and that these pledges still stand. He added that the forthcoming national convention of the I. B. A., to be held in St. Petersburg, Fla., Dec. 7 to 12, undoubtedly would ratify the plan and order it into effect.

The last year, according to Mr. Dysart, has seen many conferences with advertising men in regard to the media to be used when the advertising drive starts. Nothing has been definitely decided except the sort of copy that will be used.

This will take the form of institutional I. B. A. copy, not mentioning any individual house or security, but aiming to create confidence in the I. B. A. as a whole all over the country. Sentiment among bankers who attended the Cleveland meeting was in favor of newspapers as the media for the drive.

Accompanying Mr. Dysart to Cleveland was Harry Rascovar of Albert Frank & Co., New York. Mr. Rascovar is national publicity director for the I. B. A. and already is preparing to entertain and care for scores of financial editors and advertising solicitors who will attend the St. Petersburg meeting in December.

The Athletics Have "Gone" Nash

And now the Athletics have gone Nash. Nine members of Mr. MacGillicuddy's Philadelphia Athletics have joined the ranks of Nash owners. The batting order is as follows:

Max Bishop, Advanced Six Victoria; Sammy Hale, Advanced Six 4-Door Coupe; "Lefty" Groves, Advanced Six Sedan; "Mickey" Cochrane, Advanced Six Sedan; "Cy" Perkins, Advanced Six Roadster; Jimmy Pool, Advanced Six Sedan; "Chick" Galloway, Special Six Sedan; Baumgartner, Special Six Sedan; "Slim" Harriss, Advanced Six Sedan—a whole team of Nash-ites.

It is rumored that this all-Nash contingent, with Harriss, Baumgartner and Perkins in the outfield, Groves in the box and "Mickey" behind the plate, are going to challenge the rest of the Mack brigade to a game.

And if this battle does come off, you don't have to guess on which side J. G. Roberts, Philadelphia Nash distributor, is going to place his money.

"It is on fitting that the Nash should be the favorite car of the Athletics," claims Mr. Roberts. "The long sweeping Nash lines and the smooth, powerful performance suggest immediately the qualities of youth, spirit and co-ordination that have been responsible for the good showing of the Mackmen this past season.

Incidentally, those who have seen the Mackmen in action and have marveled at the towering Gothic construction of Pitcher "Slim" Harriss will never have any doubts as to the genera spaciousness that characterizes the interior o the Advanced Six Sedan.

Typical of the audacious use of editorial space by automobile press agents. The above copy, mailed to the press in ma form for free insertion, is advertising in the garb of news. Read the stuff! Think of ramming it down the throats o honest readers who depend upon a newspaper to label advertising!

Daily Wins 9-Year Libel Fight

The supreme court of Illinois this week affirmed opinion of the appellate court in sustaining a Winnebago county court decision favoring the *Rockford* (Ill.) *Morning Star,* defendant in a libel suit instituted by Oscar H. Ogren, on basis of advertisements appearing in the Star in the course of a municipal campaign nine years ago. Ogren was attacked as a socialist and when he sought $10,000 damages on representation that the accusation was an attack on his character, the paper made the defense that it had no part in preparing the advertisement, which it printed "without malice, with good motives and for justifiable ends." The supreme court upheld that attitude. The case was tried twice in circuit court, went to the appellate court once and the supreme court reviewed it twice.

To Study Forest Taxation

A nation-wide study of the forest tax problem in relation to reforestation is being launched by the Forest Service, United States Department of Agriculture which has just announced the appointment of Prof. Fred R. Fairchild of Yale University as director of the investigation. A detailed study of forest tax problems will be made in principal forest regions of the United States to determine the effect of present tax laws on reforestation and timber holding, and the conditions that must be met in any effort to readjust present tax laws so as to be fair both to the land owner and the county.

P. M. Dailies Merged in Macomb

The *Macomb* (Ill.) *Journal* has purchased the *Macomb* (Ill.) *Bystander.* Publication of the Bystander has been discontinued.

THE U. S. FISHERIES ADVERTISING PLANS

October 26, 1925.

To EDITOR & PUBLISHER: With reference to editorial and items in your Oct. 17 issue re Fisheries Association advertising. The facts are as follows:

Desiring to begin a national publicity campaign to expand the market for fish, the Publicity Committee of the U. S. Fisheries Association commissioned the Chas. W. Hoyt Company to make a survey of market conditions and to suggest a plan of national publicity.

The Hoyt concern made this survey and embodied their suggestions in a report which the Publicity Committee of this Association had printed and mailed to members.

At the recent convention of the Association, the Publicity Committee secured the endorsement of the members of an advertising campaign, and the Committee was empowered to solicit funds by voluntary assessment.

The advertising plan of the Chas. W. Hoyt Company has not been accepted by the Association. Numerous plans have been laid before the Association—all of which will be considered when sufficient funds are in hand to warrant the launching of a Publicity Campaign.

In the meantime, the Association is endeavoring to raise money. The best method of expending it will be discussed and decided upon later, and newspapers as well as magazines and other forms of publicity will be given a careful consideration.

Since your published reports tend to place the U. S. Fisheries Association in an unfavorable light, you will surely be fair enough to correct that impression.

U. S. Fisheries Association, Inc.,
F. W. WALLACE,
Chairman, Publicity Committee

Rothenburg Joins N. Y. "Special"

Grover V. Rothenburg on Nov. 1, will become vice-president and a partner in Cone, Hunton & Woodman, Inc., with headquarters in the New York office. For more than 20 years Mr. Rothenburg has been in the newspaper and advertising business. At one time he was a reporter in the Chicago office of the Associated Press; for years one of the executives in the sales and advertising departments of the Postum Cereal Company, Battle Creek, Mich., and for the last ten years in the advertising agency business in New York and Chicago.

Berlin Daily Sues Ex-Crown Prince

The *Berlin Montag Morgen* has brought suit for libel against the former Crown Prince Wilhelm, alleging defamatory statements were contained in an open letter writen by the Prince in answer to articles published by the newspaper. The newspaper stories were to the effect that the former Crown Prince was providing one of his secretaries with luxuries not usually enjoyed by working girls. In his open letter, the Crown Prince declared he would not stoop to answer the attack. He dwelt at length on matters not brought up in the newspaper story.

DEALERS TOLD TO ASK FOR FREE SPACE

Arrange for Publicity As Part of Con tract, Advises Advertising Agency, Representing National Steel Fabrics Company, Subsidiary of U. S. Steel

Dealers are told to ask their loca newspapers for free space by the Bisse and Land Advertising Agency, Pittsburgh in connection with the account of th National Steel Fabrics Company, sub sidiary of the United States Steel Cor poration.

The agency furnishes the dealers wit nine illustrated "news stories" in ma form. In explanation, it is stated:

"When properly written, newspapers ar more than anxious to get articles of thi nature, which they will set up and ru as articles by their staff men or by thei editors.

"As a part of the contract with you local newspaper, there should be arrange the insertion of the nine reading notice reproduced above. These will appea every fourth day for a period of 36 days.

Paid advertising, the dealers are in formed, is to appear in a large weekl magazine and in 12 or 15 technica publications.

Ministers to Write Editorials

The *Parsons* (Kan.) *Daily Sun* wil use editorials written by the ministers o Parsons for ten days beginning Nov. 2 Arthur D. Marlin, editor and publisher announced.

Tabloid Fiction Section Dropped

The *Milwaukee Journal* on Sunday Oct. 18, discontinued its tabloid fictio section, the features being placed in th General Feature Section.

KALAMAZOO GAZETTE NEW BUILDING HAS STRIKING DECORATIONS

Symbolic Statues and Plaques Adorn Exterior Walls—Walnut Panels and Scroll Carving Embellish Interior of Model Plant

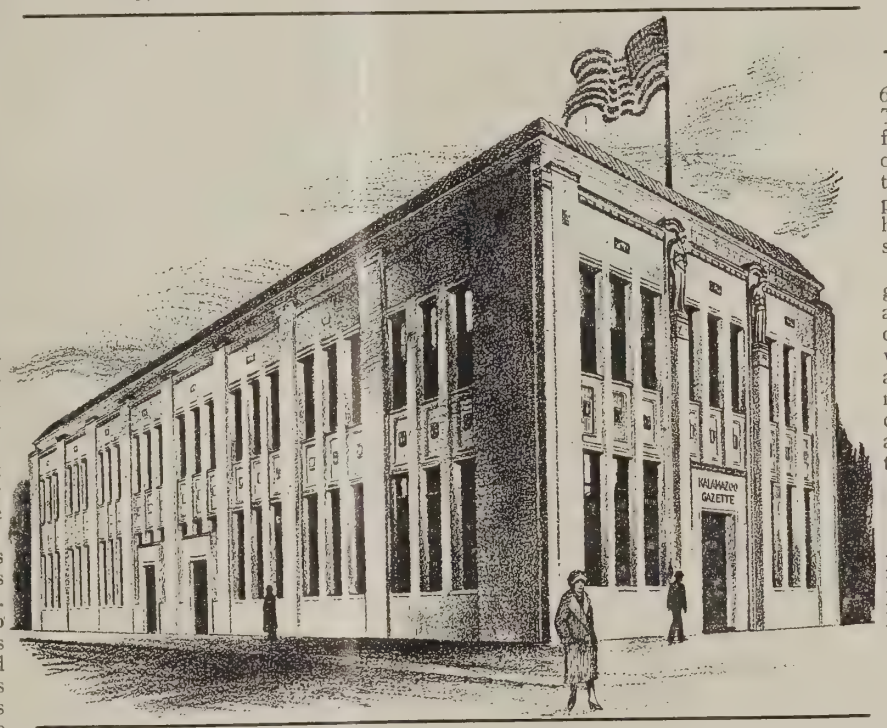
OPEN house was held in the new home of the *Kalamazoo Gazette* Oct. 20. Readers of the oldest newspaper in Michigan—it was established in 1833—were invited through the columns of a "progress edition" to inspect the plant and meet the executives of the newspaper and of the Booth Publishing Company, among whom were George G. Booth, Ralph H. Booth, Charles M. Greenway and Clarence H. Booth of Detroit, and Hon. Thomas J. O'Brien and Edmund W. Booth of Grand Rapids.

E. R. Chapman

J. K. Walsh

The new building is constructed of white stone and is 159 feet long, 55 feet wide and 41 feet high, with a one-story wing in the rear for paper storage. The effect of the building's length is modulated by a counter-impression of perpendicular lines produced by the close alignment of upright stone work. Flat engaged columns of modified Doric style rise to the roof without any suggestion of cornice. At the front of the building are two slender engaged pillars flanking the main entrance and topped by the figures of two women in classic robes, symbolic of journalism. Other decorations in the form of plaques of symbolic intent mark the exterior walls, in a manner somewhat similar to that executed in the new *Milwaukee Journal* building.

The first public view of the interior is the chastely ornate lobby and business office, two views of which are reproduced. A wide passageway is formed by two long marble-covered counters and is floored by inlaid marble squares laid diagonally. Above the door appears hand-carved scroll work and the walls are panelled in walnut. Four square pillars rise from the tops of the counters to a ceiling of ivory and old ivory divided by beams of polychrome plaster into nine rectangular units.



To the right of the entrance are the circulation and classified advertising departments and the business office, whilewhich is across the hall from the editorial department, is the arrangement of the Linotypes, which run in column near the large wide windows instead of the usual line formation. The maximum of light is thus available for each machine. Stereotyping operations occur at the rear of the composing room and plates go to the press room by the usual chute.

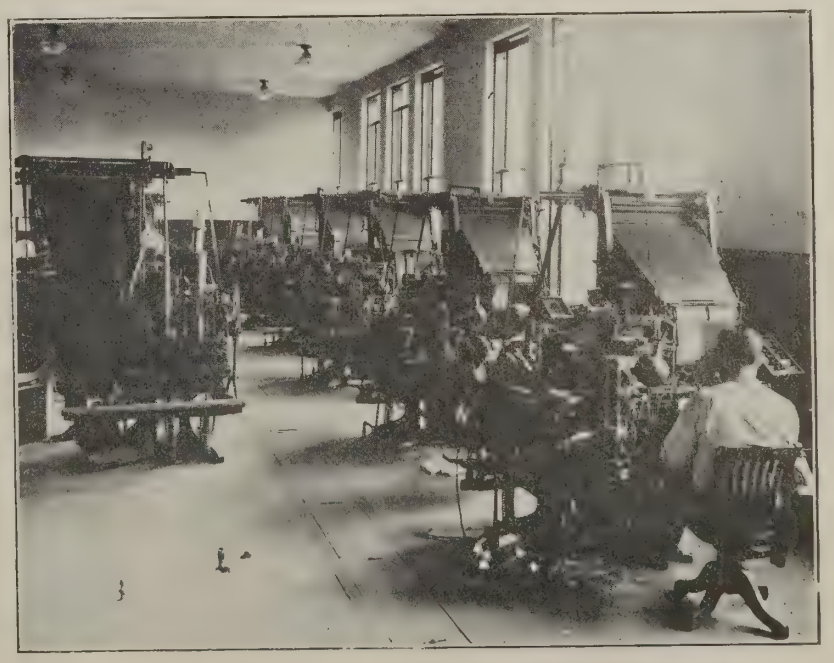
Noteworthy in the composing room, the other counter marks the advertising department. In the rear behind high walnut partitions, is the office of the general manager, E. R. Chapman. Facing this office is the cashier's cage. Wrought iron chandeliers and a clock set against a scroll work of walnut complete the decorative effect. A mezzanine floor houses the telephone board.

Editorial activities occupy half of the second floor. The deep main news room is paneled like the business office in 5-ply walnut, which reaches three-fourths of the way to a lofty ceiling done in cream-white ornamental plaster. Two of the walls are given almost entirely to windows, of which the room has 15. The horseshoe copy desk at one end of the room is unusual in that it is fitted with disappearing typewriter carriages. The office of J. K. Walsh, editor-in-chief, opens off the news room. Adjoining the editor's office and also opening on the newsroom is the library, which in turn opens upon the assembly or conference room. This room is available not only for staff meetings, but for public assembly. The cut library adjoins the news room on the opposite side from the rooms mentioned.

Marble floor and marble top counters decorate the lobby and publication office (above). The architect's drawing of the exterior (left) shows the symbolic statues and plaques.

The pressroom is equipped with a Scott 6-unit press with Cutler-Hammer control. The press is mounted not on the building foundations, but upon a steel framework of its own. Marked freedom from vibration is thus attained. Conveyors take the papers to the L-shaped mailroom which has entrances on two streets and a special section devoted to news-boys.

The new building section of the "progress edition" gave the public complete and detailed information about all present operations of the Gazette and the channels which connect it with news events and advertising currents. Historical data furnished are interesting, being chiefly concerned with early Michigan journalism and the pioneer editors and publishers of the Gazette.



Plan Memorial Supper in New York

Members of the Newspaper Club of New York will hold a memorial supper Nov. 8, the 200th anniversary of the founding of New York's first newspaper, the *Gazette*, by William Bradford.

Danville (Va.) News Suspends

The *Danville* (Va.) *News*, afternoon paper served by the United Press suspended publication Oct. 28. It announced it has been operated at a continual loss since the date of its initial appearance, June 11, 1923.

Model editorial room equipment of the Gazette is illustrated above. At the right is depicted the unusual arrangement of type-setting machines.

LIBRARY U. OF I. URBANA-

SIMMONS COMPANY SHOWS THE WAY TO MANUFACTURE ADVERTISERS

Newspaper Campaign in 94 Cities Filled Order Books Above 1920 High Peak—Firm Owes Trade 1,000 Cars of Merchandise—Record Business Through Advertising

By HAMMOND EDWARD FRANKLIN

"LAUNCHING a new line upon the public and trade is ticklish business," a veteran sales manager remarked the other day. "If the manufacturer does it half-heartedly, it succeeds only in a haphazard, unsatisfacttory fashion. Put it across with a punch, or don't try to do it at all."

Not every manufacturer can take this advice literally, for some have not the means or business genius to introduce a new line in a big, smashing way, and have to make a start in a smaller fashion.

The Simmons Company, with headquarters at Chicago and branches through the country, through advertising has become well known for its line of beds, mattresses and, more recently, furniture. The company has come to appreciate the almost infinite possibilities of profit through exceptional value at low, popular prices, à la Ford. It has introduced refinements, but kept the price down—depending on volume sales for its net.

This year the company had a new line which it believed of more than ordinary value to put across. The business outlook was studied and it was decided the time was ripe to do so, in advance of the customary fall flow of business.

The new line was featured to the trade in every way possible, and the salesmen went out after the business with definite value and advertising talking points. With a background of a certain amount of color magazine advertising, 94 cities strategically located were selected to carry intensive newspaper campaigns.

Newspaper executives helped by carrying news of the new line to the trade, publishing stories in sales aid newspapers, getting window displays and selling a substantial volume of tie-up space. The trade bought liberally as a result of coordinated effort.

A feature of the campaign has been the emphasis placed on retail resale prices. A pioneer advertising man has said the public wants to know what the advertiser has to offer, what it does, where it can be bought and what it costs. The Simmons advertising, through its concreteness, satisfies all these tests of good advertising.

On most furniture, markups vary so noticeably that the public seldom knows what it will be charged. This is because most of the manufacturers in the industry sell on an unbranded, unstandardized basis without advertising to the public. The Simmons Company is paving the way for many another new newspaper advertiser from this field by showing how to do the job.

The company maintains warehouse service in practically all parts of the country with large stocks from which the retailer can draw as needed on 24 hours' notice. He thus is able to carry a small, but representative showing of Simmons goods on the floor, and buy for his trade as necessary, which is in line with the present demand of retailers, many of whom continue to buy hand-to-mouth, although improvement is noted.

A few weeks ago, Z. G. Simmons, president of the Simmons Company, wrote to Charles Daniel Frey, of Chicago, whose agency directed the advertising:

"I am sure you will be greatly interested in knowing the actual results of the campaign of advertising you are handling for this company.

"Our unfilled order book is now at the high point since 1920, and not one dollar of orders is speculative.

"The week ending Aug. 31, our increasing business exceeded our shipments by $250,000, notwithstanding the fact that we delivered to the trade our largest week's delivery this year. The corresponding week last year on smaller delivery to the trade, our unfilled order book decreased $75,000.

"At this writing, we owe our trade 1,000 cars of merchandise and our incoming business equals our daily production. We are adding help everywhere and many of our departments are being put on double time. I never knew the business outlook to be so good as at this writing. Everything points to a record year in 1926. Will be glad to keep you posted as we go along.

Simmons' large size copy aiding local dealers and stressing "sleep luxury."

"The last quarter this year is insured by our unfilled order book to be the largest quarter by long odds in our history. I attribute no small amount of the success of this to the advertising campaign."

Mr. Simmons might well have added that a good share of the successful working out of the campaign can be traced to the intensive form of newspaper publicity used and its intensive merchandising to a goodly portion of the trading population of the country.

The Heywood-Wakefield Company is another large furniture manufacturer who has recognized the value of intensive newspaper advertising. For several years now, the company has used contracts in a large list of newspapers to show its baby carriages with the slogan: "A quality seal on every wheel." For every dollar spent by the company, the dealers have spent a liberal amount in tie-up space. A window display contest each year has produced many hundred displays.

Tie-up advertising has become a valuable by-source of revenue to the newspaper. One paper which circulates in five states makes a steady practice of going after and getting a large amount of space not only from local dealers, but from those some miles away. It puts one or more solicitors at a telephone and has them call dealers several hundred miles away in some cases, tells them about the campaign and tries to get their authority for a small tie-up advertisement. This boosts the paper's lineage very materially and pleases the national advertiser immensely.

Leading national advertisers and agencies subscribe to clipping services which enable them to check up on just how far dealers are tieing up with the campaign. One baby carriage manufacturer makes it a practice to write every dealer who features baby carriages alone without mentioning a brand, offering mats and showing the value of associating his store with a well known make.

A plan which has been used with some degree of success by one agency is to offer the newspaper a generous size contract, with the national advertiser buying a good part of the page, providing the paper will sell the rest of it to local dealers. The American Radiator Company applied it several years ago in their drive. Atwater-Kent Radio is using it now, with a mat of a large receiving station nearly a full page deep, the company copy at the top and spaces below to sell locally.

The furniture field continues catering to jobbers and dealers without identifying the merchandise, controlling its price by legitimate methods or creating a larger market for furniture. It is in sad contrast with the automobile field of aggressive advertisers.

But there is hope. Simmons points the way.

JOHNSON APPOINTS COMMITTEES

S. N. P. A. President Names Press Foundation and Office Affairs Groups

President Walter Johnson of the Southern Newspaper Publishers' Associtaion has appointed a committee representing the S. N. P. A., to investigate the establishment of a National Home and Press Foundation in Florida. It is composed of George Stephens, *Asheville* (N. C.) *Citizen,* chairman; George E. Hosmer, *Ft. Myers,* (Fla.) *Press;* Harry Brown, *Lakeland* (Fla.) *State-Telegram.* The committee will report at the next convention of the association.

President Johnson has announced the following members of the Business Office Affairs Committee, of which John A. Park of the *Raleigh* (N. C.) *Times* is chairman:

Alabama, Harry M. Ayers, *Anniston Star;* Arkansas, K. A. Engel, *Little Rock Democrat;* Florida, David B. Lindsay, *St. Petersburg Times;* Georgia, J. A. Davis, *Albany Herald;* Kentucky, E. J. Paxton, *Paducah Sun;* Louisiana, C. P. Manship, *Baton Rouge State Times;* Mississippi, W. G. Johnson, *Jackson News;* North Carolina, Rufus Shore, *Winston-Salem Sentinel;* Oklahoma, C. A. Looney, *Muskogee Times-Democrat;* South Carolina, W. B. Swindell, *Greenville Piedmont;* Tennessee, Fred T. Bonham, *Knoxville Journal;* Texas, Lowry Martin, *Corsicana Sun;* Virginia, C. P. Hasbrook, *Richmond Times-Dispatch;* and West Virginia, R. L. Smith, *Charleston Gazette.*

Curtis Helping Young School Boys

Cyrus H. Curtis, through the Curtis Publishing Company of Philadelphia, has offered $250,000 to be loaned to boys who desire to attend college. To any boy who qualifies under the College Loan Plan, the Curtis Publishing Company will lend amounts up to $1,500. Security will be the boy's character as developed in his home, in his school and in his work delivering the Curtis publications.

A 308-PAGE EDITION

Terre Haute Tribune Celebrates 50th Year with Mammoth Issue

The *Terre Haute Tribune* last Sunday presented the city with an edition weighing five pounds, composed of 308 pages and carrying 378,728 lines of advertising. It was the Tribune's 50th anniversary edition, also a "pictorial booster" number for Terre Haute, and was the first issue off the Tribune's new Hoe octuple press. The edition was produced in four 64-page sections, one 48-page section, and a 4-page comic.

Delivery was made on time Sunday morning, with practically no complaints, by a novel distribution scheme. Each section as it was printed was sent to the homes of carriers, who stuffed the papers themselves. When the last section was printed Sunday morning, each carrier was furnished with an automobile by which the regular routes were covered. Twelve thousand extra copies were printed, the office was kept open Sunday until all were sold. Copies have been sent to advertising space-buyers and to fraternal homes in the larger cities.

All advertising was sold and practically all written by the regular staff and the only extras employed on the edition were a few relief pressmen. Complete new mechanical equipment has been installed in the pressroom, including Cutler-Hammer control, Hoe plate finisher and new stereotyping machinery. The composing room has also been remodelled during the past year.

Reporter's Assailant Acquitted

Terry Druggan, on trial in Judge Marcus A. Kavanaugh's court charged with mayhem for slugging John F. Lovering, reporter for the *Chicago Journal,* was found not guilty Oct. 27. The jury held that the mayhem charge, which carried a penalty of from one to 20 years, was not justified in the light of Lovering's injuries.

NEW YORK CITY AND STATE GROUPS URGED TO CO-OPERATE BY FRIENDLY

Business Manager of New York Sun Suggests New Association to Merge Interests of Present Bodies Addressing Syracuse Meeting

SYRACUSE was the scene Oct. 30 and 31, of the annual meeting of the New York State Publishers' Association.

The annual dinner was held Oct. 30, with Edwin S. Friendly, business manager of the *New York Sun*, and James W. Brown, publisher of EDITOR & PUBLISHER, the chief speakers.

Mr. Friendly urged co-operation between New York City and state publishers, suggesting a third association be formed to merge the interests of the New York City publishers and the New York State publishers. "By effective co-operation between the New York City publishers and the New York State publishers, most effective legislation will result, which, if conducted by either association separately, would be unsuccessful," he said.

"The mutual interests of all New York publishers in the Associated Press and other news gathering organizations should be a matter of conference and agreement. All legislation affecting newspapers or other interests should be considered and as far as possible agreed upon in order that mutual interests of upstate publishers and New York City publishers should be best served. Special attention to an agreement of attitude should be established on all labor matters affecting either or both upstate publishers and New York City publishers. Transcripts of all proposed contracts should be submitted by upstate publishers to New York City publishers, and vice versa, before negotiations are begun with the unions, and information regarding any unusual developments during negotiations should be communicated.

"In order to achieve the greatest efficiency in the accomplishment of the above results, while there should be a New York City Publishers' Association and a New York State Publishers' Association, there should be a third association merging the interests of the two which should meet not less often than once in six months for the consideration of questions mutually important and for the preparation for any prospective emergencies.

"A question which such a combined organization ought at the present time to be considering is a formulation of some plan which will make more effective and valuable the school at Ithaca, particularly the photo-engraving school which has just been established. Unless some well thought out plan makes it certain that the graduates of the photo-engraving school are retained in or about New York, the union may send the graduates to widely scattered places so that we will get little benefit from the operation of the school."

Mr. Friendly continued:

"It seems to me there is no more important thing to a newspaper than the publisher's responsibility to his readers. Nothing has a more direct bearing on the business office than the publisher who is honest, sincere, straightforward and whose staff follows his ideals in making his newspaper. The paper, of course, must have accuracy, truthfulness and avoidance of exaggerated presentation of news. A newspaper so constructed gathers unto itself reliable, substantial, prosperous readers who in turn make for a productive circulation. This kind of circulation is invaluable to the advertising department, as it constitutes the kind of people most advertisers are trying to reach.

"Newspaper circulations cannot be measured with a yardstick. Fifty thousand readers of the kind of newspaper I have just described are worth far more in advertising rate per line per thousand than 50,000 readers of a newspaper that is careless in its presentation of news and advertising.

"No newspaper can be successfully run without money. Most of a paper's income comes from advertising. Advertising must be profitable, or it will cease. The most profitable advertising is truthful. Unless truthful it cannot live. And by profitable I mean profitable to the advertiser.

"The free publicity evil is constantly growing, and should be very carefully guarded against by publishers. However, I don't believe that a newspaper should refuse to print a story if it has news value just because it contains the name of an advertiser; neither should it eliminate the advertiser's name, as, if the article has news value, it destroys the value of the story to eliminate the name.

"Many newspapers do not pay enough attention to their own publicity, to the advertising of themselves in their own newspaper and in other newspapers and trade papers. Newspaper publishers cannot give too much attention to their own announcements.

"Frank Munsey, owner of the Sun, gives an unusual amount of time to the text and typography of every important message of his newspaper. Men like Franklin Simon of Franklin Simon & Co. and Jesse I. Straus of R. H. Macy & Co. are equally particular.

"To sum it all up, if a newspaper can make its staff have an ownership interest in the newspaper the property will have a good chance of being successful. Too few men in the average newspaper staff get the angle of the owner of the property to realize what his ambitions are. If newspaper men will conduct themselves in their daily work as though they were part owner of the property and represent the newspaper in that spirit the accomplishment will be very great."

JAMES KERNEY HONORED

Trenton Times Editor Awarded Honorary M. A. by Lafayette College

James Kerney, editor of the *Trenton* (N. J.) *Times*, was awarded the honorary degree of Master of Arts by Lafayette College, Easton, Pa., at the annual Founders' Day exercises, Oct. 21.

In presenting him for his degree, Judge E. J. Fox, of the Lafayette Board of Trustees, said: "In recognition of his public service abroad during the war, and of his services as a leader in Trenton, I wish to present Mr. James Kerney for the honorary degree of master of arts."

MISSOURI A. P. GROUP MEETS

Pass Resolution Commending Kent Cooper—Jeffries Re-elected President

ST. LOUIS, Oct. 26.—Missouri members of the Associated Press discussed plans for expansion and improvement of its service in the state and adopted a resolution commending the work of Kent Cooper, recently appointed general manager, at a meeting at Hotel Jefferson, Friday, Oct. 23.

It was announced by Edgar T. Cutter, of Chicago, central division superintendent, that a new bureau would be established soon at Columbia, Mo., and effective Nov. 2, the Missouri day and night wire relays would be transferred from Kansas City to St. Louis.

The following officers were elected: president, J. B. Jeffries, publisher, *Hannibal Courier-Post*, re-elected; vice-president, George H. Longan, news editor, *Kansas City Star;* secretary, Kenneth Clark, St. Louis correspondent; member central division Advisory Board, W. C. Van Cleve, publisher, Moberly *Monitor-Index*.

Clothing is second only to food as a Barometer of Business

The first material need of all people all the time is food—the second, apparel. Food is bought primarily to sustain life—secondarily, to please the sense of taste. Clothing, primarily to protect the body from exposure—secondarily, to please the aesthetic sense.

In Cincinnati it is impossible to draw a line between the primary and the secondary buying motive. The standard of living averages so high that palatability, attractiveness and convenience are demanded of a grocery product as insistently as nourishment. Every man, every woman and every school child in Cincinnati insists upon wearing clothing that looks well and fits well and wears well.

Hence there is no better gauge by which to measure the buying power of this city than that furnished by the retailers of groceries and by the merchants who deal in suits and cloaks, underwear, hosiery, boots and shoes, hats, caps and millinery, furnishing goods and apparel for men, women and children.

In an earlier advertisement we have told you that the Cincinnati Times-Star is the second six-day newspaper in the United States in the amount of food advertising carried.

For almost eighteen consecutive years the Times-Star has been, as it now is, the leading medium of the Cincinnati trading area for the advertising of apparel.

This indicates that the merchants who deal in wearing apparel find their most responsive audience among the readers of this newspaper. The fact that a merchant does advertise these things in the Times-Star is presumptive evidence that his merchandise is good, honest value at its price, whether the price be high or low. If it were otherwise he could not afford to advertise in the Times-Star. If his merchandise is good, honest value, he cannot afford not to do so.

The same reasons that make it safe for you to buy the groceries and articles of apparel that you see advertised in the Times-Star also make it safe for you to buy a home, an automobile, a piano, a suite of furniture, a set of tires or a radio from a Times-Star advertiser.

JOURNALISM TEACHING GAINS IN IMPORTANCE

Nearly 70 Colleges Now Providing Instruction in Newspaper Work—Student Dailies Contribute Laboratory Experience—How the Daily Iowan Is Conducted

TEACHING of journalism is assuming more importance than ever before in the educational system of the nation.

As the fall term gets under way, thousands of would-be newspaper men and women are enrolled in nearly 70 colleges and universities in courses and special departments devoted to instruction in newspaper making.

W. S. Maulsby

Scarcely a state in the Union is now without an available center to which native students may turn for apprentice instruction in such departments or courses.

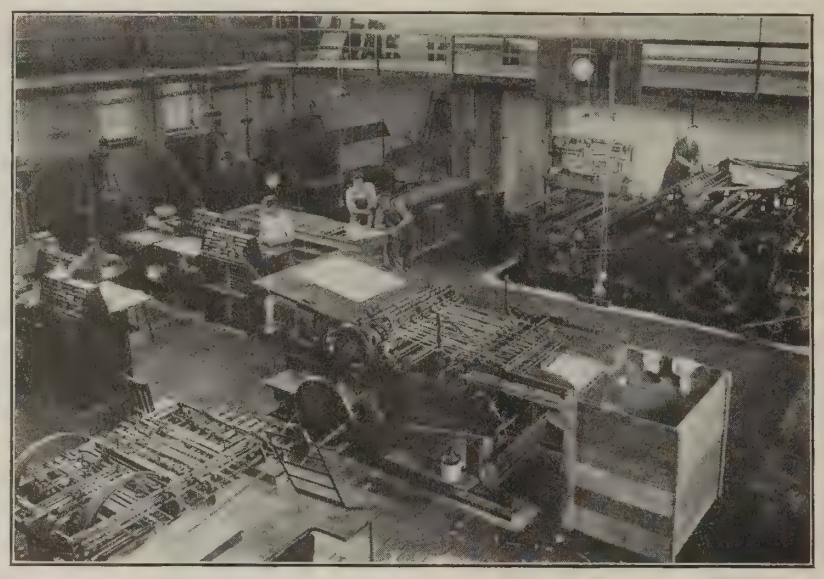
Universities in two states, hitherto unrepresented, have this year created chairs of journalism—Rutgers University, New Brunswick, N. J., and the University of Florida, Gainesville, Fla.

A new journalism department was founded this fall at Kansas State Teachers' College, Hays, Kan. Previously journalism work was offered as part of the English curriculum.

This same step will be taken by Stanford University in California, which opened a journalism department, Oct. 1, under the direction of Dean E. W. Smith, replacing a course formerly a division of the department of English.

Prof. Henry E. Birdson of Butler College, Indianapolis, has also enlarged his course to the status of a department. Students there for the first time in 40 years are editing a daily newspaper, the *Butler Collegian.*

Boston University starts its first year offering journalism as a four-year degree course. This is the first and only journalism course in New England, granting successful students a degree of Bachelor of Journalism. Prof. Harry B. Center, formerly with the *Boston Post,* is responsible for this innovation.



Outstanding as developments in journalistic education are the tendencies towards a more rounded course of instruction than afforded several years ago, and an increase in facilities for practical experimentation in the business students have chosen for their careers.

The theory at present almost universally stressed is that journalism graduates should know economics, politics, sociology, ology, history, literature, and science, in addition to the technical subjects required.

A distinct advance, journalistic educators point out, has also been made in the laboratory training in newspaper work now available in conjunction with most courses of theoretical instruction. While the majority of schools maintain a close alliance with local and nearby newspapers to accomplish this, many of the larger universities support student daily newspapers, which form an important part of the curriculum.

The University of Southern California is said to be among the first institutions in the country with a journalism department to establish the policy of practical training trips for students. During the past five years, more than 20 southern California daily newspapers have been completely edited and put to press by students under the direction of Prof. Marc N. Goodnow, director of the course. This program was made possible through the co-operation of the Southern California Editorial Association, of which Ben H. Read is manager.

Typical of the college daily as laboratory is the *Daily Iowan,* student newspaper of the University of Iowa school of journalism, which serves the dual purpose of a city and college daily. From the click of its Associated Press leased wire in the news department to the clatter of its linotypes in the composing room, the Daily Iowan is a representative newspaper plant, and also it is distinctly a student enterprise, directed financially, editorially, and for the greater part of its operation, mechanically by students.

The composing room of the *Daily Iowan,* University of Iowa daily, which carries the Associated Press report. The paper owns its mechanical equipment valued at $43,000 and did an $82,000 gross business last year.

Managing editor of the Iowan is Philip Adler, son of E. P. Adler, president of the Lee Syndicate of Newspapers.

The first and second floors of the Journalism building, a block from the gates of the University, are devoted to a publishing plant. The central news room into which the reports of city, University, and world hapenings are brought day by day occupies the second floor. Four division editors are grouped about the general copy desk in the outer office, each desk editor being in charge of a page of campus local, women's, and sports news. The preparation of each day's copy and the arrangement of the first page is done by the night editor, who sits in the slot of the semi-circular desk and is in charge of the paper for one issue.

Philip Adler

Beyond is the editorial department with the office of the editor.

The composing room which occupies half of the first floor represents $43,000 of equipment and prints not alone the Daily Iowan, but five other campus periodicals as well. The day mechanical force, printers, operators, stereotyper, and pressmen are full-time workmen. A student force supplements the day personnel of the shop at night. The shop includes three linotypes, a model E Duplex press, Miehle and Gordon job presses, cutter, stitcher, rotary saw and router, steel furniture and makeup banks.

Connecting the shop and editorial rooms is the business department, in charge of a company manager and business manager.

The Daily Iowan is controlled by Student Publications Incorporated, administered by a board of trustees composed of five student and four faculty members. Each spring the board elects the heads of the six publications which it directs. An aggregate of $82,000 gross business was transacted last year.

An Untapped Supply of Type on Slugs

THERE is a flexibility about the Ludlow system of composition that appeals to the newspaper plant regardless of size. Under the ordinary pressure of display composition it hums along at its task, but it is the exceptional job—the big special issue, loaded with big and little display lines—that really proves the capacity of the Ludlow.

Every Ludlow, literally, represents an untapped supply of type on slugs—it stands, always ready, at a touch to produce as much display composition as is desired in an unvarying excellency of quality. Just keep the metal pot full and the composition will be up in record time.

But the real value of the Ludlow is in its day-to-day capacity to produce beautiful display lines that liven up the paper and make the advertisements more attractive and readable.

Examine any paper—if the type is new and clear without broken or worn letters—if the italic is full-flowing, close-fitting and free from broken kerns—if the whole paper is livened by attractive display in the most popular faces—that paper is almost invariably Ludlow equipped.

LUDLOW QUALITY COMPOSITION

How Advertising Dollars Were Divided The First Nine Months

There is no proof of an advertiser's preference as strong as his CHECK BOOK. Figuring the linage of the three Birmingham papers for the first nine months, at the national rate, the advertiser's check book speaks in no uncertain terms, an overwhelmingly strong endorsement for The News. This preference is based, not on newspaper claims or theories, but on actual results, covering a long period of years. With apologies to Chesterfield—"SUCH POPULARITY MUST BE DESERVED."

Out of Every $3.00 Spent

$2.15 Goes Into The News

NOW FOR LINAGE FOR THE FIRST NINE MONTHS

Combine the totals of the second and third papers, then add 27% to get the enormous linage carried by The News. Three words fully explain this tremendous leadership. "RESULTS ALONE, COUNT."

LATEST INSURANCE ADVERTISING TREND

E. A. Collins, Conference President, Sums Up Situation, Pointing to Scepticism Among Magazine Advertisers as to Results and Leaning Toward Use of Newspaper Space

"SCEPTICISM prevails among insurance firms now using magazine advertising pages. Many are doubtful they are obtaining the proper measure of results."

And Edward A. Collins, secretary of the National Surety Company, who, as president of the Insurance Advertising Conference, made this disclosure this week to EDITOR & PUBLISHER, declared the trend was definitely toward the use of newspaper space.

Without mentioning firm names for publication, or quoting individuals, Mr. Collins left no misunderstanding in this interviewer's mind as to the impression

Copy showing how newspapers are being used by insurance firms

he wished to give. It was that he was in close touch with insurance advertising executives, and that among those steering appropriations towards the so-called national media there was decided doubt as to the power of magazine pages either to spur insurance dealers to action or create actual sales.

"The trend among insurance companies in the United States and Canada is definitely toward newspaper advertising," Mr. Collins said.

"I do not look immediately for insurance home offices to create special appropriations for general newspaper advertising. That is still considered too expensive.

"But more and more will be done by progressive companies towards assisting agents in placing copy in their local newspapers. Advertising copy, as in some cases now, will be furnished them, and arrangements made to help them finance local advertising investments.

"Already some companies are assisting their agents by offering larger commissions, with the view that a percentage of each commission should go to building up future business by advertising. Others are agreeing to pay 50 per cent of the newspaper advertising cost.

"After all, insurance advertising is yet in the experimental stage. The great awakening is still around the corner.

"There are about 500,000 people selling insurance of one sort or another in this country today. Each one of the half million is a potential newspaper advertiser in varying degree.

"These agents, however, are apathetic. Today of the half-million there are not 25,000 who conduct their businesses like modern business men. The majority of insurance agents are not progressive, and, in consequence, they do not improve as other lines do.

"In this, of course, there are notable exceptions. One, particularly, is, I believe, worthy of mention.

"During the past few years, Roswell Phillips, an insurance agent of Scranton, Pa., has built up a $100,000 insurance business. Phillips left the advertising department of a newspaper to sell insurance. The first thing he did was to sign a contract for regular advertising in the local newspaper.

"He didn't submit tombstone copy either. His advertising was personalized. It consisted of a picture of himself and his address, with space in which each day he placed some interesting fact, theory, or item, regarding insurance.

"As an example, when Mr. or Mrs. Jones had a baby, Mr. Phillips would clip the item from among the briefs, caption it 'Congratulations,' and underneath it tell how many parents are preparing for the future of their children by endowment insurance policies. Each day it was different. Most frequently his text was based on some local event."

In more general terms, the present advertising situation, as summed up by Mr. Collins follows:

Of about 600 insurance, assurance, surety, fire and casualty companies in the United States and Canada, only about 200 are in any sense of the word alive to the possibilities of advertising. While virtually all of them have advertising appropriations, the bulk of money goes into booklets, calendars, blotters, copy in the trade press, etc.

Those who have become general advertisers may be numbered on the fingers. Chiefly they include: the Metropolitan Life Insurance Company; the Hartford Fire Insurance Company; the Aetna Life Insurance Company; Phoenix Mutual Life Insurance Company; Home Insurance Company; and the Insurance Company of North America.

An index of the kind of advertising these firms are doing may be found in winners of what is called the Holcombe trophy, offered each year to the member of the Insurance Advertising Conference, who over a period of 18 months, has accomplished the most outstanding advertising achievement in the advertising business. This trophy, a silver cup, was first offered two years ago by John M. Holcombe, who was then president, and is now chairman of the board of directors of the Phoenix Mutual Life Insurance Company. Last year it was won by the Metropolitan Life Insurance Company.

This week the Holcombe trophy went to the Hartford Fire Insurance Company, of which John W. Longnecker is advertising manager. C. King Woodbridge, president of the Associated Advertising Clubs of the World, was chairman of the jury of award.

The writer was given an opportunity to look over the "advertisement achievement" judged the most outstanding by the Insurance Advertising Conference. In book form under the title "The Helping Hand of Insurance," specimens of copy placed, and statements on results obtained are gathered for inspection of the judges.

The company paid for advertising copy placed in two general magazines, the *Saturday Evening Post* and the *Literary Digest*. The account was and is still being handled by Calkins and Holden, Inc., New York agency.

Keynote of the copy in every case was a witchlike figure picturizing fire. In a statement outlining the purpose behind the magazine drive, it was stated that the advertiser sought to "convict" the general public, for the "appalling waste" caused by fire.

This magazine copy, the cost of which

Wilke's METALS
THE HIGHEST STANDARD

These Things We Know:

How "Wilke's" Type Metals *Are Made*—

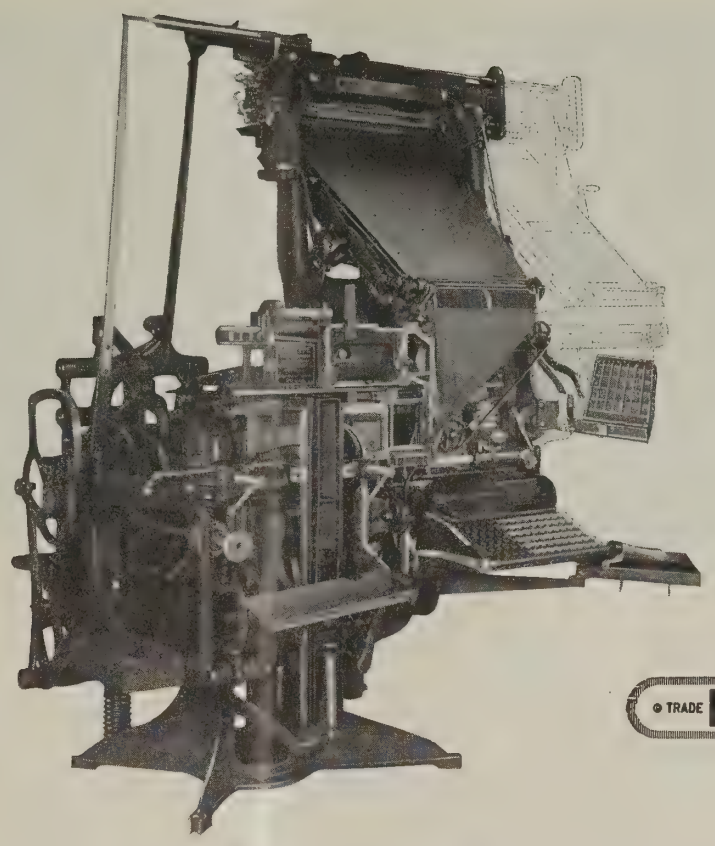
We know they are alloyed from the purest ingredients, under the supervision of expert chemists and metallurgists, in a thoroughly modern plant. We make it our business to manufacture "Wilke's" Type Metals up to the very highest standards of purity and uniformity—standards which we created.

What "Wilke's" Type Metals *Will Do*—

We know that users of "Wilke's" Type Metals continue to give us their business because they get the results they seek—clear, sharp and solid type, slugs and plates. Often where other metals have failed to give satisfaction.

That You Will Be Pleased *With Results*—

We know that the list of newspapers finding it to their advantage to use "Wilke's" Type Metals in Composing Rooms and Stereotyping Departments is constantly growing—and that you too will be pleased with results in your own plant.



"Wilke's" Type Metal Insurance Plan is your assurance that your metal supply will always be in perfect condition. Complete details on request.

NEW WEEK-DAY RECORD

St. Louis Post-Dispatch Prints 76-Page Regular Edition

With 76 pages containing 488 columns of paid advertising, the *St. Louis Post-Dispatch* of Friday, Oct. 23, established a record for a regular week-day issue of any metropolitan newspaper. The *Washington Herald* published 70 pages, with 439 columns of advertising on Dec. 14, 1923.

The *Miami Herald* was the only one other newspaper to equal the Post-Dispatch achievement, for which Florida real estate advertising was responsible.

Of the Post-Dispatch advertising, 422 columns were local, the remaining 66 columns being national and classified. Famous & Barr Company, a department store, used 15 solid pages and most of another page to advertise St. Louis Day, Saturday. This is believed to be the largest volume of advertising ever used by one store in one paper and for one day's selling. This store used a total of nearly 24 pages in St. Louis newspapers for this one-day event.

Stix, Baer & Fuller Company used seven pages in the same issue to advertise Opportunity Day. A total of more than 12 pages was devoted to this store's one-day selling.

Famous & Barr Company's tremendous volume broke the record established a week previously by Nugent's, which used 11 pages in the Post-Dispatch. A total of 18 pages was used in the St. Louis newspapers for this event.

Still another St. Louis advertising record was broken in this week. Scruggs, Vandervoort & Barney Dry Goods Company used eight pages each in the *Globe-Democrat* and *Post-Dispatch* on Sunday, Oct. 18.

Milwaukee Journal's Record Edition

The *Milwaukee Journal* on Oct. 16, printed its record week-day newspaper, 64 pages exclusive of a two page green section. The former high record was 58 pages established Dec. 12, 1924. The recent issue carried 123,492 lines of advertising.

OAKLAND EXAMINER DROPPED

Morning Times Succeeds It As Circulation Ally of S. F. Examiner

The *Oakland* (Cal.) *Morning Times,* which has been kept alive for a number of years by the daily publication of a limited edition from the plant of the *Oakland Post-Enquirer,* has been enlarged in form and will hereafter be circulated with the *San Francisco Examiner,* taking the place of the *Oakland Examiner,* which has been issued as an Eastbay edition of the San Francisco newspaper.

The discontinuance of the Oakland Examiner was caused by a ruling of the Associated Press which holds that the use in the title or head of a member newspaper of the name of any city other than that in which the paper is actually published is in violation of the by-laws of the association.

LAUNCHING SUNDAY EDITION

Lakeland (Fla.) Ledger to Start With 200-Page Issue Nov. 1

The *Lakeland* (Fla.) *Ledger* will print its first Sunday edition on Nov. 1. It will contain more than 200 pages, including an eight page magazine section, four pages of colored comics and other features, according to Earl Mullen, manager.

The Ledger has just completed the installation of a new high speed Goss 24-page press, has added several new linotype machines to its equipment and beginning Nov. 2 will be one of the first papers in a city the size of Lakeland with two full leased wire services, Mr. Mullen stated. At this time full leased wires service of the Associated Press and International News Service will start.

NEWSPAPER MAKERS AT WORK

"Sell your paper"—John Cowles

THERE is no royal road to circulation dominance or any mysterious way in which big circulation gains can be made over night in the opinion of John Cowles, associate publisher of the *Des Moines Register and Tribune-News.*

A good product aggressively merchandised over a long period of time is the only way a sound circulation structure can be developed, he declared in an interview for EDITOR & PUBLISHER this week.

"Next to the managing editor's job that of the directing head of the circulation department is about the most important position on a newspaper," Mr. Cowles stated.

"On many papers too large a part of the effort is put into making the paper and too little into selling it."

When asked what he regarded as the most aggressive newspaper in the country in a circulation way, Mr. Cowles replied "the *Chicago Tribune.*"

"If the Chicago Tribune were published in New York instead of in Chicago and pushed as hard in a circulation way as it now is, I shouldn't be surprised if it would have twice as much circulation as any of the standard size New York papers now have," he added.

The Des Moines Register and Tribune-News, of which Mr. Cowles is associate publisher, has 160,000 daily and 135,000 Sunday circulation, which is said to be the largest in the world in a city of 150,000. Its net circulation income is more than $1,000,000 a year.

Twenty-one years ago, Gardner Cowles, publisher of the paper, bought controlling interest in the Register when it had a circulation of 10,000. Sixteen years ago, the evening paper, the Tribune, was established. In 1924 the News, a Scripps-Howard paper, was purchased and consolidated with the Tribune as the Tribune-News.

John Cowles, son of the publisher joined the reportorial staff of the Register while a student at Harvard University. After being graduated from Harvard in 1921 where he served as editor of the *Harvard Crimson,* student daily, he joined the business staff of his father's dailies as associate publisher.

In 1924 young Cowles toured Europe, penetrating Russia to view at first hand conditions under the Soviet regime. He wrote a series of articles on Russia for the North American Newspaper Alliance, of which he is a director.

FLORIDA

Sunshine City's Largest Circulation

The DAILY NEWS, St. Petersburg's *Picture Paper,* has the largest circulation in the Sunshine City.

The DAILY NEWS was started on March sixteenth last. Its circulation is growing daily . . . On October tenth it reached fifteen thousand, without the aid of any circulation campaign.

It carries the flag of progressive newspaper achievement in Western Florida. *Everybody reads the NEWS.* Any bank reference.

SAMPLING ON BIG SCALE

Cleveland Times Covering Suburbs With 97,000 Extra Copies

An experiment in circulation promotion has been undertaken by the *Cleveland Times,* with the result that an edition of 130,000 copies is being published every Friday, the 97,000 excess over the current net paid circulation, based on the Oct. 1 statement, being placed directly into 97,000 homes in greater Cleveland, which includes Lakewood, East Cleveland, Cleveland Heights, Shaker Heights, Euclid Village and other suburbs separated from Cleveland proper only by streets.

In starting the edition, the publishers announced that the object was to acquaint all Cleveland with the Times and place it where it had not yet been seen.

THE MAN W

To The Publisher:

I have been asked by our President, as the one who is responsible for its manufacture and subsequent behavior, to put into letter form my opinion of the PONY AUTOPLATE MACHINE.

As a manufacturing proposition it is a simple, clean-cut, straightforward job. The parts are few, strong, and easily made; they go together without trouble and seldom have to be readjusted, even under the severe requirements of the testing stand.

As the machine is a unit and is powerfully built to withstand the punishment of hard daily work, we are enabled to box and ship it already set up, prepared for work, and nowhere has there been any difficulty on the part of a stereotyper in beginning promptly to make plates with it for his daily run. There is nothing for him to learn.

The fact that it clears a foundry of a lot of apparatus and makes space where there

wasn't any, and that it cuts actual tons of lifting out of the stereotyper's daily work, makes friends for it from the start. Outside of the foundry, the management likes its saving of time and the pressroom likes the better printing qualities of its plates.

So far as operating troubles are concerned, I can truthfully say that we haven't any; our Service Department keeps us clear of them. Besides, the periodic visit of our service man to every office that has an AUTOPLATE machine is an educational factor of great value. It brings to a foundry news of the latest wrinkles in stereotyping, it prevents the deterioration of a machine through lack of knowledge or neglect, and it makes every publisher feel that we stand forever behind our machine to insure its giving him to the fullest extent the service to which he is entitled.

HALF-RATE ADVERTISING

"ADVERTISING without publicity means that you are getting only half-value for your money."

This classic is from the hand of the press agent of the Moon Motor Car Co., of St. Louis, Mo.

It is contained in a note sent by that gentleman to Moon distributors and dealers, advising them that he is forwarding publicity direct to the dealers who should make a "personal" effort to get it printed in the newspapers in which they advertise.

If the press agent is right, and apparently many newspaper managements accept his view as they publish automobile publicity by the page, automobile advertising is sold on a half-rate basis, under-rating advertising purchased by large local dealers who exact no free linage.

Considering publishing costs, many newspapers are doubtless printing automobile advertising, plus free publicity, at actual loss. The sort of publicity that most of the automotive press agents dole out is usually utterly uninteresting and in our opinion merely clutters the space. Some of it is doubtful propaganda. For instance, the copy that went out to Moon dealers, with the half-rate suggestion quoted herein, was pure propaganda for repeal of the excise tax on automobiles.

All honor to skillful "New York World" correspondents who have repeatedly penetrated Mussolini's cowardly censorship, latterly revealing apparently genuine secret documents which connect the Dictator Premier with the Matteotti murder and as chief of an Italian Cheka.

MR. WALLACE'S LETTER

READERS of Editor & Publisher will learn with pleasure that the United States Fisheries Association has not been quick to accept the advertising plan which, as announced in these columns, called for paid space in magazines and free publicity in newspapers. Mr. Wallace's letter, appearing in another column of this issue, is appreciated and we are glad to set the matter right.

However the question may eventually be decided, it must be obvious to these business men that an advertising plan which proposes to pay its way in one section of the press and graft its way in another is unsound in principle and will not deliver satisfactory results from the neglected side.

Speaking of qualitative analysis of circulation: How much is it worth per thousand, to the ordinary channels of respectable trade, when gained through the publication of horse race dope?

A PRESS CURIOSITY

ONE of the curiosities of modern journalism is *The News,* published by the students of the three-year high school at Fountain Green, Ill.

The town is eight miles from a railroad. It has less than 100 families. There are only 36 students in the high school. The paper has contracts with more than 100 advertisers and Alleyne Barbe, its secretary, advises Editor & Publisher that "our paper has many hundreds of subscribers."

We have just read the Hallowe'en Number, in tabloid form with 16 handsomely printed pages and a bright yellow cover. It might have creditably been produced as a weekly in any fair sized city. The news is well written and displayed with taste and the advertisements are representative of business in the rich section in and surrounding Fountain Green. There are many one-inch cards for doctors, dentists, barbers, lawyers and merchants, and some fine display spaces for banks and experienced advertising retailers. We know of no newspaper published by a high school to compare with the News, and there are scores of pretentious publications that display no such spirited business enterprise or editorial skill. Watch for a crop of smart newspaper men and women from Fountain Green, Illinois.

The heart is deceitful above all things, and desperately wicked: who can know it?

I the Lord search the heart, I try the reins, even to give every man according to his ways, and according to the fruit of his doings.—Jeremiah, XVII; 9, 10.

ADVERTISING DEMOCRACY

HERE is some remarkable news from Harry H. Field, late of *London Daily Mail,* now travelling in the Far East: In the Japanese crusade for democracy the newspaper is playing an important role. On October 9 the Japanese press was given further recognition at a meeting in the Peers Club when thirty members of the Federation Demanding Reform in the House of Peers met to adopt a program for their campaign this winter.

The outstanding resolution passed at this important conclave and the one that is to be the corner-stone of their program calls for an advertising campaign in the newspapers throughout Japan to bring to the attention of the people the aims of this movement to reform the House of Peers.

It was determined to hold public meetings in all the large cities and to charge an entrance fee at each one. The money raised at these meetings will pay, in part, for the advertising, and it was also decided to raise a public subscription to further defray the costs of the newspaper campaign.

Baron Nakagawa, the leader of this movement, is reported to have said that the reform is not to be made an issue of party politics as it is simply a movement seeking to perfect the constitutionalism of the country.

"It is imperative," the Baron is reported to have continued, "that persons of nobility should realize the fact that the people have begun to attach less importance to titles of nobility. The public has become more and more rational and the intelligentsia have begun to voice their discontent against the special prerogative of nobles, which is not based on the welfare of the public."

Thus the Federation Demanding Reform in the House of Peers is raising money by public subscription and by public meetings to effect a constitutional amendment through the constitutional means of advertising in the columns of the Japanese press!

B—SARCASM, FISHBEIN

FOR centuries the medical profession has made a mystery of the business. The ancient medicine man was regarded by the tribe as a sort of divine magician. The typical modern medical man still surrounds himself with elements which lend themselves to mystery. The scheme of the profession has been to keep the public in ignorance of medical matters. Prescriptions are written in Latin. A physician's ethical code protects him in various ways from public intrusions. Physicians are notoriously backward press subjects. The medical assumption is and long has been that medical affairs are much too sacred for public discussion. There are, of course, some excellent reasons for the censorship.

Dr. Morris Fishbein, of the American Medical Society, continues to make sarcastic references to newspaper men who misuse medical terms. His latest criticism appears in *"American Speech,"* a magazine. He charges newspaper system with being faulty and lending to inaccuracy. He is constantly referring to the "queer triple play, leg-man to telephone to rewrite man."

Dr. Fishbein is ungenerous and does not take into account the fact that his profession is merely reaping the harvest of its own planting.

Brooklyn man, reported dead, for social and business reasons advertises: "I'm alive." We'll say he is.

NOW, WE FEEL BETTER

TWENTY years ago, one beautiful Spring morning, an excursion boat, which was crowded with boys and girls from a New York German-American Sunday school, out for a day's excursion and picnic, took fire while going through Hell Gate in the East River.

Alarms were sounded and the present writer, who chanced to be calling at the north end of Manhattan Island, was the third reporter to arrive at the scene of the disaster. From the pier we saw in the distance the General Slocum wrapped in flames, a ghostly spectacle. A fire tug was just entering the slip where we stood, her rear deck piled high with the bodies of children and women, rescued from the water, and we recognized Fire Chief Croker and called to him "How many are dead out there, chief?" Instantly he replied, "There are a thousand dead".

We rushed to a telephone in a dirty little confectionary store nearby and got the office. "Flash a thousand dead—Steamer General Slocum is afire in Hell Gate—Quote Croker as saying a thousand dead" and then went on with the details of the story.

A solemn rule had just been adopted by the press association we represented at that time, in the interest of news conservatism. This editorial is intended to atttack the principle of such rules. To avoid overestimation of casualties in railroad wrecks and similar disasters all desk editors had been ordered to arbitrarily cut in half or more the first estimates of dead.

For twenty years we have been harboring a sense of injury and outrage that our reportorial enterprise, or luck, or what you will, in first reporting that 1,000 was the official estimate of the General Slocum dead, was through an arbitrary rule cut by a desk editor to "200 dead." The final count of the General Slocum dead was 1,021, and that figure is written in marine history. Fire Chief Croker was the sort of man who knew what he was talking about when the subject concerned his business. No desk editor in New York or elsewhere had power to divine truth which in any degree compared to Croker's quick ability to estimate losses on the scene of a fire.

Newspaper men are prone to talk of the "good, old times", when men were men in journalism, and scoff at present day ultra-conservatism, but there is not a desk editor of the present generation that would cut by eighty per cent a staff reporter's estimate of dead in a disaster, particularly when it was supported by the quotable word of the highest authority on the subject. That sort of nonsense was the exclusive privilege of the good, old editorship of 20 years ago.

The best general rule that obtains for journalists is: Use common sense and break all office laws that conflict with it.

PERSONAL

CORNELIUS VANDERBILT, JR., publisher of tabloid newspapers was taken ill this week at his hotel in Atlanta, Ga. On Oct. 28, he was reported resting easily and physicians predicted his speedy recovery. Mr. Vanderbilt was gassed during the World War, the fumes affecting his jawbone. His present illness is a recurrence of this infection.

Asa W. Butler, editor of the *Albany* (Mo.) *Capital*, and former president of the Missouri Press Association, has resigned as state oil manager for Missouri.

Robert Lincoln O'Brien, editor, *Boston* (Mass.) *Herald*, recently spoke on "Our Presidential Puzzle," before members of the Littleton Lyceum at Littleton, Mass.

Willis Sharpe Kilmer, Binghamton sportsman and founder of the *Binghamton Press*, has returned from a trip abroad where he purchased another horse to add to his racing stables.

Major Frank Knox, publisher of the *Manchester* (N. H.) *Union and Leader*, has been re-elected president of the New Hampshire Marketing Association.

Abraham M. Liebling, publisher of the *Chicago Daily Press*, recently purchased the Seelbach hotel, Louisville, Ky. The purchase price was $2,500,000.

W. F. Muse, editor of the *Mason City* (Ia.) *Globe-Gazette*, formerly city editor of the *Cedar Rapids* (Ia.) *Evening Gazette*, is visiting in the latter city en route home from the Inland Press Association meeting in Chicago and an Alaskan trip. He has frequently been mistaken for Irvin S. Cobb, and on his recent visit displayed a letter of sympathy from the author-humorist.

W. C. Simons, editor of the *Lawrence* (Kan.) *Journal-World*, was recently elected president of the Kansas Baptist Association.

IN THE BUSINESS OFFICE

WILLIAM F. ROGERS, advertising manager of the *Boston Transcript*, and president of the Advertising Club of Boston, extended greetings to delegates at the International Direct Mail Advertising Convention in Mechanics Hall, Boston, on October 28.

Robert M. Harper, business manager of the *East Moline* (Ill.) *Herald*, has been elected first vice-president of the Moline-East Moline Chamber of Commerce.

Everett B Harvey, for the past four and a half years business manager of the *Quincy* (Mass.) *Patriot Ledger*, has resigned to become business manager of the *New Haven* (Conn.) *Journal-Courier*. He began his duties there this week.

Fred Mott has resigned as business and advertising manager of the *Grand Rapids* (Minn.) *Herald-Review* and joined the *Washington* (Ia.) *Evening Journal*.

Carl F. Morrison, formerly proof reader, *Bangor* (Me.) *News* and later reporter and assistant advertising manager of the *Bangor Commercial*, has assumed new duties as advertising manager of the Besse System Stores in that city.

C. M. Dunham, advertising manager of the *Coffeyville* (Kan.) *Daily Journal*, has several fractured ribs and other injuries, the result of an automobile crash.

K. T. Boardman has joined the *Palo Alto* (Cal.) *Times* as circulation manager, and will direct the circulation of both the Times and the *Redwood City Tribune*. He started newspaper work 2 years ago on the *Minneapolis Journal*, later becoming circulation manager of the *San Francisco Chronicle* and the *Call*. Recently he was with the *Santa Barbara* (Cal.) *Morning Press*.

L. W. Neuheisel, formerly of the *Milwaukee Journal* and the Mills Engraving Company, San Antonio, has succeeded Jack McGuire as service artist for the *San Antonio Express and Evening News*. McGuire resigned to go with the Service Engraving Company. S. H. Needham has joined the service department, succeeding Thornton B. Hall, who became secretary to Publisher F. G. Huntress. William S. Chaney has joined the Express-News soliciting staff.

Hazel Freeman, of the advertising department, *New York Herald Tribune*, sailed last week for a two week's business trip to Bermuda to promote resort advertising there.

George R. Taylor of the real estate advertising department, *New York Herald Tribune*, and formerly of the *Philadelphia Evening Bulletin*, is to be married on Nov. 7 to Miss Emma W. Fetterolf of Philadelphia.

Harry G. Swanson has joined the radio department of the *New York Herald Tribune* as a solicitor. He was formerly with the *New York World*.

IN THE EDITORIAL ROOMS

HERBERT R. GALT, managing editor, *St. Paul Dispatch-Pioneer Press*, has returned from a hunting trip in the Northern Minnesota woods.

Stuart Strobridge, managing editor, *Fairmont* (Minn.) *Daily Independent*, who was injured in an automobile accident four months ago, is now back at his desk.

Clarence L. Moody has resigned as city editor of the *Lynn* (Mass.) *Telegram-News* to take a similar position on the *Quincy* (Mass.) *Patriot Ledger*. He has been succeeded on the Telegram-News by Paul E. Barron, formerly of the copy desk.

James Marshall, city editor of the *Seattle Daily Star*, and Mrs. Marshall have returned from a trip to Alaska.

Jacob Rachman, known to readers of the *Davenport* (Ia.) *Times* as "J. R." conductor of the "Idle Thoughts" column, has left the Times after 12 years as a member of the staff, to become advertising and publicity manager for the World Realty Company, Omaha, operating eight motion picture houses.

George Stevenson has resigned from the *Long Beach* (Cal.) *Press-Telegram* staff to join a real estate firm. Stevenson has the second longest record in active work on Long Beach papers having served the local press for 20 continuous years.

Franklin Merrit, formerly with the *Superior* (Wis.) *Telegram* and *Milwaukee Journal*, is now managing editor of the *International Falls* (Minn.) *Daily Journal and Weekly Echo*.

Joseph Reddington of Lakewood, R. I., has joined the reportorial staff of the *Providence* (R. I.) *Journal and Bulletin*.

George Daniels, veteran West Scranton correspondent for the *Scranton* (Pa.) *Times*, has been ill for several weeks.

L. E. Glab, of Vancouver, British Columbia, has joined the staff of the *Newark* (N. J.) *Morning Ledger*.

A. Waller Lewis, Jr., Ashaway, R. I., has joined the reportorial staff of the *Providence* (R. I.) *Journal and Bulletin*.

Michael F. O'Connor, city editor of the *Holyoke* (Mass.) *Transcript*, has returned to his duties after an illness.

Rae J. Barrett has returned to the sporting staff of the *Newark* (N. J.) *Morning Ledger*.

Miss Fern Haggen has resigned as society editor, *Devils Lake* (N. D.) *Daily Journal* and gone to Goshen, Ind., to reside.

Thurlow Weed Barnes, telegraph operator of the *Albany Evening News* and son of William Barnes, former publisher of the *Albany Journal*, has resigned to enter publicity work.

James Gray, dramatic critic, *St. Paul Dispatch-Pioneer Press*, is furnishing the Dispatch with a daily column headed "The World of Art, Books and Drama."

G. A. Falzer, sports editor of the *Newark* (N. J.) *Sunday Call*, is improving after having been struck by an automobile, Oct. 24.

Miss Modanna M. Todd, of San Berdino, Cal., formerly of the *San Francisco Examiner*, who joined the staff of the *Newark* (N. J.) *Ledger* last July as feature writer, has been named Sunday editor.

FOLKS WORTH KNOWING

CONGRESSMAN Joseph W. Martin, Jr., who represents the Fifteenth Massachusetts Congressional District is one of the very few newspaper men that the Old Bay State has sent to Washington in recent years. He is the manager and editor of the *North Attleboro* (Mass.) *Evening Chronicle*.

J. W. MARTIN, JR.

Born in North Attleboro in 1885 he started his newspaper career when only seven years old as a newsboy. Graduating from the North Attleboro high school he became associated with the *Attleboro Sun* and several years later achieved one of his ambitions by obtaining control of the *North Attleboro Evening Chronicle*.

Although only 41 years of age, he is among the leading Republicans in Massachusetts. For nine years he served in the State Legislature and for the past four years was the executive secretary of the Republican State Committee.

While a member of the legislature he became a close friend of President Calvin Coolidge who was then president of the Massachusetts Senate.

Gilbert Jarvis is now city editor of the *Little Falls* (Minn.) *Daily Transcript*, having resigned the city editorship of the *Austin Daily Herald*. He succeeds Verne E. Joslin, now city editor of the *Bismark* (N. D.) *Tribune*.

Jerry Mullin, formerly of the *Newark* (N. J.) *Evening News*, is back at his sports post in the place of Myron Townsend, resigned.

H. Goodrich Gates, formerly Cortland, N. Y. correspondent of the *Syracuse* (N. Y.) *Telegram*, has joined the *Rahway* (N. J.) *Record* as managing editor.

Robert B. Peck and Forrest Davis of the editorial staff of the *New York Herald Tribune* spent several days last week shooting partridges at Mr. Peck's country home at Shokan, New York.

Miss Deborah Corle, assistant to the society editor of the *New York Herald Tribune*, has returned from a week's trip to Washington and Virginia.

HOLDING NEW POSTS

W. T. VAN CLEVE, from city editor, *Moberly* (Mo.) *Monitor-Index*, to assistant business manager, *Maryville* (Mo.) *Democrat-Forum*. Gordon Hudelson succeeds him as city editor.

James Joyce, from telegraph editor, *Wichita Beacon*, to *Cleveland* (O.) *Press* staff.

L. F. Brewer, from managing editor, *Salina* (Ka.) *Daily Union*, to telegraph editor, *Coffeyville Daily Journal*.

Albert E. Harris, from city desk, *Fairmont* (Minn.) *Daily Independent*, to night city editor, *Fargo* (N. D.) *Forum*.

Walter S. Adams, from city editor, *Knoxville* (Tenn.) *Sentinel*, to managing editor, *Sarasota* (Fla.) *Times*.

Ralph A. Hoyle, from reportorial staff, *Worcester* (Mass.) *Telegram and Gazette*, to *Bridgeport* (Conn.) *Times*.

Lewis M. Nachman from assistant classified manager, *Ft. Worth Record*, to classified manager, *Muncie* (Ind.) *Evening Press*.

R. J. Stribley, Jr., from *Dubuque* (Ia.) *Telegraph-Herald*, to telegraph editor, *Moberly* (Mo.) *Monitor-Index*.

MARRIED

HENRY P. LEWIS, radio editor, *Springfield* (Mass.) *Union*, to Miss Lucille Wetsel, Oct. 17.

Laurence E. Andrews, Fitchburg, Mass., correspondent for the *Worcester* (Mass.) *Telegram*, to Miss Olive Morano at Fitchburg, Oct. 18.

W. T. Van Cleve, assistant business manager, *Maryville* (Mo.) *Democrat-Forum*, to Miss Catherine Baldwin Moore, in Moberly, Mo., recently.

Charles Freed, city circulator, *Amarillo* (Tex.) *Daily News*, to Miss Lilly Catheren, of McLean, Tex.

Miss Kathryn Esther Elfes, daughter of Orlo Elfes, publisher of the *Pine Knot* (Minn.) *Colquet*, to Eugene Nelson, of New York, recently at the home of the bride.

Clinton H. Sippy, of the mechanical department, *Chippewa Falls* (Wis.) *Telegram*, to Miss Eunice Card in Chippewa Falls, Oct. 22.

George Hazen Whitson, formerly of the mechanical department *Montpelier* (Vt.) *Daily Argus*, to Miss Gertrude Fruth, Quincy, Mass., Oct. 19, at Lenox.

George B. Neibert of the mechanical department, *Norwich* (Conn.) *Bulletin*, to Miss Agnes Enright, also of Norwich, on Oct. 22.

Frank J. Connelli, telegraph operator of the Associated Press at the office of the *Norwich* (Conn.) *Bulletin*, to Miss Ruth Pollard, Taftville, Conn., recently.

Helen Lilly of the advertising art department of *Chicago Tribune*, to Maurice Reilly on Thursday, Oct. 22. The groom is a former Ohio University football star. Following the ceremony Mr. and Mrs. Reilly left for Columbus, their future home.

Woodbridge E. Morris of the *Cleveland Plain Dealer* staff, to Miss Jean C. Muir of the city staff, *Springfield* (Mass.) *Republican*, Oct. 27, in Springfield.

Stories for Children That Are Worth the Space!

THE bedtime tales for juveniles written by Mrs. Florence Smith Vincent are FEATURES, not just fillers.

Countless thousands of children have heard her on the radio, and more than 20,000 members of this radio audience have written to her. Her books have gone into many editions. Librarians and teachers attest her gift for fascinating the little ones.

Mrs. Vincent's stories will be a regular feature of the Central Press Association's complete and exclusive illustrated daily feature news service, beginning Monday, November 16.

Write today for proofs of this feature, one of many in the distinctive Central Press service.

NEW PLANTS AND EQUIPMENT

AMONG the press shipments from the New York works of R. Hoe & Co., Inc. last week was a new double-quad octuple for the *Boston Post* and another new 16-page unit for the *Jacksonville* (Fla.) *Times Union.*

Aitkin (Minn.) *Independent-Age* is building a new plant.

Bayport (Minn.) *Herald* has purchased a Universal press.

Morris (Minn.) *Tribune* has installed two variable speed motors for its Gordon jobbers, also a Boston stitcher.

Bottineau (N. D.) *Farmers' Advocate* has moved into a new home.

Clark (S. D.) *Courier* is having its home remodeled and has put in a new linotype.

Doland (S. D.) *Times-Record* has purchased an intertype.

Newspapers which have recently installed the Ludlow system are: *Miami* (Fla.) *Herald, Hawthorne* (N. J.) *News, Mt. Carmel* (Pa.) *Item, Springfield Illinois State Journal, Evening News,* Sydney, Australia, and *Marion* (O.) *Star.*

SPECIAL EDITIONS

COLUMBIA (S. C.) RECORD, 88-page Progress and Prosperity edition, Oct. 18.

Fayetteville (N. C.) *Observer,* 30-page National Publicity edition, Oct. 19.

Christian Science Monitor, Ohio edition, Oct. 22.

Columbus (O.) *Dispatch,* 158-page annual Home Beautiful edition, Oct. 11.

Omaha (Neb.) *World Herald,* 24-page Florida section, Oct. 4.

Geneva (O.) *Free Press,* annual Fall Festival edition, Oct. 5.

Albany (Ga.) *Herald,* 160-page Kiwanis convention edition, with 8-page rotogravure section.

Galesburg (Ill.) *Evening Mail,* 8-page section devoted to new Illinois Power & Light Corporation office building and headquarters for the western Illinois division.

Burlington (Mass.) *Daily News,* special University of Vermont supplement of 12 pages, Oct. 24.

PRESS ASSOCIATION NOTES

JOSEPH L. JONES, of the United Press foreign department, will leave New York shortly to join the staff of the U. P. London bureau. He will replace Lloyd Allen, who after five years abroad returned this week to the press association's home office.

John O'Brien who has been reporting warfare on the Riff front for the past three months, has returned to the Paris office of the United Press.

Edward McKernon, superintendent of the Eastern Division of the Associated Press, was a guest of *Attleboro* (Mass.) *Daily Sun* last week and was the speaker at a Chamber of Commerce dinner. During his Attleboro stay, Mr. McKernon was the guest of J. H. Vallette, Sun publisher.

Charles J. M. Kelsey, of London, England, has joined the staff of the Kent Press Service as Springfield, Ill., correspondent and general political editor. Mr. Kelsey was formerly foreign correspondent at Cronstadt, Russia, for the *London Daily Chronicle,* and later, assistant to Sir Phillip Gibbs in the London office of that paper. Since his arrival in the United States, Mr. Kelsey has held the post of assistant city editor on the *Minneapolis* (Minn.) *Journal.* He is a graduate of Brighton College, Sussex, England. Charles E. Calkins, who has been chief correspondent at Springfield, will go to the Chicago office as superintendent of bureaus. Lawrence H. Selz, managing editor, goes to Detroit temporarily, to open the new office there in the near future.

Associated Press has extended its leased wire system in Minnesota to the Iron Range, where the *Hibbing Daily Tribune* has been added to the circuit.

Otis Swift, manager of the Chicago United News bureau has joined the business staff of the United Press.

ASSOCIATION CHIEFS

WILLIAM J. SMITH, president of the Illinois Press Association, owns the *Waukegan* (Ill.) *Daily Sun* and the *Lake County Independent,* with his brother Frank G. Smith.

W. J. Smith

Following his graduation from the Waukegan high school he took a position as timekeeper at the Thomas Brass & Iron Works at $9 a week but within three months his interest in newspaper work, obtained when writing high school notes for the local paper, attracted him to the *Waukegan Daily Sun.* He left the $9 job to become a cub reporter at $5 a week. Later he became the city editor of the Daily Sun and in 1906 with his brother purchased the *Waukegan Daily Gazette.*

They conducted that paper for five years sold out at a profit and for about six months engaged in other lines of business but the call of the newspaper was too strong for them and in the fall of 1911 they purchased the Waukegan Daily Sun and the *Lake County Independent* which they have conducted since.

W. J. Smith until the present year has been vice-president from Illinois for the National Editorial Association, was treasurer of the Illinois Press Association for three years and during the past year has held the position of first vice-president of the Illinois Association.

During the Lowden administration he was public administrator of Lake County.

ON THE MECHANICAL SIDE

GEORGE FICKE, for many years assistant foreman in the pressroom of the *Richmond News-Leader,* left this week for Miami, Fla., to join the mechanical staff of the *Miami Daily News.*

George Edward Fitz, for several years with the mechanical department of the *Webster* (Mass.) *Evening Times,* has bought a printing plant at Brockton, Mass.

WITH THE SPECIALS

HAMILTON-DELISSER, INC., New York, have been appointed national advertising representatives of the *Manchester* (Conn.) *Evening Herald.*

Charles H. Eddy Company, New York, has been appointed to represent the *Buffalo Express* nationally.

CHANGES OF OWNERSHIP

E. P. EASON, for 17 years the owner and editor of the *Winters* (Tex.) *Weekly Enterprise,* has purchased the Curran and Fulfer printing shop in Anaheim, Cal.

Richard E. Schultz has purchased the *Akron* (N. Y.) *News Weekly,* from Harry J. Childs, son of the former owner and editor of the publication. The present owner was for 17 years with the *Batavia Daily News.*

W. F. Toby, of Woodstock, Ont., has purchased from James A. Livingston & Sons, the *Grimsby* (Ont.) *Independent,* and the *Canadian Sportsman.* Mr. Toby was formerly connected with the *Woodstock* (Ont.) *Sentinel-Review* and is a nephew of William J. Taylor, publisher of the Sentinel-Review and other Ontario daily papers.

Clinton (Ill.) *Register,* edited and published 39 years by the late George W. Hughes, has been purchased from the Hughes estate by Ellis and Willis Reddick of Clinton. Willis Reddick, who will graduate from the University of Illinois School of Journalism next June, is expected to become editor and active manager. George A. Slusser has been managing the paper since Mr. Hughes' demise.

George Ericson, until recently publisher of the *Spooner* (Minn.) *Northern News,* has bought the *Brainerd Tribune* of Miss Anna Himrod and Arthur Haase. Mrs. Ericson will assist in the publication.

Waukon (Ia.) *Republican-Standard,* weekly, was sold last week by Sheriff Ben Davis to meet creditors' claims, to A. P. Bock, former owner of the *Republican.*

Parma (Mich.) *News,* weekly, published for the past 11 years by William E. Beebe, has been sold to Rae Corliss, of Albion. Corliss has been on the staff of the *Jackson* (Mich.) *Citizen-Patriot* for the past two years.

Ray W. Gifford has sold his interest in the *Westerville* (O.) *Public Opinion* to his partner, A. D. Curfman.

Julian G. Kent is now directing the *Abilene* (Tex.) *Times,* having purchased the interest of G. Fisk in the paper.

F. B. Whipkey has purchased from his brother, A. L. Whipkey, the latter's interest in the Whipkey Printing Company, publishers of the *Colorado* (Tex.) *Record.*

F. S. Pavit has repurchased the *Canadian* (Tex.) *Record* from C. E. McKimson.

J. W. Munsell, who recently sold the *Menard* (Tex.) *Messenger,* has acquired the *Richland Springs* (Tex.) *Eye Witness* from C. H. Bentley.

Narrow Escape in Plane Crash

Roy Atkinson of *Boston Post* sustained bad cuts and bruises and three other Boston newspaper men, Wilfred T. Price *American,* Edmund B. Sargent, *Herald* and Munson T. Adams *Traveler* escaped injury when the Remington Burnelli airplane, Miss Essex, one of the largest commercial aircraft in the world was wrecked in a forced landing in a plowed field at Seekonk, Mass., Tuesday afternoon. Both motors suddenly went dead when the plane was at an altitude of 3,000 feet. It was only through the skill of the pilot Lt. George R. Pond that the drop did not result fatally for the passengers.

The "E. & P." of Argentine

Carlos Viale started publication this month of *Periodismo,* a semi-monthly magazine devoted to the interests of the newspapers and magazines of Argentina.

NATIONAL LEADERSHIP
IN
CLEVELAND, OHIO

During the first six months of 1925, The Cleveland News (Evening) published a greater volume of National Advertising than was published during the same period by the other evening newspaper in Cleveland.

Church Advertising An Asset

Newspapers all over the country are taking up the lance against "the great American scandal," crime. All sorts of panaceas are being suggested, among them, religious education.

President Coolidge says, "We do not need more laws; we need more religion."

Chief Magistrate McAdoo says, "The scores of criminal youth appearing before me have had no religious training, and therefore have no basis for character."

The newspapers through allowing more space to church news and church advertising can be the strongest moral force in the country toward diminishing crime.

This is not a statement of mere altruism.

Church advertising will prove itself an asset, bringing you

New revenue
New friends
New advertising copy

LIBRARY U. OF I. URBANA

WHAT'S WHAT IN THE FEATURE FIELD

Introducing C. B. Driscoll, New Syndicate Editor—American Writers to Discuss Religion for McClure—"Who's Who in the U. S. Senate"

CHARLES B. DRISCOLL who resigned from regular newspaper work to enter the syndicate field, as managing editor of the McNaught Syndicate, Inc., New York, was for the past several years chief editorial writer and conductor of a column on the *Cleveland Press*, and has also been a frequent contributor to the *American Mercury, The Nation, Country Gentleman* and *McNaught's Monthly*.

C. B. Driscoll

Mr. Driscoll claims that it was he who wrote and produced the original "scandal number" of a college newspaper. He began newspaper work as a business as call boy for the *Wichita Eagle*. He was paid $4 a week for hauling sleepy carriers out of bed, beween the hours of 1 A. M. and 8 A. M.

Later he became a muckraking reporter for the *Omaha Daily News*, and, he recalls, was mobbed by gangsters for his pains.

He left that city for better work on the *St. Paul Daily News*, where he created and edited one of the first pages of school news and features in the United States.

His next position was in New York as mail editor for the United Press. From New York he went back to Wichita as editor of the Eagle, the newspaper where he began as call boy years before. After five years on the Eagle he went to the Cleveland Press.

The McClure Newspaper Syndicate, New York, is preparing a new symposium of American writers on "My Religion." Arrangements have already been made with Charles Norris, Inez Haynes Irwin, Fannie Hurst, Alexander Black, Dr. Frank Crane, and Herbert Adams Gibbons. Negotiations are pending with other authors. The same syndicate is offering a symposium on the same subject by English writers, which is scheduled to begin in newspapers Nov. 1.

Preparing for the opening of Congress in Washington in December, the Editors' Feature Syndicate, New York, is offering a series of short personality sketches of each United States Senator, to run under the heading "The Gentleman from . . . " The name of the author is held secret. The sketches are illustrated by A. P. Adams, newspaper artist.

Alexander Woollcott, dramatic critic of the *New York World*, who writes a weekly theatrical letter distributed by the New York World Syndicate, is to deliver a series of lectures on the theater at the Guild Theater New York, during November, December, and January.

Harry C. (Bud) Fisher, creator of Mutt and Jeff, returned to Europe this week on the Leviathan, the same ship on which he had arrived last week. The Countess Aedita de Beaumont of Paris, whose engagement to the cartoonist has been announced, also sailed back on the Leviathan.

A new love-problem serial, called "Confessions," and written by Hazel Deyo Batchelor, has been added to the list of the Ledger Syndicate, Philadelphia.

The National Magazine Syndicate, 700 Huron Road, Cleveland, will begin the publishing of magazine sections in tabloid size for small dailies and country weeklies beginning Nov. 1. E. W. Hayden, general manager, was formerly with the Linotype Company as a salesman.

Current News Features is releasing this week a series entitled "Lost Dollars" by M. B. Levick. This series exposes the methods of promotors of bogus securities.

A success story in strip form called "Bound to Win" by Edwin Alger was announced this week by the Bell Syndicate, Inc., New York. The same syndicate has arranged to distribute nationally George Jean Nathan's dramatic letter, which is being written for the *New York Telegraph* by the celebrated critic. Bell also this week took over syndication of "The Lights of New York," a daily New York letter by Pierre Van Paasen.

ORGANIZING KEYSTONE PRESS

Greensburg Scene of First District Meeting of New Association

Newspaper publishers representing dailies and weeklies in Southwestern Pennsylvania gathered at the *Greensburg Tribune-Review* plant Oct. 24, for the first district meeting of the new Pennsylvania Newspaper Publishers' Association. An executive business session was held in the Penn Albert hotel following luncheon. The morning was spent in examining the plant of the Tribune and Review.

John L. Stewart, president of the state organization and publisher of the *Washington Observer* and *Reporter* described the new association. Greensburg is the headquarters of this district which comprises nine counties in Southwestern Pennsylvania.

Present at the session also was Albert W. Fell, as manager of the association, who dwelt upon how his new Harrisburg office would operate. It will be utilized as a clearing house for newspaper information of value to the publishers of the state, whether daily or weekly and will offer service of any nature desired. Following Mr. Fell's talk an informal discussion took place.

Those present were:

John L. Stewart, Washington Observer and Reporter; Walter A. Krebs, *Johnstown Tribune;* W. A. Helman, *Irwin Republican-Standard;* W. T. Wertz, *Scottdale Independent;* Ivan Hernley, *Scottdale News-Observer;* Clark Queer, *Mt. Pleasant Journal;* S. J. Humphreys, *Bolivar News;* Claude E. Towner, *Monongahela Daily Republican;* Howard L. Christman, Washington Observer and Reporter; Clark M. Kelly, *Braddock Daily News-Herald;* C. M. Bomberger, *Jeannette News-Dispatch;* J. J. Driscoll, *Connellsville Daily Courier;* Albert W. Fell, Harrisburg, manager P. N. P. A., S. S. Baldrige, *Appollo News-Record;* H. L. Reed, *Blairsville Dispatch;* John B. Knepper and Ronald C. Knepper, *Carnegie Signal-Item;* W. E. Ranck and Feye L. Ranck, *Barnsboro Star;* W. S. Livengood, J. E. Imler, *Meyersdale Republican.*

Transfer of Coast Ownership

John A. Rollins for the past three years manager and publisher of the *San Luis Obispo* (Cal.) *Morning Herald-Daily Telegram* has sold his entire interest to his former associates, R. C. Hoyt and his brother E. S. Hoyt. Mr. Rollins has resigned as manager and publisher and secretary of the Herald Publishing Company. J. A. Easton former New York State newspaper man was appointed manager effective Oct. 20, and will be in full charge of the papers. Hil F. Best remains as advertising manager, and J. F. Shoemaker as editor.

What Is Believed To Be

The World's Second Largest Newspaper

Was Published Sunday, Oct. 25th, by The

TERRE HAUTE TRIBUNE

The Edition Contained 304 Pages Which, According to the Records of "The Editor & Publisher" and "The Fourth Estate," is Second Only to a Recent Feature Edition of The Miami News.

In celebrating its Fiftieth Anniversary and the installing of completely new mechanical equipment including a new Hoe Octuple 64 page press, the Tribune issued a Pictorial Booster Edition showing the progress of Terre Haute.

The manufacturers and merchants were behind the edition practically 100% and the edition contained 378,728 lines of advertising, which was all sold and practically all prepared by the regular advertising force of the Tribune. No outside assistance with the exception of a few out of town relief pressmen was required by any department.

The papers were all delivered at the regular time Sunday morning with scarcely a "complaint." This was handled by delivering the sections to the carriers' homes as each section was printed and furnishing each carrier with an automobile Sunday morning when the last run was off.

With the starting of our new press Sunday, Oct. 25th, our mechanical requirements have changed to a page size of eight columns by twenty-two inches and the columns are now twelve and one-half ems.

The Tribune Has Led The Second Paper in Terre Haute Over 2,000,000 Lines per year for the past Two Years.

Food—*and Ten Million People*

FOOD is a necessity. Everyone must eat. The buying power potential of the ten million people in the six markets served by this newspaper group is of tremendous proportions.

Food advertisers, through the use of these six newspapers, can influence nearly one-tenth of the *total population* of the United States. Their advertising will be supported by a standardized merchandising service, time-tried and proven through intimate contact with food manufacturers, jobbers and retailers.

A representative will welcome an opportunity to show you how this newspaper sextette will lower advertising costs and increase sales volume in six highly responsive markets.

ADVERTISING AGENCY AFFAIRS

Roy S. Durstine Is Youngest President of Four A's—Shenfield Joins Pedlar & Ryan, Inc.—Cole-MacDonald-Wood, Inc., Names Bruske Copy Chief

ROY S. DURSTINE, elected president of the American Association of Advertising Agencies at the age of 38, the youngest man who has held this office.

ROY S. DURSTINE

Mr. Durstine was born in Jamestown, N. D., on Dec. 13, 1886. He lived in Iowa, Ohio, Texas and Massachusetts before the family came to New York. He went to Lawrenceville and then to Princeton, where he was graduated in 1908. In each of his four years at Princeton he was in the cast of the Triangle Club show. With Tertius van Dyke, son of Dr. Henry van Dyke and now himself a Presbyterion minister, Mr. Durstine wrote the "book" of two of those shows.

Princeton men with newspaper leanings invariably gravitated to the old *New York Sun* at $15 a week. To the Sun went Roy Durstine. Boss Clarke was the night city editor, George Mallon the day city editor, Chester S. Lord the managing editor, and Edward Page Mitchell, under William M. Laffan's direction, the editor-in-chief. Durstine covered police stations, he covered police courts, he covered the Criminal Courts Building, he wrote obits and shirt-tails—and less than a year after joining the Sun he was sent to Beverly to spend the summer of 1909 reporting the activities of President Taft.

After four years of it, he left to manage Col. Roosevelt's press bureau in the campaign of 1912. At the end of the campaign he entered advertising and for two years he wrote copy for Calkins & Holden. In 1914 he and James G. Berrien, who died last June, formed the advertising agency of Berrien-Durstine, Inc. In 1919, Roy Durstine, Bruce Barton and Alex F. Osborn founded the present agency, Barton, Durstine & Osborn, Inc., of which Mr. Durstine is secretary-treasurer.

Mr. Durstine has been a member of the executive board of the American Association of Advertising Agencies since 1921 and was vice-president and chairman of the grievance committee last year. He was chairman of the New York council of the Four A's in 1923.

Fred M. Winn, of Tulsa, Okla., has become account executive of the Brown-Connery Advertising Agency, of Oklahoma City, succeeding Erville C. Sutton, who leaves Oklahoma to engage in business at Asheville, N. C.

Winn, who has been foreign advertising manager of the *Tulsa World* the last two years, was for ten years associated with the Southwestern Advertising Agency at Oklahoma City.

Lawrence L. Shenfield, President of W. I. Tracy, Inc., advertising agency, New York, has resigned from that firm to join Pedlar & Ryan, Inc., also of New York, as an executive officer.

Paul H. Bruske has been appointed copy chief of Cole-MacDonald-Wood, Inc., Detroit advertising agency, Col. Walter C. Cole, president, has announced —prior to 1916 he was advertising manager of the Studebaker Corporation, and since that time has been connected with Power, Alexander & Jenkins, Detroit agency.

C. W. Moore, recently of the editorial staff, *Des Moines* (Ia.) *Register,* has joined the staff of Fairall & Co., advertising agents in Des Moines, directing house organs and special work. Ralph W. Harley, Des Moines advertising man, has also joined the sales department staff.

The firm of Chambers, Brecht & Pollard, Lancaster, Pa., advertising agency, has been incorporated under the name Brecht-Pollard, Inc. Edward B. Pollard is space buyer.

Carl L. Bixby, of Cecil, Barretto & Cecil, advertising agents, of Richmond and New York, has opened the Carl L. Bixby School of Advertising. A practical course in advertising for advanced students is being given. G. Kenneth Goode is business manager.

The Schwartz Advertising Agency, Hartford, Conn., has filed a voluntary petition in bankruptcy in the United States District Court. The schedules disclose liabilities of $27,086.86 and assets of $8,550.

The Unique Advertising Agency has been established in the Colonial Building, 100 Boylston street, Boston, Mass. Its proprietors are Thomas A. Manning and Edward E. Leader.

Albert Orlen & Co., headed by Mr. Orlen, formerly of the advertising staff of the *Springfield* (Mass.) *Union,* has entered the advertising field in Holyoke, Mass. Mr. Orlen is a graduate of the New York University, and was also connected with the M. Spivak Advertising Agency at New York City. He will be assisted by Miss Minnie Pinchuck, formerly associated with the Howard Marcus Strong Advertising Agency, Springfield, Mass.

John Ball, former managing editor of the *Des Moines* (Ia.) *Capital* has purchased an interest in the Battenfield & Ball Advertising Agency. Offices have been moved to the Register and Tribune building.

COAST CIRCULATORS MEET

Harold Searles, Hollywood Citizen, Elected President—100 Attend

The seventh annual convention of the California Circulation Managers' Association opened Sunday, Oct. 18, in Los Angeles, for a three-day session, with nearly 100 members in attendance, representing the leading newspapers from practically every section of the state.

Entertainment was furnished the delegates by a committee from each of the Los Angeles dailies. Sunday was given over to visits to the nearby beaches and in renewing acquaintanceships.

The official sessions began Monday morning in the Indian room at the Ambassador Hotel.

At the business sessions the newsboy problem came up for discussion as well as the matter of handling mail orders. On Tuesday evening the convention was brought to a close with a banquet at the Ambassador Hotel. Local publishers were guests of the circulation men on the closing night.

At the election of officers Harold Searles, *Hollywood Citizen,* vice-president for the past year was named president of the association to succeed John Grey of the *San Francisco Call.* Fred Anderson, *San Francisco News* was elected vice-president to succeed Searles; H. H. Cahill, *Fresno Republican,* second vice-president; William McKay, *Santa Ana Register* was re-elected secretary-treasurer.

The following directors were re-elected: E. A. Crawford, *San Francisco Examiner;* L. V. Peterson, *Stockton Record;* W. V. O'Farrell, *San Diego Union and Tribune;* W. H. Harrison, *Los Angeles Evening Herald.* New directors elected were : W. F. D. Brown, *Oakland Tribune;* Edwin L. Simpkins, *San Jose Mercury-Herald;* George A. Fisher, *San Francisco Chronicle;* Fred G. Rotermund, *Sacramento Union;* Victor Lattaner, *Oakland Post-Enquirer.*

The 1926 convention will be held in San Francisco.

Field Managers Reelect Bemis

Ed Bemis, field secretary of the Colorado Press Association, was re-elected president of the National Association of Press Field Managers at the annual convention in St. Louis recently. A board of directors, composed of O. W. Little, secretary of the Kansas Association G. L. Caswell and Ben H. Read of the Iowa and Southern California associations was named. St. Paul was awarded the 1926 convention.

Newspaper Firm Organized

The Atlas News Company, Worcester, Mass., has been incorporated with a capital stock of $20,000, for the purpose of buying, selling and dealing generally in newspapers. There are 200 shares of common, with par value of $100 each. The incorporators and directors are: President and treasurer, Paul Sirlin, Worcester; clerk, Paul E. Fenske, Springfield, and Samuel Black, Worcester.

30% Lead in Circulation **MIAMI**

Publisher's Government sworn circulation statements for six months' period ending September 30th shows The Miami Herald leading the second paper by 30%.

WITH THE GENERAL ADVERTISERS

Increased Advertising Follows $18,000,000 Phonograph Merger—Gold Dust Buys F. F. Dalley Corporation—Toy Maker Uses Newspaper for Christmas Advertising

INCREASED advertising to promote sale of records will follow the $18,000,000 phonograph merger announced this week by the Columbia Phonograph Company, according to George Metzger, of Hanff-Metzger, Inc., New York advertising agency handling the account.

Four phonograph companies are in the announced alliance. Other companies in addition to Columbia, are the Columbia Graphaphone Company, Ltd., of London, the Carl Lindstrom Company of Berlin; and the Transoceanic Trading Company of Amsterdam. Their combination, through a common holding company, the Columbia International, Ltd., of London, constitutes a world-wide manufacturing and trade arrangement, whereby their laboratory and factory experts will cooperate in producing advanced types of phonographs, records, and even radio equipment.

Regarding advertising, Mr. Metzger informed EDITOR & PUBLISHER, he placed this week full page space in a chain of 22 metropolitan newspapers to appear Oct. 29, 30, and 31, and was now preparing another and larger list. He declined to discuss details of future advertising plans, beyond indicating plainly increased advertising might be expected.

Henry O. Cox, president of the Columbia Phonograph Company, is a director of the holding company. The only other American director is Lewis Sterling, who is chairman of the board of directors of the Columbia Phonograph Company. Sir George Croydon Marks is chairman of the board of the Columbia International, Ltd.

W. C. Fuhrie, is general manager of the Columbia Phonograph Company, and J. Duffy is advertising manager.

Merger of the Gold Dust Corporation, soap manufacturers, and the F. F. Dalley Corporation, makers of shoe polishes, was announced this week. Gold Dust is said to have paid $8,000,000 cash for the Shinola concern.

A. C. Lang, director of sales and advertising for Gold Dust, who is out of the city, could not be reached for a statement on advertising plans. At the Robert M. McMullen Company, New York advertising agency handling the account, it was said it was too early for any announcement of change in the advertising program. Mr. Lang will return to New York next week.

Gold Dust at present uses considerable space in the magazines, with occasional big newspaper drives. Mr. Lang is a believer in and a user of radio broadcast advertising. The F. F. Dalley Corporation, as shown in recent EDITOR & PUBLISHER articles, shows a tendency towards reliance on free publicity.

The Gold Dust Corporation, will combine production, distribution and sales department of the two companies. The merger, it is said, will effect important economies in distribution, because more than 90 per cent of the products of both companies are distributed through the same trade channels.

Some of the Dalley plants will be abandoned to effect operating economies. The number of plants to be abandoned and their location will be determined within the next week or so at a special meeting of the directorate of the Gold Dust Corporation.

The F. F. Dalley Corporation, established in 1846, last year produced 90,000,000 packages of shoe polish. The corporation's subsidiaries, whose properties will also be taken over by Gold Dust include S. M. Bixby & Co., of Brooklyn, organized in 1860 and the Shinola Company of Rochester organized in 1879.

The Gold Dust Corporation succeeded in 1923 to the soap and washing powder business of the N. K. Fairbanks Company, a subsidiary of the American Cotton Oil Company. It operates plants at St. Louis, Guttenburg and Montreal, and is building a new plant at Baltimore from treasury funds, without financing, to replace the Guttenburg plant. Last year the output of its plants totaled 100,000,000 pounds.

George K. Morrow, president of the Gold Dust Corporation, estimates that probable net earnings of the combined corporations will approximate $1,700,000 a year.

Lionel Corporation, New York, makers of toy electric trains, has adopted a new policy in regard to its advertising for the Christmas trade. Small local newspapers are being used this year. Previously the investment has only been in the magazines and in metropolitan dailies.

"We are using more newspapers this year, but are not neglecting the other media," M. Harris, vice-president of the Lionel Corporation, informed EDITOR & PUBLISHER.

The account is in the hands of the George L. Dyer Company, New York advertising agency.

The Federal Telegraph Company of California, manufacturers of Kolster Radio sets, makes the following statement in a letter to their jobbers:

"To localize this tremendous *Saturday Evening Post* advertising and to capitalize it for the direct benefit of Kolster dealers we have appropriated a large amount of money for local newspaper advertising. This newspaper advertising will be released just as soon as the Kolster distributor has appointed the Kolster dealer and the dealers have Kolster radio in stock and on display in their stores. It is our intention to feature the name and address of the Kolster dealer in this local newspaper advertising to complete tie-in between our national advertising and the dealer."

This is a Lord & Thomas account.

Beginning next week and continuing until Christmas, the American Tobacco Company will use newspapers to promote Lucky Strike Cigarettes, employing the "tax-free-coupon" stunt so successful last year. John F. Quick, of the Lord & Thomas New York Office, informed EDITOR & PUBLISHER that the campaign will run in virtually every daily newspaper in the country.

Camels, R. J. Reynolds Tobacco Company cigarettes, are coming back strong in the newspapers, along with Prince Albert tobacco. The Reynolds concern has been giving billboards a trial during the past few years. N. W. Ayer & Son is placing the advertising.

Tide Water Oil Company is extending its newspaper appropriation considerably, it is indicated in the 1,000-line contracts now going to papers in 232 cities promoting Veedol. The Joseph Richards Company, New York, is placing the business. Tide Water's investment in newspapers last year was $50,000. The Bureau of Advertising of the American Newspaper Publishers Association reports that free publicity is going out with the Veedol contracts. F. H. Dickinson is director of sales and advertising.

The Coca-Cola Company established a new high record for any quarterly period in the history of the company with the quarter which ended Sept. 30, showing a figure of $3,345,980 compared with a net income of $2,494,232 reported in the June quarter.

Moon Motors reports net earnings of $452,026 for the quarter ended Sept. 30.

For the quarter ended Sept. 30, the Pierce Arrow Motor Car Company reports net income of $405,777 after all expenses, repairs, taxes, and other deductions. This compares with a net income of $364,714 for the preceding quarter.

Something new in the use of newspaper space by a manufacturer is being tried by Julius Kayser & Co., New York makers of gloves, underwear and hosiery.

In addition to regular illustrated copy this advertiser uses one column of the space purchased to carry text in news style.

"This column makes it possible to give a full amount of information, without jamming up the advertisement itself with copy," Grace Walton, advertising manager, explained to EDITOR & PUBLISHER.

The Kayser campaign is running in more than 50 daily newspapers. The columns of detailed information run under the headings "The Truth About Hosiery"; "The High Cost of Hosiery" and "How to Judge Hosiery Wisely."

The advertising campaign, although that of a manufacturer, is based on the retail layout.

"It is our opinion that the retailer has solved the selling problem far more thoroughly than any one in the field, and therefore, as we are primarily out to sell merchandise, we have taken a leaf from his book."

Simple and Economical Cold Stereotyping

with

CERTIFIED DRY MATS

(Made in the U.S.A.)

Certified Dry Mats are readily conditioned in a heatless, inexpensive humidor WITHOUT steaming.

The mats are simply placed in the racks, and allowed to remain in the airtight, heatless humidor for 24 to 48 hours. There is no steaming, and no thermometer watching.

For taking the impression the mat is imposed on the form face down, and a molding blanket (either cork or felt; some stereotypers prefer two blankets, both cork or one cork and a felt) placed on top.

The mat is rolled one way (but once) the stroke of the roller bed being from 20 to 30 seconds, the slower the better.

The molded mat is then removed from the form, and the form does not enter in the process any further. The form is not heated in any way, and is therefore instantly available for re-make or other disposition.

The molded mat is now "backed" up with felt packing in the particularly open spaces, in just the same way and to the same extent as the old "wet mat."

After it is packed the mat is THOROUGHLY dried in the scorcher, generally for one-half to one minute. A thorough drying is essential, and prevents a good deal of the trouble which stereotypers encounter in their work.

During this scorching period the mat shrinks, so that without altering present make-up, it is possible to print on narrower paper.

With Certified Dry Mats this margin of shrinkage is *constant* and *uniform,* and is always under the control of the stereotyper.

Certified Dry Mats are now being used in several hundred stereotype plants **in all kinds of casting equipment, including Autoplate, Duplex, Goss, Hoe and Scott.**

Please don't get the impression that Certifieds cannot be used with Autoplate equipment; names of users so equipped will be gladly furnished any publisher upon request.

What Could Be Simpler?

With American-made Certified Dry Mats there is no pasting fuss, no steamtable bother, no heated forms, no ruined type. Certified Cold Stereotyping *does* save invaluable time, newsprint paper, and improves working conditions in the foundry.

And remember that with Certifieds you not only benefit from the advantages of dry mat cold process stereotyping but you maintain your old established "wet mat" printing of type matter and secure improved printing of half-tones.

If you will fill in the questionnaire below, and return it, we shall gladly place our proposition before you and be able to give you a good idea of what *Certified Dry Mats* can save you in dollars and cents. You do not incur any obligation whatsoever, so write NOW.

CLIP; FILL IN AND MAIL NOW!

E & P 10-25.

ASSOCIATIONS

MASSACHUSETTS PRESS ASSOCIATION held its monthly meeting last week at Braintree where the members were the guests of the Cities Service Company at a luncheon. Besides inspecting the company's oil refining plant, they also visited the chocolate factory of the Walter F. Baker Company at Milton Lower Mills. Two new members, A. F. Ralston of the *Franklin Sentinel,* and George H. B. Turner of the *Ayer Public Spirit,* were accepted into the association.

North Dakota Associated Press Editorial Association held its annual meeting at Bismarck, recently. H. D. Paulson, *Fargo Forum,* was re-elected president and John B. Cooley, *Grand Forks Herald,* was re-elected vice-president. The editors were guests of George D. Mann, manager of the *Tribune,* at luncheon.

Good Fellowship Club of Associated Press Telegraphers of New England held its annual guest banquet last week at the Boston Yacht Club. Among the speakers were: Franklin Spiker of the *Salem* (Mass.) *News;* Alfred Baker, *Concord* (N. H.) *Monitor-Patriot;* F. E. Williamson, Boston A. P. Bureau; A. E. Farrell, *Salem* (Mass.) *News* and G. M. Frazer of the American Telephone and Telegraph Company.

R. B. Williams, operator at the *Bloomington* (Ill.) *Daily Pantagraph,* was elected president of the **Illinois Good Fellowship Club** of the Associated Press at the annual meeting in Bloomington last week. Other officers are: Robert Day, *Joliet News-Herald,* vice-president; Leon Dille, *Peoria Transcript,* secretary-treasurer.

Schenectady Press Club, organized a short time ago by 25 local newspapermen, has increased its charter membership to 56. The club held a dinner in the Van Curier Hotel, Saturday, Oct. 24. A joint dinner with the Schenectady Advertising Club is being arranged for early November.

Annual convention of the **Seventh District A. A. C. W.** will be held in Oklahoma City, Nov. 23 to 25. Fred Galle, advertising manager, *Wichita Eagle,* is chairman of the district.

Executive board of the **Texas Woman's Press Association** will hold its annual convention in Austin, Nov. 10. Mrs. J. M. F. Gill of Burkburnett, state president will preside.

"Bulldogs" Again in Cleveland

Expiration of agreements between morning and evening papers in Cleveland this week saw the *Plain Dealer* and *Times* resume publication of the "bulldog" edition for street sales, these editions hitting the street around 10 p. m. This is the first time bulldogs have been published in Cleveland in more than a year.

Increase for Scranton Printers

Printers employed on the newspapers of Scranton, Pa., were recently granted a wage advance of $3 a week. The scale went into effect on the first of October.

Arizona Daily Reverts to Semi-Weekly

The *Jerome* (Ariz.) *Verde Daily News* has reverted to a semi-weekly, thereby automatically relinquishing its membership in the Associated Press.

CIRCULATION PROGRESS

Gained 420 Readers a Year for 51 Years—F. M. Hatch

F. M. Hatch

STARTING at zero, the average growth of the *South Bend* (Ind.) *Tribune* has been 420 copies for each one of the 51 years of its history, according to F. M. Hatch, circulating manager.

"I gathered in the first hundred subscribers for my paper," Mr. Hatch is able to say.

The Tribune began in 1873. Mr. Hatch was then 14 years old.

"When the work of starting circulation in the little towns near South Bend began, the Chicago papers were entrenched in this territory, and were being delivered at 6c per week," he recalled.

"The 1c papers were struggling against what they called 'blanket sheet' competitors and on the start and for a number of years had the best of it, both in circulation and advertising.

"At present, the syndicate papers have been gaining more rapidly throughout the United States by mere force of brains, capital and enormous executive power. The day of the weekly is fast waning and the day of the hourly million a day edition has arrived. Premiums, contests, features, news, literary and comics, are pushed by vast combinations of brains and capital, so that the single publisher is surrounded and apparently swamped by the flood of competition rolling over him

"The fight for leadership in circulation was never so strenuous as at present, and the gains are made by features, editions, and expensive promotion, which may take the place of advertising, premiums, bargain days, periods, or any way of obtaining and tying up the home delivered, home read, circulation.

"It is not premiums, but it is the quality as well as the quantity of circulation—its permanency among the readers who have the largest paying ability, as well as the inclination toward the thing advertised. Also, given the quality and quantity of circulation—nearness to the market and the ease and quickness with which it can be reached comes much closer to answering the questions than any side issue of any kind.

"My circulation slogan is:
"Do it better and do it first.
Do it with a better product
At a more reasonable price
At an earlier time of arrival
At more points of delivery.
Do it with all your might."

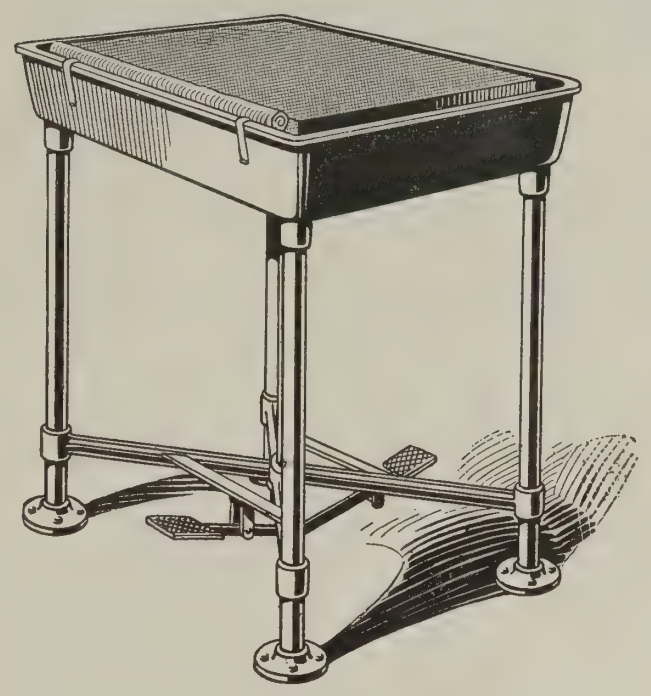
POWERS PERFECTION COOLER

Every Newspaper Photo Engraving Plant should have at least one

The Powers Perfection Cooler requires no water connection of any kind.



It can be moved at will by simply picking it up and placing it where it is wanted.

It has no mechanical parts to get out of order.

It applies cold water evenly and simultaneously to all parts of the plate—ON THE BACK OF THE PLATE only.

It cools the plate instantaneously to the exact temperature required and saves wiping, mopping and reheating.

The price of the Powers Perfection Cooler is $350

The *Powers Perfection Cooler* met with the instantaneous approval of both the workers and the owners wherever it was installed and tried. The men in the shops like it because it helps them in their work. They save time and effort, turn out more work and better work, and do it with very little physical labor. It is a clean, workmanlike way of doing what is otherwise a messy, sloppy task.

Proprietors like it because it saves gas, water, time and makeovers. These savings mean money and profits and that is what we all want. To satisfy yourself, go into your etching rooms and see what happens when the etcher tries to cool a large plate by dragging it over a roller wrapped in old towels and rags or a piece of burlap. Watch the plate buckle and then see him try to straighten it out. You know what that means in color work.

The use of the Powers Perfection Cooler does away with buckled and twisted plates, the splashing of water on the face of the plate and the constant work and worry connected with etching. A zinc etching is heated from 13 to 16 times by the etcher. That tells the story.

GENERAL MOTORS ASKS SLASH IN RATES

Seeks to Get Lower Price Because of Large Amount of Advertising Business Planned—Dailies and Weeklies Refuse

General Motors Company of Detroit is endeavoring to get "department store" rates for newspaper advertising space, claiming the large amount of business they are planning to place this year justifies the attempt.

Verne Burnett, secretary of the advertising committee, has admitted his company has made a study of the entire newspaper field seeking to determine the best rates obtainable.

Daily newspapers are declining to cut rates, however, according to special representatives in New York, while the American Press Association states that the majority of country weeklies are also refusing to make bargain arrangements with the automobile concern.

The following questionnaire was sent publishers by the General Motors Company:

Gentlemen:

Will you kindly advise us in the space provided below, the very best rates for display advertising in your publication placed through a recognized advertising agency.

In furnishing this rate, please remember that there is but 15 per cent agency commission and 2 per cent cash discount to be paid by you.

Please furnish this information by return mail, addressed to Mr. Verne Burnett, General Motors Corporation, Detroit, Mich.

Yours very truly,
General Purchasing Committee,
JAMES LYNCH, Executive Sec'y.

Vanderhoof & Co., 167 E. Ontario street, Chicago. Placing orders with some Western papers for Savoly Company, nail polish, Chicago.

M. C. Weil Advertising Agency, 222 West 23rd street, New York. Placing orders with newspapers in selected sections for the Root Mfg. Company, Root Tivoli Underwear, Cohoes, N. Y.

RADIO MAKERS FINDING NEWSPAPERS BEST

Manufacturers, Lacking National Sales Organizations, Are Realizing Dailies Permit Local Campaigns, Says C. N. Halsted, Lansing Publisher

LANSING, Mich., Oct. 26.—Radio manufacturers generally, no matter what the scope of their business, are coming to a realization that concentration of advertising through daily newspapers, or tabloids and magazine sections published by dailies, gets best results, according to Charles N. Halsted, president of the *Lansing State Journal*, publishers of the first radio trade magazine run in conjunction with a daily.

Mr. Halsted has just completed a tour in which he touched representative cities in New England, along the eastern coast, and throughout the middle west. On this trip, he conferred with executives of practically every important radio manufacturing concern and sounded out the sentiment in relation to radio advertising. He found, without exception, he says, that radio makers, while dependent on "broadcasting" for their business, find broadcasting of advertising in national magazines a most wasteful method of reaching the buying public.

Most radio manufacturers, Mr. Halsted found, have not as yet completed sales organizations. Many of them have sales representatives in but a relatively few metropolitan centers. To make extensive use, then, of national magazine space with its widely dispersed appeal is proving almost futile while concentration of advertising in territory where jobbing and retail sales facilities have been provided has been most effective.

It is Mr. Halsted's idea that the manufacturers, working through the jobbers primarily rather than the retailers, plan to concentrate their advertising in the future to the benefit of all daily newspapers. During his trip, several such manufacturers assured him that they would urge their jobbers to purchase their space in the local medium.

The State Journal, which has pioneered in the field, now publishes a complete radio trade journal, designated as the official organ of the Radio Trade Association of Michigan. The magazine, in tabloid form, is entirely the product of the newspaper office. This month's issue carries no "local" advertising, no retail dealers using its columns but manufacturers making direct appeals to dealers and the public through the jobbers. Interesting radio features, profusely illustrated, and a complete radio log feature its editorial content.

HOW EDITORIAL LAXITY NIBBLES PROFITS

(Continued from page 5)

(A large tract of land at Whippany N. J.)

GRANTED ORIGINALLY BY INDIANS KNOWN AS TUTTLE GROVE AND FARM ON BANKS PASSAIC RIVER, BEEN SOLD FOR REAL ESTATE DEXELOPMENT . . . GEORGE W. TUTTLE RECENT OWNER HAS IN HIS POSSESSION ORIGINAL RETURN MADE TO COLONEL DANIEL COX FOR ONE THOUSAND TWO HUNDRED ACRES WITH TITTLE DEEDS DOWN TO DATE. COX BOUGHT LAND FROM WEST JERSEY PROPRIETORS WHO SECURED DEED 1725 FROM JONATHAN STILES OF STRATFORD CONN WHO BOUGHT FROM INDIANS PORTIONS OF ORIGINAL TRACT ALL SOLD YEARS AGO EXCEPT TUTTLE LANDS WHICH NEVER LEFT FAMILY. PROPERTY HAS FRONTAGE ON PASSAIC RIVER THIRTY FIVE HUNDRED FEET.

A large tract of land at Whippany, N. J., granted originally by Indians and known as Tuttle Grove and Farm, on the banks of the Passaic River, has been sold for real estate development.

George W. Tuttle, recent owner, has in his possession the original return made to Colonel Daniel Cox for 1,200 acres, with title deeds down to date.

Colonel Cox bought the land from West Jersey proprietors, who secured a deed in 1725 from Jonathan Stiles of Stratford, Conn., who bought from Indians portions of the original tract, all of which was sold years ago except the Tuttle lands, which never left the family.

The property has a frontage on the Passaic River of 3,500 feet.

Exhibit M—Only the skeleton of a story, as it went to the composing room! The operator filled in the missing words and corrected grammatical slips.

litorial matter. Without advocating ny particular style, it may be suggested at in date lines the abbreviations of e State might well be eliminated in l cases of well-known cities, while in ses where there are more than one of e same name or an obscure town the tate abbreviation should be inserted by te writer.

In any case the writer should prepare s copy as it is expected to appear in nt. Nothing should be left to guesswrk of the linotype operator or proofrider.

The elimination of varying styles for fferent departments would remove confsion and uncertainty, avoid many errs by the linotype operator, proofrking by the reader and save the time the operator and bank corrector, which nans, that the matter is ready for the rms in an appreciably shorter space o time.

It has been estimated that the cost of nking corrections in linotype matter of errors which should not have occurred (resetting line) is one cent each. The same estimator placed the cost in an office of twenty-five linotype machines at $25,000 annually for commas alone.

On this basis, as errors of punctuation do not constitute half of those made unnecessarily in the process of preparing matter for the forms, it may be safely claimed that in a newspaper composing room with twenty-five machines the cost of correcting errors of the writer, linotype operator and the reader will reach more than $50,000 annually.

Having copy properly prepared, as suggested elsewhere, so that the linotype operator may safely follow it, would eliminate guesswork, assist in placing an organization on a markedly more efficient plane and effect an amazing saving.

This is the first of two articles by Mr. Edwards. The concluding article will appear next week.

SIX NEW PRESS UNITS FOR HERALD TRIBUNE

New Scott Presses Will Give Daily 34 Black and White Units—Flat Stereotyping Equipment Doubled

Six more Scott press units and two folders have been ordered for installation in the plant of the *New York Herald Tribune*, Howard Davis, business manager, announced this week. They will be arranged to run as two sextuples or one double and one quad, or as a five roll or a six roll press.

The arrival of the new units, which are expected to be in operation by February, will give the Herald Tribune a total of 83 black and white units, or the equivalent of 11 sextuple presses.

The new units will have two sets of Cutler-Hammer drives and two motors. From R. Hoe & Co., the Herald Tribune has ordered a complete duplicate of its present flat stereotyping equipment, to be installed in 90 days. This will double present capacity.

Four new linotypes were installed last week.

"KEEP HOME FIRES BURNING"

New York Evening World to Aid Poor in Coal Famine

"Keep the Home Fires Burning Through the Christmas Season."

Under this slogan the *New York Evening World* this week announced a plan for relief of the poor during the present coal famine resulting from the strike of anthracite miners. The plan would take care of the needs of at least 5,000 families a week for 12 weeks, it was declared.

The Evening World has made an arrangement with Burns Brothers whereunder that company will supply hard coal for $15 a ton during the stringency and deliver it in small lots to the homes of the needy. Plans whereby tickets for this coal will be distributed only to those most deserving of them are being evolved in a manner to assure free coal however rigorous weather conditions may become. Further details will be announced later.

The free coal distribution will be made at the rate of 250 tons a week. The Evening World itself underwrote, with $3,750, the first week's supply.

No "Hindsight" Necessary in

Indiana

A long season of industrial progress is ahead. There can be no developments in the months to come that will retard the steady industrial movement. The prosperity in the manufacturing areas is creeping into the farm section. Electric interurban traffic is the heaviest in the country.

The Indiana Market has everything for business success.

Indiana daily newspapers effectively cover this great territory because they go into the homes and are a part of the daily life of the Indiana family —and 91.8 per cent of the population is native white.

If you leave Indiana out of your National Advertising Campaign you are overlooking a vitally important market.

DR. HENRY J. WATERS

Weekly Kansas City Star Editor, Former College President, Dies

Dr. Henry Jackson Waters, editor of the *Weekly Kansas City Star* and former president of the Kansas State Agriculture College, died at 8:25 o'clock Monday night in his home, the Carlton Hotel.

Dr. Waters became ill with pneumonia Oct. 15. His condition gradually became worse and reached the critical stage several days ago.

Long regarded as one of the leading authorities on agriculture in America, Dr. Waters spent the greater portion of his life in the service of his calling in the middle west.

He accepted the editorship of the Weekly Star in 1917, resigning from the presidency of the State Agriculture College to do so. At that time he stated that he believed he could be of more service to his fellow countrymen as editor of a great weekly newspaper than as a college president.

Dr. Waters served as president of the Kansas college for nine years. Before that he was dean of the college of agriculture, University of Missouri. He was a native Missourian.

JOSEPH W. MILLER

Civil War Veteran, 87, for 25 Years on St. Louis Globe-Democrat Staff

Joseph W. Miller, 87, who died in St. Louis recently, was a captain on Gen. Philip Sheridan's staff during the Civil War, later a newspaper correspondent with the Union troops, and for 25 years an editorial writer for the *St. Louis Globe-Democrat*. Interment was in Cincinnati.

Mr. Miller's newspaper career began at 14, as a printer's devil on the *Cincinnati Commercial Gazette*. After 9 years' service there, he joined the Union army, but was released following a severe attack of scarlet fever. He later became a newspaper correspondent at the front. At the close of the war, he became a member of the staff of the *Cincinnati Times Star*, but after a few months went to St. Louis.

In 1895, Mr. Miller became an editorial writer for the Globe-Democrat, continuing as such until 1920.

Pioneer Special Is Dead

A. Frank Richardson, pioneer newspaper special representative, who retired from business in 1902, died recently at his home in Bay Shore, New York. Paul Block and Herman G. Halstead, were associated with Mr. Richardson early in their careers.

Noted Music Publisher Dies

Theodore Presser, 77, widely known music publisher, died in Philadelphia, Oct. 28, Mr. Presser was head of the Theodore Presser & Co., music publishing house and the founder of *Etude*, a musical publication.

Obituary

GEORGE M. BASFORD, president of the G. M. Basford Company, technical advertising agency, New York, died suddenly in New York, Oct. 26. Mr. Basford had been head of the agency since its founding 10 years ago, also acting as consulting engineer for the Lima Locomotive Company.

MRS. CLYDE HAMBRIGHT, 45, society editor of the *Philadelphia Public Ledger*, died Oct. 25 at her home in Philadelphia. Her husband is a member of the *Philadelphia Evening Bulletin* staff.

JOSEPH H. BURNETT, 78, for more than 50 years editor of several Missouri weekly papers died recently at his home in New London, Mo. He owned the *New London Ralls County Record*, from 1890 to 1915.

JAMES F. MITCHELL, managing editor of the *Scranton Republican*, died recently at his home in Scranton after a lingering illness. Mr. Mitchell had been engaged in the newspaper business of Scranton for almost 35 years.

RICHARD EVELYN BYRD, father of Harry Flood Byrd, Democratic Governor-designate of Virginia state, and owner of the *Winchester Star* and *Harrisonburg News-Record*, died Oct. 23, in a Richmond hospital.

JOHN H. SCOTT, 76, brother of H. S. Scott, general manager of the *Detroit News*, died recently at his home near Fort William, Ont. For 30 years he was connected with the Canadian postal service.

ALEXANDER H. PETROSKY, for 40 years an employe of the printing and proofreading departments of the *Detroit Free Press*, died last week at his home in Detroit.

STEPHEN H. WOODHOUSE, 65, for more than 30 years on the composing room staff of the *Boston* (Mass.) *Globe*, died at his home in Dorchester on Oct. 25.

GEORGE L. KEHEW, 77, for more than 50 years on the mailing staff of the *Boston* (Mass.) *Herald*, died at the Somerville Hospital from injuries received when struck by a motor car on Oct. 13.

C. R. GIBSON, founder of the *Waxahachie* (Tex.) *Enterprise* in 1876, and at 83 years old still a "paragrapher" on the *Waxahachie Light*, died in that city last week. He formerly was speaker of the Texas house of representatives.

L. A. LACROSSE, 79, editor of the *Del Rio* (Tex.) *News*, died suddenly last week in Del Rio. He formerly conducted newspapers in Yoakum, Hallettsville and Luling, Tex.

DR. WILLIAM S. CADY, Sr., 59, father of William S. Cady, Jr., of the *Cleveland Press* and King Cady of the *Wichita Beacon* advertising staff, died at his home recently following a stroke of apoplexy.

GEORGE W. MASCORD, 66, general works superintendent of the *London Daily Chronicle* and the *Sunday News*, and a director of United Newspapers, Ltd., died recently.

MAJ. T. J. KIRKPATRICK, 75, one of the founders of *Farm and Fireside*, and who later owned the *Akron* (O.) *Beacon-Journal*, died at the Masonic Home at Springfield, O., Oct. 5.

CHARLES L. ESTEY, 55, advertising counsel for the Vanderbilt Newspapers, Inc., and widely known publicity and advertising expert died suddenly on Monday, Oct. 20, of heart disease at 1401 Alvardo Terrace, Los Angeles.

LONDON EDITOR FINED FOR "RED" CARTOON

Court Decides Comment and Drawing Published in London Evening News Prejudiced Communists Sedition Trial—£100 the Penalty

It cost the editor of the *London Evening News* a $5,000 fine to publish an article and cartoon on the arrest of communist leaders, now being tried for sedition and incitement to mutiny. The penalty was imposed Oct. 26, Kings Bench Court declaring the newspaper was in contempt of court. The cartoon and article upheld the arrest.

The complaint was made on the ground that the comment tended to pervert the course of justice by creating prejudice against the communists.

Justice Sir Horace E. Avory, in delivering judgment, said he had come to the conclusion that the comment amounted to contempt of court, but he held that there was no ground for supposing that there was any intention on the part of the newspaper to prejudice the trial. Referring to articles in other newspapers on the same subject, the judge remarked that the case was likely to command considerable public attention, and he declared that in the future the court would not hesitate to use its powers to prevent anything calculated to prejudice in either way the trial of "this important issue."

That its comment did not touch upon the question of guilt in any particular case, but was merely a question of executive policy, was the plea advanced on behalf of the Evening News by W. A. Jowett, K. C. Pointing out that there were two sharply opposed schools of thought in the country—one condemning, the other approving, active measures against the communists—Mr. Jowett contended that the newspaper's approval of the arrests was nothing more than the logical sequel of its consistent advocacy of an active policy.

Sir Henry Slesser, who appeared for the communists, arguing that the comment prejudiced a fair trial, said he did not dispute that considerable feeling had been aroused on the subject of communism, but the fact that there was such tense feeling, he declared, should make the editor all the more careful about what he published.

N. Y. Sun Prints Florida Section

The *New York Sun* on Oct. 24 published a 14-page Florida section. The business department reports it was received with marked interest, thousands of extra copies having already been ordered.

Shelbina (Mo.) Democrat Sold

RAYMOND HIGHET

OLDTIMER, "Trail Blazers of Advertising" is for you! Looking backward is *not* going backward—we are all through with the loose-as-ashes methods of the Dizzy Daddies of Yesteryear, but there is no offense in having a laugh with them—and Pancoast's book is a yarn to make every reader of Editor & Publisher merry.

Better than fiction for young folk who are unfamiliar with the stunts of those "good old days."

If not a regular reader of Editor & Publisher, send $4.00 for a year's subscription, and insure delivery of the complete book in weekly installments.

BARNUM MADE 'EM WONDER

EXCITING and intimate histories of P. T. Barnum, Buffalo Bill, and many other famous blades whose advertising of a quarter to half a century ago contributed to the romance of the Golden Age of Romance in America. Startlingly contrasting with the scientific and controlled advertising of our own day. Pancoast (known everywhere in advertising as "Pan") spins some classic yarns of Indian Medicine Tent Shows, Barnum's Wild Adventures with the Mermaid and other weird curiosities, Publicity in the Woolly West, Rolling Stone Ad-Solicitors, Special Edition Blowhards, Mexico's Thieves' Market, Advertising a Bull Fight, An Arizona Saloon Opening, Goat and Ghost Towns, Snake Dance Advertising, Street Fakers, Masters of Gab, and dozens of stories of pioneer schemes and schemers.

It rattles the dry bones of ghosts that were once the giddy romancers of every American city and town.

INSURANCE ADVERTISING

(*Continued from page* 20)

is not divulged, is of course merchandised to agents. Prior to its appearance in the magazine, a proof is sent to agents, with the list of the magazine's subscriber's in his city.

The agents are not expected to rely solely on the magazine advertising. In an agent-instruction booklet the Hartford Fire Insurance Company devotes a full chapter to the value of newspaper advertising in building up local business. This chapter is included with the advertising specimens submitted in the prize contest.

Agents are also furnished with an advertising cut service for their use in local newspapers. The home office does not however assist in the cost of placing the newspaper copy.

Just hinted at in the prize-book is the free publicity obtained through the annual fire prevention week, of which the Hartford company is one of the originators.

Quite generally among insurance companies at the present time efforts are being made to obtain free publicity in newspapers while, as described by Mr. Collins, the "experimental stage" of insurance advertising, using magazines is underway. "Education of the public in insurance" through the news columns of newspapers is considered legitimate, and is being practiced by individual concerns, while a group is known to have formation of a press bureau under consideration.

While the bigger companies prepare mat and electro services supplied agents on request, the great difficulty is to get the agents to use the material.

One company, particularly progressive in educating its salesmen in the value of newspaper advertising, is the Connecticut General Life Insurance Company of which Miss F. E. Barrett is advertising manager.

The order blank this firm sends agents wishing to order mats or electros states in part:

"The company supplies newspaper advertising service to agents who plan to advertise regularly in their local newspapers. Agents are not encouraged to begin advertising until they are ready to continue regardless of visible returns. Intermittent advertising is wasteful. It is better to take small space once a week than large space irregularly.

"Advertisements are supplied in two sizes, five inches single column and five inches double column. They are furnished either in electrotypes or matrix form, according to the requirements of the newspaper in which they are run.

"The advertisements have striking and interesting illustrations. Every agent has a complete file of them. It is not always possible to supply the set of advertisements an agent asks for, so, unless an agent has some reason for wanting to use a certain set at a certain time, it will be appreciated if he will leave it to the advertising department to decide the order in which the advertisements will be run."

This company for seven years has been supplying agents with the newspaper mat and electro service. The problem had been, however, to get the agents to use the electros after they were ordered. The agent now signs the order blank only after he has contracted for space, and the mats or electros are not sent to him, but direct to the newspaper. The result, according to the insurance company, has been a wider use of newspaper space.

On the order blank, the agent is told:

"First see the publisher of your newspaper and contract for space. Arrange to have the same position on the same page always if possible. It is usually practicable to have an understanding to this effect without paying extra for position. Choose a page carrying news. Find out whether the paper can use matrices. We prefer to supply them, but will supply electrotypes when the paper can't use matrices or doesn't get good results from them. We expect the newspaper to return electrotypes to use when through using them."

In conclusion, Mr. Collins summed up what he termed the two outstanding groups of insurance advertisers. One group made up of casualty, surety, and marine companies he described as users of psycological advertising, while life and fire insurance were, in his opinion, of the normal, steady type.

"Psychological advertising is especially fitted for newspapers," he explained. "Its chief characteristic is its timeliness. To be most effective it must be built on some news event, such as a big robbery, an accident, or a shipwreck. Obviously, since it hinges on the news, it is spasmodic advertising, in comparison with the advertising of life and fire companies, which is adapted to steady treatment."

The National Surety Company used New York newspapers Oct. 20, in an example of this "psychological advertising," Mr. Collins pointed out. Text of this advertisement was:

"$33,750.00 payroll stolen!

"Last Saturday four Chicago bandits held up 16 employes of the International Harvester Company and ordered the manager to 'turn over the payroll.'

"Loss was fully covered by our Payroll-Robbery policy and payment was made by us today (just 2 days).

"The Harvester Company offered a reward of $1000 for each man arrested and convicted.

"We now offer a reward of 10 per cent of the amount directly recovered and applied on our loss through the apprehenion or killing of any of these bandits, this Company to be the sole judge of who is entitled to share in any reward."

The advertisement closes with the terse notice to brokers:

"We still have the courage to write payroll hold-up policies."

GIFT FROM BRITISH JOURNALISTS

Stone from St. Paul's Cathedral Presented Missouri Journalism School

The British Empire Press Union, through its president, Lord Burnham of the *London Daily Telegraph,* and by permision of Dean Inge, has presented to the University of Missouri School of Journalism, Columbia, Mo., a stone from St. Paul's Cathedral.

"The Cathedral looks down upon the birthplace of English literature, the English newspaper press, and the English publishing business," Dean Walter Williams of the Missouri journalism school states. "Its presentation is an act of international good will and friendship on behalf of English journalism to the journalists of America."

The stone will be unveiled Tuesday Nov. 10 with appropriate ceremonies. Sir Esme Howard, British Ambassador to the United States will make an address. A large group of prominent American newspaper men have been invited to attend.

Flossie the "Vamp" in "Love Bound"

"Love Bound"

Beatrice Burton's

latest and most fascinating serial is the story of sisters, two girls who belong to the group of women about whom all other women are wildly curious—business girls.

They are interesting for the reason that Mary Rose and Flossie Middleton are figures of romance and drama to their mother—not because they earn their own living, but because they live their daily lives with men. **Because they see more of the men they work with than the wives and sweethearts of these men see of them. Because they know more about the mysterious male after they've worked for him a few weeks than the sheltered woman learns about him in a lifetime.**

And the sheltered woman knows it.

She asks herself the very questions that Mrs. Middleton asked herself about Flossie:

Was her employer in love with her?

Did she try to "vamp" him?

"Love Bound"

is better than "The Flapper Wife," which was a record breaking circulation builder. Every woman in and out of business will read it. Every man will be questioned about it.

Beautifully illustrated by Lejaren Hiller of Underwood and Underwood studios.

For release November 9.

IN A COMPACT TRADING AREA
NEW ENGLAND
IS RICH IN INDUSTRIES

New England factories produce more than 11 per cent of the total manufactures of the United States, in a territory comprising a trifle over 2 per cent of the area of the entire country.

This compact section is the oldest manufacturing center in the United States and produces a great variety of industrial products, many of which bear names that are familiar in all trading centers of the world.

Leading all other sections in the manufacturing of such varied lines as textiles, shoes, paper and the machinery for these great products; brass, bronze and copper products, needles, pens and rubber goods.

This great territory is a compact, industrial region, with more than half the population living in cities. They know what they want in New England and have the money to spend. They are thrifty, intelligent home owners, and read their daily newspapers.

These Leading New England Newspapers Are Ideal For National Advertising

LIBRARY U. OF I., URBANA-C

Our Own World of Letters

By JAMES MELVIN LEE

A BOOK that grew from a real economic need is "Art in Advertising" (The Press Art School, Tudor Hall, Forest Hill, London, England) by Percy V. Bradshaw. As the author points out manufacturing methods in England have long been superior to British methods of salesmanship. To improve this salesmanship is one of the aims of the author.

The manufacturer is warned that in his distress over high overhead expenses he should watch carefully his economy lest he "spend a shilling to save sixpence." He sometimes, for example, buys expensive advertising space and then by short sighted economy in the illustrations he will ruin his chances of using such space successfully. "The art which is essential to successful salesmanship is not to be obtained in this way."

The author while admitting that many British advertisers are wise enough to use the best talent available in the presentation of their publicity still insists that there is a vast amount of advertising which is old-fashioned and unimaginative and that much money is spent on advertising which has no economic value. A perusal of this volume by the right sort of readers in England and in America ought to help advertising to become both more sensible and more efficient.

Attention is called to the fact that women are supposed to control about 80 per cent of the family purse. Women are influenced by style in dress and so it is logical to assume that they are influenced by style in advertising. A good point is raised when the question is asked, "Is feminine taste less refined than masculine taste?"

The fine tribute paid American advertisers by this distinguished critic of English art somewhat surprises me. He gives them first place in illustration, display, and printing, admits that American advertising is more profitable than British, and proves it by showing that the American advertiser has already invaded British markets successfully.

The point that the barrier which formerly separated art and commerce is being removed is emphasized again and again throughout the volume. The reader is asked to listen to this, as a group of art students listened a little while ago:

> In the old days, when the Church was the great art patron, all that there was of idealism, of devotion, of piety, was called for from the artist, and these qualities found their way into his work. Now, Commerce has taken, or is rapidly taking, the place of the Church. It is beginning to pay the piper. But is it to call the tune? So-called "Commercial Art" is already largely the art of the present; it will be increasingly the art of the future. Is this to be looked upon as "pot boiling"?

The matter of ethics is touched upon here and there throughout the volume as when the author insists that commercial art is not, like the famous razors, only meant to sell, and not to cut. Another illustration of direct quotation shows the ethical advance in advertising:

> The examples of art in advertising which I am privileged to reproduce should remind even the cynic that the old term of reproach, "It's only an advertisement"—a reproach justly earned by much dull and dishonest advertising in the past—is rapidly growing meaningless. Some of our advertisers are using the talents of the finest painters, illustrators, designers, and decorative artists of to-day, but we have still a long way to go before we reach the level of the best American advertisements.

The quotation just given is from the chapter "The Artist and the Business Man"—one of the best chapters in the volume. How practical are the suggestions for the young artist the following quotations will indicate:

> Bring to the business man's problem that breadth of vision and enthusiasm which you bring to your own work. You are using, in art, a medium which demands control, quick observation, decision, inventiveness. Use these invaluable qualities when you are given a business problem to solve.
>
> Try to see the point of view of the other fellow. Don't be too hasty; *think* before you start that drawing, or you may waste your own—and your client's—time.
>
> Don't rail at the business man, from whom you accept a clear and definite commission, if he refuses to accept an "idea of your own" which has suddenly occurred to you. Don't produce a piece of work which is a better advertisement for you than it is for the commodity which you were engaged to advertise. Don't smother your message in technique.
>
> Be decorative, by all means, but don't let your pattern become so involved or your symbolism so obscure that you play into the hands of the Philistine who is convinced that all artists are mad. Some of the latest achievements in decorative art tend towards the unintelligible. But there's plenty of hope. We are still only at the very beginning of the partnership between art and commerce.
>
> And I am prepared to protest, with the utmost vigor, against the sneer that art is "above the heads of the public." The great artists of the past would not have secured undying fame if their talents had been appreciated only by their brother artists, and if their messages had been too involved and technical to be grasped by the layman. Great art invariably delivers a direct message, and demonstrates its own big qualities with absolute clearness and simplicity. It possesses a character far above mere technique, whereas the experiments made by many groups of "moderns" are so concerned with technique that they only succeed in talking an unintelligible language.

I am not much of an artist, but I can see that there is a lot of common sense as well as art in the chapter "Pictorial Composition—Design and Layout." This chapter, incidentally, pays a fine tribute to Henry Lewis Bullen, curator of the American Typographical Library and Museum in New Jersey.

The chapter "The Art of the Printer" is the result of many visits on the part of the author to printing establishments in England. It shows that the introduction of art and good taste while adding very little to the cost of the job may tremendously increase its possibilities as a selling instrument. Descriptions of distinguished printing establishments in England and discussions of the type of work turned out are given in this chapter.

A companion chapter "The Advertising Agent and his Work" takes up the leading advertising agencies in England. I mention the fact that the firms whose work is discussed are arranged in alphabetical order lest the reader jump to the conclusion that they are arranged in the order of merit.

Special campaigns are taken up in the chapters "Art and the Railways," "Art and the Shipping Companies," and another chapter which groups together what is left, "Notable Advertising Campaigns." The railways in England, including London's underground, are well sold to the public—a fact impressed upon the reader as he turns the pages of the volume.

The chapter which undoubtedly has the most value for those connected with the advertising department of the newspaper is the one headed "Retail Store Advertising." This chapter raises many questions for which space can be found for only one by way of illustration:

> One does not doubt that the organization and purchasing-power of the big retail store enable it to offer the customer unusual service and value for money; one realizes that the success of a store is built mainly on these factors; but it is difficult to believe that the present orgy of blatant "bargain" advertising will continue indefinitely, or that there is a unique condition in regard to such publicity which isolates it from the advertising of other commodities. If Lever Bros. can sell, with artistry, bars of soap to the working man's wife; if Lyons' can sell cups of tea by means of beautiful window-displays and refined publicity; if the workman's beer and tobacco can be sold without offending the average sense of fitness; if public utilities and staple foods can be advertised with real distinction, it is hardly convincing to suggest that appeals to feminine taste in our national newspapers must, so often, completely disregard all consideration for attractive display.

It seems to me that I have noticed in some of the advertising of metropolitan department stores an influence of the copy printed in London newspapers by the leading retail establishments of that city. The Bok award at Harvard to the store of R. H. Macy & Co. of New York illustrates exactly what I mean in the preceding sentence.

The concluding chapter is what might be called an American supplement though it bears the official title "Art in American Advertising." When we hear so much criticism about American advertising it certainly is refreshing to read these words from such a competent authority as Mr. Bradshaw:

> I have heard many people attribute th artistic enterprise of American advertisers t the factor that "they've got the money to d it," and excuse our own artistic shortcoming by the general statement that we "can't a ford it." This attitude is unfair as well a unwise. It assumes that art is an expensiv luxury instead of a practical necessity, an infers that art in America is of very recen growth. As a matter of fact, America ha led the world for over forty years in regar to the production and illustration of popula magazines; and the encouragement which the give to artists, and the idealism which the show in regard to pictorial work, are onl natural developments of the enthusiasm fo art, which they have always displayed.

It should be borne in mind that th concluding chapter ought technically t include that work, previously printed i the volume, which comes from the Londo branches of American firms. The wor of Lord & Thomas of Chicago will d by way of illustration.

This comparison between the press o New York and London may be of inter est to American readers:

> The principal difference between the Ne York and London daily newspapers is in th greater variety of news which the America

A Rotogravure Magazine With Newspaper Timeliness

The New York Times Magazine Section of the Sunday edition combines the features of the best magazines with the timeliness of a newspaper. Its articles are written close to the news. Advertisements may be changed weekly, an advantage over the publication issued once a month. Each issue of The New York Times Magazine Section reaches more than 600,000 purchasers of the Sunday Times, approximately the same circulation as the combined total of five standard monthly magazines comparing in quality with The Times Magazine Section. Printed in rotogravure. Advertising rate, $1.00 an agate line.

225 Fifth Ave., New York

emand—which naturally affects the size of t papers. The *New York Times* often is es a 48-page daily edition and one of 160 es on Sunday. The American newspaper strikingly different in appearance from the litish—different in typography, illustration, le of display, quality and surface of newsper used. In America the newsprint gen-lly used is better both in color and surface. More attention is paid to advertisent typography and in the assembling or cing of the advertisement on the page.

By way of comment Mr. Bradshaw ds that Louis Wiley, business manager the New York Times, recently indicted in an amusing way the fundamental ferences by quoting these words of Stephen Leacock, "With us in America, e great thing is to get the news and out it to the reader; in England they t the news and then break it to him gently as possible." Mr. Bradshaw ds that "in Mr. Wiley's view, the Britnewspaper is designed to be read ietly at a slow breakfast, whereas in nerica it has to be read whilst a man hanging on to the strap of a clatterg subway express, or getting a shave, about to have his teeth drawn."

This last chapter mentions the fact that Associated Advertising Clubs of the orld was originally an American instition but now has international influence. refers to the Association of Newspaper dvertising Executives and prints the deils of one type of service offered to adrtisers by that association. It points th pride to another organization in merica—the Audit Bureau of Circulatins. It shows rather than tells that merica may be proud of its posters. It rvels at the co-operative advertising in merica. Warm words of praise are gen to the Advertising Typographers America for its "Code of Ethics" deed to "promote idealism and generous vice in business, and to develop the st artistic standards in the Craft of e Type."

The concluding note of the chapter as ll as that of the volume itself is nded by Ernest Elmo Calkins whose ent writings in the *Atlantic Monthly* ve frequently been mentioned in this deatment for their remarkable charm and chnique. Those who have a delicately usted receiving set that removes static r who have ear phones closely adjusted wl pick up the full meaning of the words Mr. Calkins when he broadcasts this phecy about the future of adverng in America:

dvertising "copy" shows a tendency to en into what the French so expressively *clichés*—stereotyped expressions of the al-worked copy-writer without sufficient maal, and barren of inspiration—the meanss superlative, the bests, unequalleds, unlasseds which are in themselves a confesc that there is nothing to write about. h results in the prevalence of what might called the "advertising tone of voice." re is a difference between the natural unoned expression of a good writer and the , uninspired grouping of words in the age advertisement. The next generation dvertising men has an interesting proame. What we have done is nothing to h they will do. The machinery of adverg is presented to them as a going con-. It has not outlived its usefulness, it has reached its zenith. On the contrary, it is beginning to realize its power, to vision possibilities.

ere the volume parks. I am going lo the same though in justice to the volume I ought to say something about its fine art work, its excellent typography, and especially the personal pleasure I have had in turning the pages. The last I am going to do in a letter to the author where there are no editorial instructions as to space available and where there is no danger of a blue pencil if I let copy run.

* * *

THE October issue of *The Iowa Journalist*—a monthly periodical published by The School of Journalism at The University of Iowa—has a number of interesting items. The issue opens with an account of some old Iowa printing presses. It concludes with "A Page for the Copy-reader" in which common errors of the desk are pointed out. In some respects the most important story is by W. R. Orchard, editor of *The Council Bluffs Nonpareil*, who contributes "Shaping the Newspaper Policy."

* * *

E. W. HOWE, who puts out a personal organ from Potatoe Hill Farm, Atchison, Kan., prints in his current issue an essay on common sense about press agents. He warns the reader not to imagine that the term refers only to the person who gets free "reading notices in the newspapers about a moving picture queen's art and lovers."

Some of the pivotal points in his chat are:

> The owner of one of New York's best newspapers once told me his greatest difficulty was to prevent his writers becoming Press Agents for their special friends and fancies;
>
> It is common knowledge that newspaper writers often pay their board with frequent references to hotels and restaurants;
>
> Every young woman who sings, or plays the piano, has a Press Agent; usually it is her mother.
>
> Well, it's that bad all over the world; there are big frauds to "work" the big papers, as well as little frauds to "work" the little papers.
>
> It's a cheap world; the newspapers cannot make it over.

Editor Howe reminds his readers that they like editors must "take the world as they find it, and blush and be careful."

* * *

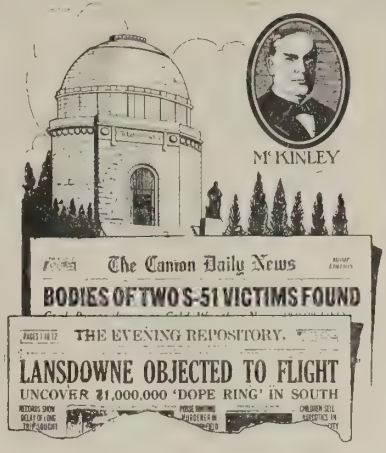
AN editorial in *The New Republic* for Oct. 7 discusses syndicated material in general and syndicated venality in particular.

It backs up the campaign of EDITOR & PUBLISHER to keep the news columns free from commercial taint. In a special mention of the editorial page appears this paragraph:

> In the midst of this smothering avalanche of canned journalism, one newspaper department long stood firm—anchored as the unyielding rock: the editorial page. The articles appearing thereon have frequently been terrible, but they have been the editor's own—or at least, his wife's or his maiden aunt's, or the aspiring reporter's. Every editor, however modestly incompetent he may feel in all other departments of the paper, is yet eaten up with the inward conviction that as an editorial writer he is a combination of Frank Cobb and Henry Watterson, retaining the best features of each and adding several merits of his own. The sheer bulk of dull and needless comment on the world's affairs, couched in platitudinous, bad English, which any one of these gentry has been in the habit of turning out in the course of a single day's efforts is almost beyond belief. Even in the exceptional case when he has not burned with the sacred fire himself, he has accepted the tradition that editorials should be numerous, voluminous and home-grown.

The comment in *The New Republic* then goes after a commercial organization which promises to deliver editorial mention for its client in at least 35 daily newspapers throughout the country at a total cost of $350. That this promise is not idle talk is proved from a testimonial from a satisfied customer. Pitiless publicity is the remedy.

* * *



THERE are almost 100 business and special libraries which contain books and data on advertising, according to the second nation-wide survey completed by the national Special Libraries Association. This is a decided advance over the 1921 survey which revealed less than 20 libraries claiming to have material in this field. New York City is particularly strong in its collections of advertising data but Chicago, Philadelphia, Boston, Detroit and other cities are evincing increasing interest.

Among the special libraries devoted to advertising are those maintained by Albee Corporation, Detroit Associated Advertising Clubs of the World, Association of National Advertisers, Barton Durstine and Osborn, George Batten Company, Erickson Company, Curtis Publishing Company, Philadelphia; D'Arcy Advertising Company, St. Louis; McCutcheon-Gerson, Chicago; MacMartin Advertising Agency, Minneapolis; Procter and Collier Company, Cincinnati; and Tel-U-Where Company, Boston.

The results of the survey have been published in the form of a national directory of special libraries, compiled by May Wilson, librarian of the New York Merchants' Association, and edited by Rebecca B. Rankin, librarian of the New York Municipal Reference Library.

THE Dallas Journal's rate, already attractive, has been made still more so by a combination rate with The Dallas Morning News.

The Dallas Journal

Imperial in McKinley's Home City

IMPERIAL is pleased to serve the two newspapers of William McKinley's home city of Canton, Ohio. The Canton Repository and the Canton News, two splendid newspapers, give the citizens of Canton up-to-the-minute news on world-wide happenings. Both depend on the Imperial Plus Plan.

There are three reasons why both of these Canton newspapers depend on the Plus Plan:

First. The Plus Metal Plan keeps their type metal in a perfectly balanced condition at all times.

Second. By keeping it constantly in balance the working life of their metal is extended by years.

Third. By adding years of life they are saved the cost of frequent new metal supplies and the expense of trouble with metals.

These three reasons should convince every wide-awake publisher of the advisability of using the Imperial Plus Plan for his metal.

Think This Over And Then Act

The Plus Plan is saving for hundreds of publishers by cutting down the overhead on metal. It can save for you. Send for a copy of the Plan now, read it carefully and convince yourself.

BUSINESS TICKLERS

COMPOSITE photograph advertisements are a new idea. Have a room furnished complete by as many retailers as will join in, a furnisher supplying the furniture, a jeweler the clock, an art retailer the pictures, a draper the clothes for a model representing the lady of the house, the gas company the stove, etc., etc. Reproduce a large scale photograph of this scene and give each retailer 250 words to talk about his goods as shown in the picture. It will create interest.—G. F. Wilkinson, London.

Much additional space has been sold by the *Long Beach Press-Telegram* through the inauguration of "Economy Tuesday." Starting out with a one-page spread it has now grown to two pages appearing each Monday evening. Each advertiser has an equal amount of space and advertising one special for the day. —Harold J. Ashe, Long Beach, Calif.

A page headed "From A to Z on the Map" with a cut of the city lettered showing the location of the advertisers is a regular weekly feature of the *Courier-Citizen* and *Evening Leader* of Lowell, Mass.—J. D. S.

Rotogravure advertising solicitors will find that they will be able to increase their business for fall if they begin at once to solicit Christmas business. A number of Des Moines firms have been sold on the Christmas business idea. It will work in your city.—E. R. Appel.

Did you ever try a "one letter a day" business directory? Run the A's one day, the B's the next, etc., so on down the line and sell your contracts accordingly. It's a new stunt that went big in an Illinois city.—B. A. T., Springfield, O.

Now is the best season of the year to play up photography. Emphasize the value of taking pictures of beautiful autumn scenes, great games in the sporting world, personal snapshots to keep for memory. Get the photography stores to insert special ads. They are sure to welcome the opportunity of a special drive.—C. E. Pellissier, Boston, Mass.

With the increasing popularity of the bus and the large number of lines that are being established newspaper offices are flooded with calls concerning bus schedules. The fact that the lines are operated by different concerns and seldom have a central terminal makes it difficult for the individual to get information. Daily and Sunday papers are finding it profitable to establish a bus advertising column. Here the terminals and schedules for each line are given. The *Worcester Sunday Telegram* is listing the terminals for each line at the top of the column and the bus lines it has been found are not only eager to advertise schedules of their different lines but appreciate the opportunity to get the information before the public. The advertising is carried in the same position in each edition of the Sunday or daily papers. The scheme has proved a substantial business getter.—James H. Guilfoyle, Worcester, Mass.

"Are you preserving you beauty?"

Under this caption the *Duluth News Tribune* runs twice weekly a half page of advertisements of beauty parlors. Twenty-two establishments advertise in the section.—S. K. D.

CANADIAN PRESS TO MEET

Semi-Annual Gathering to Be Held in Montreal Nov. 23

The semi-annual meeting of the Board of Directors of the Canadian Press will be held in Montreal, Que., on Monday, Nov. 23. Customarily this meeting is held somewhat earlier in the fall, but owing to the absence of President J. H. Woods, managing editor of the *Calgary* (Alta.) *Herald,* in Australia, where he attended the Imperial Press Conference, it was postponed. Mr. Woods will report on his trip.

A report by the special committee which has in hand the question of the establishment in Canada of property right in news, as has been accomplished by a number of the British oversea dominions, as well as by the Associated Press in the United States, will be an important feature of the meeting.

The only application for new membership is that of the *Oshawa* (Ont.) *Daily Reformer,* which asks for an evening paper membership. The Reformer recently absorbed the *Oshawa Telegram,* each being then tri-weeklies. The Reformer lately entered the daily field.

ready reference.—G. Harris Danzberger, Hartsdale, N. Y.

The *Brooklyn Eagle* is combining reader interest and circulation building in a Treasure Hunt contest to find the most valuable human treasures in its suburban territory. Any person may nominate as a "treasure" anyone who has served the community, done a courageous or kindly act of social value. Persons nominating those finally judged as the ten "human treasures" are given $25 each as prizes by the paper.—W. M. W.

The city library might be called the "port of missing articles." Librarians find everything from burnt matches to $1 or even $10 bills left in the books returned to the library. Every day an assortment of needles, thread, letters, money, business papers, cooking receipts and sometimes home-brew receipts are unknowingly left in returned library books. Unusually these have been placed in as bookmarks, or in a moment of absent-mindedness.—R. W. A.

HUNCHES

ONE DOLLAR WILL BE PAID FOR EACH "HUNCH" PUBLISHED

IF you have an Associated Charities or similar organization in your town real human interest stories and a public service can be entwined in a series of stories seeking homes for orphan children. One Pennsylvania paper at the present time is getting a page one lead out of this every day.—E. H. Derby, Greensburg, Pa.

A feature which has attracted attention through Colorado has been a series of articles written by newspaper editors of the state, on their home communities, for the *Sunday Gazette and Telegraph,* Colorado Springs. The series has run nearly a year without lapses and state bureau officials have declared it is the best compilation of scenic, farming, mining, and other resources that has been made. Already more than 40 editors have contributed.—F. McEniry.

The *Hartsdale Herald* has started an idea applicable to other small community publications. Under the reading "Capsule Information," the Herald is running weekly, important information. For example, the time that mails arrive and leave in both directions; emergency calls, such as telephone, police, hospital, etc; fire signals (siren); town officials and addresses; train service, denoting the time of arrival and departure of express or local trains; taxes, when due and where payable during the year, and other similar items. The Herald further advises clipping the articles, and pasting them or keeping them in a convenient place for

Advertise In Pennsylvania For Results

Many national advertisers and merchandisers appreciate the value of the Keystone State for sales promotion.

Every morning and evening and Sunday the sales appeal is brought directly to the prospective buyer through his newspaper—the one positive medium of intense reader interest.

The demand for any product of real merit must be created by intimate knowledge of the requirements or demands of the ultimate consumer.

Survey of your sales territory and also of the quality and quantity of newspaper circulation and advertising rates will convince you that at the lowest possible cost you can make your sales appeal to your reading audience with a closer intimacy than with any other form of printed salesmanship.

Pennsylvania newspapers will cooperate with you in your survey of this important market. They are supported by readers who will receive your announcements in good faith. Confidence in their own papers will be reflected in ready response to your advertising.

This list of newspapers offers quality and quantity of circulation.

and "The Market Place for 200,000 Homes!"

ELIZABETH HALLAM BOHN, Director of The New York Telegram Food Bureau, is a food specialist and authoritative writer of acknowledged repute.

Through her intimately helpful columns in The Telegram's two-page household section, and the influence of the Winifred Stuart Gibbs syndicated food features, advertisers get far more than a "bowing acquaintance" with the Telegram's 200,000 families in the Greater New York Market—they get sales *from* them!

The Telegram's woman's pages offer housekeepers what they most *want*—a close, daily touch with practical suggestions for the home and home comforts, food, hygiene, furnishings, decorations, etc., etc., building a powerful reader-influence, and a *receptive*, ready-made market—a CONSUMING market of 100 per cent interest.

Here is a recognized reader-influence that's building advertising prestige and clinching one unmistakable fact—it pays to SELL through Telegram columns, a *sales-making* force to be reckoned with in covering the Greater New York market. Is the Telegram on your next New York list?

200,000 Circulation!

The charts below represent three graphic reasons why publishers seeking to increase their National Advertising revenues should use The Chicago Tribune.

In the territory covered by The Tribune (Zone 7) are to be found 28% of advertisers doing a national business.

22% of the total number of advertising agencies are to be found in The Chicago Territory.

During 1924 28% of the money spent by National Advertisers in 29 leading magazines came from advertisers located in The Chicago Territory.

Not only in Chicago but in more than 1,000 other communities throughout Illinois, Indiana, Iowa, Michigan and Wisconsin, The Chicago Tribune is read every morning by an overwhelming majority of the manufacturers, bankers, lawyers, executives and business men generally.

Buying Space *to* Sell Space

FORTUNE has been exceedingly good to business this fall. Publishers have felt the exhilarating touch of prosperity as the valume of circulation and advertising gains can testify. But 1926 should see even greater gains. Even the most conservative of our business forecasters admit an unusually bright outlook for the coming year.

The Chicago Tribune has had a banner year. Circulation has increased and advertising revenues are the greatest in the history of The Tribune. In fact The Tribune has the largest revenues of any newspaper on earth; and this distinction is inseparably connected with the fact that The Tribune is itself a consistent and adequate advertiser of itself. So far this year The Tribune has spent $81,000 in other newspapers.

The Chicago Tribune not only *sells* advertising but *believes* in advertising and *buys* advertising.

This advertising schedule is as much a part of The Tribune's policy as its editorial policy.

The use of this space has been mainly to increase National Advertising by hard intelligent selling of National Advertising in individual papers.

The Chicago Tribune will be glad to give any other newspaper the benefit of its successful experience in the development of National Advertising. A request will bring a Tribune man who will discuss the use of Chicago Tribune space.

The Chicago Tribune
The World's Greatest Newspaper

Circulation Over 670,000 Daily and Over 1,000,000 Sunday

THE BIRTH RATE IS HIGH IN THE SOUTH AND THE DEATH RATE IS LOW

The population is rapidly increasing also because of the steady stream of new arrivals from all parts of the world.

There are certain economic forces at work, greater than the power of man to stay them.

These forces are attracting various industries to the South that have been considered a natural and permanent part of other sections of the industrial world. There is unlimited territory for the development and expansion of these industries and there will be available an abundant supply of suitable labor.

The South offers ample banking facilities. Public service is highly developed and supplied at low rates.

The South has been laying a foundation for present and future prosperity reflected in its cheap power, good roads and growing diversification of agriculture and industry.

They're busy down South—already rich, they're growing richer—the only visible idleness is voluntary—earning power is great—buying power is great.

Opportunity for distribution and sales promotion of commodities was never greater.

The newspaper was a factor in the wonderful development of the South.

The newspapers of the South will present your product to the territory they have helped develop. They will supply you with proper territorial information and merchandising cooperation.

Selling Footwear IN PHILADELPHIA

Philadelphia, having the third largest population in the United States, is naturally a very important market for the maker of shoes and stockings, shoe polishes and other things sold in Retail Shoe Shops.

With more than three million consumers in Philadelphia, Camden and their vicinity, it offers particularly attractive possibilities to those who seek a concentrated outlet for the products of their factory.

What local advertisers do is probably the best guide to national advertisers in sizing up the situation in any city. Nearly every Philadelphia retail merchant that advertises uses The Bulletin. Follow him, he knows!

Send for a free copy of THE BULLETIN ROUTE LIST OF SHOE DEALERS IN PHILADELPHIA AND CAMDEN. It will be of great help to your salesmen when calling on the trade.

DOMINATE PHILADELPHIA

Create maximum impression at one cost by concentrating in the newspaper "nearly everybody" reads—

The Evening Bulletin.

Landslide of Fall Trading Drives Press To New High October Linage Records

Some Papers Show 14 Per Cent Gains—Widespread Prosperity Reported—Brilliant Holiday Season Indicated—Year Totals May Smash Many Records—1925 Ranking With 1920

WITH frost on the pumpkin, savory mincemeat perfume in the air and the jingle of Christmas shopping bells faintly echoing across the continent advertising men are speculating on 1925 newspaper linage totals.

If the currents of business are not disturbed during the last quarter of the year 1925 will bulk its linage totals vastly in excess of those of 1924, which was also a first-class year. The present year of grace will put good old 1923 totals completely in the shade. Many newspapers are scoring new high records.

Reports received by EDITOR & PUBLISHER this week, detailing October advertising volume in the newspapers of some 25 key cities, show that the average run of paid space at the present time is from 10 to 15 per cent greater than during the Fall season of 1924.

Prosperity is in the air from Atlantic to Pacific, from border to border. Merchandise is everywhere in active demand, prices are favorable, the season is normal, crops are excellent, the people are employed, money is flowing and never before have advertisers used newspaper space to better advantage. Indeed, it is a commonplace among advertisers that judicious publicity is at present paying out the highest dividends ever known in the trade of this country in a normal year.

In the East October 1925 newspaper linage ran greatly in excess of last year's figures have completely out-distanced 1923. Take New York as the shining example. The aggregate linage gain of the newspapers was more than two millions, whereas October of 1924 fell short more than a million of the total for the same month of 1923. New York department stores, specialty shops and general retailers of branded merchandise are hotly contesting the field with some of the most brilliant advertising that the metropolis has ever seen. The press is bulging with this commerce. Rarely before have the streets been more colorful in a Fall season. EDITOR & PUBLISHER is informed that the New York stores are looking forward to the biggest holiday trade in history. Even now the stores are thronged with buyers.

October was the largest month in the history of advertising in Boston. A. H. Marchant, of the *Boston Post*, in a telegram received on Wednesday, said: "October broke all records for Post linage, as well as for some of the other Boston papers. The total increase in display advertising of the Boston papers over October of last year was more than a half million lines. The whole year, to date, has been the best ever known and the outlook for Fall, Winter and Spring is exceptionally good."

Philadelphia newspapers are having their share of prosperity, all reporting exceptional October gains, in instances breaking records. The same is true of Washington. In Wilmington October showed a heavy increase and the publisher of *Every Evening* wired: "Prospects for local business were never better and this applies to all classes of trade."

The Baltimore papers gained nearly a half million lines in October over the same month a year ago. "I look for continued record-breaking linage," said W. F. Schmick, business manager of the *Baltimore Sun*. "The majority of the stores are telling us that they are having their best season. Many new advertising accounts are breaking."

At Richmond, *The News-Leader*, according to a report to EDITOR & PUBLISHER, made an October gain of more than 72,000 lines. "Business conditions are fine. National advertising has been increasing constantly and the holiday outlook here is splendid," said the management of that newspaper.

Birmingham leaped ahead of October 1924 totals by more than a quarter of a million lines. "Conditions here indicate that we will break all records in 1925, including our banner year of 1920," the *Birmingham News* reported.

In Atlanta three newspapers during October published a total advertising linage of 3,739,952. Charles D. Atkinson, business manager of *The Journal*, said: "Atlanta bank clearances for several months have exceeded the percentage of increase for any other city of Atlanta's size. The post office receipts for months have surpassed the receipts for the corresponding month last year. The stores generally report the largest October business in their history. Prevailing opinion among Atlanta business men is that sales are based on the soundest foundation ever known here and that a steady increase can be expected, much more desirable than rapid inflation."

New Orleans newspapers stacked up a total October linage of nearly a million more than in 1924, and in that year they had a gain of more than 850,000 over 1923. One new morning paper has been add to the field, but business in New Orleans is breaking records in all directions this year and advertisers are using the daily press as never before. Said the management of the *Times-Picayune*: "We expect a total advertising linage of eighteen million for the year, which would be a million more than our peak year, 1920."

"Business conditions are excellent and the outlook on every side is good," reports the *Memphis* (Tenn) *Commercial Appeal*. "Our territory is picking a record cotton crop. The price has declined, but much of the crop was already sold at high price. We look for a wonderful holiday season." Menphis newspapers in October ran ahead of the corresponding month of last year, despite a huge gain then over 1923.

Florida press prosperity, of course, is simply amazing. For instance take the October figures for three newspapers reporting to EDITOR & PUBLISHER from Miami. These three papers carried in the month 10,500,212 lines, gaining nearly seven million over October 1924. Three Miami newspapers in October carried five eights as much advertising as all the New York newspapers. This business, naturally, represents in the main the astounding land boom. "The Miami Herald's total linage record for the first ten months of the year was 24,106,030, which exceeds the world's record, according to a wire received this week from Charles S. Bates, the advertising manager.

The *Tampa Tribune* carried 2,544,038 lines of advertising in October, against 1,083,736 in October last year. J. H. Hampton, the advertising manager, said: "Every indication points to continued improvement and big increases in the coming two months. We could carry more business if we had adequate facilities." These are but indications of the whirlwind of business that has overtaken the press of the "newly" discovered land of tropical enchantment.

Turning Westward the Fall prosperity reports to EDITOR & PUBLISHER were on a par with those of key cities in the east and south. In Chicago the aggregate October total of all of the newspapers ran more than a million lines ahead of the corresponding month in 1924. Chicago papers are breaking records. For instance, the linage for October for *Chicago Tribune* was the largest in the history of that newspaper. The business management of the Tribune this week reported: "Advertising men here expect record business to continue. Trading is remarkably active in every department."

The aggregate total paid linage of three newspapers of Cleveland ran ahead of the figures established last year by a third of a million. The October linage in three Indianapolis newspapers was 3,641,151, compared with last year's total of 3,149,991. The *Indianapolis News* management wired EDITOR & PUBLISHER: "This October was the biggest month in the history of the News and we expect excellent business in November and December." Total October linage in all Cincinnatti newspapers was 3,690,162, a gain over October of last year, of 153,720 and business there was said to be remarkably active. (See p. 4.)

BIG OCTOBER LINAGE GAINS IN TYPICAL KEY CITIES

Following are newspaper October linage records, selected at random, indicating the huge volume of paid space now running in the press of the country. The figures represent the aggregate linage of all of the newspapers published in each city, except where noted. On the basis of this comparison the average linage increase for October, 1925, over October, 1924, was about 14 per cent.

	October, 1925	October, 1924	1925 Gain	October, 1923	1924 Gain or loss
New York (all)	17,387,908	15,315,626	2,072,282	16,466,140	1,150,514*
Chicago (all)	8,824,605	7,710,093	1,114,512	7,406,350	313,743
Indianapolis (all)	3,641,151	3,149,991	641,151	3,057,516	92,475
Kansas City (all)	3,638,630	3,491,432	147,198	3,330,975	160,457
St. Louis (all)	4,904,920	4,624,620	280,300	4,311,240	313,380
Houston (all)	2,712,864	2,711,982	882	.....	.....
Cleveland (three papers)	4,461,856	4,094,482	366,374	3,963,764	130,718
Minneapolis (all)	3,437,012	3,217,794	219,218	3,349,523	131,729*
St. Paul (all)	2,920,078	2,389,170	530,908	2,416,756	27,586*
Fresno (all)	1,322,062	1,294,580	27,482	1,289,709	4,871
Cincinnati (all)	3,690,162	3,536,442	153,720	3,325,152	211,290
Baltimore (all)	4,913,607	4,497,219	416,388	4,867,060	369,841*
Memphis (all)	2,815,848	2,799,476	16,374	2,551,304	248,172
New Orleans (all)	4,238,479	3,317,839	920,640	2,458,329	859,510
Miami (three papers)	10,500,212	3,527,604	6,972,608	.....	.....
Birmingham (all)	2,928,618	2,663,906	264,712	2,470,454	193,452
Salt Lake City (all)	2,083,368	2,043,986	39,382	1,952,552	91,434
Total	81,390,308	71,893,392		(incomplete)	*Loss.

The following are the October advertising records for Minneapolis: *Journal,* 1,438,754, compared with the October 1924 record of 1,268,892; *Tribune,* October 1925, 1,452,365, against 1,411,505 for October last year; *Star,* 545,892, for 1925, compared with 537,397 for October last year. E. I. Harlow, advertising manager *Minneapolis Journal,* said: "There is every indication here that record business will continue."

St. Paul newspapers gained in excess of a half million lines in the October comparison. R. T. Snodgrass, of *St. Paul Dispatch Pioneer-Press,* wiring EDITOR & PUBLISHER said: "November will show still larger increases. It looks like a sure record year until the year's end. Excellent business in this district."

The total paid advertising of all the St. Louis papers in October this year exceeded last year's total by more than a quarter of a million and George M. Burbach, of *St. Louis Post-Dispatch* said: "Present indications are that the newspapers will enjoy an unprecedented volume of local and national advertising this year and at least during the early part of 1926. Conditions never looked better in St. Louis."

Substantial gains were made by all the newspapers at Kansas City: "All conditions are favorable for a big business during the rest of the year," the *Kansas City Star* reported. "Building permits, postal receipts, grain and live stock prices and local trading all go to indicate a healthy condition throughout the southwest. October 1925 was the Star's biggest month in advertising linage."

Houston, Texas, newspapers made a slight gain in October over last year and both Houston and Dallas reported to EDITOR & PUBLISHER that conditions in that state were first-class and that the outlook for holiday trade was excellent.

Salt Lake newspapers in October bettered the total of last year and the management of the *Salt Lake Tribune,* had the following to say: "The inter-mountain country and particularly Salt Lake's trading territory, has had a notable improvement in business conditions. There are bumper crops in both Utah and Idaho and prices are high for agricultural commodities. Conditions surrounding the Utah metal mining industry are basically sound and there is a marked improvement in live stock industrial conditions. These circumstances have united to create a most satisfactory condition. There is every reason to believe that Salt Lake's holiday season will show an increase of from 15 to 20 per cent over last year. During the past eight weeks the volume of retail trade has advanced from 15 to 20 per cent over the corresponding period of a year ago. Merchants are anticipating an equal or larger increase in December. Utah's crops on a price basis are valued at $55,000,000, or ten millions more than the farmers received in 1924. Utah business will run ahead of the peak year of 1919."

Tremendous advertising gains are reported for every month during 1925 over the corresponding months of the previous year by the *Denver Post* and the management of that newspaper said: "Business here is in splendid condition, with wonderful prospects for the balance of the year."

Los Angeles had a slight decline in October linage, under that of last year's October. The figures are as follows: For 1925, 7,469,140; for 1924, 7,507,052. In 1923 the aggregate October linage of the Los Angeles newspapers was: 8,589,840. Business conditions in Los Angeles are reported improved by I. R. Smith, advertising manager of *Los Angeles Times,* who predicts good trading conditions for the balance of the year.

J. A. Callahan, of *San Francisco Examiner,* wired: "The local situation is excellent and the outlook is good for record business until the end of the year. Examiner total October linage this year was 1,757,294 against last year's 1,650,717."

Total Fresno linage for October showed a substantial gain and business there is reported to be vastly improved.

Unprecedented favorable conditions prevail at Portland, the newspapers reporting significant October gains. For instance, the *Oregonian* said that its 1925 linage was the largest since October 1920 and that the indications were that the year would break all records except 1920.

At Seattle business activity is reported on a high scale with all of the newspapers participating in prosperity. The majority of people in Seattle are reported at work, and indication for the holidays unusually favorable.

These are snapshots taken on a hop-skip telegraph survey of the country by EDITOR & PUBLISHER, with many omissions of important centers and important newspapers, but highly significant of a bumper newspaper advertising crop in 1925.

PRESS CLUB BUILDING PLANS PROGRESSING

John Hays Hammond Named President, Temporary Board Directors, of $9,000,000 Club Home Project

WASHINGTON, D. C., Nov. 4.—John Hays Hammond has been elected president of a temporary board of directors of the National Press Club Realty Holding Corporation at a special meeting at which plans for the completion of the National Press Building, for which the corporation will act, were reported to have made considerable progress.

The building, to be erected at a cost of $9,000,000, is expected to be ready for occupancy by Nov. 1, 1926.

Besides Mr. Hammond, Henry L. Sweinhart, president of the National Press Club, John Joy Edson, James William Bryan and Harvey D. Jacob were chosen members of the temporary board. Mr. Sweinhart was elected vice-president; Mr. Edson, treasurer; and Mr. Bryan secretary.

"Our project is making rapid and favorable progress," Mr. Sweinhart said. "Applications for office space are pouring in upon us. A number of leading newspapers have already taken space. There is every indication that the new building will house a majority of Washington correspondents, many of whom have already 'signed up' for space. Special arrangements have been made for the most adequate telegraph and telephone service. We are certain the new building will prove a real headquarters for the active working newspaper correspondents of Washington, and one in which the newspapers represented may take a genuine pride as reflecting the growing importance of national journalism."

BUY MARYSVILLE DEMOCRAT

McKechnie Group Take Coast Daily at Reported $85,000 Price

The *Marysville* (Cal.) *Democrat,* afternoon paper, has been sold by Arthur W. Gluckman to a group of newspaper men headed by Fred W. McKechnie, Jr. Formal announcement of the sale was made Monday, Nov. 2.

The sale includes all of the newspaper property and a job-printing establishment in connection. No official announcement of the selling price was made, though reports placed it at $85,000.

Mr. Gluckman, who purchased the Democrat ten years ago, is president of the Marysville Chamber of Commerce and has been active in fraternal circles. He will retire from newspaper publishing.

Mr. McKechnie will be president of the new company and editor of the paper. Before coming to the Pacific coast, Mr. McKechnie was an editor of the Newspaper Enterprise Association at Cleveland and later managing editor of the *Cleveland Press.* Upon coming to the coast he was placed in charge of the United Press bureau at Portland and subsequently became managing editor of the *San Francisco Daily News* and the *San Francisco Bulletin.*

His last newspaper connection was as publisher of the *Sacramento Star,* which was purchased within the last year by the *Sacramento Bee.*

Associated with Mr. McKechnie as manager of the mechanical departments of both the newspaper and the commercial printing establishment will be Clarence A. Davy of San Francisco.

The *Marysville Democrat* is a client of the United Press.

LEARNING HOW TO ADVERTISE

NEARLY 400 advertising men and women are enrolled in what the Advertising Club of New York claims is the largest class in advertising ever held by anybody anywheres." The exact enrollment is 386. Ernest Eberhard, is chairman of the club educational committee, consisting of Robert K. Leavitt, Daniel S. Tuthill, and Mathew Beecher. The class in session is pictured above.

Other lectures are scheduled.

It had been planned to hold sessions of the course in the Advertising Club building, but so many students applied that it was necessary to take the class to larger quarters in the 23rd street branch of the Y. M. C. A. On Oct. 29, A. T. Powers, of the Powers Reproduction Corporation, lectured on Photo-Engraving, the members of the class being conducted through his modern plant.

Newspaper-Stage Romance

William Dowdell, city editor of the *Cleveland Press,* was married Oct. 19 to Mae Jenson, vaudeville dancer. The romance started when Dowdell was connected with the New York office of the United Press. He was sent to Boston to cover a murder trial in which Miss Jenson was a witness.

Cornelius Vanderbilt Jr., Under Knife

Cornelius Vanderbilt, Jr., publisher of tabloid newspapers, was operated on Nov., 3, in Atlanta, Ga., for the second time within two weeks for an infection of the jaw. The ailment is due to his being gassed in the World War.

PAN PRESS MEET T PROBE NEWS PROBLEM

A resolution was also adopte authorizing the chairman of the Gover ing Board to designate the members the committee on program of the Sixt Pan American Conference. The Secr tary of State was elected chairman this special committee.

FRENCH WRITER IMPRESSED BY U. S. NEWSPAPERS

By G. Langlaan

PARIS, Oct. 20—Gerville-Reache, one of the French correspondents, who came to the United States with the Caillaux debt commission was impressed by the thorough organization of American newspapers.

"In a general way, I was struck by the marvellous organization, the rapidity and the highly developed technical nature of the American press," he told EDITOR & PUBLISHER. "It is needless to say that in France we have no comparable methods even in our biggest newspapers, circulations of which, nevertheless, are superior to those of American dailies, although the importance of our French papers from the point of view of the number of pages and advertising carried is much less. French newspapers are more condensed, more concise, but not so free as American papers nor so firmly based on revenue producing advertising."

TRAIL BLAZERS OF ADVERTISING

Fascinating Story of Barnum's Publicity Hokum

by Chalmers L. Pancoast

COPYRIGHT 1925 BY EDITOR & PUBLISHER CO.

Barnumopsis

"When to the common rest that crowns his days,
Dusty and worn the tired pedestrian goes,
What light is that whose wide o'erlooking blaze
A sudden glory on his pathway throws.
"It is the Drummond Light that from the top
f Barnum's Massive Pile, sky-mingling there,
Darts its quick gleam o'er every shadowed shop,
And gilds Broadway with unaccustomed glare."

"Barnum's Parnassus" 1855.

Chapter I

THE spirit of P. T. Barnum is found today on Broadway. His publicity eas and schemes still gild Broaday's glare. If he were on earth at this oment, this publicity giant would have sky-voiced newsboys yelling "Wuxtra! Wuxtra! All about P. T. Barnum the Vorld's Greatest Humbug! With wonrs new and strange, with monsters aly and scarey!"

Most humbugs have been advertising en, but not all advertising men are mbugs.

Old Barnum—Prince of the Humbugs and Buffalo Bill, the famous Indian cout and showman were my boyhood roes. That is the reason I associate em with myself and other schemers.

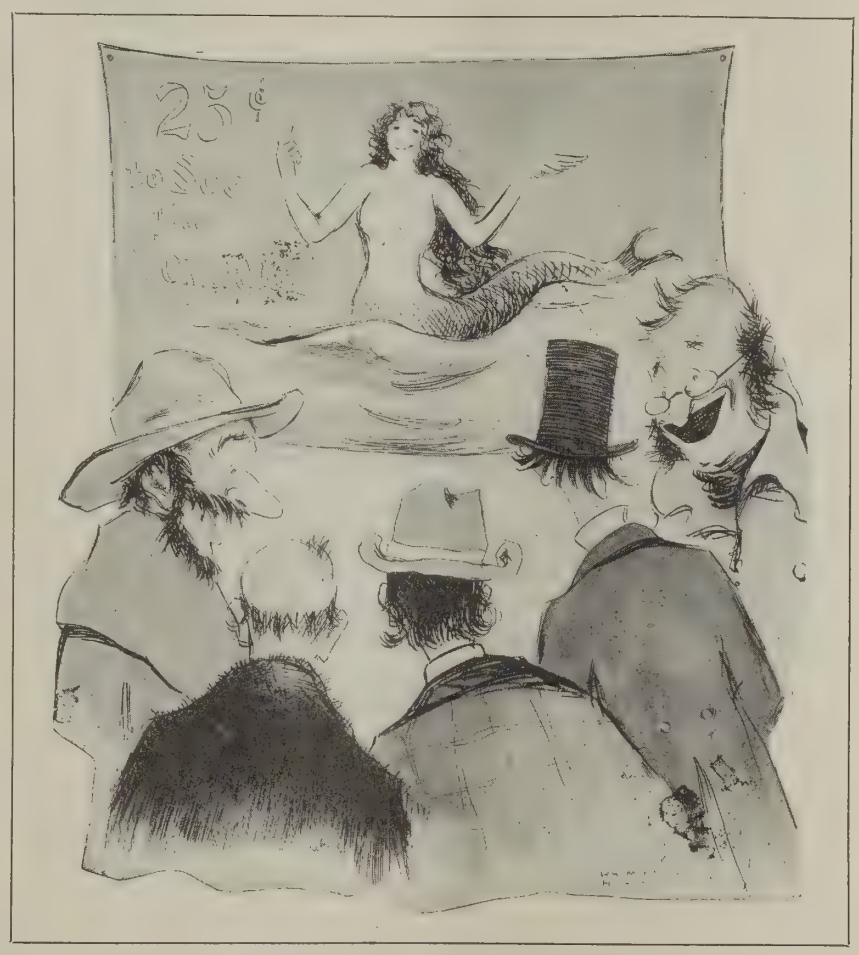
The titles of "Humbug," and the Prince of Humbugs," were first applied Barnum by himself. They were his dvertising slogans to hit the public hard ad carry along the notoriety of his sentional schemes and hoaxes.

Barnum was America's first GREAT dvertising man. The question has often len asked "Was Barnum the humbug claimed to be?" No! That was just e of his many clever ways of advertisig himself. It was the most sensational blicity of those times, or any period nce then.

He won fame as a fake and a humbug, torious fame, but he started it all himlf. It was just a clever piece of pernal publicity.

It takes a wise man to proclaim himself humbug nationally, keep it going and ake the people like it. Barnum made s humbug advertising so attractive it oled people and they ate it up and ied for more. It made such a hit that ey still talk about Barnum and quote s famous remarks. His schemes and nts worked so well that they were pular for 50 years following. His cus methods are still as powerful toy as they were in 1850.

There is something very fascinating out the advertising of yesterday. Oldnes and old-timers come in for a lot discussion these days because times ve changed so abruptly.



The great change in American life in t past 25 years has been brought about advertising—but not Barnum's kind advertising.

Looking backward to the old days and old-time methods, one is struck by the narkable change that has taken place inthis dignified, scientific business which w refuses to be classed as a "game."

We hear a great deal about the romnce and adventure of the "old newsper game" the "old writing game," the "d selling game," and "the old adverting game." In comparison the "games yesterday" present a striking contrast wh the science of the newspaper and advertising business of today.

Barnum was America's first great scheme, stunt and lottery advertising man. He made a "game" out of advertising, because he used the power of publicity to attract the people in mobs.

FROM a lifetime spent in all phases of advertising, Chalmers L. Pancoast has written "Trail Blazers of Advertising" which is to run serially in EDITOR & PUBLISHER. *Now vice-president of the Charles C. Green Advertising Agency, New York, Mr. Pancoast looks to the days when, as a boy, he made his professional debut as a handbill passer for the Kickapoo Indian Medicine Tent Show in Newark, O. As a cub reporter on the Newark (O.) Tribune and later as a frontier newspaperman on the Albuquerque, New Mexico, Citizen and other southwestern papers, he saw at first hand the flamboyant beginnings of advertising in those early days. Later he became an advertising solicitor and copy writer working for many mid-western newspapers, magazines and agencies. Before joining the Charles C. Green Agency he was successively manager of the Eastern office of the Chicago Tribune, and manager of the Eastern office of Liberty Magazine.*

The yokels came to gawk and remained to pay when Barnum flung out his screaming canvases advertising the "Feejee Mermaid." His freak was only a repulsive little sea animal having little resemblance to human form.

Barnum played the "advertising game" as it has never been played before, or since his time. He was always shouting about himself or something he had to sell the public, and making it sensational by stirring up controversy. He critised his own stunts, but no one knew he started the fight.

In one of his early autobiographies, written in 1854, he used this dedication:

"To the Universal Yankee Nation of which I am proud to be one, I dedicate these pages, dating them from the American Museum, where the public first smiled upon me, and where henceforth my personal exertions will be devoted to its entertainment.

P. T. Barnum."

Barnum knew the value of tempting advertisements; especially those which shocked people, then produced harmless laughter. Barnum knew mob psychology before the name was coined. He tickled the nation's funny bone by advertising himself as a humbug. He knew people would believe him if he gave himself a black eye, and yet would not take him too seriously.

Barnum started advertising himself in minute detail when in 1855 he wrote "The Life of P. T. Barnum Written By Himself." In this first volume he says:

"My career has been a checkered one—my life has been a merry one—I have looked chiefly on the bright side of things—I have not covered up my so-called humbugs, but have given a full account of such schemes as 'Joice Heth,' the 'Fejee Mermaid,' and the 'Woolly Horse.' The fame of 'General Tom Thumb,' the musical campaign of Jenny Lind—though a portion of my 'confessions' may, by some, be considered injudicious I prefer frankly to 'acknowledge the corn' wherever I have had a hand in plucking it."

The advertising schemes back of promoting General Tom Thumb and Jenny Lind, the Swedish Nightingale were the marvel of the early forties and fifties.

Barnum first started his publicity game in money-making lotteries. In those days lotteries were patronized by both church and state. People would gamble in lotteries for the benefit of a church in which to preach against gambling.

Barnum's first advertising venture was to concoct schemes which would be attractive and popular.

One church scheme he worked was a novelty. He advertised, "Not a blank in the Lottery." It was a winner; for while the price of a ticket was $5, 11,400 out of a total of 12,000 prizes were set down at $2.50 each. Barnum says—"Never was a lottery so popular (before it was drawn) as this."

Barnum turned everything into advertising. When he was editor of a weekly paper, *The Herald of Freedom,* he was indicted and sent to jail for a story about a dignitary of a church being guilty of taking usury of an orphan boy.

When he was released from jail the event was extensively advertised as: "P. T. Barnum and a band of music in a coach drawn by six horses made a triumphal march. The procession commenced its march amidst the roar of cannon and cheers by the people who escorted the editor from the jail to his home."

Chapter II

Some of Barnum's Hoaxes

"Barnum in search of wonders new and strange,
Grasped the wide skirts of Nature's mystic robe;
Explored the circles of eternal change,
And all the dark chambers of the entire globe."

THE most interesting book I have in my collection is the Autobiography of of P. T. Barnum which was issued in large editions and sold at his circus performances and given away by P. T. to his friends.

At the beginning of this book, written in 1854, he says: "I have been in jail in palaces; I have known poverty and abundance; I have traveled over two continents; have encountered all varieties of men, and have often been in imminent personal peril. In all this I have had some sad experiences, but, on the whole my life has been a merry one."

In perusing the old volume it is evident that Barnum was inclined to be ludicrous, which made him a success as an advertising man. After Barnum came to New York to live, he wrote: "Every morning at sunrise my eyes were running over the columns of 'Wants' in the *New York Sun,* hoping to hit on something."

This advertisement started him on his career as an advertising showman:

"Curiosity—the greatest natural curiosity ever witnessed, viz, Joice Heth, a negress age 161 years, who formerly belonged to the father of Gen. Washington."

Barnum purchased Joice Heth and reaped his first golden harvest exhibiting her at Niblo's Garden. His advertisements had the unique appeal of patriotism and curiosity. They were founded on a keen insight into human nature.

Barnum's great publicity stunt was secretly to start a controversy, which always resulted in priceless newspaper publicity. He circulated report that the aged negress was a mechanical automaton and the crowds came surging. No one would have doubted his advertisements if he had not questioned them anonymously in the newspapers.

The Joice Heth hoax started a battle between the editors of the *Sun* and *Herald,* which was profitable for Barnum, and a lot of fun for the public. Hundreds of dollars worth of free publicity was obtained as a result of this wordy battle.

His circus day advertising stunts were exciting. While running his first traveling circus he had advertised negro songs. His negro impersonator abruptly left

SYRACUSE JOURNAL SOLD TO HEARST

Consolidated With Telegram and Sunday American With Harvey D. Burrill as Publisher—Price "In Excess of $1,000,000"

(*By Telegraph to* EDITOR & PUBLISHER)

SYRACUSE, N. Y., Nov. 4.—Harvey D. Burrill, publisher of the *Syracuse Journal*, announced tonight the consolidation of the *Syracuse Telegram and Sunday American*, Hearst newspapers, with the Journal. This consolidation in the evening field leaves the *Syracuse Herald* as the only opposition evening newspaper.

HARVEY D. BURRILL

Beginning Thursday the two newspapers are to be issued as one with the title of *Syracuse Journal-Syracuse Telegram.* The American will be issued Sunday as usual. Both papers will be issued from the Journal plant and one of the Hearst presses will be moved to the Journal building.

The articles of incorporation filed at the County building today state a new corporation, called Syracuse Newspapers, Inc., has been formed to effect the consolidation of the Journal with the Hearst interests. Negotiations have been going on for about two weeks.

The directors of the new corporation will be Harvey D. Burrill, Stewart F. Hancock and William Randolph Hearst.

Mr. Burrill declined to make a direct statement relative to the control of the stock and other details of the financial transaction, but it is understood Mr. Hearst will have a controlling interest of stock, following negotiations with Journal stockholders.

The price paid for the Journal could not be definitely set until an accounting is made, but a member of the Journal organization stated it was in excess of $1,000,000.

The Journal staff will be retained intact, except that it will be augmented by some members of the Hearst organization to take care of the Sunday American and the general expansion. The Journal has not issued a Sunday paper. There will still be three Sunday papers, the *Post-Standard*, regular morning daily, the *Herald* and the *Sunday American.*

About 100 men in the Hearst organization will be affected by the consolidation, but in most instances they will be given the opportunity to go elsewhere with the Hearst interests. By organization of the new corporation the consolidation of the unionized mechanical staff of the two papers will result in a majority of the Journal men being retained and some of the Telegram staff added to produce the combined papers.

The Journal building, a splendidly equipped modern newspaper plant, was built about ten years ago and devoted exclusively to newspaper publication. It is two stories high and the presses are located in the basement. The Telegram building was bought by Hearst when he started the paper three years ago last September. The size of the building was doubled and opened for the use of the paper last spring. This building will be sold and the equipment disposed of here and elsewhere in the Hearst organization.

Removal of some equipment from the Telegram to the Journal office began late Wednesday afternoon, though official announcement of the consolidation was withheld until Thursday.

The incorporation papers of the new company provide for the issuing of 100 common shares of stock of no par value. The incorporators are: T. E. McEntegart, R. F. McCauley and E. M. Kent. W. A. DeFord, one of Mr. Heart's attorneys, is attorney for the new corporation.

The officers of the Syracuse Newspapers, Inc., are: Harvey D. Burrill, publisher and president; Stewart F. Hancock, vice-president; Louis D. Burrill, secretary; M. M. Andrews, treasurer. These officers are the same as the former Journal organization.

"While Mr. Hearst is a director of the consolidation," said Mr. Burrill, "I am still in direct charge of the Journal."

Mr. Burrill has been connected with the Journal for nearly 40 years. He started in the capacity of newsboy, became a reporter and gradually arose to the office of president and publisher three years ago.

The Journal is one of the oldest newspapers in the state. It was first published as the *Western State Journal*, a weekly on March 20, 1839. The Syracuse Daily Journal appeared for the first time on July 4, 1844.

The repeated rumor that a morning paper would be issued by the consolidation was met by the statement by Mr. Burrill that "nothing of that sort has been contemplated as yet."

When Mr. Hearst started the Telegram in Syracuse he made overtures to the Journal with the idea of purchase, but his offers were refused.

The following announcement was published in the combined newspaper Nov. 5:

"With this issue the Syracuse Telegram and the Sunday American are consolidated with the Syracuse Journal, and hereafter these newspapers will be published from the building which has been the home of the Journal at the corner of East Fayette and Montgomery streets.

"Harvey D. Burrill will be president of the new corporation, which will be known as the Syracuse Newspapers, Inc., and publisher of the consolidated newspapers. The other officers will be Stuart F. Hancock, vice-president; M. M. Andrews, treasurer, and Louis D. Burrill, secretary. The directors will be Harvey D. Burrill, William Randolph Hearst, and Stuart F. Hancock.

"Under Mr. Burrill's management, there will be no change in the policies, aims, and purposes, maintained by him during his long connection with the Journal. The consolidated newspaper will continue to be a Syracuse institution, independent in politics, and devoted to the best interests of the public.

"The Journal combined with Telegram, and Sunday American, foremost in their respective fields, means circulation supremacy in central New York State, and assures the reading public of continued service by giving them a greater and better newspaper.'

"Warfare between the newspapers in Syracuse has now ended," the Hearst management in New York declared to EDITOR & PUBLISHER.

"With one newspaper made from two, there is now room for all the newspapers remaining in the Syracuse field. It has been a logical merger of the daily of large circulation and no local advertising with the daily of less circulation, but large local department store advertising."

In New York it was also stated that the penny price, inaugurated recently on the Telegram to increase circulation, would now go up to the three-cent price on the street for the Syracuse Journal-Syracuse Telegram.

The John Budd Co., Inc., will continue to act for the paper as special advertising representative.

Department Store Buys Big Space

Chicago, Nov. 5.—All sales records of the Boston Store were broken this week, when the firm celebrated its semi annual Netcher Day, established by Charles Townsend and Irving Netcher in honor of their father, the founder of the store, which is now managed by his widow, Mrs. Mollie Netcher Newberry. In preparation for the celebration the firm carried 6 full pages of advertising in the *Chicago Daily Journal*, 7 in the *Chicago Evening American*, and a section of ten pages in the *Chicago Daily News* on Nov. 3, announcing bargains in every department on the next day. In addition 4 pages of advertising was distributed among 7 foreign language newspapers. In each of the English newspaper offices it was said the use of such large space on a single day was without precedent.

STAR-TELEGRAM BUYS FORT WORTH RECORD

Amon G. Carter Completes Deal Purchasing Opposition Daily from William Randolph Hearst Properties Merged

(*By Telegraph to* EDITOR & PUBLISHER)

FORT WORTH, Tex., Nov. 3.—The first of the newspapers which William Randolph Hearst purchased in Texas, the *Morning Record* of Fort Worth, was sold by Mr. Hearst Nov. 1, to Amon G. Carter and associates, owners of the *Fort Worth Star-Telegram.*

AMON G. CARTER

The transaction, which is an outright sale and was handled on a cash basis, became effective at midnight and all Sunday editions of the Star-Telegram appeared as the *Star-Telegram and Sunday Record* Nov. 2.

Publication of the Record as a six-day morning paper under the name of the *Record-Telegram,* and serving the city and suburban territory only, began Monday morning from the Star-Telegram plant. The Sunday Record has been discontinued, the new Sunday paper being a combination of the best features and departments of the two former papers. There will be no changes in either the name or editions of the *Star-Telegram.*

The subscription price of the Daily Star-Telegram and the Sunday Star-Telegram and Record will remain 75 cents. The price of the six-day morning Record-Telegram and the Sunday Star-Telegram and Sunday Record will likewise be 75 cents a month. The price of the six day morning Record-Telegram, without the Sunday edition, will be 10 cents a week or 45 cents a month.

However, for those who desire a morning, afternoon and Sunday paper delivered in the home the price for all will be $1 a month. 13 issues a week delivered for the flat price of $1. To subscribers, who have been taking heretofore both the daily and Sunday Star-Telegram, and the daily and Sunday Record, this will mean a reduction in subscription price of 50 cents a month.

Street sale and news stands prices follow: Daily Morning Record-Telegram 5 cents; Sunday Star-Telegram and Record 10 cents; afternoon editions of the Star-Telegram in Fort Worth 2 cents. These prices are the same as in effect now with the exception of the afternoon editions of the Star-Telegram, where the price has been reduced from 5 cents to 2 cents a copy.

Rumors about a change in the ownership of the Fort Worth newspapers had been rife for several weeks, some believing the Hearst paper would absorb the Star-Telegram and vice versa. However, members of the Record editorial staff found an unsigned notice in their local room seven days before the sale, announcing the impending deal. About 15 of the Hearst men went to the Star-Telegram editorial department, while the rest were able to get located elsewhere.

The Star-Telegram will maintain all of its State editions as at present, adding two in the early morning for the Record-Telegram, namely at 1:15 A. M. and 2:30 A. M.

The Star-Telegram was established in 1909, as the union of the Telegram and the Star. Amon G. Carter, president and publisher, has been at the head of the publication since it started its rapid growth in 1909. In addition, Mr. Carter is an important factor in the growth and development of Fort Worth and West Texas. He is president of the Texas Technological College board or directors, now erecting a $2,000,000 state school; president of the Fort Worth Club, which is building a $1,200,000 structure in Fort Worth and active in the development of Texas and Fort Worth.

Starting Nov. 2, the Star-Telegram which had a circulation of about 130,000 is issuing the following editions: 11:3 A. M.; 2:30 and 3:30 P. M. (home editions); 4:30 (financial); state editions 6, 7, 8, 8, 9, 10 and 11 P. M. and the morning editions at 1:15 and 2:30.

Star-Telegram executives in all departments are in control of the Record Telegram.

In purchasing the Record, that newspaper passes into the ownership and under the control of men who own and operate the Star-Telegram, all of whom have been connected with this newspaper in various capacities since its start. The ownership of the Star Telegram has not been affected by the purchase. These men are Amon G. Carter, A. L. Shuman, Bert M. Honea, H. V. Hough and J. M. North, Jr.

The Star-Telegram and Record-Telegram have 24 hour service from three Associated Press leased wires, one Consolidated Press leased wire, one Times Tribune wire and International News Service.

Executives of the Hearst organization in Fort Worth have returned for the most part to the Pacific coast.

Col. D. D. Moore, publisher of the Record, who came to Forth Worth from New Orleans for Mr. Hearst, will remain in Fort Worth, it is understood. Col. Moore started his newspaper career in Fort Worth as a printer a quarter of a century ago.

Mr. Hearst's other Texas newspaper is the *San Antonio Light.* He owned the Record 30 months.

CO-EDITORSHIP SPLIT ON CHICAGO TRIBUNE

Patterson to Establish New York Headquarters to Direct Daily News and Liberty—Col. McCormick Remains Chicago Chief

CHICAGO, Nov. 4—Division of the co-editorship of the *Chicago Tribune*, the *New York Daily News* and *Liberty*, was announced here today. The official announcement follows:

"Due to the growth in size and scope of the Chicago Tribune and its related enterprises, important changes in administration have been put into effect as of Nov. 1.

"Hitherto Robert R. McCormick and Joseph M. Patterson, co-editors and publishers of the Chicago Tribune, the New York Daily News, Liberty Weekly, and the paper manufacturing industries of these publications, have divided their time between Chicago and New York.

"During the coming year Mr. Patterson will establish his headquarters in New York and administer the affairs of the News and Liberty. Col. McCormick will stay in Chicago and manage the Tribune and the paper mills.

"Mr. Patterson will remain president of the News and Liberty Weekly and vice-president and secretary of the Tribune. Col. McCormick will remain president of the Tribune and first vice president and treasurer of the News and Liberty Weekly. The directors of the different companies will remain as now constituted with William H. Field and Max Annenberg added to that of Liberty Weekly.

"S. E. Thomason, at present second vice-president and business manager of the Chicago Tribune, remains in Chicago as second vice-president and general manager of that newspaper.

"Max Annenberg, circulation manager and director of circulation of the Tribune publications, will move his residence from Chicago to New York to become second vice-president and general manager of Liberty Weekly, Inc.

ROBERT R. MCCORMICK
JOSEPH M. PATTERSON"

Don Marquis Yale Lecturer

Lectures in the Bromley lecture course at Yale, founded in memory of Isaac H. Bromley, long editorial writer on the *New York Tribune* will be given late this winter by Don Marquis, former newspaper columnist.

N. Y. HONORS FOUNDER OF ITS FIRST PAPER

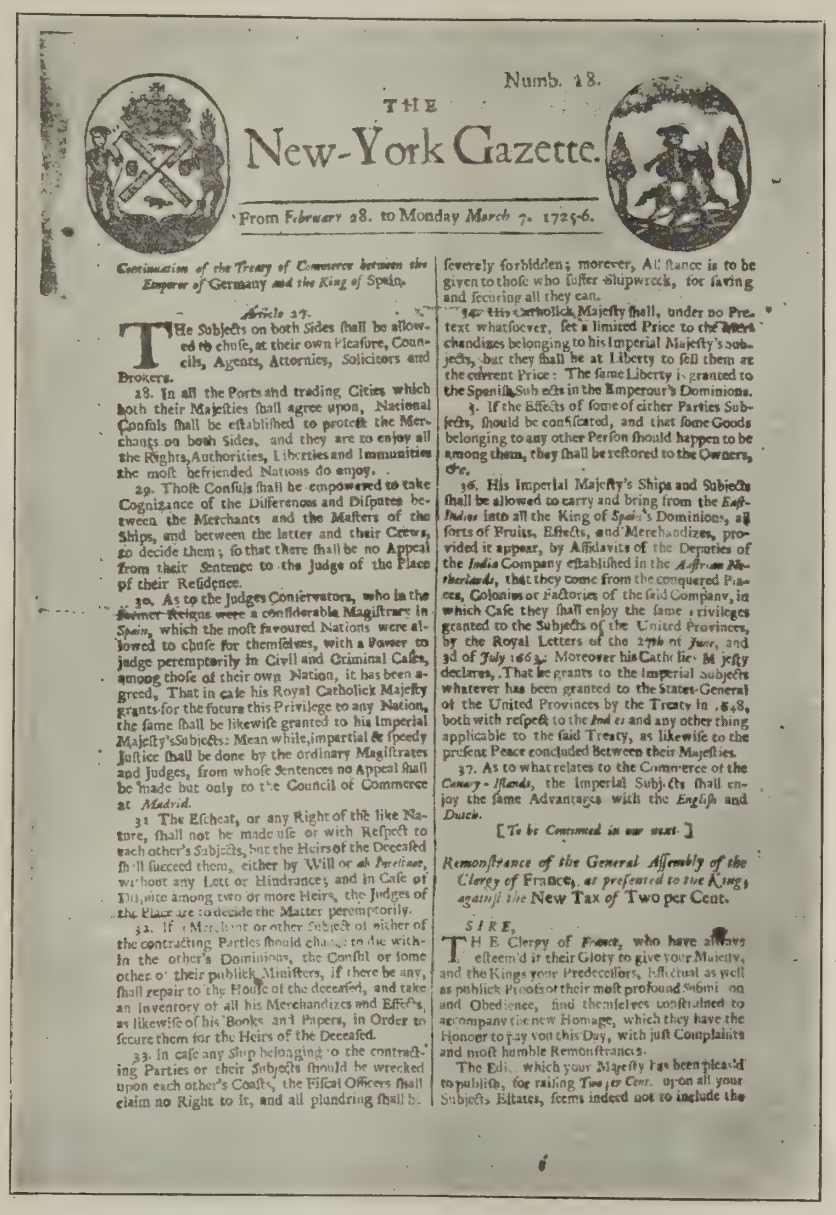
Printing Craft Marks 200th Anniversary of William Bradford's New York Gazette, Started Nov. 8, 1725—Trinity Church, Newspaper Club and Typographical Union Pay Tribute to Pioneer Publisher

By MARION R. LELAND

NEW YORK with its many highly developed and specialized papers is nding time this week to remember and ecognize the two hundredth anniversary f the birth of its first newspaper. On Jov. 8, 1725, William Bradford, whose rint shop was on Hanover Square, began ublishing the *New York Gazette.*

Recognizing the historical importance f this anniversary the event will be fitngly celebrated by various organizations. 'he diversity of these organizations is ıteresting to note. During the present 'eek the New York Historical Society nd the New York Society Library—the ldest library in the city—will have on pecial exhibition imprints from the Brad-)rd press.

Trinity Church, ever faithful to its istoric traditions, will on Nov. 8 hold memorial service in honor of New ork's first newspaper and its publisher, ho was for years a vestryman in nis church which has stood through lmost three centuries with welcoming oors in the midst of the city's materialtic growth. Inside the inner gate on ıe north side of the church-yard one of ıe most conspicious stones is that which iarks the grave of William Bradford—mecca for printers visiting the city. or the present commemorative date 'ypographical Union No. 6 has arranged) see that this grave is suitably decorated.



Emphasizing Bradford's importance in merican newspaper annals the New ork Newspaper Club will serve a special unday supper at which fitting tribute ill be paid to the city's pioneer printer ho also had the honor of being the first rinter of the middle colonies.

Sharing the general unrest of those in ngland who sought greater freedom radford came over in 1682 with William enn to see what "Penn's Woods" had offer a printer. Having helped in the ilding of the first log houses in that ilderness, and satisfied that the new ountry and the rule of Penn would be his liking he sailed for England to ocure the press and type for use in the ade which he had been taught by his ther-in-law, Andrew Soule, in London. eturning shortly to America with his mily and plant equipment he set himlf up to do general printing in the uaker city of Philadelphia.

Trouble with the Quakers and with vernment authorities over the freedom the press made Bradford willing to cept the offer of Governor Fletcher to me to New York as "Printer to the rown" at a salary of 40 pounds *per nnum.* He took with him his son, ndrew, who after learning the printing ade in New York returned to Philalphia to become its printer and postaster. In 1719 the son anticipated his ther's paper by starting the *American 'eekly Mercury,* the first newspaper in le middle colonies and the third in merica. In New York, the father encuraged the son's paper by selling copies the Mercury in his own shop.

The success of the Mercury may have ll Bradford to decide upon his own ırnalistic venture. Interest in the Mercry and in the *Boston News Letter*—eady published for 21 years in Boston—s well as the avidity with which foreign pers were awaited and read in the blic taverns of New York encouraged adford to believe that the time was pe for the publication of his *Gazette.*

The date on which the first issue of th *New York Gazette* appeared is usually eoneously given in encyclopædias and rious books of reference—to say nothin of recent magazines and newspaper aicles. The erroneous dates are either Ct. 16 or Oct. 23, 1725. Unfortunately n issue of the first number, nor of the llowing 16 has yet been brought to ht for modern historians. The earliest known issue being Number 18 for March 7, 1725-26 of which the first page is here reproduced. Dr. James Melvin Lee, in his "History of American Journalism" has proved conclusively by taking this issue and working backward, (providing no issue was skipped) that the initial date of publication was Nov. 8, 1725.

Numb. 18.

THE

New-York Gazette.

From *February* 28. to Monday *March* 7. 1725-6.

Continuation of the Treaty of Commerce between the Emperor of Germany *and the King of* Spain.

Article 27.

THE Subjects on both Sides shall be allowed to chuse, at their own Pleasure, Councils, Agents, Attornies, Solicitors and Brokers.

28. In all the Ports and trading Cities which both their Majesties shall agree upon, National Consuls shall be established to protect the Merchants on both Sides, and they are to enjoy all the Rights, Authorities, Liberties and Immunities the most befriended Nations do enjoy.

29. Those Consuls shall be empowered to take Cognizance of the Differences and Disputes between the Merchants and the Masters of the Ships, and between the latter and their Crews, to decide them; so that there shall be no Appeal from their Sentence to the Judge of the Place of their Residence.

30. As to the Judges Conservators, who in the former Reigns were a considerable Magistrature in *Spain*, which the most favoured Nations were allowed to chuse for themselves, with a Power to judge peremptorily in Civil and Criminal Cases, among those of their own Nation, it has been agreed, That in case his Royal Catholick Majesty grants for the future this Privilege to any Nation, the same shall be likewise granted to his Imperial Majesty's Subjects: Mean while, impartial & speedy Justice shall be done by the ordinary Magistrates and Judges, from whose Sentences no Appeal shall be made but only to the Council of Commerce at *Madrid.*

31 The Escheat, or any Right of the like Nature, shall not be made use of with Respect to each other's Subjects, but the Heirs of the Deceased shall succeed them, either by Will or *ab Intestato*, without any Lett or Hindrance; and in Case of Dispute among two or more Heirs, the Judges of the Place are to decide the Matter peremptorily.

32. If a Merchant or other Subject of either of the contracting Parties should change to die within the other's Dominions, the Consul or some other of their publick Ministers, if there be any, shall repair to the House of the deceased, and take an Inventory of all his Merchandizes and Effects, as likewise of his Books and Papers, in Order to secure them for the Heirs of the Deceased.

33. In case any Ship belonging to the contracting Parties or their Subjects should be wrecked upon each other's Coasts, the Fiscal Officers shall claim no Right to it, and all plundring shall be severely forbidden; moreover, All Assistance is to be given to those who suffer Shipwreck, for saving and securing all they can.

34. His Catholick Majesty shall, under no Pretext whatsoever, set a limited Price to the Merchandizes belonging to his Imperial Majesty's Subjects, but they shall be at Liberty to sell them at the current Price: The same Liberty is granted to the Spanish Subjects in the Emperour's Dominions.

35. If the Effects of some of either Parties Subjects, should be confiscated, and that some Goods belonging to any other Person should happen to be among them, they shall be restored to the Owners, &c.

36. His Imperial Majesty's Ships and Subjects shall be allowed to carry and bring from the *East-Indies* into all the King of *Spain*'s Dominions, all sorts of Fruits, Effects, and Merchandizes, provided it appear, by Affidavits of the Deputies of the *India* Company established in the *Austrian Netherlands*, that they come from the conquered Places, Colonies or Factories of the said Company, in which Case they shall enjoy the same Privileges granted to the Subjects of the United Provinces, by the Royal Letters of the 27th of *June*, and 3d of *July* 1663. Moreover his Catholick Majesty declares, That he grants to the Imperial Subjects whatever has been granted to the States-General of the United Provinces by the Treaty in 1648, both with respect to the *Indies* and any other thing applicable to the said Treaty, as likewise to the present Peace concluded between their Majesties.

37. As to what relates to the Commerce of the *Canary-Islands*, the Imperial Subjects shall enjoy the same Advantages with the *English* and *Dutch*.

[*To be Continued in our next.*]

Remonstrance of the General Assembly of the Clergy of France, *at presented to the King, against the* New Tax *of* Two per Cent.

SIRE,

THE Clergy of *France*, who have always esteem'd it their Glory to give your Majesty, and the Kings your Predecessors, Effectual as well as publick Proofs of their most profound Submission and Obedience, find themselves constrained to accompany the new Homage, which they have the Honour to pay you this Day, with just Complaints and most humble Remonstrances.

The Edict which your Majesty has been pleas'd to publish, for raising *Two per Cent.* upon all your Subjects Estates, seems indeed not to include the

Facsimile of Page 1 of William Bradford's New York Gazette for March 7, 1726, one of the earliest copies of his paper in existence

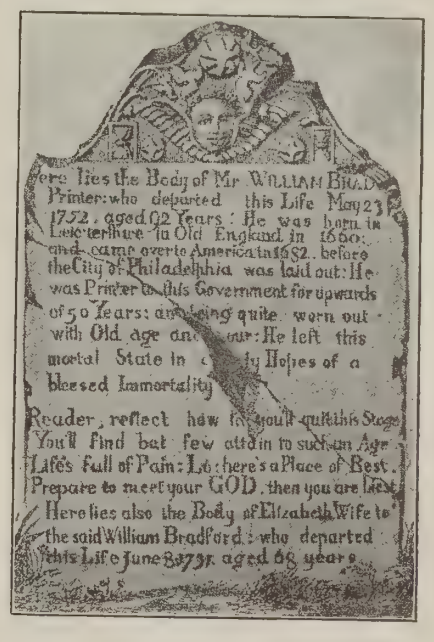
Dr. Lee substantiates this deduction by the printed word from Bradford himself, contained in the following items scissored by Dr. Lee for proof:

N. B.—This Numb. 26 of our *Gazette*, concludes the first half year and is the Time the first Payment should be made by the Gentlemen who encourage the same. And altho' the Number subscribed for does not defray the Charge, yet we intend to Continue it the next half year, in the hopes of further Encouragement.—*The New York Gazette*, May 2, 1726.

* * *

By the Advice and encouragement of some Gentlemen, for the Information of the Publick, We began to Publish this *Gazette* the first of November, 1725 (not doubting but we should have Subscribers to take off such a Number as might defray the Charge) and the first of May last it was Two years & a half that we have continued its Publication; but having calculated the Charge of Printing and Paper for the same, as also how much will arise to defray that Charge (when all those that take this *Gazette* have paid in what is due to the first of May last) do find that we shall lose Thirty-Five Pounds in the two years and a half by Publishing this Paper, besides the trouble and Charge of Correspondents, collecting the News, making up Pacquets and conveying the same to those in the Country who take them. And therefore if some further Encouragement be not given, by a larger Number of Subscribers for said *Gazette*, we must let it fall, and cease publishing the same.

Many Persons that take this *Gazette* being above a year behind in their Payments, and some not having paid since the first publishing of the same, They are now desired to pay in what is due, in order to enable the further Publication, if it be continued.—*The New York Gazette*, June 17, 1728.



This date of Nov. 8, established by Prof. Lee is now universally accepted as authorative. The celebration this week is proof of the general acceptance of the date.

Early issues of the Gazette show that the type was well worn from the printing of "Laws of the Colony," almanacs, books, prayer books, pamphlets, and general job work. Bradford did the best he could with the facilities at his disposal and his Gazettes compare favorably with the papers printed in Boston.

The news that Bradford found "fit to print" was usually taken from London contemporaries or from letters received from friends in England. Yet an examination of early issues shows also items from Constantinople, Vienna, Madrid, Paris, etc. Of course official proclamations were featured. Some issues had good stories from the settlements on Long Island, Connecticut, Massachusetts, and other colonies. News from towns in the New York colony often had more space than that given to events in the city.

Local news included the all important items of the Custom House, prices current, and a list of incoming and outgoing vessels. Other local news sifted through in the form of various advertisements. Then, even as now, according to views attributed to Mr. Kipling, the advertisements at times contained the real meat of the day's news. In contrast with present day conditions the return from advertising was most meager. Subscribers were slow in payment and some, even then, turned in the products of the farm.

To supplement his income Bradford, as was the practice of other printers and booksellers of the day, engaged in selling of various other commodities, besides selling almanacs and pamphlets. This is evidenced by the following advertisements appearing from time to time in his *Gazette:*

Here lies the Body of Mr WILLIAM BRAD Printer: who departed this Life May 23 1752. aged 82 Years: He was born in Leicestershire in Old England in 1660: and came over to America in 1682. before the City of Philadelphia was laid out: He was Printer to this Government for upwards of 50 Years: and being quite worn out with Old age and Infirmity: He left this mortal State in certain Hopes of a blessed Immortality

Reader, reflect how soon you'll quit this Stage You'll find but few attain to such an Age Life's full of Pain: Lo here's a Place of Rest. Prepare to meet your GOD, then you are blest

Here lies also the Body of Elizabeth Wife to the said William Bradford: who departed this Life June 8 1731. aged 68 years.

Original tombstone above William Bradford's grave in Trinity Churchyard. This stone is now in the New York Historical Society Museum.

Very good fresh Oatmeal to be Sold by the Printer hereof.

* * *

Very good Mill'd Stockings to be sold by the Printer hereof.

* * *

Very good Press—Papers for Fullers and Fulling Mills are to be Sold by William Bradford.

Bradford also acted as an agent for advertisers who often directed that "inquiry may be made of the Printer hereof."

When Bradford started his paper conditions in New York were rather quiet. At a late period, however, local bickerings arose between the colonial Governor and the state assembly. But as the strictures upon printed matters were very severe, Bradford, employed as he was by the Crown, had to be very careful of what he printed and found it better to let political matters alone. The times, however, were rife with the agitations caused by Governor Crosby's high-handed demands. Some organ for expressing the "people's" views was required. John Peter Zenger, a Palatine orphan, was sponsored and literally subsidized by Crosby's opponents as printer of New York's second paper, the *New York Weekly Journal.* The first issue appeared on Nov. 5, 1733.

Zenger had been trained in Bradford's shop. But after first running away, then later joining in partnership with Bradford for a short period, he had finally set up an independent shop. He was very poor but aided by such men as Rip Van Dam and James Alexander he soon pros-

MICHIGAN PRESS CLUB ELECTS A. R. TREANOR

Lively Discussion Follows Charge of Colored News Leveled at Booth Correspondent by Weekly Publisher

A. R. Treanor of the *Saginaw News-Courier* was elected president of the University of Michigan Press Club Oct. 31 at the close of a three-day session, marking the seventh annual meeting of the organization. The other officers elected were L. A. Weil of Port Huron, vice-president for the larger dailies of the state; Frank J. Russell, Marquette, for the smaller dailies; R. Averill, Birmingham, for the weekly papers. Prof. John L. Brumm was re-named secretary and treasurer. All the officers were elected by acclamation.

A. R. Treanor

The discussion sessions of the Press club ended in a stormy meeting, stirred up by charges that political news written from Lansing, the state capital, by Fred A. Grimes, the Booth correspondent, was colored. The charges were brought by Fred D. Keister, publisher of a weekly newspaper at Ionia. He alleged that Grimes had colored the news as ordered by his superiors, and that the *Detroit News* had been unfair towards Mayor John W. Smith in his campaign for re-election.

Edmund W. Booth, editorial director of the Booth newspapers in the state, replied to the charges, disclaiming any official connection with the Detroit News with the exception that its publisher was his relative. Mr. Booth declared that if it could be proved that correspondents, Mr. Grimes in particular, were coloring the news to fit some political bias or some ulterior purpose of his superiors, he would resign his job.

Senator Harry Whitely of Dowagiac, who was called by Mr. Booth, declared that from the standpoint of an anti-administration newspaper man that he did not think the news was colored but that the sources of news at Lansing were all of an administrative nature, thus accounting for the preponderance of administration material.

The convention was officially opened Thursday afternoon by A. L. Miller, editor of the *Battle Creek Enquirer-News*. His keynote speech emphasized the need for discussion of newspaper problems. Then followed a talk by George Averill of the *Birmingham Eccentric* on "Journalism Students in the Weekly Field." He pointed out the importance of the small daily or weekly as a training ground for the graduate, and stressed the need for trained reporters and schools of journalism.

Charles D. Cameron, editor of the church department of the Detroit News addressed the gathering on "The Church As a Source of News." He defined church news as the presentation of facts concerning actual progress in the religious field; and not remarks about church controversies, nor the promulgation of church propaganda.

Prof. Preston Slosson of the University of Michigan history department, in speaking of "The Newspaper as an Organ of Government," advocated the addition of an "informative" department to our executive, legislative and judicial divisions of government. "The newspaper," he said, "is an organ of government, such that, without it, democracy would not exist."

Dr. Clarence Cook Little, newly chosen president of the University of Michigan, gave the leading address on the first evening of the convention.

An address in memory of the late President Marion LeRoy Burton of the university opened the Friday evening session. It was given by Arthur H. Vandenburg, editor of the *Grand Rapids Herald*.

Grove Patterson, editor of the *Toledo Blade* and Dr. Morris Fishbein, editor of the *Journal of the American Medical Association*, were the other speakers of the evening. The Blade editor asserted that "we have all the democracy we know what to do with and more. No greater fallacy ever was penned than 'all men are created equal.' Mere numbers never mean anything to the building up of civilization, which must be accomplished by a group; not necessarily a group of intellectuals, but a group of those who care—an aristocracy of the understanding heart."

REOPEN POSTAL HEARINGS NOV. 9

Postmaster Has Additional Material to Place on Record

The Joint Congressional Postal Commission will resume hearings on the postal rate situation on Monday, Nov. 9, at the request of the Post Office Department.

Postmaster General Harry S. New expressed a desire this week to U. S. Senator George H. Moses, of New Hampshire, the commission chairman, that the Deaprtment be allowed to submit an additional report on the operation of the present postal rate law before the convening of Congress on Dec. 7.

Mr. New and Joseph Stewart, his rate expert, are expected to reappear before the commission for the purpose of amplifying the testimony they have given already.

Newspaper representatives were notified by Senator Moses to be on hand if they wished to combat any fresh statements made by spokesmen for the Department which is seeking to upset the present law in a further effort to justify the costs ascertainment report which was repudiated at the last session of Congress.

Despite the latest move of the Department no postal rate revision at the coming session of Congress is anticiapted, and whatever recommendations the Department may make are expected to be "tabled" until the present law has been in operation for a year at least.

SPEAKERS NAMED FOR A.N.P.A. MEETING

Thirteen Newspaper Experts to Discuss Means of Overcoming Waste in Various Departments — Sessions to Start Nov. 10

Speakers who will address the first fall convention of the American Newspaper Publishers' Association, to be held at the Greenbrier Hotel, White Sulphur Springs, W. Va., Nov. 10-12, were announced this week by L. B. Palmer, association manager.

The 13 experts named will discuss means of overcoming lost motion and waste in the various departments of a newspaper.

Names of the speakers and their subjects will include: E. M. Antrim, *Chicago Tribune*, "Traffic Problems"; George M. Rogers, Cleveland Plain Dealer, "Press Room Waste and Wrapper Weights"; Charles F. Hart, *New York Times*, "The Mechanical Department"; John Stewart Bryan, *Richmond News-Leader*, "Proposed Increase in Association's Work"; Louis H. Brush, *East Liverpool* (O.) *Review*, "Organization Efficiency of an Average Newspaper"; T. R. Williams, *Pittsburgh Chronicle-Telegraph*, "Elimination of Waste Through Local Co-operation."

Also: J. M. Schmid, *Indianapolis News*, and A. R. Michener, *Harrisburg Telegraph*, "Elimination of Circulation Waste"; R. L. P. Wallace, Wallace Delaney & Co., New York, "Newspaper Taxation Problems"; Don Bridge, *Indianapolis News*, "Lost Motion in So-Called Merchandising for Advertisers"; William Donahue, *Chicago Tribune*, "Proper Training of Advertising Sales Crews to Eliminate Wasted Energy"; Louis Wiley, *New York Times*, "Lost Motion and Waste in Advertising"; R. E. Lent, *Passaic Daily News*, "Waste in Advertising."

More than 150 hotel reservations have already been made, it was announced this week. Many members will leave for White Sulphur Springs on Special A. N. P. A. convention cars.

The first session will be called to order at 10 A. M., Nov. 10, by S. E. Thomson, Chicago Tribune, association president, who will make the welcoming address. The convention will then be turned over to W. B. Bryant, of the *Paterson* (N. J.) *Press-Guardian*, chairman of the program committee.

Business sessions will be held Tuesday, Wednesday and Thursday mornings, and the afternoon will be devoted to golf. Special events have been arranged for ladies.

FOUR NOTED TAFT BROTHERS

Ex-president, lawyer, teacher, and newspaper maker, makes up the distinguished Taft family pictured together at the dedication Oct. 28, of the Taft Law College, Cincinnati, named in honor of the late Alphonso Taft, their father. From left to right: Henry W. Taft, prominent New York lawyer; William Howard Taft, Charles P. Taft, publisher of the Cincinnati Times-Star; and Horace D. Taft, headquarters of Taft School at Watertown, Conn. Chief Justice Taft was awarded an honorary degree by the University of Cincinnati.

EDITOR SENT TO JAI FOR GROUP LIBEL

Editorial Writer of Suspended Stat Zeitung Is Sentenced to 6 Months fo Attack on American Legion in 1921

SPRINGFIELD, Ill., Nov. 2—The Illinc supreme court last week affirmed t sentence of a lower court committi Arthur Lorenz of Chicago, editori writer of the *Statz Zeitung*, a Chica German language newspaper, to s months in jail in Cook county for "cri inal libel" against the American Legio Lorenz's editorial appeared Dec. 13, 19 and applied derogatory adjectives again members of the legion. The defense w that no one was named but the supren court opinion was to the point in th particular.

"A libel," is held, "on a class group has as great a tendency to pr voke a breach of the peace or to distu society as has a libel on an individual a such a libel is punishable even though i application to individual members of t class can not be proved." Justice Hea wrote a dissenting opinion.

The paper is now out of business.

"That's going very far," was the con ment of a leading New York libel law yer, when the Illinois decision w brought to his attention by EDITOR PUBLISHER. He declined to be mo specific without more detailed know edge of the case in question.

"Class libel is possible, however," h maintained. "There are many cases class libel on the books. Every sta has different libel laws, while the unde lying principle remains the same.

"The principle of class libel is that group or a class may be consider criminally libelled if the description the group or class is so worded and d fined as to enable friends or acquaintanc to recognize the application of the libe ous matter."

As an instance of group libel, the a torney cited a supposed case brought t the board of directors of a corporatio None of the board might be named in th libelous article, but the writer could b prosecuted in view of the fact that man thousands of people would know ju who were members of the particula board mentioned.

TABLOID FOR WILMINGTON

E. M. Davis, Weekly Editor, Announc New Delaware Daily

Edward M. Davis, editor and publish of the *Delaware Ledger*, a weekly printe in Newark, Del., has announced his i tention of starting a daily tabloid in Wi mington, probably an afternoon pape He says a plant will be provided at cost of $220,000.

Mr. Davis says the paper is amply fi anced, but has not named his associate He is to be president and editor of th company. The Delaware Ledger is to b continued as at present.

Editor Cooperates With School

The *Seattle Times* will run an ed torial contest for nine weeks for stu dents in the School of Journalism, Un versity of Washington, the best ed torial to be printed in the *Times* and th writer to receive a prize of ten dollar Elliot Curry, senior, won the first week' prize October 26, with an editorial en titled "Tax Reduction and The Nationa Debt."

How Editorial Laxity Nibbles Profits

Concluding Article On Improved Copy Methods Which Will Eliminate Lost Motion and Waste in Composing Rooms—Solving the Problems

By EDWARD H. EDWARDS

(*Copyright* 1925, *by* Editor & Publisher Co.)

IV—CRITICISMS AND SUGGESTIONS

AN innovation that would tend to assist and unify the work of newspaper operators would be the formulation of a few simple rules, printed and posted on the front of the machine, so that an operator will always have before him what might be considered fundamentals. The "regulars" sometimes need reminders, but this system would be especially useful to the "substitute," and, particularly, a new man in an office. Such rules, of course, should be formulated to suit the circumstances, but as a suggestion to cover most cases:

"When in doubt as to style refer to Style Book or ask your neighbor.

"Correct galley proofs as soon as received, and if there are further corrections pass to next operator. This is imperative.

"When leaving machine for an appreciable time turn off power and light.

"Avoid wide spacing as much as possible, especially near end of paragraph. This does not mean, however, that questionable divisions should be made rather than wide spacing."

An operator making proofsheet corrections should pass the proof (with his corrections, neatly rolled, beginning at the bottom so as to leave the top of the galley proof exposed), to the operator who is to make further corrections. If this method is followed it will be found that when the proofsheet reaches the correcting bank it contains all the corrections and makes it possible for the bank corrector to complete his work and pass the corrected galley to the "ready" bank or to the proofpress for revise.

This point may seem of minor importance, but it must be taken into consideration that if the proof is passed to the bank corrector with only a part of the corrections made he can correct only the portion corrected by the operator and must pass the proof back for the other corrections, sometimes as often as three or four times. In the meantime the bank corrector takes up other work, dismissing from his mind the proof sent back to the operator. After a while the first proof is returned to him; the galley must be relocated, and he then takes up the work where he left off. Again he places in the corrected lines, only to find that the operator making the last corrections did not make italic or small cap corrections, as the case may be, or that there are corrections for the head-letter machines. This necessitates a return of the proof to the operator again. Such instances are very frequent and needlessly consume time of operators, bank men and messengers.

Adherence to the above rule will not only expedite but simplify the work and insure more accuracy by the operator and bank corrector.

As far as practicable, each operator should correct his own proofs. He would thus have an opportunity to see his errors and keep posted on office style. To have it as an established principle that a compositor's work is not finished until his proofs are corrected would tend to instill the practice of accuracy, which means true economy.

While these suggestions apply mainly to the "news" sections of the composing room, they may, in a modified form, be applied to the "ad" department. In display "ads" it is the workmanship which stands out and is different from the average that counts, and, within certain typographical style and uniformity, the printer should have scope and latitude.

One class of advertisements, however, can be handled according to given styles, to wit—the small classified. These, usually written by an advertiser entirely unacquainted with the style in which the compositor is supposed to set them, should be scanned closely by the clerk receiving them so that any illegible words or questionable meanings may be made legible or clarified at the source. Every "ad" should be written on a blank form with spaces at the top showing the classification, number of insertions, and any special instructions as to space, whether it is to be set in caps or blackface type, etc.

It is not an infrequent occurrence for an operator to set an "ad" in the usual style, only to find at the bottom, marked in an obscure way, instructions for setting in some other than the usual way.

A blank at the top for all instructions with the understanding that directions given elsewhere were to be ignored, would prevent the resetting of many a small "ad."

Many employes are ambitious and want to progress, while another class is satisfied with things as they are, and still another class—a small minority—are neither ambitious themselves nor patient with those who try to improve. These latter, as a rule, become cliquish and ridicule all those who do not side with them; they are obstructionists and trouble-makers, and, paradoxical as it may seem, they not infrequently wield an influence very harmful to the whole organization.

Occasionally an employe shows a disposition to learn something of the work which does not come directly in his line of duty. He is ambitious to be an all-round man, observes the work of others and is willing to help at anything. Here the trouble-maker steps in and in various ways tries to discredit his fellow-worker. As one for more than forty years a member of the Typographical Union, the writer can say that this is not in accordance with the teachings of the organization but is, on the contrary, in direct violation of its underlying principles.

Not a few men roam from office to office, claiming to be operators when they are not. This is a very pernicious practice and is an injustice to the legitimate operator seeking employment, as well as a handicap to the foreman (who depends on the product from each machine to set the paper), proving, with dirty proofsheets and small output, a drag and a detriment rather than a help, for all of which the incompetent—known to the trade as a "barnstormer"—receives pay and brags about having gotten away with it. This reflects discredit not only upon the barnstormer but upon the craft. For this unfair condition, which is also prevalent in the proofroom, as well as the machine department, there should be some remedy.

As an alternative, it is suggested the doors of opportunity be opened wider for printers to learn the operation of machines. This seems a subject worthy of consideration by publishers and union organizations, to the end that some plan may be worked out that would be beneficial to the ambitious printer, his organization and the publisher.

Apprentices and unapprenticed boys receive scant consideration in many newspaper offices. This is manifestly unfair to the boys, the office in which they are employed and the welfare of the future of the craft. The number of apprentices is limited by union rule in proportion to the number of journeymen in a given office; but as many non-apprenticed boys may be employed as are necessary.

To obtain the best results, each apprentice should be placed under the direct supervision of a competent hand-compositor, who will interest himself in the boy's typographical work and his conduct in every way in the office.

The unapprenticed boys should likewise be under the general direction of some one of mature years who will see to it that they not only perform their duties but conduct themselves properly toward each other and the other employes.

Most boys enter the composing room with the expectation of becoming apprentices whenever the opportunity presents itself. It is for this reason, as well as the boy's welfare, that his deportment should be under close observation. Almost every boy is amenable to the right kind of tutelage and anxious to progress toward apprenticeship. Proper principles instilled at this formative period will prove of lifelong benefit to the future man and his calling. Too much stress cannot be laid upon the importance of starting a boy right and watching over him to keep him under proper control.

Boys will be boys (and due allowance should be made for them), but one who does not soon understand his duties and place in the composing room should give way to some one more appreciative.

In almost every newspaper office is found at least one disgruntled employe. Nothing suits him. He grumbles to his fellow-workers, sometimes imagining that he is singled out for the more disagreeable duties; that the foreman does not give him a square deal; that every proposition emanating from the owner or publisher is for some ulterior motive. Not satisfied with discussing with his fellow-workers his office troubles, he may be found wherever printers congregate, airing his grievances and discrediting the office in which he is employed. No one, perhaps, could convince him that he is usually wrong in his conclusions. But he might convince himself if he would quietly and dispassionately weigh the facts concerning his dissatisfaction and investigate the conditions in other offices which he might expect to find free of objectionable features.

No doubt there are situations existent in composing rooms where an employe does not fit and where the "powers that be," without just cause, make it uncomfortable; but as a general proposition, if the dissatisfied one will reason out his own case many of the troubles will disappear. He is entitled to know why there is an apparent discrimination against him. The average foreman will readily discuss

SONGS OF THE CRAFT

(*Written Exclusively for* Editor & Publisher)

By Henry Edward Warner

WILLIAM BRADFORD

(The first newspaper publisher of New York City whose *Gazette* 200 years ago followed the first newspaper in Pennsylvania, *The American Mercury*, published by his son Andrew.)

I

Beneath the sod of Trinity
In peaceful sleep he lies,
The secrets of infinity
Oped to his spirit's eyes;
And that which mortal was has fled,
But Bradford . . . is not dead!

II

That soul that dared, it could not die! . . .
Let flesh the Earth caress!
But Bradford lives, inspired by
The spirit of his press!
A million tons of steel acclaim
The honor of his name.

III

To that untrodden Way he came
A Pioneer, and gave
His rough-hewn courage to a Game
That wooed none but the brave.
Somewhere, somehow, he lives today
Who cleared his mission's way.

IV

And I shall not regard him dead
Who lies in Trinity; . . .
The Tenant of the structure fled
Bides in infinity!
Peace to his soul! . . . and may he sleep
Safe in his City's keep!

PLAYING FANCY TRICKS WITH A SINGLE NEWSPAPER ADVERTISING COLUMN

Chief Charm Is That It's Different, Says Thomas Ryan, Creator of Ovington's Copy Style—Presents Rules for Making Effective Use of Elongated Space

"IT will not be long before 'Do Your Christmas Shopping Early' will be added to the advertising copy of many retail stores.

"Ovington's, I have no doubt, however, will put in their space the slogan 'Do Your Christmas Shopping Late—and still find distinctive gifts aplenty at Ovington's.'"

Thomas Ryan, of Pedlar & Ryan, the advertising agency which handles the account of Ovington's, New York gift shop, who was talking, told this story in answer to the question why he showed a preference to the use of full single column newspaper space for Ovington advertising copy.

"It's chief charm is that it is different," Mr. Ryan explained.

Mr. Ryan formerly an executive in the firm of Barton, Durstine & Osborne, Inc., was among the first to discover the possibilities of using the full single column space of a newspaper for advertising purposes. Others now using it in New York newspapers include Brokaw Brothers, Cushman's Sons, Inc., Lightolier, the India Tea Growers Association, and Julius Kayser & Co.

Rules for effective use of the single column space, Mr. Ryan said. are simple.

"First," he said, "the chief value of the single column is the illustrative effects obtainable in that space. It is my opinion that the text should be limited to as few words as possible.

"The illustration should carry the reader's eye from the top to well below the middle of the column. The whole picture should not appear in the column. Let part of it go outside. In this way, a skillful artist can easily give the impression that larger space is used.

"The text of a single column advertisement tells the story best when limited to about fifty words. The type should be larger than that used in the news columns. It is possible to get very few words on each line, and the necessary jumps would be hard on readers' eyes if the text was allowed to run too long.

"An important rule, I believe, is that an advertiser should not use the single space all the time. Variety is one advantage an advertisement should never overlook. Variety in form is as valuable as in content.

"And above all, make your illustration so striking that it will fairly shout for attention. Make your advertisement own the page."

The story of how to use the full column is also told in "The Progress of Newspaper Advertising," the booklet issued by the Bureau of Advertising of the American Newspaper Publishers Association.

A national advertiser is quoted as follows:

"Primarily we seek novelty in the physical form of our advertising in newspapers. We are firm believers in the assumption that the shape, the form, the style of a campaign, as it appears on the printed newspaper page, is highly important.

"First, we made certain investigations and we found at least 40 per cent of campaigns used three columns, ten inches. It was almost as if these proportions had been standardized. And in other sizes, there was the same degree of standardization, as if by common agreement, although I feel it is largely an advertising 'habit.'

'To break away from convention in this regard meant to obtain, inevitably, increased visual attention, because we would be doing 'something different.' The weakness in full column space seemed to be, not so much in the limitations of the area itself, as in poor compositions. What was placed in these columns and the manner of the placing, made them good advertising or poor advertising.

"And after clipping and mounting more than three hundred single column newspaper advertisements, it was our conclusion that the better examples were in this classification because the space had been shrewdly studied and both copy and art made to accomplish a given objective.

"The chief trouble with most newspaper columns is that they fail to sustain interest from top to bottom. They are broken up, composed of spotty zones of interest; there is no continuity. The best single column advertisement makes the reader glance the entire way down that column before he ever starts to read, and then keeps his mental and visual interest alive, as though on a Cook's Tour.

"There is a monotony to most column compositions. They may start off with an alert headline, but they soon disintegrate. Neither artist nor typographer can keep up the pace. We are using single columns regularly for the following definite reasons:

"(1) The physical form is unusual. Comparatively few advertisers are employing it.

"(2) There is often less surrounding competition in the matter of that first visual display. The column stands by itself; often it is set-off by a column of text beside it. When an advertisement is in other sizes, it is compelled to meet competition on every side.

"(3) The trend is for column space to get 'outside position,' which is highly desirable in itself.

"(4) It is easy to read text set single column measure because this is the conventional newspaper style.

"(5) Opportunities are great for unique art display in the single column space.

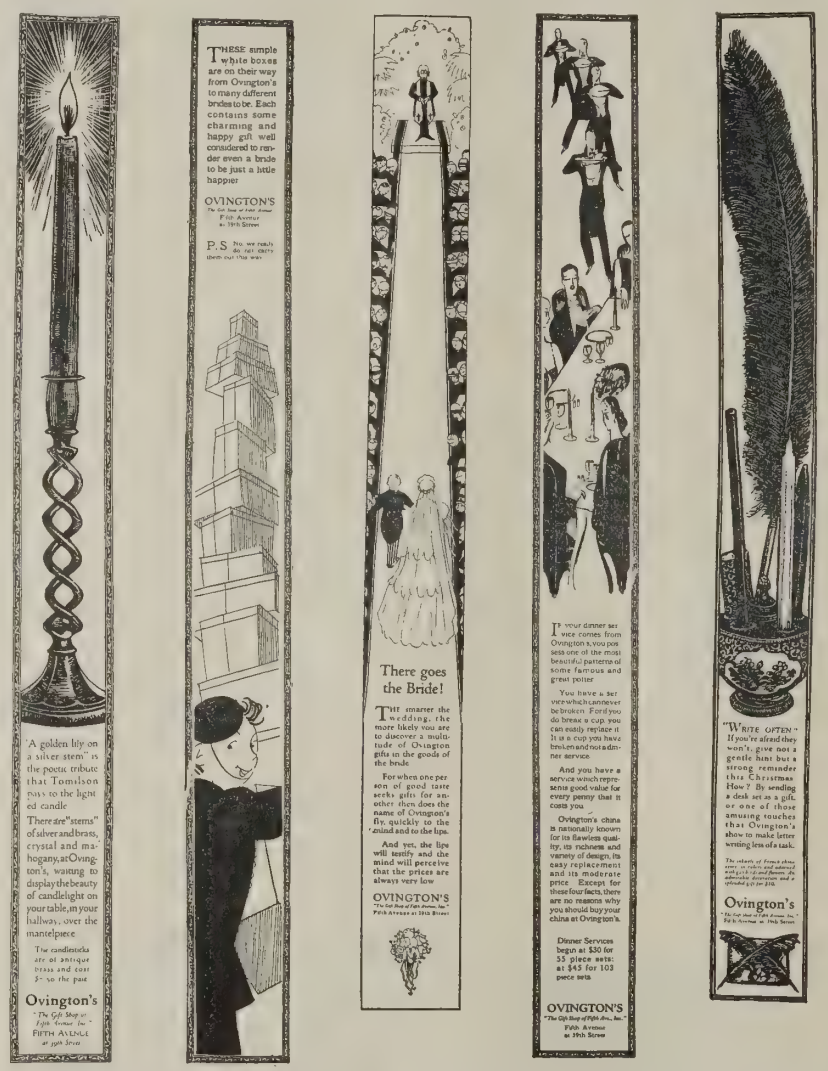
"This, of course, leads to specific instructions relative to the actual building of the 100% column display, and here are our office rules in this respect:

"(1) The illustration should be all-inclusive in its range; that is, it should literally compel the newspaper reader to run from top to bottom at one swift glance.

"(2) Action is desirable in single column illustrations. To illustrate: an advertiser formed a ladder of a column, this ladder running from the bottom to the top of the space. The middle rungs were mortized out for type. At the bottom, a small figure climbed upward, and at the top another figure waved triumphantly.

"(3) Do not scatter the illustrative features; that is, do not drop separate pictures, here and there, each an independent feature. This breaks up continuity. It also makes the reader jump from one block of type to another.

"(4) Do not run type out to the final limits of the column: indented typography is preferable, and it should not be in small-face.



"(5) The best illustration of all is the one which shrewdly takes the elongated space into consideration and deliberately plans to guide the reader down to the last line. An example: a church scene, with a wedding in progress. The aisle forms the column, with small seated figures on either side.

"(6) Borders are seldom desirable. They make the column space seem cramped and smaller than it actually is. Type composition and illustrative feature will unify the column, if wisely handled."

"One of the significant reasons why national advertisers are turning to single column campaigns has to do with their rememberable quality. The public becomes conscious that a certain message is being delivered in a certain set form," the Bureau declares in its book.

"A series of 50 column advertisements, widely distributed, has taken the form of the familiar newspaper columnist's method. The advertiser tells his story in broken paragraphs, set in various styles of type. At first glance, the feature might be, indeed, a syndicated feature or the local columnist's 'stuff.' Humor is mingled with 'reason why' copy. This column series has a standard, illustrated heading. It is signed by the sales manager of the company.

"In another campaign, equally distinctive, the type is set in straight reading style, with small half-column line illustrations interspersed. It is most inviting to the eye. There is a desire to read it because of the news flavor it exudes. You feel it is for a product no more exciting than rubber boots. These 'stunts' are based on the acknowledged popular interest in newspaper 'columns.' They merely imitate the style."

To be different, Ovington's New York gift shop makes effective use of a single newspaper column, five examples of copy style being pictured above.

FIVE NEWSPAPER MEN ON A. N. A. PROGRAM

National Advertisers Will Hear Representatives of the Press at Meeting to Be Held in Washington Nov. 16-18—Other Speakers Named

Five prominent newspaper men are scheduled to address the annual meeting of the Association of National Advertisers to be held in Washington, D. C. at the Mayflower Hotel, Nov. 16-18.

L. E. McGivena, *New York Daily News,* will talk on the question "What About the Tabloid Newspaper?"; Don Bridge, manager of merchandising and national advertising, *Indianapolis News* on "Newspapers Should Not Give Excessive Merchandising Service"; J. Thomas Lyons, formerly of the *Baltimore Evening News,* on "Newspaper Service is of Real Value to the Advertiser"; Marcellus Murdock, publisher, *Wichita Eagle,* "The Logic of Higher National Rates"; and Don Seitz, *New York World,* on "Rates and Results."

Other speakers at the convention will include:

Tim Thrift, advertising manager American Multigraph Sales Company, on "Team Work"; H. W. Prentis, Armstrong Cork Company, "Merchandising Through the Jobber"; H. H. Maynard Ohio State University, "Tendencies in Retailing"; E. A. Filene, Wm. Filene's Sons Company, Boston, "The Future of Advertising"; J. R. Brundage, vice-president, White & Wyckoff Manufacturing Company, "The Need of Closer Co-operation in Department Store Distribution."

At the annual dinner the speakers will be Strickland W. Gillilan, Baltimore, and Merle Thorpe, editor, *The Nation's Business.*

Officers will be elected at the closing business session.

News Men Hosts to Sailor Heroes

The Newspaper Club of New York was host, Oct. 30, to the captain and crew of the S. S. President Harding, rescuers of the crew of the wrecked freighter Ignazio Florio during a mid-Atlantic hurricane last week. Captain Paul C. Grening, First Officer Stedman and the volunteer boat crew, 25 in all, attended a special performance at the Hippodrome as the guests of the *New York Herald Tribune* and the theater, where they were presented to the audience by Fred D. Benham, of the *New York World.* Supper was served at the Newspaper Club.

Planning to Advertise Alabama

Plans for raising funds to advertise Alabama will be discussed at a meeting to be held Nov. 7, at Montgomery, Ala. of Advertising Alabama Abroad, Inc., an organization formed recently. The organization has the endorsement of the Alabama Press Association, Fred J. Crampton, its president, claims.

Amen Corner to Dine on Dec. 5

A dinner of the Amen Corner will be held at the Waldorf-Astoria on Saturday evening, Dec. 5, commemorating the first dinner of the Corner given on the same date twenty-five years ago.

FASCIST DICTATOR IS SNUBBED BY PRESS

Correspondents Turn Cold Shoulder to Mussolini Who Has Terrorized Press of Italy and Would Make Free Newspaper Men of the World Dance to Fascist Tunes

By A. E. JOHNSON

(*Written for* EDITOR & PUBLISHER)

LOCARNO, Switzerland, Oct. 21.—Benito Mussolini, Fascist dictator of Italy is on the blacklist of more than 200 newspapermen employed by journals in all parts of the world to cover European events.

The unprecedented action was taken at the Locarno Conference, where Mussolini appeared at the eleventh hour, supposedly to "climb on the bandwagon" at the signing of the Western Security Pact.

For some months there has been bad feeling between European correspondents and the Fascist government. Several representatives of the foreign press have been expelled from Italy. Others have been threatened with the "bastinado," a favorite weapon of the Fascists, while all have had their dispatches censored.

Today there is not a newspaper in Italy that can go to press—unless it is an avowed Fascist organ—without having its first copy censored by the Prefect of Police. Not a single Italian correspondent dares write anything derogatory to the Fascist regime. The second largest paper in Rome, *Stampa,* along with a half hundred smaller papers has been suppressed. A score of newspaper offices have been destroyed.

At a protest against the Fascist oppression of the press, the International Association of Journalists Accredited to the League of Nations decided to "boycott" Mussolini when he appeared at Locarno. Attaches to the Dictator's party announced that the Premier would receive the correspondents at the Palace Hotel Press room. After paying his respects to the allied delegation quartered there, Mussolini, a la Napoleon, came slowly down the sweeping staircase, to the lobby. His hand was over his breast in the most approved Napoleonic fashion. Still the actor was Mussolini. Behind him, as he walked through the group of about 200 silent newspapermen trailed the Italian journalists—afraid to join the boycott. Out of a score of British, one single correspondent attended the "audience." His case was exceptional. He was stationed permanently in Rome and his failure to see Mussolini would have meant a "bastinado" at least, if not expulsion from Italy.

Not a single Dutch correspondent, not one representative of the Norwegian, Swedish, Danish, Finnish, Russian or Balkan press attended. Even the Spanish and South American press abstained. Three out of about thirty Americans broke the solidarity, while a few odd Frenchmen followed the Italians and Germans. Perhaps fifty percent of the Swiss press took in the interview.

Emerging from the press room, seeing the coresspondents who had ignored him lounging around the lobby, Mussolini spied a well known British journalist, George Slocombe, of the *Daily Herald.* Walking over to him the premier said: "Ah, tell me, is Communism marching on?" Without removing his hands from his pockets, Slocombe, who stands a head above Mussolini, smiled and replied: "I do not know, Mr. President, I am not a Communist."

"I met you at Cannes? I thought you were. Perhaps I am mistaken?"

"You are" replied Slocombe, and the representative of the Rotherdamische Courant spoke up: "As is often the case."

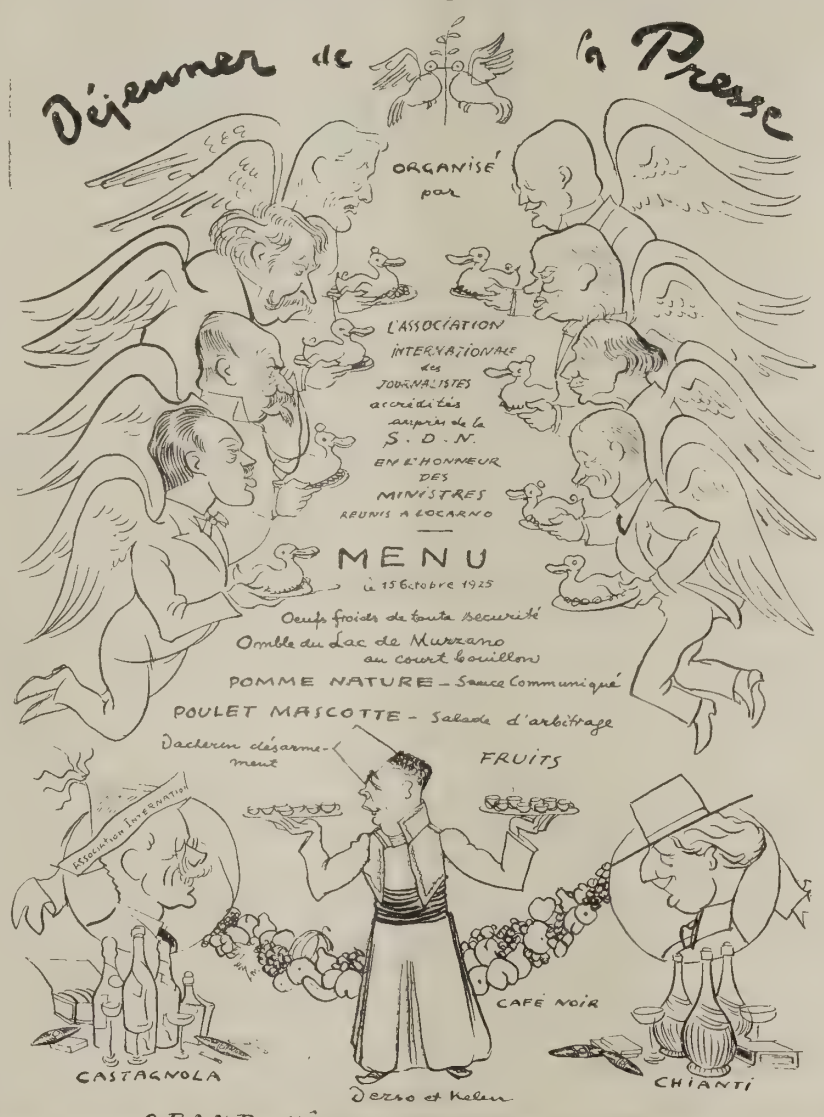
To which Mussolini cynically replied as he walked away thoroughly chagrined: "Peutetre (perhaps)."

The spectacle of a prime minister baiting a newspaperman proved a striking contrast to the reception given the press by Chamberlain, Briand, Vandervelde and even Luther. Locarno is a small place. It has one street. And at almost any hour of the day and in the evening, the Allied and German representatives could be seen sauntering alone or with a couple of correspondents along the promenade. Or seated at the cafes drinking tea or beer—alone and unguarded. When Mussolini arrived he was attended by more than a score of personal guards who never left his presence. An auto load preceded his car and another followed.

"And I walk along with only my cane . . ." commented Briand as the Fascist Premier's cavalcade rolled by in a cloud of dust and the roar of open exhausts after the final plenary session.

A few minutes previous Austen Chamberlain, with his wife on his arm, sauntered forth between the aisles of cheering townspeople, unaccompanied.

A half hour later, Herr Stresemann, who had received numerous threatening letters from Nationalists warning him to "remember Walther Rathenau," who was assassinated shortly after the Genoa pourparlers, stopped at the Cafe Suisse and drank his daily beer, alone.



M. Vandervelde, now foreign minister but who will undoubtedly be the next premier of Belgium, even refused to shake hands with the Fascist chieftain. Vandervelde was a personal friend of Matteotti, Italian Socialist murdered by the Fascists.

It has been said that foreign correspondents "made" Mussolini, as a result of the romantic publicity woven around his figure when his movement was young—and clean.

A dinner was given by more than 200 foreign correspondents to Messrs. Chamberlain, Vandervelde, Luther, Stressemann, Briand, Benes, Strynski and Scialoja, at the close of the Locarno Conference.

M. Mussolini was not invited.

About thirty American correspondents were present including representatives of the *New York World, New York Herald Tribune, New York Times, Chicago Tribune, Cleveland Plain Dealer, Kansas City Star, Chicago News,* EDITOR AND PUBLISHER, *Chicago Journal, Philadelphia Public Ledger,* Associated Press, United Press, *New York Herald of Paris,* International News Service, *New York American,* United News and Universal Service.

Mussolini was not invited to the dinner given by diplomats to newspaper correspondents at Locarno. Scene and menu of the occasion are pictured above.

MORE NEWS TO CEMENT BRITISH EMPIRE TIES

New Cables and Lower Radio Rates Between United Kingdom and Dominions Sought by Emp Press Union—Next Meeting Scheduled to Be Held at London in 1930

By W. A. CRAICK

(*Special Correspondent of* EDITOR & PUBLISHER)

MELBOURNE, Australia, Oct. 3.—Dominating the proceedings of the Third Imperial Press Conference, which concluded its sessions here Oct. 1, was the expression of the need for a more adequate interchange of news between the various parts of the British Empire. One whole day and part of a second were devoted to a discussion of various aspects of the question of interimperial communication, resulting in the passing of a series of resolutions expressing the views of the Conference on the problem of strengthening and bettering the various channels through which news is carried. In addition the delegates discussed the development of Empire resources and trade and also took up the subject of Empire migration.

The official opening of the Conference Sept. 29 was a notable function. The Governor-General of Australia, Lord Forster, performed the ceremony, after J. O. Fairfax, *Sydney Morning Herald* and chairman of the Australian Section of the Empire Press Union, had outlined the arrangements for the Conference and welcomed the overseas visitors. Impressive addresses were then delivered by the Earl of Stradbrooke, Governor of the State of Victoria, and Premier Bruce of the Commonwealth Government. The election of president of the Conference followed, only one name being submitted, that of Lord Burnham. In a brief address of acceptance, Lord Burnham outlined the history of the Imperial Press movement, describing the conferences of 1909 in London and of 1920 in Ottawa.

"The Empire Press Union does not exist only for the holding of periodic conferences," said Lord Burnham, "and in that sense, unlike what is said of journalism, it is not ephemeral. In this respect it is comparable to the League of Nations. It has both its permanent organization and its general assembly and within its sphere of counsel and operation, it is a British League of National Newspapers. Each of our branches does its own work in its own way, according to the ideas and opinions of its own members. It is for all of us, severally and jointly, to do our best to carry into effect the recommendations of our conferences in the spirit, as well as in the letter, of newspaper life. The broad lines of newspaper policy are laid down in general assembly; the measures for carrying it out have to be formulated, considered and applied in detail and so far,—and I hope it may always be the same,—the branches have worked in cordial co-operation with the central office." Lord Burnham then outlined the work that had been done by the Union since the last conference in the direction of securing quicker and cheaper means of communication.

The conference got down to business Sept. 30, when Major Astor introduced a series of resolutions bearing on communications.

Several of these were of a general character and were disposed of rapidly, as for instance one declaring the Conference to be in favor of the fullest provision of facilities for telegraphic communication througout the Empire and one expressing the urgent public importance of the provision of an adequate system for the cheap and rapid transmission and distribution of news throughout the Empire. A third welcomed the reduction in the cable rate between the United Kingdom and Australia, the announcement of the Pacific Cable Board that it would employ "loaded" cables in duplicating the Pacific channel and the decision of the Western Union to lay a new "loaded" cable across the Atlantic. At the same time it urged the Imperial Government to take immediate steps to lay a new "loaded" cable across the Atlantic and in the meantime to hire two channels from the Western Union. A further resolution expressed satisfaction that the Eastern Telegraph Company had decided to lay a new "loaded" cable between Cocos Island and Perth, Australia. In view of the early completion of the wireless station at Rugby, England, with its Empire range and radius, it was urged that the tariff of charges should be at the lowest possible rate, this meaning on the cost of management, provision for interest and reasonable and proper allowance for depreciation. Another resolution expressed regret at the delay in the erection in England of stations for "beam" radio transmission but welcomed the recent statement that the work was proceeding with all expedition.

A. W. Moore, India, introduced and secured the adoption of a resolution advocating a large reduction of intermediate press cable charges between important centres of Imperial communication, indicating that the present cost of relaying messages from Colombo to such stations as Penang, Singapore and Hong Kong was greater than the cost of telegraphing from London to Colombo.

There was some debate on a resolution introduced by A. C. C. Holtz, Melbourne, supporting the proposal that the reciprocal wireless station in England for communication with Australia should be controlled and operated by Australia, it being contended by some delegates that in a time of national emergency difficulties might arise if a station were controlled by another government. An amendment inserting the words, "while recognizing the right of the Imperial Government to resume control of the working in times of crisis," served to clear up this difficulty and riders were added making it applicable to other parts of the Empire as well.

The longest discussion of the day developed on a resolution put forward by Sir Hugh Denison, *Sydney Sun,* declaring that it was desirable that a complete service of cable news from the Dominions to Great Britain for publication in the newspapers of that country should be established. He indicated that Australian newspapers were prepared to establish a bureau for the purpose of supplying such a service. Many delegates participated in the debate, the point at issue being the extent to which papers in Great Britain would use the service so supplied. It developed that the peculiar needs of the British press made it undesirable that syndicated news should be sent, each paper preferring to have its own correspondence. Pooled news would be of very little value to the great London newspapers. Eventually the resolution was carried in an amended form, pledging members to use their utmost effort to see that more Dominion news than was now published would be used in their respective papers in future.

Sir Emsley Carr introduced a resolution voicing the opinion of the Conference that penny postage for letters throughout the Empire should be restored, instancing the experience of New Zealand where the return to penny postage had been profitable. His resolution, which was carried unanimously, also reaffirmed the principle that postal rates within the Empire for newspapers and periodicals should not exceed the lowest rates in force between any foreign country and any part of the Empire.

The question of communication by air services was discussed by Sir Harry Brittain in an informative address, the Conference adopting his resolution that it viewed with sympathy the efforts now being made for linking up by air the different sections of the Empire and urged that all the resources of the Empire be used for the development of air services.

G. A. L. Green, South Africa, brought up the question of political interference with the press as instanced by the proposal in South Africa to legislate in favor of requiring signatures to all articles written about elections during election campaigns. The principle was declared to be most pernicious. As a result the following resolution was carried:

"This Conference deprecates any legislation or administrative action which, apart from the necessary restrictions of the existing laws of libel and copyright, in any way curtails the liberty of the newspaper press, or fetters its free expressions of opinion. This Conference further expresses the opinion that it is an infringement of the root principle underlying the liberty of the press to require political or other articles to be signed by the writer."

The position with regard to wireless broadcasting of news was introduced by Sir Percival Phillips. He contended that the newspapers of the Empire would sooner or later have to face serious competition in some form from broadcasting, perhaps from stations under direct government control, as well as from those operated by private agencies. He declared that the tendency of broadcasters was to throw off all supervision and to insist upon their rights as free agents to serve the public with news as they saw fit. Experiences in different parts of the Empire were voiced by delegates and finally a resolution was adopted asking the Council of the Empire Press Union to appoint a "watching" committee to keep the overseas branches informed of developments.

Sir Edward Iliffe precipitated a debate when he moved for action in the direction of tightening up copyright protection of material appearing in newspapers and periodicals. He claimed that there should be more restriction of the indiscriminate lifting of articles. Representatives of the smaller papers argued in favor of copying articles when due credit was given but there was a general feeling that this was being carried too far and the Conference adopted Sir Edward's motion calling upon the Council of the Empire Press Union, in consultation with other organizations, to consider what action might be taken to increase copyright protection.

A report on the development of the newsprint manufacturing industry in Canada was presented by W. A. Craick, Toronto, which indicated that the Dominion's capacity as a newsprint producer was rapidly increasing and that there would be a considerable additional surplus for export in the near future.

The problem of promoting Empire trade was discussed by Major Astor and several other speakers and a resolution was adopted inviting the newspaper press in all parts of the Empire to take all possible measures to promote the interests of inter-Empire trade and to impress its importance upon the reading public in the respecting countries. Several speakers also discussed the question of Empire migration and it was decided that the press throughout the Empire should be called upon to use its utmost endeavors to publish full, accurate information of the advantages afforded by the Dominions to settlers from the United Kingdom.

After the customary votes of thanks had been adopted, consideration was given to the place for holding the next Imperial Press Conference and it was unanimously agreed that it should be held in London in 1930.

The tour of Australia which was begun at Sydney on September 1 and which, prior to the conference, covered the states of New South Wales and Queensland, was resumed after the conference, a week each being spent in Victoria, Tasm South Australia and West Australia. main party of British delegates concl the tour at Freemantle in West Aust on November 2.

The Conference, which held its ses in Menzies Hotel in this city, was r sentative of practically all parts of British Empire and included the fol ing overseas newspapermen:

UNITED KINGDOM: Rt. Hon. count Burnham *London Daily Telegr* Viscountess Burnham, representing Institute of Women Journalists; Apsley, *London Morning Post;* M the Hon. J. J. Astor, M. Celebrates 50 Years in Advertisin

Ralph Zork of the advertising depa ment of the *St. Louis Post-Dispatch* served his 50th birthday anniversary Oct. 30. A bouquet of chrysanthemu was given to Mr. Zork by other memb of the staff, and George M. Burba advertising manager of the Post-Dispat made a short talk at the morning c ference. Mr. Zork has been with t paper for 16 years.

Brandon Joins Knickerbocker Press

M. H. Brandon has resigned from *New York Evening Graphic* to beco circulation manager of the *Albany Kni erbocker Press.* Mr. Brandon, who the past years has been connected w Macfadden publications as contest ma ager and the Graphic as promotion m and contest editor, was formerly circu tion manager of the *Bridgeport* (Con *Telegram* and prior to that circulati manager of the *Ogden* (Utah) *Standar Examiner.*

First Among All Metropolitan Media

The Detroit News

With a Total Volume of

24,031,714

Lines of Advertising During the First Nine Months, 1925

THIS great volume once more places The Detroit News in the enviable position of leading the great metropolitan newspaper leaders. The Detroit News during the first nine months of 1925 surpassed its record for the same period of 1924 by 1,614,508 lines, although in that year it led the world in total advertising.

Not only does The Detroit News lead the first ten great metropolitan newspapers in total volume of advertising carried, but it also shows the greatest increase in lineage over a year ago. Each month sees increasing patronage of Detroit News columns by advertisers, both local and national, due to the growing conviction among those of experience that one medium adequately covers Detroit. And The News is that medium. In fact, no other city of Detroit's size or larger is so thoroughly covered by one newspaper as Detroit is by The News.

N. Y. PUBLISHERS TO BROADEN SCOPE OF EMPIRE PRINTING SCHOOL

Executive Committee Asked to Consider Establishment of Stereotyping Course—Financial Support Assured—Associated Press Group Meets

MEMBERS of the New York State Publishers' Association at their fall meeting in Hotel Syracuse Friday and Saturday, Oct. 30-31, passed a resolution asking the executive committee to consider the establishment of courses in stereotyping and press work at the Empire State School of Printing. While these courses would be conducted separate from the typesetting and printing courses now given at the school they would be given in the same building under the direction of Ross Kellogg, director.

The action broadening the work of the school of printing has already been assured of financial support by New York City publishers, it was reported. Passage of the resolution followed the address by Victor Ritter, vice-president of the *New York Staats-Herold,* who visualized a training center for all branches of newspaper work. The foundation of a school of engraving at the Empire State School is already under way and has the backing of a group of New York City citizens.

Mr. Ritter emphasized the growing demand for a center devoted to training men for newspaper careers in the mechanical, circulation, advertising and business management departments as well as the news and editorial departments. He said the schools of journalism provide the latter but they are not properly understood and that there should be training in the fundamentals of the newspaper profession exclusive of the news and editorial ends which the schools of journalism provide.

At the Friday evening banquet the speakers were James W. Brown, publisher of the EDITOR & PUBLISHER, and Edwin S. Friendly, business manager of the *New York Sun.* President Frank E. Gannett presided.

Mr. Friendly's address was extensively reported in EDITOR & PUBLISHER last week.

"Editorially the trend in newspaper making is decidedly in the direction of better newspapers," Mr. Brown maintained. "A broader view prevails, more care is exercised in the selection of material; there is more tolerance and fairness, less coloring of the news, more courage in the editorial page and much greater world service.

Mr. Brown called attention to the publication the previous week in daily papers throughout the land of the full text of the Locarno treaties before their submission to the parliaments of the various states. By such prompt release of a 5,000-word dispatch and immediate transmission of it over a 3,000-mile cable circuit without relay and at small cost to the newspapers he maintained we now have "open covenants openly arrived at."

The tendency among newspapers editorially is toward elimination of free readers, free write ups, free publicity, more original authoritative articles, and fewer canned statements, Mr. Brown pointed out. He emphasized the tremendous growth of newspaper advertising, because of its flexibility and facility. In administration, he maintained the tendency is toward a widening gap between editorial and advertising departments.

"The need of the hour in the editorial rooms is for more adequate compensation, and more adequate compensation of personnel would effect a great saving in turnover, which our surveys have shown to be more than 50 per cent in editorial departments alone," Mr. Brown stated.

"In circulation the trend is undoubtedly to independent carrier service with privately owned motor delivery, fewer schemes, fewer contests, fewer premiums, fewer cut rates and bargain days and more straight selling on the merits of the paper and at straight rates.

"In advertising the tendency is to a higher rate for department store advertising, less of a differential as between the local and national rate, less puffs and free write-ups, less expensive merchandising service, more linage and ever more linage in every issue, always an increasing volume of business. Indeed, the slogan seems to be "The sky is the limit," take all the good clean honest business you can get.

"Newspaper advertising is about 100 per cent greater in volume this year than it was in 1914, when statistics were first gathered.

"The power of newspaper advertising to serve the home folks was powerfully demonstrated in Chicago recently when the Fair, big department store now owned by S. S. Kresge, put on its 50th Anniversary Sale. The sale was advertised in the Friday and Saturday evening papers, and with eight pages in the Sunday *Chicago Tribune* and seven pages in the Sunday *Herald-Examiner.* The sales Monday amounted to $480,000. The increase in sales on the week over the same period the previous year amounted to a million dollars. Newspaper advertising was the backbone of the sales effort.

"But the tendency is to a higher rate for the big store and the encouragement of the smaller specialty house. The *Cleveland Plain Dealer* department store business is now reported as 15 per cent of the total volume carried by that paper, whereas some years ago it was 40 per cent.

"In the old days most newspaper promotion copy in the columns of the newspaper dealt with the exclusive stories printed, 'beat' this and 'beat' that. Now such copy deals mostly with linage and circulation gains. I am inclined to think we must shortly hark back to the old days of the excellency of the product, of its distinguishing characteristics."

Mr. Brown paid a high tribute to the Audit Bureau of Circulation. From a small beginning ten years ago, he said it is now the "yardstick of circulation," furnishing advertisers and readers with an impartial and absolutely accurate account of circulations.

Mr. Friendly gave suggestions observed from his connection with the business management of the New York Sun. In his opinion newspapers do not devote enough time and thought to their own publicity. He told of the care which Mr. Munsey goes over the advertising which the Sun does.

"There is no more important thing to a newspaper than the publisher's responsibility to his readers; nothing has a more direct bearing on the business office than the publisher who is honest, sincere, and straightforward, and whose staff follows his ideals in making his newspaper."

The New York State members of the Associated Press gathered following the banquet. Expension of the state wire service was approved and it was voted to open an office in Rochester. A similar office was opened in Syracuse last year in response to the demand for more upstate news.

Fred P. Hall of Jamestown was elected to represent New York state, outside of New York City, on the Eastern division advisory board.

Edward McKernon, superintendent of the Eastern Division of the A. P. addressed the members.

Gardner Kline of Gloversville was re-elected chairman of the association; Russell Hathaway of Albany was re-elected secretary.

At the business session of the publishers group Jerome D. Barnum of the *Syracuse Post-Standard* gave a report on the postal rates and matters brought up at the meeting of the A. B. C. convention at Chicago. He advised the publishers against entangling alliances with other interests on the postal situation.

L. B. Palmer, manager of the American Newspaper Publishers Association, spoke in detail of the meeting of the association to be held in White Sulphur Springs, Nov. 10, 11, 12. Twelve members reported they intended to attend.

Frank E. Gannett reported present tendencies in the news print market easy but that the situation would tighten up in the next year. He advised economy in the use of the news print. There was also a discussion of improved typography, printing, the tabloid newspaper, and labor problems.

Fred H. Keefe of Newburgh discussed the legislative program for the year and stated that each member would receive an outline of it in the near future.

Compensation for Plane Deaths

It required but a few moments for Ohio State Industrial Commission to p on the applications of the widows Maurice C. Hutton and Verne F. T merman, staff representatives of the *D ton* (O.) *Journal,* for awards under workmen's compensation law. The ne paper men were killed when the pl in which they were returning to Day from the Pulitzer air races crashed n New Salem, Pa. Each of the widc will get $6,500, the maximum amount lowed. Hutton was aviation editor the Dayton Journal and Timmerma photographer.

RED HAT LURE ENLISTS 18,000 BOYS IN CAMPAIGN AGAINST FIRE

Baltimore Sun's Dramatization of Fire Prevention Week Becomes a Local Institution—4,000 Parade to Music of 3 Bands

THE *Baltimore Evening Sun* recently completed its third annual Junior Fire Department celebration, an enterprise which is thought to be unique.

For more than four weeks the attention of 18,000 boys was centered on means to eliminate fire hazards in their homes and in their neighborhoods.

The affair ended with a celebration in the forenoon one Saturday with 4,000 boys taking part in a gathering in the Fifth Regiment Armory and then marching downtown in a parade with 700 real firemen marching with them, three bands leading sections of the procession. There was an entertainment at the armory the biggest element of which was a moving picture of the Junior Firemen parading the year before. Some of the boys saw themselves in the picture.

In the parade the chief of the Junior Fire Department, rode alone in the red automobile of a chief of the department, with a chauffer to drive him. The chief was free to sound the real chief's bell any time he wanted. And he made it work overtime. He was picked by August Emrich, the real chief of the Baltimore department, from the following body of boys who had qualified themselves for their special positions by writing the best suggestions on how to prevent fire: 12 battalion chiefs, 200 captains, 200 lieutenants. Each of the 18,000 boys who participated in the Junior Fire Department activities made ten suggestions. They wrote their suggestions and sent them to the office of the Evening Sun. They were judged for effectiveness of the suggestions by members of the staff and the Board of Fire Commissioners of Baltimore

The parade ended with a demonstration of the Baltimore fire-fighting apparatus in the City Hall Plaza, the boy chief, battalion chiefs, captains and lieutenants being allowed to manipulate some of the apparatus.

A concert was given by a band made up of a consolidation of three organizations. John Philip Sousa came to Baltimore especially to lead this consolidated band.

The whole affair resulted from a suggestion received by J. Edwin Murphy, managing editor of the Evening Sun, and Edwin A. Fitzpatrick. Jr., assistant managing editor, from the Board of Fire Commissioners three years ago. The Board went to those executives with a request that special publicity be given in "fire prevention week." Neither Mr. Murphy nor Mr. Fitzpatrick believes much in preaching. The suggestion that they print stories and editorials on how to avoid fire during the designated week did not appeal to them. The Commissioners were anxious to arouse the adults. Messrs. Murphy and Fitzpatrick told them that the best way to arouse the adults was to get the children interested. They dramatized the movement by planning the Junior Fire Department.

This year firemen's hats were distributed to a limited number of boys who distinguished themselves. Handsome badges were also supplied to the chief and the battalion chiefs of the junior fire department. Every boy in Baltimore wanted one of those hats. They are still trying to get them.

The boys got into the contest and the Junior Fire Department by getting their parents to sign blanks agreeing that they might join. These blanks were distributed at the office of the Evening Sun, at fire headquarters and at the fire engine houses throughout the city.

Parents who appeared at the office asking for hats for their sons or for application blanks proved the correctness of the judgment of Messrs. Murphy and Fitzpatrick by saying that their sons had been unable to talk about anything but the Junior Fire Department from the date the announcement was made in the paper.

That it was effective in directing the attention of people to simple measures they could take to avoid fires is beyond question. The boys who joined pledged themselves to clean yards, cellars and garrets of causes of fire such as paper and boxes, and were reminded of the dangers attending the use of the electric iron, the use of gasoline and other inflammable materials. They were asked if they knew how to turn in a fire alarm.

Six thousand boys joined the department in the first year. This third year 18,000 joined.

RADIO CONFERENCE NOV. 9

Editors and Representatives of Industry to Meet in Washington

Radio editors of many of the leading newspapers and magazines of the United States have signified their intention of participating in the Fourth National Radio Conference called by Secretary of Commerce Herbert Hoover.

The conference will open on Monday, Nov. 9, at 10 a. m. in the auditorium of the United States Chamber of Commerce Building.

The three previous conferences solved many of the problems which embarrassed radio communication, and contributed greatly to its rapid progress, Secretary Hoover pointed out. New questions now require consideration.

The conference is called for general discussion and consideration of matters affecting radio communication in the United States from the viewpoint of the public interest.

The conference will include representatives of all radio activities.

While consideration will be given to radio activities generally, the principal problems will be those affecting broadcasting. The subjects, so far as they can be outlined at present, will be:

(1) Recognition of the principle that service to the listening public must be the basis for every broadcasting privilege and for all radio regulations.

(2) The present saturation in broadcasting due to the exhaustion of channels, and the necessity for limiting the number of stations on the basis of public service.

FREIGHT EMBARGO HITS FLORIDA NEWSPRINT

President Johnson, S. N. P. A., Asks Railroads to Expedite Shipments to Prevent Famine—Presses Held Up

As a result of requests from Florida newspaper publishers the Southern Newspaper Publishers' Association during the past week appealed by telegraph through its president Walter C. Johnson, to freight traffic managers of Florida railroads for the issuance of sufficient permits to insure an ample supply of Florida daily newspapers. This action was brought about by a shortage in Florida of newsprint paper as a result of the freight embargo now in effect in that state.

Publishers have advised S. N. P. A. headquarters that they have been experiencing some difficulty in Florida in obtaining freight permits since the embargo was placed in effect.

Mr. Johnson explained it is first necessary for the permit to go to the manufacturer before a shipment of paper will be made. He said he had been advised there was at one time 7,000 freight cars held up in the Jacksonville, Fla., yards. Included in this number were some cars of newsprint paper.

Another report has reached the S. N. P. A. that one Florida newspaper had 47 carloads of paper at an eastern port which could not be moved on account of congestion and uncertainty of unloading and that several Florida newspapers were facing reductions in the size of their papers if a sufficient supply was not made available immediately.

The president has been advised that the shortage of labor has made docking facilities uncertain and unsatisfactory.

Another Florida publisher, according to Mr. Johnson, reported that a new press was held up in New York because of the congestion.

Mr. Johnson states this is the first time since the World war, and immediately thereafter that the S. N. P. A. has been called in to handle the freight traffic situation for any group of publishers.

Following is a copy of telegram sent to traffic managers of three railroads by Mr. Johnson:

"Am informed that many Florida daily newspapers are facing critical situation because of shortage of newsprint paper due to congestion and limited tonnage permitted to move. During the war newsprint was given preferential treatment as necessity and I appeal to you for issuance of sufficient permits to meet all needs of Florida newspapers. Please wire fully how you find situation on your line and what steps can be taken to insure ample supply of newsprint.

Southern Newspaper Publishers Association,

W. C. Johnson, President."

The traffic manager of Seaboard Airline in response to the request wired S. N. P. A. headquarters his road stands ready to give special consideration to shipment of newsprint paper in carload lots to relieve the Florida shortage. The traffic manager of the Atlantic Coast Line asked S. N. P. A. headquarters to furnish him with a report of newspapers on his line in Florida using newsprint paper in carload lots.

ZELLERBACH SUSTAINED BY U. S. JUDGE IN INCOME TAX CASE

Methods Devised by Paper Company to Declare a Non-Taxable Dividend Revealed in Decision of Board of Tax Appeals—History of Case Told

By LEO A. McCLATCHY

WASHINGTON, Nov. 5.—Methods devised by the Zellerbach Paper Company of San Francico, to declare a dividend in 1917 that would not be taxable by the federal government as income, and would, at the same time, not appear to the public as constituting a dividend at all, are revealed in the decision of Judge Adolphus E. Graupner of the United States Board of Tax Appeals.

The decision sustains the appeal filed by Isadore Zellerbach, president of the company, against a deficiency of $25,159.16 which the treasury assessed against him, and the appeal he filed as executor of the estate of his mother, Mrs. Theresa Zellerbach, on which an assessment of $85,882.05 had been levied.

In both cases, the issue involved was a dividend declared by the Zellerbach Company in 1917. The treasury declared this was a cash dividend, and hence was subject to tax. The appellants maintained it was a stock dividend, and as such, exempt from tax. This latter view was upheld by Graupner.

In the "findings of fact" accompanying the decision, it is brought out that the company, in 1916, issued a stock dividend of $750,000, concerning which, it is said:

"This stock dividend aroused considerable discussion among customers of the company and in financial circles, and newspaper articles commented on the 'cutting of a melon' by the company. The gist of such discussion and comment was that the company was making very large profits and taking advantage of its important position in the manufacture and sale of paper to charge extremely high prices."

In 1917 the question arose of declaring another $750,000 stock dividend, but, it is related in the "finding of facts" that:

"Because the stock dividend of 1916 had resulted in much adverse criticism among those engaged in the paper trade and in financial circles, the officers and directors were reluctant to openly declare a stock dividend in the amount of $750,000 within twelve months thereafter. The large stockholders, including the taxpayers, also objected to such a procedure as they believed it would subject them to heavy income taxes, stock dividends being regarded as income at that time. However, they were willing to convert surplus into capital as suggested if these objections could be overcome. The result of conferences among the officers, directors, and leading stockholders of the company, who held a total of 20,104 shares of the outstanding 22,500 shares, was the adoption of a plan whereby the capitalization of $750,000 of surplus would be accomplished by calling for subscriptions for the 7,500 shares of stock remaining in the treasury of the company on the basis of one share for each three shares held by the stockholders, and the offsetting of the same by declaring a cash dividend in the total of $25 per share on the total 30,000 shares of the company payable in two installments, one in 1917 and one in 1918. This plan was evolved to avoid the appearance of a stock dividend and at the same time distribute the income tax to the stockholders over a two-year period."

This scheme was adopted prior to the decision of the United States Supreme Court when it was believed that stock dividends were subject to income tax the same as cash dividends. The supreme court later ruled stock dividends were not subject to income tax.

At the time this plan was evolved, approximately 92 per cent of the stock of the company was held by members of the Zellerbach family, "or by officers, directors or employes of the company who were in accord with the plan." The remaining eight per cent of the stock was held by "outsiders" to whom the plan was not divulged, the reason being to avoid publicity.

On April 2, 1917, the commissioner of corporations of California authorized the Zellerbach Company to sell 7,500 shares of its capital stock at $100 per share. The company then notified the stockholders that the permit had been issued. As explained in the "findings of fact" by the Tax Board:

"This notice announced that all of the stockholders had subscribed for their pro rata; that the issue would be confined to one-third of their present holdings, eliminating fractions, and that a certificate for their pro rata of shares was ready for delivery. On March 15 there were 51 stockholders who held an aggregate of 22,500 shares in the company and of these, the holders of only approximately eight per cent of the outstanding stock paid in $65,500 for their pro rata of the shares. None of the stockholders paid in any money and it was definitely understood by the holders of approximately 92 per cent of the stock that they would not be called upon for a stock subscription and that no money was to be paid by them. This understanding or agreement was never changed or modified.

"Neither Theresa Zellerbach, who was the largest stockholder, owning 7504 shares, nor Isadore Zellerbach, who was president and the next largest stockholder, owning 5475 shares, these joint holdings being more than 57 per cent of the stock, made any subscription for the stock. Neither of them paid any money for the pro rata of stock to which they were entitled, but on April 7 certificates for 2501 and 1825 shares were issued respectively to Theresa and Isadore Zellerbach. Neither of them was charged on their personal accounts on the books of the company with the amounts which they should have paid had they been bona fide subscribers."

On April 7, 1917, certificates for shares of stock were issued to each member of the group, including other members of the Zellerbach family, who owned approximately 92 per cent of the capital stock "without regard to the fact that no subscription had been received from any such member."

The 8 per cent minority actually paid for their subscription, and this was returned to them in two installments, one in June 1917 and the other in June 1918.

In his opinion, Judge Graupner pointed out that it had been necessary for him to wade through a "maze of inconsistencies existing between the minutes, the books of account and the actions of the officers and directors of the company," but he added that these actions were at least "consistent with the plan to give the stock dividend the appearance of being something else."

"Approximately eight per cent of the stockholders" (those not within the controlling force of corporation) the opinion added, "paid in cash for their pro rata of the 7500 shares. They were nominally paid two dividends of $12.50 each on all of the stock owned by them, but as a matter of fact, they were repaid the money which they had paid in and thus had their stock for nothing. The holders of approximately 92 per cent of the shares (the operating majority) paid nothing and received nothing but their pro rata of the 7500 shares of stock. The sum of $750,000 was transferred from a surplus to capital stock with a corresponding issue of stock certificates and the plan of the controlling factors of the company was accomplished. The fact that the officers of the company sought to delude the public or to distribute over two taxable years what they feared would be taxed in one year cannot influence us in deciding these appeals upon their merits."

Radio Show a Success

Buffalo's Second Annual Radio Exposition, promoted by the Radio Trades Association and the *Buffalo Courier and Daily Star,* was a success in point of attendance and exhibits. More than 55,000 people visited the auditorium to inspect 140 display booths.

TRANS-ATLANTIC TEST OF "RADIOSCOPE"

Telefunken Company, Berlin, Announces New Invention for Sending Script, Photographs and Movies by Wireless

The Telefunken Company of Berlin has announced trans-Atlantic tests will be conducted shortly of the Radioscope, a new machine for the almost instantaneous transmission of script, photographs, motion pictures by wireless, the invention of Dr. Carolus of the University of Leipsic.

The announcement made in Berlin was to the effect that the tests would be held with the co-operation of the Radio Corporation of America.

In New York officials of the Radio Corporation denied knowledge of the invention and the promise of co-operation. It was admitted the Berlin Company was an associate concern.

A paper surface ten centimeters square bearing either writing or a photograph can be transmitted by wireless or wire by the Carolus instrument in a few seconds, it is said, and ultimately transmission will become instantaneous. Telegrams, it is argued, will become much cheaper, since instead of a message being sent word by word in the Morse alphabet it will be dispatched all at once—and be received in the sender's own handwriting.

A whole newspaper page can thus be transmitted by wireless in facsimile. The importance of this development in the long-distance transmission of important documents, signatures for business purposes and police data, photographic and otherwise, can scarcely be overestimated.

The inherent difference between the German radioscope and previous instruments of a similar type is that it functions far more readily, according to the promoters, and thus overcomes the prohibitive cost of earlier devices.

The Radio Corporation of America has conducted several successful tests of wireless picture transmission.

Our Own World of Letters

By JAMES MELVIN LEE

JOSEPH BUCKLIN BISHOP is an old newspaper man. After being graduated from Brown University in 1870 he joined the famous old staff of the *New York Tribune*—a staff that consisted of such men as Whitelaw Reid, John Hay, Bayard Taylor, George Ripley, John R. G. Hassard, etc.

It is not surprising, therefore, that Mr. Bishop in his "Notes and Anecdotes of Many Years" (Charles Scribner's Sons) devotes considerable space to incidents and anecdotes of his newspaper career. Some of the material in this volume has previously appeared in magazine form and was mentioned in this department at the time of its publication. The volume, however, contains much new material, especially about such newspaper men as Horace Greeley, Edwin L. Godkin, John Hay, Isaac H. Bromley, William Winter, James Gordon Bennett, Noah Brooks, Charles A. Dana, and William Cullen Bryant.

After a brief introductory chapter Mr. Bishop devotes two chapters to Horace Greeley and his Tribune. He lets the reader catch this glimpse of the entrance to Greeley's sanctum:

> The editorial room fronted on Printing House Square, and was entered through the reporters' room. A half-partition of wood and glass, the latter very dirty and never washed, separated the two. It was only eight feet or more in height, but, low as it was, to the minds of the reporters it was the most formidable of barriers.

Then he opens the editorial door and shows Horace, "careless and dishevelled in dress, as if he had put on his clothes in the dark, with the round and rosy face of a child and a cherubic expression of simplicity and gentleness." Later Mr. Bishop adds of Greeley that "a more whimsical, impracticable, lovable man never lived, and American journalism has produced few superiors to him as a clear and forcible editorial writer."

In August, 1883 at the invitation of Edwin L. Godkin, editor of the *New York Evening Post,* Mr. Bishop joined the staff of that journal as an editorial writer—a position that he held until 1900. Consequently his chapter on Godkin is a personality sketch from first hand observation. Of Godkin Mr. Bishop speaks as follows:

> Nothing delighted him more than what he was fond of calling "journalistic rows." When one of these broke out between two or more contemporaries, he always followed it with intense enjoyment, and sooner or later fairly itched to take a hand in it. The "joy of combat" inherent in the Irish blood, was strong in him, and he knew he must watch it. Repeatedly, when a "row" was on, he would write something about it, just by way of trial, and then take advice. If you said in criticism that in writing about it he had committed some of the most flagrant of the offenses that he had for years been assailing as the leading characteristics of these "rows," he would burst into a roar of laughter and say: "Well, I am afraid that is so, but I really should like to show what a pair of humbugs they are." But he would destroy his "copy" nevertheless. Never was his enjoyment of a "row" keener than when he himself was the object of attack, as was very often the case. He would read all the hard things said of him in one paper after another, fairly shaking with pleasure, and then say: "What a delightful lot they are. We must stir them up again." If the able editors who thought they were making him miserable with their "scathing" attacks upon him as "Larry" Godkin could have seen him under these conditions, they would have been greatly astonished.

The man who receives the most attention in the volume is Theodore Roosevelt. Other prominent personages are also portrayed in detail and with so much wit and fun that the reader is bound to know them better because of Mr. Bishop's book. So good are these that every newspaper man who reads the volume will want to keep it for his personal library.

* * *

THOSE who have anything to do with the classified section of the advertising department will find several laughs in the article "Pathos and Humor Mix at Tribune Want Ad Counter" which Betty Sander contributes to *The Trib* for October. The Trib, as I have mentioned a number of times, is the house organ for those who work on the *Chicago Tribune.* The Tribune by the way has just issued a supplement to its radio book and has brought matereial down to Oct. 1, 1925, so far as station data are concerned.

* * *

AN editorial in the *Christian Science Monitor* for Oct. 31 discusses the matter of future ownership of the *Chicago Daily News.* In doing so it comments about Mr. Munsey's newspaper properties in New York, the provisions of Joseph Pulitzer for the management of the *World,* after his death, the trust created by William R. Nelson for continuing the *Kansas City Star,* etc. It pays special attention to the more novel method of controlling the future of a newspaper—that adopted by Major Astor, owner of the *London Times.* This editorial concludes with the comment that it would have been interesting had Mr. Lawson adopted some similar plan for assuring the future of the *Chicago Daily News.*

* * *

LITERARY editors who have not received a copy of the booklet "O. Henry" by Arthur Bartlett Maurice who used to be literary editor of the *New York Sun* should send a request to O. Henry Memorial Association, 18-20 Market street, Asheville, N. C. Mr. Maurice has boiled down his copy and yet produced something that gives the reader a fairly comprehensive sketch of the life of O. Henry.

* * *

HOWARD WHITE in *The Ohio Newspaper* for October—a copy which has just reached my desk—tells about the newspapers of England as seen through American eyes. In discussing British newspapers he comments about their strange ideas of what is news, describes the pecularities of editors, and chats about the advertising columns.

At one time Mr. White was on the staff of the *Columbus Dispatch*—a paper that received a good write-up in this issue because of the fact that it has recently moved into its new home on the East Side of Capitol Square.

* * *

TO *The Yale Review* for October Thomas L. Masson contributes a serious discussion on "Humor and Comic Journals." With rare skill Mr. Masson picks out and enlarges upon the pivotal point around which the comic journal not only in America but also in other countries revolves. For example, the pivotal point of *La Vie Parisienne*—the representative French comic jornal—is "woman as a plaything." In other words, sex is the *motif* of its editors.

The editorial policy of the comic periodical is thus summed up by Mr. Masson:

> A humorous weekly can never depend for its permanence and solidarity upon its humor, for the reason that any solid mass of jokes must inevitably defeat its own purpose. That elusive thing which causes laughter is hinged always upon the element of surprise; it must therefore be casual and occasional. Besides, people do not want a diet of laughter without intermission. It has been proved over and over that what they really want is to be informed. The delusion that real knowledge lies just over the rim of the horizon still persists, in spite of the constant disappointments. We are all intense radicals in our aspirations. Thus the skillful editor hides the deep-seated conservatism of his humorists under the changing aspects of ridicule as applied to the new aspects of things in general, and at the same time, along with this, he mirrors the times. *Punch* is the most ful historian of modes and manners, and and manners are by far the best history; more seemingly solid things fade. Readers humorous paper get something more end than laughter, and get it in a way not con through any other medium; they get it, speak, in flashes of type and pictured s If you would know what they are doi London, what they are eating and drinkin saying and wearing, read *Punch.*

Mr. Masson is rather positive in hi lief that comic weeklies are not more than good incubators of talent. such journals the humorist often find first market but he soon breaks awa find greater freedom in the newsp and special stories in the popular m zines. One is surprised to find in th ticle no mention of such comic jou as *Vanity Fair, Punchinello, Tomah* etc. Mr. Masson does mention the ent *Vanity Fair* but does not give a to the old *Vanity Fair* which under editorship of Artemus Ward was prob the greatest comic journal, in the sense of that word, that the world ever seen.

NEWSPAPER MAKERS AT WORK

By PHILIP SCHUYLER

Howard Kahn Describes How "Mr. Fixit" Works

"MR. FIXIT is the best man I've ever known. He ought to run for Mayor of St. Paul."

The other day a letter of this sentiment came to the desk of Howard Kahn, editor of the *St. Paul News*.

"And we have received many others like it since we started our Mr. Fixit column about a year ago," Mr. Kahn said this week in an interview.

The column he referred to is one of several good will building stunts Mr. Kahn has tried out since he assumed the News editorship in 1920.

"We try to make Mr. Fixit a sort of free lawyer for the people," he explained. "He has been very successful in St. Paul, and now I think he might well take up practice elsewhere, using a local newspaper as his office."

Mr. Fixit, the phantom attorney, announces on his shingle, tacked to the top of his daily column, that he will take all complaints and questions from St. Paul citizens to the proper municipal and state authorities and see that they are attended to and answered.

Thus he is called upon to find out why St. Paul has neglected to remove Mrs. Jones' garbage for three days. When a sewer is reported to him as being out of order, he goes to the right city official and has it put to rights. Poor Mrs. 'Tony Tirello, not long in St. Paul from Italy, appeals to him for advice as to where she may obtain good free medical attention.

And so the questions and complaints pour in—at the rate of fifty letters a day, according to Mr. Kahn. All questions are published in the column with their answers. Names are withheld, although a rule insists correct names and addresses must accompany all queries.

"It saves the citizen from bothering around city hall, where, too frequently his complaint is buried under red tape mountains. A newspaper can get quicker action," Mr. Kahn said.

Of course the busy fixer must necessarily be a man of many hands and brains. And he is. This is the way he works.

A letter comes to the News office addressed to Mr. Fixit. First it goes to the desk of Mr. Kahn's secretary. She types it in duplicate. One copy goes to the reporter on whose run the query must be answered or the complaint filed. The other goes to a desk man, who keeps tabs on the reporter and sees that the questions are answered promptly.

"It turns up some mighty good stories," Mr. Kahn said. "But we keep confidence unless the writer is willing to let us publish his name."

Last winter a letter came from a woman asking Mr. Fixit for help. Her husband had deserted her and her eight children, she scrawled in a shaky hand. The address was peculiar and a reporter was sent to investigate.

He found the poor woman living with her family in a tent on the icy windblown outskirts of St. Paul. Winters in that city are notorious. The reporter promised to help.

Pictures were taken and a good human interest story found its way to the newspaper front page.

The first mail after the News went on the street brought a letter with a $90 gift for the woman. Before the week ended $1,500 had been raised. Neighbors set to work and built the destitute family a shack.

Meanwhile copies of the newspaper went to other cities in the state. The woman's husband saw an edition telling of the money raised. He decided to return and share his "old woman's" good fortune. But that person had become independent. She wouldn't have him back.

"Wait till I get hold of that newspaper editor," shouted the enraged man.

About an hour later Mr. Kahn's door slammed open and shut with a bang.

"Are you the editor?" a raucous voice challenged.

"Yes," Mr. Kahn admitted.

"Well what do you mean by printing that I deserted my old woman, that I'm a drunk. You ———, You ———."

Kahn sprang to his feet.

"I'm goin' to kill you," shouted the man, obviously mad with liquor.

Kahn was looking into the muzzle of a pistol. It wasn't a pleasant few seconds. He looked down at his desk. The Corona was about the highest object to hide behind.

But Kahn's secretary had shown nerve and quick wit. Unnoticed by the gun brandishing man, she had slipped from the room. She returned with the News staff as a reinforcement.

"Now we'll sit down and talk this over," said Kahn after the man had been disarmed. But without his pistol, the intruder didn't care to talk. He left, and Kahn hasn't seem him since.

"News, of course, is what counts the most, local news particularly," Mr. Kahn said, "But I am also a believer in all sorts of stunts and contests for building and holding newspaper circulation.

"For instance it is my personal hunch that if there are two newspapers in a town, the woman will be the one who will decide which her family will buy. Therefore I give plenty of space to women's features and news. Our newspaper has been criticized for giving so much space to women. Our Sunday paper, for instance, we give over to women to a very large degree.

"The stunt I like the best is the localized serial. We take a fiction story and change the setting from wherever it is to St. Paul. We give local names to streets and clubs, and make the story appear to be written about the home town.

"We also try to make a mystery of the author. We don't say absolutely that the serial was written by a St. Paul woman, but many seem to think so. Each day we get telephone messages, asking us please to tell who the authoress is. Some people become very angry. They read themselves into the fictitious characters.

"Of newspaper stunts of the past year, the best to my mind was the one conducted by the *Cleveland Press*, when the editor named a wreck of an automobile 'What Price Glory,' and sent it and a reporter-driver through a series of side-splitting adventures.

"On the News we made a one day story, based on a somewhat similar id
"We got hold of an old Ford a labled it with a banner 'Freeport, Min some small up-state village. Then had a reporter dress as a hayseed a drive it through the city. He was i structed to stall as often as possib break all the minor traffic regulatio and then come back to the office a write a story of his treatment by t police. It made a good yarn, and w instructive in that it told how a c should be driven through the city.

"For Christmas we play Santa Claus the crippled children at a local hospit All we try to raise is $2,500 and that sufficient to provide a splendid party f them. There are usually about 2 patients in the hospital and we promi to buy them whatever one thing th want most for Christmas. Yes, we ha had to buy ponies and bicycles, b oftener than not the requests are ve modest."

Mr. Kahn has been for five years t editor of the St. Paul News. He is native of Indiana and a graduate of t University of Indiana, where he studi journalism.

Following graduation in 1908 started newspaper work on the *Cincinna Inquirer* as a reporter. After a year went to St. Paul, where he began worl ing for the Dispatch. He did all the r portorial runs and in four years ha worked up to the position of editor the Sunday Pioneer-Press.

That was in 1914. In that year, yo may remember, a U. S. cruiser fired o Vera Cruz, Mexico, and a punitive ex pedition with General Pershing in com mand was crossing Mexican mountair chasing bandits who had killed Amer cans. Kahn went down there, not as newspaper correspondent, but as private.

He came back in 1916, fully decided h had missed the real battle fields, an sailed for overseas to enlist in the Frenc army as an ambulance driver. When th World War ended he was mustered ou a lieutenant.

Here to stay

As Certified Dry Mats are entering upon their second year of manufacture in the U. S. A. to meet the preferences and needs of American business, publishers are beginning to give up their misgivings of monopolistic control, as they realize the significance of a free and open market for dry mats.

Publishers who have long realized the sensibleness of DRY MAT COLD stereotyping are *now* beginning to reap the benefits made possible by adopting CERTIFIED DRY MATS.

There is nothing difficult or mysterious about our process; it is being installed without any loss of time or interruption of schedules. Your stereotyper is perfectly capable and competent to adopt Certifieds without any loss of time or trouble.

It is a privilege for us to be able to explain the merits of Certified Dry Mats, and you do not incur any obligation whatsoever by asking for full particulars if you are now using wet mats or by trying samples if you are equipped to handle dry mats.

We invite you to get acquainted NOW.

Geo. A. Kubler, Pres.,

CERTIFIED DRY MAT CORPORATION

340 Madison Avenue, New York, N. Y.

For "wet mat" printing with DRY Mat facility—use Certifieds.

Made in the U. S. A.

Another Big Month for THE NEW YORK SUN

In October this year The New York Sun carried 1,642,102 lines of advertising, against 1,382,630 lines in October last year—a gain of 259,472 lines.

This lineage leads everything in the New York evening field and beats the nearest evening paper by 41,278 lines. Indeed, for four consecutive months—July, August, September and October—The Sun has carried more advertising each month than any other New York evening newspaper.

The Sun's gain of 259,472 lines in October this year over October last year lacks only 10,000 lines of beating the combined gains for this same period of the Evening Journal, the Evening World and the Evening Post—the individual gains of all three of these newspapers added together.

A better understanding of what advertising building of this sort means is found in the fact that these great gains in The Sun's advertising volume are all made from advertising of the very first quality. The Sun stands rigidly for character and quality in its advertising columns, precisely the same as it stands for character and quality in its reading columns, and the readers of The Sun understand this.

The advertisers and advertising agents of the country, shrewd, keen men who know their business, are not putting advertising in The Sun as a compliment to The Sun or to its owner. They are putting advertising in The Sun because it is good business to put it there—because The Sun has a clientele of men and women who have money to spend and who spend it freely alike for their necessities and their pleasures—a larger concentrated audience of character and substance in the metropolis of the nation than advertisers can reach through any other newspaper. It is this audience that the sound business man wants to meet and does meet through his advertising in The Sun.

Incidentally, The Sun might add that in this day advertising is everywhere measured by the agate line—not by the column. The agate line is a standard that never varies; newspaper columns may and do differ greatly in length.

News Should Begin at Home

[Why Search for the Hot Stories? Dozens of Them Beg to Be Written in Each City Room]

By CHET JOHNSON

SOME alleged humorist once said: "Why go to Africa for ivory when there's so much of it at home?"

Paraphrase that: "Why send good (occasionally) reporters out to pile up taxi bills, wear out shoes and flop on stories when there are so many good yarns in every news room sobbing to be picked on?"

There isn't a city or managing ed in the country who would sit down and starve to death in a grocery store. Yet these same cuckoos, without exception, get news hungry day after day in the middle of scores of good, snappy yarns, and howl their heads off about the failure of murders, floods, earthquakes and scandals to happen when news is scarce.

Start right at the city desk. That's where the responsibility rests for this grave neglect. Breathes there a city editor with soul so dead who never has given cause for a story with this head:

CITY EDITOR RUNS AMUCK!

Threatens to Slay Entire Staff for Alleged Failure to Get First Edition Stories in Before Deadline

GIRL WRITER IN HYSTERICS

Chief's Violent Attack Causes Poor Sob Sister in Corner to Scream "Damn It, Shut Up! I'm Trying to Telephone"

When the good old brand of crime stories is scarce, something like this can always be smoked up into a red-hot story:

PASTE POT THEFT BARED!

Sporting Editor, Branded Desk Raider by Irate Copy Reader, Denies Charge and Uses Short, Ugly Word

SLEUTH FINDS MISSING STICKUM

Suspect Unable to Explain How Loot Reached his Table; Two Pencils and Old Scissors Included in Swag

See how easy it is if you just look around once in a while? As no edition is complete without a foul-play-feared story, the following may be used at any time without fear of libel:

MISSING OFFICE BOY SOUGHT!

Dragnet Out for Lad, Last Seen On Way to Art Room: Friends Fear Foul Play; Search of Pool Rooms Ordered

SPOT NEWS PHOTOS HELD UP

Lost Youth Had Only Prints of Bride Who Swallowed Poison and King of Bootleggers Sobs Managing Editor.

Perhaps it's feature stories you find most difficult to dig up on the spur of the moment. Why not try one like this:

STILL A "GIMME" AT 67!

Veteran Dramatic Critic Proud That He's Never Spent Dime For Cigarets But Smokes Regularly.

FURNISHES HABIT AND MATCHES

Younger Generation's Custom of Buying Own Pills Denounced By Old Time Scribe As "Jazz Extravagance"

Saturday, of course, is the best day for news in the office. It is then that the weekly outburst takes place in the general vicinity of the cashier's window. Capitalize that explosion—turn it into type for a yarn that's worth bull lines and 48 point decks in any paper:

GIGANTIC FRAUD PROBED!

Cashier Demands Investigation of Expense Account Swindle, Accuses Reporters of Mulcting Management

TAXI BILLS FIRST UNDER FIRE

Nickel Cuddler Blames Laxity of City Editor for Alarming Increase in Graft; Paper Headed for Ruin He Says

Conditions vary in every office. Some of the above yarns may not apply to every shop. But there is one that never fails. It is as certain of breaking at least once a day in every shop from San Ysidro, Cal., to Skowhegan, Me., as the photographer is of being jumped on for not getting a pretty girl somewhere in the picture of the church cornerstone laying ceremonies. If you haven't guessed it, here it is:

MANIAC THREATENS MASSACRE!

Mad Foreman Confesses Desire to Annihilate Every Man, Woman and Boy in Editorial Room; Hurls Hint of Walk-out

SCRIBES SHIVER AS TORTURE LOOMS

Raving Printer Brandishes Arms and Broadcasts Profanity After Boss Bawls Him Out Because Edition is 10 Seconds Late

FINED FOR FRAUD AD

Worcester Merchant in Court For Misrepresenting Silk

Alleged to have advertised a certain brand of goods for sale and then offering the bargain hunters another product Abel Robinovitz proprietor of a silk store in Worcester, Mass., was recently fined $10 on a complaint of inserting a false and misleading advertisement in a newpaper.

Albert S. Howard, an official of a Lowell cloth firm testified the defendant advertised a cloth of a copyrighted trade name as selling for $3.25 a yard when the standard mill price was quoted at $4.12 per yard. Robinovitz was told by the complainant's counsel he would ask for a dismissal of the case if the defendant would print a retraction of the same size and prominence as the original advertisement. Robinovitz inserted a retraction in the classified section of a newspaper but this was not considered satisfactory.

FLORIDA

Sunshine City's Largest Circulation

The DAILY NEWS, St. Petersburg's *Picture Paper,* has the largest circulation in the Sunshine City.

The DAILY NEWS was started on March sixteenth last. Its circulation is growing daily . . . On October tenth it reached fifteen thousand, without the aid of any circulation campaign.

It carries the flag of progressive newspaper achievement in Western Florida. *Everybody reads the NEWS.* Any bank reference.

UTAH DAILY TO TEST CIGARETTE LAW

Statute Forbidding Advertising to Be Fought in Court on Grounds of Constitutionality by Salt Lake City Tribune

Salt Lake City, Nov. 4.—The anti-cigarette law which forbids the advertising of cigarettes in any form in the state, is to be brought before the Supreme Court of Utah at an early date for the purpose of contesting its constitutionality. The law originally prohibited the sale of cigarettes as well as the advertising of them, but this section was repealed by the legislature which met in 1923 after a stiff fight.

As a compromise, for the loss of the "Sale" section of the act, the 1923 legislature passed a law forbidding the advertising of any form of tobacco in any medium, except newspapers. A test of the constitutionality of this law was decided upon soon after, but after the district court decided the law was unconstitutional on the ground of discrimination, the matter was dropped by those favoring the law and tobacco in all forms other than cigarettes has since been advertised openly and freely.

The State Treasurer is taking up the question of the constitutionality of the section of the law forbidding cigarette advertising and the *Salt Lake City Tribune* will be made defendant in a test case, it is stated. If the section is declared unconstitutional there will be very little left of the anti-tobacco and cigarette legislation in Utah.

New P. M. Daily for Blackwell, Okla.

The *Blackwell* (Okla.) *Tribune* has started a new evening newspaper called the *Blackwell Evening News.* Advertising is sold to general advertisers under the morning and evening combination plan.

Fields Starts New Oklahoma Daily

The *Okemah* (Okla.) *Ledger* started publication Nov. 2, as an evening daily using the United Press service. Raymond Fields, owner of the *Guthrie* (Okla.) *Leader,* owns the new daily.

OUTDOOR AD GROUPS MERGE

H. F. O'Mealia Named President at Kansas City Convention

Consolidation of the Poster Advertising Association with the Outdoor advertising Association into the Outdoor Advertising Association of America was effected at the annual meeting of the associations in Kansas City, Mo., last week. Harry F. O'Mealia of Jersey City, N. J., was elected president; C. U. Philley of St. Joseph, Mo. was elected vice president and Tom Hokes of Jamestown, Pa., treasurer. The 1926 convention will be in Atlanta.

A resolution condemning erection of advertising boards in residential districts, near scenes of beauty and at places they would be traffic hazards, was adopted.

C. B. Lovell of the General Outdoor Advertising Company, New York City, said more than $65,000,000 would be spent for outdoor advertising in 1925.

Lebanon (Pa.) Times Sold

The plant and equipment of the *Lebanon* (Pa.) *Daily Times* has been purchased by the Lebanon News Publishing Company. As a consequence of the transaction the circulation of the Times was added to that of the news. Publication of the Times was discontinued.

A New Era Begins for Salt Lake Telegram

A Few months ago Mr. A. L. Fish, General Manager of the Salt Lake Telegram, decided that his paper could remain no longer without a Ludlow. After his Ludlow had been installed he wrote us the following unsolicited letter:

"We have the new Ludlow and Elrod equipment in place and running. Everything is working in the most satisfactory manner. The equipment was installed without in any way disrupting the work of the composing room force.

"Before the Ludlow was installed we were greatly handicapped by lack of working space. Now we have thrown out enough type, type cases, etc., to start a good size printing establishment. By eliminating this equipment we have greatly increased the efficiency in the composing room."

EDITORIAL

SNUBBED HIM GOOD

EXPERIENCED newspaper correspondents in Europe have taken an extraordinary attitude toward Dictator Mussolini. It is not often that these men permit themselves to show any personal feeling toward a foreign diplomat or government, no matter how badly the press may be treated. This impersonality of relationships with foreign affairs and persons is, in fact, traditional among foreign correspondents, greatly befitting the dignity of the service.

But they cannot stomach Mussolini, and no reasonable person could expect it.

His iron heel has crushed out every vestige of freedom of the press of his country. His violence, when opposed, knows no bounds. Every Italian editor who has dared to speak out against misgovernment has been seized as a criminal. Newspaper plants have been smashed by the Black Shirts and free press has not drawn its breath for more than two years. The Dictator has stood, not because of any superior intelligence, service to his people, or honor among the men of the world, but because he carried a club.

During the past year the Italian censorship has not only tightened within, but has vigorously striven to extend its impudent sway to the nations of the world. Mussolini has sought to bring the foreign correspondents to their knees, thus to give to the outside world a one-sided picture of his regime.

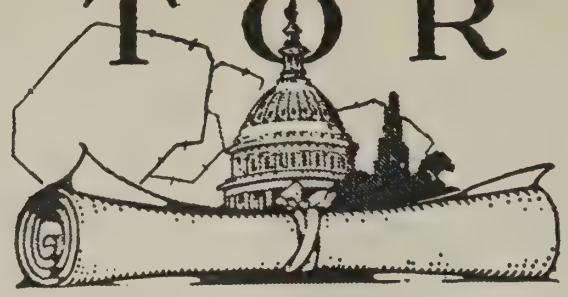
But the Dictator has found it difficult to terrorize the press of the world. The foreign correspondents have been resourceful. They have managed, no matter how tight the Dictator might screw down the lid, to get to the reading public the essential facts of the situation, all indicating that the Facist Government is a government of brute force and that its censorship is merely a blind for a multitude of sins.

EDITOR & PUBLISHER readers will thoroughly enjoy the news from Locarno. There, the press representatives got the Italian Dictator into the open. They snubbed him good. They gave him a dose of the right sort of medicine. They took a bit of the strut out of the audacious actor.

All honor to newspaper men who do not bend the neck to swashbuckling tyrants of the Mussolini type! The correspondents of Europe will live to write the whole truth concerning the Fascist outrages after public opinion has torn down the press barricades that Mussolini set up to make his cruel business safe.

Each week sees some new, happy convert to the fine art of spelling the word meaning volume of lines without the central "e," thus—l-i-n-a-g-e. The old spelling of the word smacks of ancient and outworn lineage.

PRESS AGENT SUGGESTION



SHOCKED and surprised the publisher of a daily newspaper in the South exclaimed, after a representative of EDITOR & PUBLISHER has pointed to a quarter page paint advertisement in the news columns of his paper, "What fool put that in?"

It was a quarter-page press agent graft, in mat form, and it was found that a young and inexperienced make-up man had inserted it because he happened to need a piece of copy of that size.

The incident serves to suggest that it might be a very good plan for publishers to insist that all press agent copy received through the mails or locally, be turned over to a man appointed to handle such matter. This man could be instructed how to handle the copy. If advertising, send it to the advertising department for proper solicitation. If news, read it to catch well-known press agent dodges, and inform the editorial department what to avoid.

A single individual could in a short time be made expert in the handling of press agent material, whereas if the copy is handled by anyone in the office sour results are inevitable.

"Neither do men light a candle, and put it under a bushel, but put it on a candlestick; and it giveth light unto all that are in the house," sums up for business the principle of advertising.

Strengthen ye the weak hands, and confirm the feeble knees.

Say to them that are of a fearful heart. Be strong, fear not: behold your God will come with vengeance, even God with a recompense; he will come and save you—Isaiah, XXXV; 3, 4.

FIRST EDITIONS

WE have before us as this is written the first edition of an evening newspaper published in a city of the Middle West. It is not entirely novel and is therefore anonymously treated here. It differs from first editions produced in the evening field in a number of cities, notably New York, in that it does not present a first page which, at least five days of the week, is but a mere "lobster" rewrite of morning papers, with selections for display identical with those of morning papers printed from five to seven hours earlier.

Only an occasional "story" breaks for first editions of evening papers. The world is asleep. There is an occasional big flash of news, but ordinarily the "lobster shift" scratches on the bare ground for a news lead. Failing of important matter, worthy of a spread which would command street sales, many editors play up rewrites of the morning papers, struggling for "new leads," and often present exaggerated accounts of minor fires or accidents in lieu of important news matter.

Our friend in the Middle West is reasoning out his task along different lines. It is his obvious theory that a news line that has sold papers in the morning field, unless it concerns a subject of a major second-day interest and can be built on later developments, is a twice-told tale, and by very unconventional means he seeks to turn a new first-page face to his world.

On dull days this editor may give his leading display to a local story which has been worked up in advance and which becomes first-class local feature material, for inside play in the regular afternoon editions. But it gives him something new to sell. The circulation department may instruct corner boys to call out a minor fire, on the first page, if there is no good call in the lead story, but the reader is asst of a substantial story in the news-feature.

There are times when a syndicate story is given play—something held over for the purpose. friend evidently sifts the night telegraph mate closely to find some story that has either been mi or under-played by the morning papers, but it r have a sound news base, read interestingly and itself to head-lining.

One of his stunts is to get in first page display dull days, a "situation," or "round-up" story on s important current news situation, and from such terial he is able to write good selling banner line

The inside pages of his interesting first edition well made and we judge they are prepared the before and stand through all editions. Combined the newsy first page that is produced by the arti here mentioned, and doubtless others as they ma contrived, a paper is produced which has chara and individuality and must excellently answer purpose of surburban distribution.

It must not be understood that our Middle W editor fails to rewrite for his first edition the m interests of the morning papers. He does so, always attempts to play up a new angle. His rew are brief.

In some of the larger cities first editions are c made to follow the lines of morning papers, ex on days when big news breaks, with such fidelity it is to be wondered why anyone who had re morning paper would buy them, except for fe material in well-established demand. Certainly a page routine news head-line, on newsstands a a. m., which is patterned exactly after headlines went to press twelve hours previous, are not culated to sell the first edition of any newspape

There is as much expense in preparing a mer write first page in a first edition as in the sc employed by the Middle West editor who is str to produce fresh display, and when the latter is enough to hold and turn inside for news-feature play an actual economy has been accomplished.

Because it is such a difficult task the "lobster" tion often challenges the best efforts in a newsp office. It calls for genius. We have seen "lobster" editions of Sunday papers, made for co circulation, which were better, because of their planned first pages, than later editions carrying plete, but less interesting news. Let the early tion work fall to the hand of a bright, resour young man, instructed to produce something new smart, and by legitimate but not necessarily co tional means! When he has made good at that the paper will have developed an editor of talen

---

It appears, from page one, New York "Hera Tribune," that the Matson Line is building t good ship "Malolo," finest, fastest, greate biggest, safest, most desirable ship known humankind, at Cramps, and thus does good o Charlie Post, the press agent, laugh in glee the "news" is printed and reprinted, time wit out number.

VALUABLE CONTRIBUTION

IN his refreshing series of articles in EDIT PUBLISHER Edward H. Edwards presents a cellent brief for clean copy, which is sure to widespread effect. The evils of blind and mi ing editing of copy have never been better expos any writer. In this day, when speed is a para press necessity, the author's warnings and se suggestions are timely. Editorial laxity not runs into heavy waste of time and material in m corrections in the composing department, but ha much worse effect of imparing a newspaper's pri reputation for accuracy because of errors whic not caught. Publishers and editors will appr Mr. Edwards' contribution to the cause of acc and the long-suffering printers' fraternity will it with pæans of praise.

C. C. Hamlin, Colorado Springs (Co Gazette and Telegraph, says that if the hea of great business enterprises knew what pr agents are saying in their names, there wo be short shrift for the grafters, and we agr

PERSONAL

EDGAR B. PIPER, editor of the *Portland Oregon* and president of the Portland Symphony society, gave a dinner to the directors of the society in honor of Willem Van Hoogstraten, noted conductor, who has arrived in Portland to direct the Portland Symphony Orchestra this Winter.

Scott C. Bone, former governor of Alaska and former editor of the Seattle (Wash.) *Post Intelligencer* and the *Washington* (D. C.) *Post* and former publisher of the *Washington* (D. C.) *Herald,* has been named a vice-president of the Western Publishers, Inc., at Atascadero, Cal., and will have editorial direction of an Americanization magazine to be started soon.

B. F. Irvine, editor of the *Portland Oregon Journal,* was the chief speaker at the recent Navy Day celebration in Portland.

Col. R. M. White, who purchased the *Mexico* (Mo.) *Ledger* in 1876, recently celebrated his 49th year of ownership. Col. White is editor emeritus and his son is the acting editor of the paper.

Bernard M. Wynkoop, editor and manager of the *Jackson* (Mich.) *Citizen Patriot,* with Mrs. Wynkoop, has returned from a brief vacation in Nova Scotia.

Col. Charles H. Browne, owner and editor of the *Horton* (Kan.) *Headlight,* suffered a badly wrenched back in an automobile accident recently.

Frank P. MacLennan, owner and publisher of the *Topeka* (Kan.) *State Journal* observed the 40th anniversary of his ownership of that paper Oct. 31.

IN THE BUSINESS OFFICE

WILLIAM J. LA VARRE, JR., has joined the advertising staff of the *New York Times* in charge of magazine section advertising. He was formerly a director of Foote & Wagan, Inc., advertising agency.

W. J. Tice, formerly secretary and treasurer of the Adamars Company, St. Louis, has joined the national advertising department of the *St. Louis Post-Dispatch.*

Charles Plambeck has become advertising manager of the *San Diego* (Cal.) *Independent.* He is assisted by Sid Fuller, formerly of El Paso, Tex.

William J. Rogers, manager of the business office at the *Trenton Times* and Mrs. Rogers, are parents of a son.

Miss E. Estelle Spear, assistant to William H. Dow, manager and treasurer of the *Portland* (Me.) *Evening Express* until the purchase of the Express and *Sunday Telegram* by the owners of the *Portland Press Herald,* entertained her former associates of the business department at her home at Cape Elizabeth recently.

Wilson M. Brooks, formerly in the advertising department of the *Richmond* (Va.) *News-Leader,* is in charge of the membership committee of the Virginia Society, just organized in Sarasota, Fla., with 26 charter members.

IN THE EDITORIAL ROOMS

WILLIAM CARNEY, of the *New York Herald Tribune* staff sailed this week on the Minnekahda for Paris, where he expects to spend a year. He will be joined in a few weeks by Mrs. Carney who is connected with the Herald Tribune Fresh Air Fund.

Jennings F. Sutor, news editor of the *Portland Oregon Journal,* has returned from a trip around the world in company with Aubrey R. Watzek, Portland lumberman.

Donald Ashton has succeeded Darwin J. Smith as city editor of the *Sacramento* (Cal.) *Bee.*

Frederick B. Edwards of the *New York Herald Tribune* staff has returned from a three weeks' stay in Canada.

John E. Kelly, shipping editor, *New York Herald Tribune,* and Mrs. Kelly sailed Oct. 30, for Havana for a two weeks' vacation.

Nicholas Roosevelt of the editorial staff of the *New York Times* has left New York on a trip to the Far East. He will arrive in the Dutch Indies, Nov. 15, later visiting the Philippines, Hongkong, Shanghai, Pekin, and Japan. He will return to this country in April.

Wilbur Hindley, of the editorial staff, *Spokane Spokesman-Review,* has written a play entitled "The Little Tin God," which will be produced by Maylon stock company in Spokane during December.

Henry Kraft, former night editor of the New Jersey office of the Associated Press, who for the past two years has been conducting a news bureau at Albany, N. Y., has sold his interest in that enterprise and joined the copy desk of the *Worcester* (Mass.) *Gazette.*

George H. ("Farmer") Smith, children's editor of the *New York Evening Graphic,* will be one of the principal speakers at the Press Luncheon to be given at the Stacy-Trent, Trenton, N. J., Thursday, Nov. 5 by the New Jersey State Congress of Mothers and Parent-Teachers Association.

Mrs. M. F. Hazelton and Miss Muriel Summer have joined the staff of the *Worcester* (Mass.) *Evening Gazette.*

Francis R. Murphy, formerly County Agent has been named county editor of the *Worcester* (Mass.) *Telegram.*

James E. Barry, former city editor of the *Jackson* (Mich.) *News,* has joined the *Jackson Citizen Patriot* editorial staff.

William J. Grow succeeds R. B. Anderson as managing editor of the *Lancaster* (Cal.) *Ledger-Gazette.* Mr. Anderson has gone to Indiana to continue in newspaper work.

Alfred Human has resigned as managing editor of *Musical America* to become editor and publisher of his own monthly, *Singing, The Voice Magazine.*

HOLDING NEW POSTS

ROGER BUSFIELD, from head of the *Fort Worth* (Tex.) *Record* copy desk, to copy desk, *Worcester* (Mass.) *Gazette.*

Miss Eleanor Mead from society editor, *Albany* (N. Y.) *Evening News* to society desk, *Worcester* (Mass.) *Telegram.*

Milton C. Chapin from county editor, *Worcester* (Mass.) *Telegram* to county editor, *Providence* (R. I.) *Journal.*

Edward Venable Mitchell from copy desk, *Richmond* (Va.) *Times-Dispatch* to sporting editor, *Charlotte* (N. C.) *News.*

Albert Hadlon from *Worcester* (Mass.) *Evening Gazette* to reportorial staff, *Providence* (R. I.) *News.*

Charles Chambers has joined the reportorial staff, *Worcester* (Mass.) *Evening Gazette.* He was formerly with the *Worcester Telegram.*

Kittredge Wheeler, from *Des Moines Register* copy desk, to *Milwaukee Sentinel.*

Mark Drumm from advertising manager, *Yuma* (Ariz.) *Sun* to a similar position, *Calexico* (Cal.) *Chronicle.*

Warren MacNeil from *Lynchburg* (Va.) *News* to copy desk, *Richmond Times-Dispatch.*

PRESS ASSOCIATION NOTES

KENT PRESS SERVICE on Nov. 9 will open their fourth bureau in Detroit, at 431 Howard street. The other three offices are located in Chicago, Springfield, Illinois, and St. Louis, Mo. Lawrence H. Selz, managing editor, is temporarily in charge of the new bureau.

Frank H. King, who for the last year has been working in the New York bureau of the Associated Press, is returning to London.

CHANGES OF OWNERSHIP

ALBERT HULEN, owner of the *Jamesport* (Mo.) *Gazette,* has sold the paper to A. W. Fagin, of Cameron.

Hamburg (Pa.) *Item,* which recently celebrated its 50th anniversary, has been sold to St. John McLean and Peter T. McGuirk.

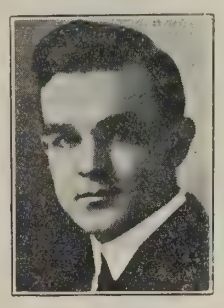
E. D. Fred, founder of the *Roseville* (Cal.) *Advertiser,* weekly, has sold his interest in the paper to G. A. Haas.

Wallace Casey, of the *Kansas City Star* and Mrs. Casey, employed on the *Kansas City* (Kan.) *Kansan,* have purchased the *Elkhart* (Kan.) *Morton County Progress.*

W. H. Cole has bought from A. B. Byrne the *Hyde Park* (Cal.) *Press.*

Frank Swann of San Jacinto, Cal., has bought the *Beaumont* (Cal.) *Leader* and changed its name to the *San Gregorio Leader.*

James H. Howell has disposed of his interests in the *San Diego* (Cal.) *Independent* to Franklin O Schroeder, who founded the publication and who now has complete control.



A. G. Campbell, owner of the *Tina* (Mo.) *Journal* for the past three years, has sold the paper to Chester Strong, formerly editor of the *Hale* (Mo.) *Leader.*

J. Herald Frost, owner of the *Vandalia* (Mo.) *Leader* has sold the paper to F. B. DeTien.

FOLKS WORTH KNOWING

FRANK E. PHILLIPS, manager of the New England Daily Newspaper Association, was formerly managing editor of the *Portland* (Me.) *Evening Express.*

A Portland boy, Mr. Phillips at 12 began taking papers from the press in the plant of the *Portland Daily Press.* Later he was carrier boy for the Press and afternoon *Advertiser.*

FRANK E. PHILLIPS

In the fall of 1905 he was graduated to the rank of reporter on the staff of the Advertiser. After two years on that newspaper he transferred to the Evening Express. On the Express he served on the copy desk for a while, and then for five years was sports editor, before becoming city editor and subsequently managing editor.

NEW PLANTS AND EQUIPMENT

RECENT Ludlow installations include the *New York Sun,* three machines; *Tampa* (Fla.) *Tribune* and *Sarasota* (Fla.) *Herald.* The *Portland* (Ore.) *Journal* has just replaced its old machines with two new Ludlows. Other new Ludlow users are: *Key West* (Fla.) *Morning Call, Haines City* (Fla.) *Herald, Pittsburgh* (Pa.) *Press, Camden* (N. J.) *Post Telegram,* and *Tampa* (Fla.) *Evening Globe.*

Three Hoe 16-page press units and one superspeed double folder, have been shipped by boat to the *San Francisco Bulletin,* the remainder of a double sextuple press being installed in the Bulletin plant. A 32-page Simplex press was shipped by Hoe to the *Salina* (Kan.) *Journal* last week.

ON THE MECHANICAL SIDE

R. SILLETTO, printer, *Des Moines Register and Tribune-News* was severely injured last week when the automobile he was driving collided with another machine.

Fred Richard, 20, assistant pressman on the *Lewiston* (Idaho) *Morning Tribune,* was caught in an elevator at the newspaper plant, October 26. He is in a critical condition.

SPECIAL EDITIONS

TAMPA MORNING TRIBUNE, 238-page annual development number, Oct. 27.

Cushing (Okla.) *Daily Citizen,* Greater Cushing Industrial number in six sections Oct. 28.

Janesville (Wis.) *Gazette,* 34-page History number, with 16-page tabloid section, Oct. 24.

WITH THE SPECIALS

H. H. REBER COMPANY, New York, has been appointed eastern representatives for *Diesel & Oil Engine Journal,* published by the Technical Publishing Company, Los Angeles.

E. M. Burke, Inc., special representatives, New York, have been appointed to represent the *Duluth News Tribune* nationally.

MARRIED

L. A. BROWN, advertising solicitor, rotgravure department, *Des Moines Sunday Register,* to Miss Erma Johnson.

ASSOCIATIONS

FRANK SULLIVAN of the *New York World* was the guest of honor at a dinner of the **New York Newspaper Women's Club** on Oct. 29, at the new headquarters of the club at 47 West 44th street. Miss Louella Parsons of the *New York American* announced that the first of the Sunday afternoon teas will be given on Nov. 15.

Oklahoma Associated Press Editors, meeting in Oklahoma City, with Kent Cooper, A. P. general manager as guest of honor, elected L. M. Nichols of the *Bristow Record,* president, succeeding Clyde Muchmore of the *Ponca City News* who was named a member of the national advisory committee. W. M. Taylor of the Enid Publishing Company was elected vice-president, and L. R. Penn of the Oklahoma City A. P. bureau, secretary. Oklahoma Associated Press Good Fellowship Club, composed of state A. P. operators, met at Oklahoma City Oct. 25 and elected T. H. Davis, Oklahoma City, president.

A Story Women Everywhere Are Going to Talk About

FICTION that women like—and buy newspapers to read, is an important part of the Central Press Association's complete and exclusive illustrated newspaper feature service.

First publication of the new novel of Edgar Poe Norris, author of the conspicuously successful "Surrender," will be in newspapers that receive the Central Press service. The story has the alluring title of "METHUSELAH'S WIFE," and it's the story of a beautiful girl who married an old man to achieve wealth and social position. The plot touches all of the elements of popularity.

Release date of the first of the generous, graphically illustrated, daily installments is Monday, November 16. Write now for proofs.

The Central Press Association

V. V. McNITT, President — Central Press Bldg. Cleveland — H. A. McNITT, Manager

P.S.—We produce the world's best daily picture page.

New York Editorial Conference will hold the first luncheon meeting of the season at the Hotel Astor, Nov. 13. The subject is: "Where is the Business Paper Editor of the Future Coming From?" Speakers will be J. W. Cunliffe, director of the Pulitzer School of Journalism, Columbia University; and W. W. Macon, of *Iron Age*.

Ohio Newspaper Women's Association recently awarded prizes for meritorius work appearing in the Ohio papers. Mrs. Amoretta Fitch, Cincinnati, won the prize for the best verse. Miss Allene N. Summer of Cleveland for the best news story and the best humorous story. Miss Florence Smith of the *Portsouth Times* carried off the honors for the best story about the 1924 convention. Miss Daisy P. Young was awarded the honors in the contest for the best feature story. Other prize winners were Mrs. Charlotta Price Shea of the *Bellefontaine Examiner* and Anna Marie Tennant of the *Springfield Sun*. Pauline Smith, Columbus, is the new president of the group.

For the sixth time Fred Cooper, editor of the *Topeka Construction News*, won the **Kansas Editorial Golf Association** title at the semi-annual tournament in Chanute. He defeated Bert Harris, *Herington Times*, on the 18th hole. L. B. Merillat, Topeka, won the championship consolation from H. W. Albright, Western Newspaper Union, Wichita; Angelo C. Scott, *Iola Register* won the Goodfellows flight from John T. Mack, *Newton Kansan-Republican*, with Wilfred Cavaness winner of the consolations from Dick Gelvin, Topeka.

Cape Cod Press Club held its annual election of officers Oct. 31, at Hyannis, Mass., with the following results: President, Charles Warner Swift, of Yarmouthport; secretary, Herbert L. Chipman, of Sandwich, and treasurer, George M. Haskins, of Hyannis. Philip Hale, *Boston Herald;* William O. Taylor, *Boston Globe;* Ruth Scott Miller, Raymond M. Crosby, M. A. Dewolfe Howe, Jason L. Rogers and Herbert W. Collingwood, editor of the *Rural New Yorker*, part time residents of Cape Cod, were elected honorary members.

California Advertising Service Association met in Los Angeles, Oct. 23-24, with James J. O'Shaughnessy, executive secretary of the American Association of Advertising Agencies, as one of the principal speakers.

Washington Press Association will hold its fourteenth annual Newspaper Institute, March 4, 5, and 6, at the University of Washington.

Third District Republican Editors of Kansas, will meet at Neodesha Nov. 7, for their annual fall meeting. Thomas E. Thompson, editor of the *Howard* (Kan.) *Courant*, is president.

Texas Editorial Association will meet in Brownsville, Dec. 2-4. Two hundred editors are expected to attend.

Midwinter meeting of the **Virginia Press Association** will be held at Farmville Friday and Saturday, Jan. 15-16. President W. S. Copeland is preparing the program.

Daily Wins $50,000 Libel Suit

A jury required only ten minutes to return a verdict favorable to the *Redding* (Cal.) *Searchlight* Oct. 22, in the $50,000 libel suit instituted by Leslie Jones, a city trustee. The suit was based upon a letter written by Ernest Dozier, also a city trustee, and published by the Searchlight during a recent municipal election campaign.

Dozier was also named a defendant in the action.

Pastor Wins $15,000 Libel Verdict

Rev John E. Lillbach of Brooklyn, N. Y., formerly pastor of a Quincy, Mass., church was awarded $15,000 damages by a jury in Federal District Court Boston Tuesday in his suit against the Eteepain Cooperative Society of Worcester, publishers of a Finnish paper, charging libel. He brought suit for $50,000 alleging that the paper had printed a story defamatory to his character.

ASSOCIATION CHIEFS

E. F. EILERT, publisher of the *Musical Courier*, New York and president of the Eilert Printing Company was elected president of the United Typothetæ of America at the 39th annual convention in Chicago, Oct. 19-24.

E. F. EILERT

This is the third time in the 38 years of the history of the international association of employing printers that a New York man has been elected to its presidency, the other two being Theodore L. DeVinne, who was elected at the first meeting in 1887 and William Green, elected in 1919.

Mr. Eilert is an ex-president of the New York Employing Printers' Association and the present chairman of its Board of Directors. He is also a director in the National Publishers' Association.

A. L. PERKINS HEADS A. P. GROUP

Texas Managing Editors' Association Meets in Dallas

At a meeting of the Texas Managing Editors' Association in Dallas last week A. L. Perkins, *Galveston Tribune* and E. B. Doran, *Dallas News* were reelected president and secretary respectively. San Antonio was selected for next year's meeting.

The Association comprises editors of Associated Press Papers. Amon G. Carter, publisher, *Fort Worth Star-Telegram*, was named member of the central divisional advisory board of the Associated Press. Reorganization of the Texas election bureau machinery was discussed.

A. F. Henning, election bureau manager, spoke. President Perkins was instructed to appoint a committee with power to act toward providing next year's election service. A. P. officials present included Kent Cooper, general manager, Edgar, T. Cutter, central division superintendent, Paul Cowles, Western division superintendent, E. T. Wolford, central division traffic chief, and Ray Baumgardner, Dallas bureau manager. Plans to broaden the state service were stressed.

FATHER AND SON RIVALS

Wilbur Morse, Senior and Junior, Represent Different Dailies at Capital

The Washington newspaper corps now includes father and son, Wilbur Morse, Sr., and Wilbur Morse, Jr., representing different Philadelphia newspapers.

Wilbur Morse, Sr., a veteran in the Philadelphia and Washington newspaper field, resigned recently from the financial department of the *Philadelphia Evening Bulletin*, to become the Washington correspondent for the *Daily News*, Philadelphia's afternoon tabloid which is being conducted by Lee Ellmaker, a former Washington newspaper man.

Wilbur Morse, Jr., is a member of the Washington bureau of the *Philadelphia Ledgers* and *New York Evening Post*.

Robert B. Armstrong, Jr., son of the late Robert B. Armstrong, noted Washington correspondent has stepped into his father's place as the representative at the Capital of the *Los Angeles Times*.

Honor "Marse Henry's" Memory

A portrait of the late Henry W. Watterson, of the *Louisville Courier-Journal*, has been ordered by the journalism school of Washington and Lee University, Lexington, Va. It will hang over the mantelpiece in the school's news room, according to Prof. R. B. Eklard.

FOREIGN FEATURE STAFF

New Service Being Organized for New York Sunday Times

Organization of a European feature service, in addition to the foreign news service now operated, is being undertaken by the *New York Times*. It is planned to have feature headquarters in London and branches in other important news services abroad. Articles supplied by the feature service would be used exclusively by the New York Sunday Times and its magazine section.

F. L. Minnigerode, who has been writing special articles for the Sunday Times from Rome, has moved to London as chief representative abroad of the Sunday department.

In Paris, Miss Diana Bourbon has been appointed correspondent for the Sunday paper, and in Berlin, Hermann G. Scheffauer. To this nucleus there will be added men in Rome and in Vienna, which is the source of feature articles from the Balkans as well as from Austria. Eventually the organization will be extended to include Russia and the Far East.

Arranging Sphinx Club Dinners

Preston P. Lynn, president of the Sphinx Club. New York advertisers' society, has named the following members to arrange for the next four club dinners to be held in November, December, January and February: George Ethridge, James P. Gillroy, Charles C. Green, and William H. Rankin.

President Lynn of the club has been seriously ill, but is now recovering.

INGLORIOUS MILTONS, BUT NOT MUTE, SO PAPER MUTES 'EM

WHETHER or not Concord, N. C., is particularly suited to composition of original poetry does not appear. Neither has it been shown that residents of Concord are particularly desirous of having their poetical products given to the world.

What is quite evident is that the *Concord Tribune* does not solicit contributions of such poetry. In a front-page box, under the heading, "No More Original Poetry," the following recently appeared:

"The Tribune is nothing if not accommodating, but in future we shall be compelled to draw the line at original poetry. We always want items of news, but we cannot get the consent of our minds to inflict original poetry on our readers."

Stunt Extra Stressed Fire Peril

An extra announcing that the busines district of Montrose, Pa., had been lev eled by fire because of lack of fire ap paratus was recently published by th *Montrose Independent Republican*, weekly There was no fire, the stunt having bee arranged to arouse the city to the need of the local fire department. Proceed of the sale of the extra were donated t the department.

Look Ahead

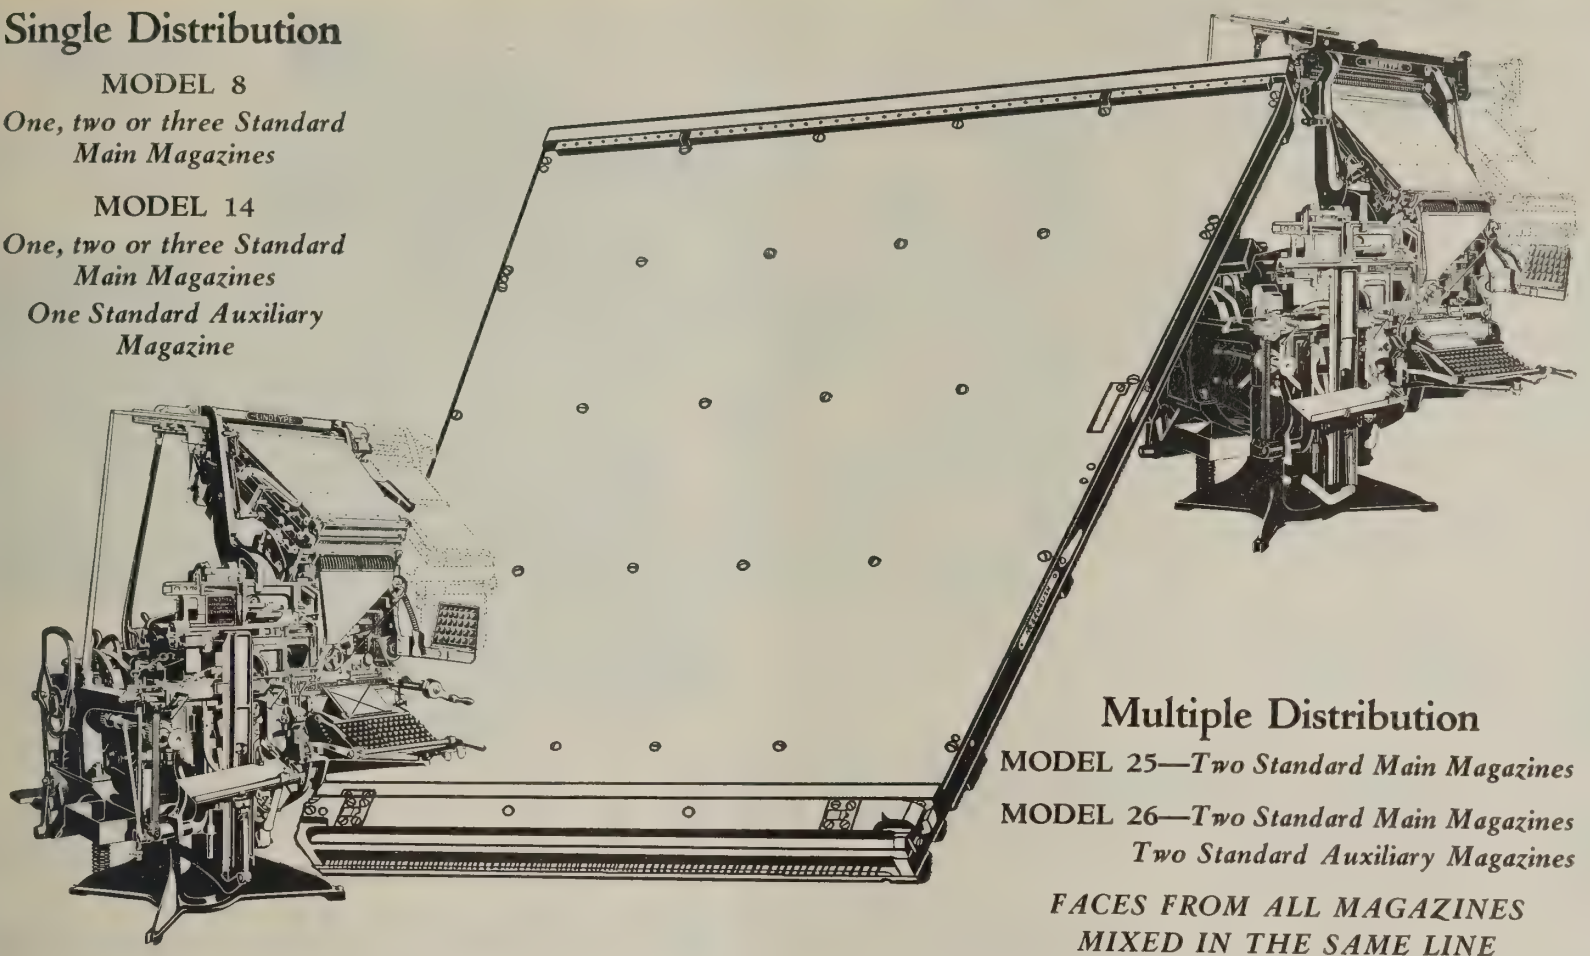
The Development of Church Advertising Is Worth While

What can restore public attention to the service of the church? What better than the newspaper?

In the last copy of the Literary Digest is the Reading *Eagle's* appreciation of Reading churches. The Eagle is looking ahead:

"Reading has about 70 churches. There is an investment of possibly $5,000,000—all for your benefit—and it is a benefit indeed. . . . Tomorrow these churches will be open to you. . . . Over 500 singers and musicians will sing and play for your benefit. Sixty clergymen will deliver carefully prepared sermons. Thousands of earnest, kind-hearted Christian men and women are ready to give you the sincere handclasp of fellowship. Doesn't all this mean something to you? With all this prepared for your benefit, why not go to some church, Sundays?"

The Associated Advertising Clubs has a series of Come-to-Church advertisements for the joint use of every church in town, in your Saturday church page.



Write us for plans and copy. The Church community is worth cultivating.

ADVERTISING AGENCY AFFAIRS

New Addresses for Two Agencies—H. K. McCann, New York, and Tracy-Parry, Philadelphia—Ozburn Joins John S. King Company, Cleveland—Sweetser Now with the O'Malley Advertising and Selling Company

TWO advertising agencies moved to new offices this week.

In New York, H. K. McCann Company transferred headquarters from 61 Broadway uptown to 285 Madison avenue. The Tracy-Parry Company, Inc., moved its Philadelphia offices from the Lafayette Building, Fifth and Chestnut streets, to the new building of the *Philadelphia Public Ledger* on Independence Square. The New York offices of this company are at 347 Fifth avenue.

C. L. Ozburn, formerly with the Albert Frank Company, New York, has joined the staff of the John S. King Company, Inc., Cleveland advertising agency.

Theodore H. Sweetser, for the past four years space buyer for the Franklin P. Shumway Advertising Agency, is now associated with The O'Malley Advertising & Selling Company, 244 Washington street, Boston.

W. Frank McClure, vice-president Albert Frank & Co., Chicago, and president of the National Advertising Commission, spoke before the Sales Managers' Bureau of the St. Louis Chamber of Commerce Oct. 30, on "The Advertising Man's Laboratory."

Edward A. Mackey, formerly with James F. Newcomb & Co., Inc., New York, in association with Martin Prehn, has formed the Prehn-Mackey Company, a new York advertising service company. Mr. Prehn had been conducting an agency under his own name.

The Campbell-Ewald Company, General Motors Building, Detroit, announces the addition of Keith Crombie and M. S. Charlton as copy writers.

S. C. Stokley for six years merchandising counsel and retail statistical compiler of the Grand Rapids Show Case Company and previously advertising manager of a number of eastern department stores including Higbee Company of Cleveland is now associated with George J. Kirkgasser & Co., Chicago advertising agency as merchandising counsel and account executive.

P. A. Wilkinson is now manager of the New York office of the Chambers Agency, Inc., succeeding, John H. Strumberg, who has returned to the New Orleans office as an account executive Mr. Wilkinson was formerly with Frank Seaman, Inc.

McKinney, Marsh & Cushing, Inc., Detroit advertising agency, announces tne addition to its staff of George R. Cullen, formerly engaged in advertising work at Grand Rapids, Mich.

Alfred E. Fountain, Jr., on Nov. 1, joined the New York office of the Lyddon-Hanford Company. He was formerly secretary of the Tuthil Advertising Agency, Inc., New York.

The Harold Worm Company, advertising agency, has been organized in Grand Rapids, Mich., Harold Worm having taken over the interests of his former associate, L. R. Vercoe, Jr.

Merrill Hoff is now assistant art director of the Irwin L. Rosenberg Company, Chicago advertising agency. Formerly he was with the Bureau of Engraving, Minneapolis.

Clyde A. Stevens has resigned as central manager of the *Nation's Business* and on Jan. 1, will join the Nichols-Evans Company, Cleveland advertising agency.

ADVERTISING COMPETITION

450 Salesmen for Newspapers Compared to 600 for the Magazines

The following figures gathered and made public by the Association of Newspaper Advertising Executives, show the magnitude of sales activity and competition in the national field:

"There are 91 special representative organizations in New York alone that sell for the larger newspapers. These 91 organizations employ 450 salesmen. In New York City, there are 142 organizations, employing 600 salesmen, who are fighting the advertising battles for the magazines. Another 100 salesmen working for 20 specials, represent the farm papers in New York. In addition, there are the numerous sales representatives of the car cards, outdoor display, novelties, direct-by-mail interests, etc.

"All of these figures refer to New York City alone. A similar regiment of men work from Chicago offices to induce advertisers to use their particular medium. Other hundreds of sales representatives operate from cities on the Pacific Coast, from Detroit, St. Louis and other large cities. Add to all of these salesmen, the home office executives, the service, promotion and local contact personnel and the army of advertising salesmen is augmented still further."

Hanks Heads Texas Press League

Meeting in Dallas, the Texas Daily Press League elected officers as follows: Bernard Hanks, *Abilene Reporter,* president; A. G. Mayse, *Sherman Democrat,* first vice-president; C. W. Wilson, *Mineral Wells Index,* second vice-president; E. W. Bateman, *Marshall Star,* secretary-treasurer. The League's advertising bureau elected J. L. Nunn, Amarillo, chairman; J. L. Gree, Denison; C. E. Palmer, Texarkana, and Walter Murray, Ranger, advisory committee.

Texas Semi-Weekly Now a Daily

The *Vernon* (Tex.) *Record* began publication Nov. 2, as a daily newspaper. Previously it had been a semi-weekly, under the direction of R. H. Nichols. James N. Allison, formerly of the local staff of the *Wichita Falls* (Tex.) *Daily Times,* has been appointed news editor of the new daily. Mr. Allison is the son of J. H. Allison, former publisher of the *Fort Worth Record,* now vice-president of the Wichita Falls Daily Times.

Shoes—and Ten Million People

The buying power potential of the ten million people in the six markets served by this newspaper group is of tremendous proportions.

Consider it, for example, in relation to the purchase of shoes. Suppose we allow these ten million people only two pairs of shoes a year and give them a minimum cost of $5 a pair. That would represent an expenditure of $100,000,000 for shoes in a single year.

These six markets, containing nearly one-tenth of the TOTAL POPULATION of the United States, can be covered adequately and economically by this newspaper sextette.

A representative will gladly give you the facts

WHAT'S WHAT IN THE FEATURE FIELD

Col. Haskell Writes About "The Land of the Soviets"—New Golf Feature—Christmas and New Year Stories—Wide World Opens Coast Bureau

COL. WILLIAM N. HASKELL, U. S. A., is author of "The Land of the Soviets," a series now being offered newspapers by King Features Syndicate, Inc., New York.

Col. Haskell had charge of the distribution of the $70,000,000 relief fund in Russia that was raised by the American people, and his articles describe the country as he saw it during the two years he was there.

The articles are prepared in four installments of about 3,000 words each.

Glenna Collett, the women's national golf champion, has signed a contract with the McNaught Syndicate, Inc., New York, for a series of weekly golf articles to appear beginning Dec. 1.

Metropolitan Newspaper Service announced the following Christmas and New Year stories this week: "The Truce of God," by Mary Roberts Rinehart; "Mr. Holiday," by Gouverneur Morris; "The Miracle," by Melville Davisson Post; and "Happy New Year," by Zona Gale.

Cosmos Newspaper Syndicate, New York, has added a weekly half page of college humor to its list of feature offerings. The new feature is made possible through an arrangement with the magazine *College Humor,* of which J. M. Lansinger is publisher.

A new daily puzzle feature was announced this week by the International Syndicate, Baltimore, Md. The new feature, it is stated, will "include practically every form of puzzle, excepting crosswords."

World Wide Photos has established an office in San Francisco, Cal., under the management of Victor Kuhes.

Bushnell Dimond is now writing the weekly Broadway letter, distributed by the Newspaper Feature Service, New York. He succeeds Brett Page who is convalescing in California after a long illness.

A vaudeville version of "Gus and Gussie," comic strip baloons of which are written by Jack Lait, made its appearance on the New York stage this week.

Gus Mager, newspaper artist, originator of the comic strip, "Hawkshaw the Detective," is now drawing a new daily strip called "The Fifty-Fifty Family" for the McNaught Syndicate, Inc., New York.

BRITISH GIFT CEREMONIES

Elaborate Preparations Made for Ambassador Howard at Missouri U.

COLUMBIA, Mo., Nov. 3—Special ceremonies including an academic procession, a university convocation, and a banquet have been arranged by the University of Missouri in honor of Sir Esme Howard, British ambassador to the United States, who on Nov 10 will present to the School of Journalism in behalf of the British Empire Press Union a stone from St. Paul's Cathedral in London.

Acceptance of the stone in behalf of the Missouri School of Journalism and the press of the United States will be made by George B. Dealey, president of the *Dallas News* and a vice-president of the Associated Press.

Following the presentation, E. Lansing Ray, chairman of the Board of Curators of the university, and publisher of the *St. Louis Globe-Democrat,* will preside at a special afternoon convocation in the university auditorium.

The stone was taken from St. Paul's Cathedral, near which William Caxton established the first printing office in England in 1477. Other early printing offices in this vicinity were those of Wynkyn De Wold, Richard Pynson, and John Day.

Sir Esme Howard's party will arrive in Columbia Tuesday morning, Nov. 10. Marshall Gordon will entertain these official guests of the university at breakfast. At noon they will be guests at a luncheon of the Round Table Club.

In the afternoon, Dr. Stratto Brooks, president of the university hold a reception for them at his In the evening they will be guests university at a banquet at the Boone Tavern. The party will then for Kansas City.

MILWAUKEE VETERAN DI

Charles Dean for 26 Years Op and News Man for A.P.

Charles Dean, for 26 years spondent of the Associated Press a waukee, died Nov. 4 while prepar leave for his daily tasks.

Mr. Dean retired from the Asso Press two years ago after 32 year the organization as a telegrapher newsman. He did not retire from life, however, becoming assistant director on the *Milwaukee Sentinel*

During his years of newspaper Mr. Dean had covered all the imp events in the city's history. He years old and was born in Canada was one of the acknowledged exp copying a news report in long hand

ANNOUNCEMENT

TO avoid promiscuous reprinting from College publications, with the attending embarrassment and belittling of our own publication, we announce that CollegeHumor has entered into written contracts with the publications here listed, granting to us *exclusive* reprint rights. We shall extend the privilege of reprint at our discretion, and publishers desiring this right must have our written permission. This important step has been taken to prevent otherwise unavoidable duplication of material and to maintain the prestige of college publications. This we are under obligation to protect, as well as that of CollegeHumor, for the privilege extended to us. We pay these college magazines for *exclusive* reprint rights and advertise in the publications listed.

What's Behind Your Intertype?

[**1**] Factories containing *one hundred fifty thousand* square feet, devoted exclusively to the manufacture of Standardized Intertypes, parts and matrices.

[**2**] An annual output of more than *twelve million* matrices.

[**3**] A regular stock of more than *thirty million* matrices.

[**4**] A large stock of supply parts to adequately meet the demands of all customers.

[**5**] Average profits during the past few years of nearly *one million dollars* annually.

[**6**] More than *one million dollars* cash in bank.

[**7**] Approximately *four million dollars* in customers' notes covered by mortgages and in accounts receivable.

[**8**] Sales and deliveries consistently increasing.

[**9**] Satisfied users operating from *one* to more than *one hundred* machines.

[**10**] Permanently established offices in New York, Brooklyn, Chicago, San Francisco, Memphis, Boston, Los Angeles, Toronto, London and in every civilized country of the world.

[**11**] More than twenty-five per cent of Intertype first preferred stock is owned by loyal Intertype employees.

[**12**] A well-trained organization working together with a definite policy of protecting slug casting machine users against machine obsolescence.

These are only 12 reasons why you should investigate the Standardized Intertype. Ask us to tell you about the others.

WITH THE GENERAL ADVERTISERS

Cadillac Motor Company Increases Sales with Newspaper Advertising—Lucky Strike's Investment $2,500,000 —Cilley Resigns as Wanamaker Ad Chief

SALES increases which followed adoption of wider use of newspaper space by the Cadillac Motor Company, Detroit, Mich., are told in detail by W. W. Lewis, advertising manager, in a letter to the Bureau of Advertising of the American Newspaper Publishers Association, made public this week.

The letter follows in part:

'Since we have assumed the entire responsibility for Cadillac newspaper advertising, we have had for the first time uniform coverage and it has been possible to take full advantage of the flexibility of the newspapers on more than one occasion.

"Since its introduction the newspapers throughout the country have carried the Cadillac story and this very insistent demand continues.

"Sales for the first month of the new car were 87 per cent greater than sales of the previous model during the same month.

"Sales for the second month were 68 per cent greater than sales of the previous model for the same month.

"Sales for the first month of the new car were 52 per cent greater than the best month of 1924 and 29 per cent greater than the best previous month in 1925.

"We are very much over sold on all body styles and from present indications this condition will exist at least until the first of the year.

"I am sure that our newspaper advertising has played an important part in announcing the new car.

"It seems to me that this is a job done best by the newspapers even though we are continuing a heavy schedule in the magazines and our distributors and dealers are making some use of bulletin boards as well as an extensive use of direct advertising."

Further details of the special campaign for Lucky Strike cigarettes being conducted by Lord & Thomas for the American Tobacco Company, were learned this week. Start of the drive was announceed last week in this department.

The Lucky Strike advertising will go in virtually every daily newspaper in the country and will run for 18 months. The investment is approximately $2,500,000.

Some weeks ago, orders for Lucky Strike copy went out through Lord & Thomas to a large list of newspapers. make the campaign extend the 18 months instead of the two months originally intended.

H. Gordon Cilley, for 16 years advertising manager of the John Wanamaker store in Philadelphia, announced his resignation Nov. 2. He declared he was not in a position to make any definite statement regarding his future plans. Capt. William M. Dryden, assistant advertising manager, is temporarily in charge.

Mr. Cilley served an apprenticeship in news and publicity work with the *Charlotte* (N. C.) *Observer,* where he was employed as printer and later telegraph editor. In addition to newspaper work, he studied law, but before he started practice he enlisted for the Spanish-American war.

At the end of the war Mr. Cilley came to Philadelphia and became assistant news editor on the *Philadelphia Record.* He held that position from 1899 until 1909, when he resigned to accept the management of the advertising department for the Wanamaker store. During the late war he was appointed a major in the army reserve corps but was not called for active duty.

James H. Rand, Jr., president of the Rand-Kardex Company, Inc., of Tonawanda, N. Y., manufacturers of filing systems, has purchased control of the Library Bureau, Inc. The new consolidation will be the largest manufacturers in the world of filing systems and business records, it is said. Recently Mr. Rand obtained control of the Visible Index Company, of New Haven, and the good will, merchandise, stock and trademarks of the Add Index, a subsidiary of the American Can Company.

A. H. Berwald has resigned as manager of advertising and sales promotion of the E. I. du Pont de Nemours & Co., Inc., Fabrikoid division, to undertake similar work for the Eagle Pencil Company of New York. Mr. Berwald went to the du Pont Company in 1916, and during the ten years has worked on a large number of du Pont products, including Pyralin toiletware, the advertising of which was under his direction for two years. For the last eight years the advertising and sales promotion of the Fabrikoid division has been handled by Mr. Berwald.

The Cleveland Metal Products Company has changed its name to the Perfection Stove Company, in order to tie up more directly with its product, the Perfection Stove.

A local chapter of the Association of National Advertisers has been formed in Rochester, N. Y., with L. H. Bartlett, of the Eastman Kodak Company, chairman.

Louis Bruch has been appointed assistant advertising manager of the American Radiator Company, succeeding Brewster S. Beach.

Louis Blumenstock has resigned as director of advertising of the Kaufmann's Department Stores, Inc., Pittsburgh, Pa., and will join the Hartman Corporation of Chicago, on Jan. 1, as director of advertising of all the Hartman stores.

V. Vivaudou, Inc., reported for the quarter ended Sept. 30, net profits of $79,585, after depreciation and all charges, compared with a net loss of $41,866 in the third quarter of 1924.

For the quarter ended Sept. 30, the General Cigar Company reported net income after charges and Federal taxes of $668,317.

Newspaper space was used in Chicago this week to promote the leather show held under the auspices of the American Leather Producers, Inc., Nov. 2-7. If results are as expected, similar shows and similar advertising will probably be arranged in other cities.

Peter P. Carney, for six years in charge of the publicity department of the Winchester Repeating Arms Company, and for two years in charge of sales promotion, retires from that firm at the end of this year. Mr. Carney has made no announcement of his future plans.

A. C. Stearns, Jr., has been made advertising manager of the Federal Radio Corporation of the Federal Telephone and Telegraph Company, Buffalo, N. Y.

Robert N. Fugarde on Nov. 2, became the advertising manager of the William Connors Paint Manufacturing Company, Troy, N. Y. Prior to this new connection he was assistant advertising manager of Loft, Inc., New York.

Julius Kayser & Company, and affiliated companies, New York, manufacturers and distributors of silk gloves, hosiery, etc., report a net income, after charges, of $1,174,642 for the fiscal year ended August 31.

Permanent roads are a good investment—not an expense

One Horse Town Good-Bye!

Any community whose streets are not durably paved is going to be known as a "one horse town."

When that time arrives, Prosperity says, "Good-bye, old friend, Good-bye!"

People start moving away. Bank deposits fall off. Business in general begins to take a slump, and the place is no longer "on the map."

Contrast all this with the city that is well paved.

It steadily forges ahead over its hard, even streets. Automobiles, busses and delivery trucks, operate efficiently and economically, regardless of season or weather.

Business is good, and keeps getting better. Modern, fire-safe buildings spring up. New industries are attracted to town. Plants and factories are working full time. Trade at the stores is brisk, and everybody's busy.

In short, permanently paved streets and roads are one of the very best investments any community can make. You can enjoy the tonic effect of well paved streets by helping your local authorities to find ways and means to build more of them.

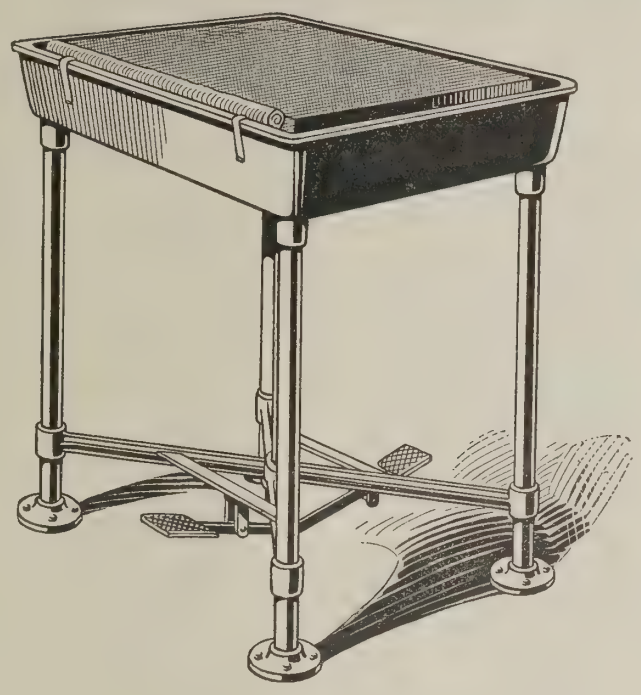
POWERS PERFECTION COOLER

Every Newspaper Photo Engraving Plant should have at least one



The Powers Perfection Cooler requires no water connection of any kind.

It can be moved at will by simply picking it up and placing it where it is wanted.

It has no mechanical parts to get out of order.

It applies cold water evenly and simultaneously to all parts of the plate—ON THE BACK OF THE PLATE only.

It cools the plate instantaneously to the exact temperature required and saves wiping, mopping and reheating.

The price of the Powers Perfection Cooler is $350

The *Powers Perfection Cooler* met with the instantaneous approval of both the workers and the owners wherever it was installed and tried. The men in the shops like it because it helps them in their work. They save time and effort, turn out more work and better work, and do it with very little physical labor. It is a clean, workmanlike way of doing what is otherwise a messy, sloppy task.

Proprietors like it because it saves gas, water, time and makeovers. These savings mean money and profits and that is what we all want. To satisfy yourself, go into your etching rooms and see what happens when the etcher tries to cool a large plate by dragging it over a roller wrapped in old towels and rags or a piece of burlap. Watch the plate buckle and then see him try to straighten it out. You know what that means in color work.

The use of the Powers Perfection Cooler does away with buckled and twisted plates, the splashing of water on the face of the plate and the constant work and worry connected with etching. A zinc etching is heated from 13 to 16 times by the etcher. That tells the story.

VETERAN BALTIMORE PUBLISHER DIES

General Felix Agnus, After Brilliant Civil War Record, Published American for Nearly Half Century —Sold to Munsey

General Felix Agnus, publisher of the *Baltimore American* for almost half a century, died on Oct. 31 after an illness of about 8 months. For several weeks he was unable to leave his bed. Infirmities of age caused his death. He was 86 years old, having been born in Lyons, France, May 5, 1839. He died in his apartment at 1836 Eutaw place.

Educated at Jolie St. Clair, near Paris, General Agnus left home when he was a boy of 13 and made a trip around the world in a sailing ship. Before he was 20 years old he fought in the French armies and later fought in Italy under Garibaldi.

Coming to this country about 1860, he planned to become a chaser and sculptor for Tiffany's, New York. But when the Civil War began he enlisted in Duryea's Zouaves, in New York, and went out to fight for the preservation of the Union.

He had many adventures during the war, and saw much active service, especially in the Virginia campaigns.

He was seriously wounded in battle and sent to Baltimore to recover.

During his convalescence he met and became engaged to Miss Annie E. Fulton, daughter of one of the publishers of the Baltimore American. They were married shortly before the close of the war.

Before being discharged from the army, Agnus reached the rank of major and was brevetted lieutenant-colonel, colonel and brigadier general in one day.

After the war he returned to Baltimore and for a time was an assessor attached to the staff of the Baltimore Custom House. Later he was employed by the American. When Charles Carroll Fulton died Agnus was made trustee of his will and thus became the publisher of the American. He continued in this position until Frank A. Munsey in 1920, bought it and the *Baltimore Star,* an evening edition of the American which Agnus had established. The Star was discontinued. Later William Randolph Hearst acquired the American and the News from Mr. Munsey.

As the publisher of the Republican newspaper in a state which is normally Democratic, General Agnus was in the national councils of the Republican party.

Father of George Fitch Dead

E. E. Fitch, former publisher of the *Galva* (Ill.) *News* and father of the late George Fitch, died Oct. 28, in Eugene, Ore., where he had made his home in recent years. Mr. Fitch was nearly eighty years old, a veteran of the Civil War, which he entered as a drummer. He served as superintendent of Galva schools from 1875 to 1884 when he bought the News, which he published nearly 30 years. It was in the News that George Fitch got his first training.

George Adams Post

George Adams Post, 71, president of the Standard Coupler Company, who died Oct. 31, was a former newspaper man. He was editor of the *Montrose* (Pa.) *Democrat,* and later was on the editorial staff of the *New York World.* He gained distinction as organizer and later president of the Railway Business Association.

N. Y. Times Man Dies

Rudolph Weinacht, 42, assistant auditor of the *New York Times,* died in New York, Nov. 1. He had been connected with the Times eleven years. Previously he had been in charge of the cost accounting department of *Collier's Weekly.*

Milwaukee Editor Dead

Henry Towell, 69, editor and publisher of the *Milwaukee Times,* died at his home Nov. 2.

Obituary

NEIL MACKINNON, office manager of the Wood-Flong Corporation, New York, died Nov. 3. He had been connected with the firm two and one-half years and before that was on the *New York Evening Post* staff.

G. BERNARD WEST, 77, former editor of the *Washington Times* and the *Washington Post,* died in Los Angeles, Nov. 2. For the last 13 years Mr. West was editorial writer for the *Los Angeles Examiner.*

PAUL GYLLSTROM, 49, formerly of the *San Diego Union* staff, died Oct. 25, at San Bernardino.

GEORGE L. KEHEW, 77, an employe of the *Boston Herald* for more than 50 years and said to be the oldest active newspaper mailer in the United States, died Oct. 24, at the Somerville, Mass., hospital from injuries received when he was struck by a motor car on Oct. 13.

JOSEPH W. MILLER, 87, formerly editorial writer on the *St. Louis Globe-Democrat,* died recently.

MRS. ISABELLE HENDERSON, 72, widow of Howard E. Henderson, for many years managing editor and one of the owners of the *Kokomo* (Ind.) *Dispatch,* died recently in Indianapolis.

RAYMOND J. GIBBONS, 25, sports writer on the *Cleveland News,* is dead after a two months' illness.

GEORGE SHIRLEY, 55, who perfected a machine, which attached to fast presses, helped eliminate static electricity, died at his home in Denver. He was a printer on Missouri, Kansas and Colorado newspapers for many years.

KIMBER C. SMICK, 72, editor of the *Wamego* (Kan.) *Reporter,* died at his home suddenly following an attack of heart disease. He had owned and edited the Reporter for 29 years.

SAM A. MOTZ, 53, owner of the *Emmett* (Idaho) *Examiner* for 14 years, died in Boise, Oct. 23, following an operation.

MRS. MINTA HARRISON, 81, mother of John H. Harrison, editor and publisher of the *Danville* (Ill.) *Commercial-News,* died Oct. 24 at her home in Danville after a brief illness. Her husband, the late Dr. Thomas H. Harrison, was publisher of the *Lebanon* (Ind.) *Pioneer* and later the *Michigan City* (Ind.) *Dispatch.*

DARIUS STACY LOGAN, 71, for 21 years foreman on the *Leavenworth* (Kan.) *Standard* and later connected with papers in Prescott, Ariz., died recently in San Diego, Cal.

DAVID E. SWALES, 83, lifelong printer, employed on the *Jacksonville* (Ill.) *Daily Journal* when it was established and a resident of Jacksonville since, died Oct. 23 at his home.

MRS. ELLA THATCHER, publisher of the *Alta* (Ia.) *Advertiser,* and associated with her late husband in the business, died last week in Storm Lake, Ia., where she had lived the last few years.

EDWIN ROUTLEDGE, 57, editor and publisher of the *San Antonio Daily Commercial Record,* died Tuesday.

Former Washington Writer Dies

L. White Busbey, 73, veteran Washington correspondent, vice-chairman of the Republican National Committee in charge of publicity during 1924, died at his home in Washington, D. C., Oct. 30. He was for many years the correspondent of the *Chicago Inter-Ocean.* In 1903 he became private secretary to "Uncle" Joe Cannon, serving in that capacity until Cannon's retirement in 1923. He was considered an authority on the tariff.

Radio Set Used on Murder Story

To cover a murder story, 80 miles away, with no telephone or telegraph communication available, the *Eureka* (Cal.) *Humboldt Standard* used wireless in enterprising fashion on Oct. 21. A wireless set with two skilled operators in charge was rushed to the murder scene. Within an hour after the set was on the ground an aerial had been raised and communication established.

Get Your Readers to build their own cook books in a card index box out of the columns of your paper.

A card index box with the name of your paper on it and a card index recipe on your woman's page. Think that over. Now being used by 50 leading newspapers of America. Write us for terms and particulars of our plan.

DAILY PAPERS FROM OTHER CITIES
HOTALING'S NEWS STAND
BROADWAY AND 43RD ST.
NORTH END THE TIMES BUILDING

"Perhaps the most cosmopolitan spot in New York City is Forty-third Street and Broadway . . . Here is a mammoth news stand which sells newspapers from every city in the world. . . Every town has similar stands, but none as huge as this, and none as varied and as picturesque in its patronage."
—*Boston Transcript, Oct. 29, 1921*

HOTALING'S NEWS AGENCY, 308 WEST 40th STREET, NEW YORK

WHAT THEY ARE SAYING

PROFESSOR NEWSPAPER

"THE newspaper touches varied fields of knowledge, and, if the reader really seeks to understand things to which daily dispatches point, he will educate himself."—Glenn Frank, President of the University of Wisconsin.

* * *

NEWSPAPER INTEGRATES COMMUNITY

"NEWSPAPERS—the soul of the city. A town without them is only a place of brick and stone."—Walter P. Burn, Pacific Coast Manager, American Newspaper Publishers' Association.

* * *

"A MAN IN PRINT"

"THE newspaper is built around its soul, not its pocketbook, even in this clamorous, commercial age. The newspaper is a man in print. The newspaper of today is as great as that of yesterday and that of tomorrow will be greater as it is more responsive to the soul of man."—Dean Walter Williams, University of Missouri.

* * *

TWO LISTS OF NEWSPAPERS

"ONE national advertiser has two lists of newspapers, which he patronizes; one list of those who will run free advertising, to which he sends no paid matter; and one list which will not run free advertising, to which he sends only paid matter. He must patronize both to get coverage of the country."—Wil V. Tufford, Secretary, Inland Daily Press Association.

* * *

ADVERTISING A STIMULANT

"JUST as strong, vigorous circulation of the blood is stimulated by good food and exercise, so is a healthy circulation of the things people enjoy, stimulated by the desires and confidence created in their minds by advertising."—Knox Armstrong, E. M. Kahn & Co., Dallas.

* * *

NEWSPAPER AND TAXES

"UNQUESTIONABLY, there is no agency existing which can exert so powerful an influence for the reduction of the costs of government as a newspaper. A newspaper that consistently and intelligently calls to the attention of its readers the mounting costs of local government occasioned by demands, which while seemingly needed are not really for the benefit of all concerned, will do much to relieve the burden of taxes."—Harry F. Long, Massachusetts Tax Commissioner:

* * *

RADIO FOR GOOD WILL ONLY

"THE testimony of advertising concerns that are spending money consistently in radio broadcasting is to the effect that they are pleased with the good will value of the broadcasting but they find it just as necessary to maintain their reader audience and in many cases to increase it. In my opinion radio broadcasting for toll should result in automatically increasing newspaper and periodical advertising."—Frank A. Arnold, Frank Seaman, Inc., New York.

* * *

TREMENDOUS POSSIBILITIES

"THE possibility of increased business to savings banks which know how to advertise effectively the human elements in their story is tremendous. However, too many of them know little about advertising and much of the total expenditure is wasted. No advertising is good unless it is productive and savings bank advertising cannot possibly be so when the message consists of scarcely more than a name, address and a statement of business. It emphasizes the fact that the bank is neither progressive nor aggressive; that if it has a message it does not know how to deliver it."—Hugh A. O'Donnell, Assistant Business Manager, *New York Times*, before Financial Advertisers' Association.

Jackson Semi-Weekly Started

The *Jackson* (Mich.) *Tribune*, a twice-a-week newspaper, has been launched by former employees of the defunct *Jackson Morning News*. The first issues consisted of 8 pages and the paper is given free distribution in the city. The Tribune is published by the Jackson Tribune Publishing Company, capitalized at $25,000, according to articles filed with the secretary of state. A total of $10,500 is listed as having been subscribed and $2,660 paid in. The officers of the company are: President, John H. Allen; vice-president, Albert J. Horton; secretary-treasurer, Zora J. French.

Prints 68 Pages, Regular Edition

The *Baltimore Evening Sun* on Friday Oct. 30, published the largest regular week-day papers in its history, 68 pages carrying 412 columns of advertising. One advertiser took four pages.

San Francisco Chronicle

PAYING circulation determines the logical choice of an advertising medium. In San Francisco and Northern California it is a recognized fact that The Chronicle following has the buying power.

225 Fifth Ave., New York

Business is Stimulated in Illinois By Favorable Crop Report

All lines of merchandising and industry are showing increased activity now that the crops are out of danger and all of them, excepting corn, gathered and stored. Corn husking is in active swing. Prices for all farm products continue steady at satisfactory levels, which means the farmers will have money to spend.

Merchants are stocking up freely on this prospect. Business will come with a rush after the corn is marketed.

Retail store trade continues well ahead of last year.

There are more customers in the market than a year ago, larger road sales, and a greater current distribution of wholesale dry goods. There is a better distribution of merchandise, no surplus of stocks and a good healthy trade situation.

Illinois newspapers will cooperate with you in merchandising this market.

CONFERENCE TO FIGHT WASTE IN BUSINESS

Two Hundred Manufacturers, Merchants and Editors to Consider Waste at Washington, Dec. 15-16

A concerted attack by business men upon waste in business will be opened at a general meeting of the National Distribution Conference to be held in Washington, Dec. 15 and 16, under the auspices of the Chamber of Commerce of the United States.

More than 200 manufacturers, wholesale and retail merchants, economists, editors, advertising experts and representatives of trade associations and organizations, will weight the methods by which transactions aggregating upward of $50,000,000,000 annually in the United States, as variously estimated, are carried on. They will attempt to point out the practices which are unethical and economically unsound, constituting major sources of waste, and outline methods by which they may be eliminated.

Problems arising in the field of merchandise distribution, extending from the corner grocery to the large department store and manufacturing corporation, will be brought into relief in a series of surveys now approaching completion. These include the gathering and dissemination of statistical information looking to the stabilization of business, legislative and administrative questions involved in the governmental regulation of business, conditions under which business is now carried on and the costs of conducting various kinds of business.

The six surveys, each covering an important aspect of distribution, have been undertaken by six special committees of representative character. The subjects with which they deal and their chairmen are:—"Collection of Business Figures," Owen D. Young; "Trade Relations," A. Lincoln Filene, Boston; "Market Analysis, Advertising and Advertising Mediums," Stanley Resor, president of the J. Walter Thompson Company, New York; "Expenses of Doing Business," Robert R. Ellis, Hessig-Ellis Drug Company, Memphis; "Methods of Distribution," L. D. H. Weld, Director of Research, Swift & Co., Chicago; "General Conditions Affecting Distribution," G. S. Brown, president, Alpha Portland Cement Company, Easton, Pa.

The wide range of problems brought to light in these surveys will be submitted to the National Distribution Conference with a series of recommendations which will form the basis of discussion and will serve as a definite plan of campaign, national in scope, to be conducted by business for the elimination of waste in distribution.

New Farm Weekly

The *National Farm News*, a weekly newspaper for farmers has just appeared. It is a newspaper, claimed to be unlike farm journals, which undertakes to give each week a complete service of news pertaining to agriculture. It is edited by Dixon Merritt, and published by the Independent Publishing Company, with offices at 219 G street, N. W., Washington, D. C.

Tearing Down Roadside Ads

Carrying out the provisions of a bill passed by the 1925 Wisconsin Legislature, workmen of the La Crosse highway department last week began to clear the county highways of billboards and other advertising signs. Small tin signs, wooden signs, and all other types of advertising mediums which obstruct the view of passing motorists are being removed, pursuant to the order.

Price Heads Danville Ad Club

An advertising club has been formed in Danville, Ill., with A. E. Price, advertising manager of the *Danville Commercial-News* as president; George Logan, vice-president and Arthur T. McGuire, secretary-treasurer.

NEW YORK HONORS FOUNDER OF ITS FIRST PAPER

(*Continued from page 7*)

pered in his new enterprise and in his historic fight against the tyranny of the government over so-called seditious printed matter, he became famous as one of the early champions of the freedom of the press. It must be recalled, however, that Mr. Bradford had earlier suffered arrest and been threatened with the loss of his press when in Philadelphia. In New York, however, where he was under oath and practical bondage to the Crown he was of necessity conservative and loyal.

Bradford's paper often varied in size from two to eight pages. He continued as a newspaper publisher until Nov. 19, 1744, when he withdrew from all connections with the New York Gazette. During the last few years he had been in partnership with Henry De Foreest. When Bradford withdrew, De Foreest changed the name of the paper to the *New York Evening Post.*

James Parker, another printer who had learned the trade with Bradford, later borrowed the discarded title "Gazette," and put it in the heading of his paper—then *The New York Weekly Post-Boy.* Parker, a warm admirer of his former teacher, printed this obituary in his paper, after Bradford's death, on May 25, 1752:

Last Saturday Evening departed this Life Mr. William Bradford, Printer of this City in the 94th Year of his Age: as the Printer of this Paper liv'd upwards of 8 years Apprenticed to him, he may be presumed to know something of him. He came to America upwards of 70 years ago and landed at the place where Philadelphia now stands before that City was laid out or a House built there. He was a Printer to this Government upwards of 50 years and was a man of great Sobriety and Industry; a real Friend to the Poor and Needy and a Man Affable to all; but acquiring of an Estate happened not to be his faculty notwithstanding his being here at a Time when others of not half his good Qualifications Amassed considerable Ones. He was a true Englishman and his Complaisance and Affection to his Wives of which he had two was particularly great, and without the least exaggeration it may be said that what he had acquired with the first . . . . was lost with the second. He had left off business for several years past and being quite worn out with Old age and labours, his Lamp of Life went out for want of Oil.

This quaint tribute from his apprentice and fellow printer is in error as to Bradford's age which has been conclusively proved by a statement found in an old Almanac for 1739. Printed by Bradford, himself, it has in its record of events for the month of May: "The Printer born the 20th 1663." Here as in the matter for the date of the first issue of his paper, the fact to be accepted is what Bradford himself has recorded in type.

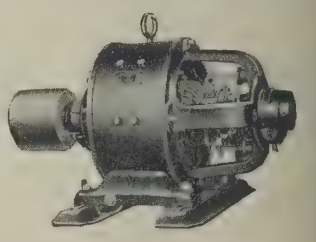
Notwithstanding its slight inaccuracy, this obituary is an eloquent appreciation of the man whose name has been so long and worthily identified with the American press. His influence in Pennsylvania through his son, Andrew, and more especially later through his grandson, William, was particularly conducive to the advance of the American newspaper. Of this later William Bradford's paper, the *Pennsylvania Journal,* established December 2, 1742, Dr. Lee, already mentioned as the author of "The History of American Journalism," has written that it "was in many respects, and these the most essential, more independent in tone than the *Pennsylvania Gazette* and was much the better newspaper during the Revolutionary Period."

With traditions and accomplishments such as these, associated with the name of Bradford, it is small wonder that such institutions as the New York Historical Society and Trinity Church as well as the more specialized organizations cooperate in commemorative exercises to keep alive the memory and influence of the man who was the first to suggest printing the Bible in the middle colonies, founded the first paper mill, was the earliest champion of independence of the press and its right, and set up the first newspaper in New York City which was destined 200 years later to be proud of the high moral standards and intellectual as well as economic progress of what it so simply still calls its newspapers.

Cline System—What It Means to the Printing Trades

Cline System means more than a "service" to printers

—more than motors and controllers which thousands of printers have found the best from every standpoint—safety, speed, economy, and long life.



—more than equipment suited to every printing need from the largest newspaper press to the smallest wire stitcher.

CLINE

Twenty years of specialized experience in printing press control engineering

Cline System means an organization of trained experts, who for a quarter of a century have specialized in just one thing—electrical equipment and control systems for printing machinery. A corps of engineers who design, manufacture, and install this equipment with all the knowledge and skill that twenty-five years have brought to them.

WESTINGHOUSE

Known throughout the world as manufacturers of the best electrical equipment

IRGES CAUTION IN USE OF DIRECT MAIL

lepartment Store Ad Executive Tells Convention It "Failed to Perform" in Year's Test—Newspaper Budget Not Cut

An important Detroit department store ls experimented with direct by mail advrtising and found it wanting.

This admission was made by Sydney lghtstone, associate advertising manager, the J. L. Hudson Company, Detroit, fore the eighth annual convention of the Irect Mail Advertising Association, held Boston, Oct. 28-30. The subject of Mr. lghtstone's address was "Direct Mail oblems in the Department Store."

"The mail advertisements failed to perfm," he declared.

Mr. Lightstone explained his assertion vs the result of an extensive experimen vh direct mail advertising, carried on f more than a year by his store.

The results obtained, he said, warrant ction in the use of this kind of advert ng in preference to newspaper adver ting. Direct mail failed in performance a a low cost in a sufficient number of es, without risking failure on doubtful es.

Following their direct mail campaign al what he declared was the resulting flure, Mr. Lightstone said his store, ter careful and painstaking analysis of it experiment, decided not to cut down lir newspaper appropriation and to ope their enthusiasm for the postal ute.

t makes considerable difference, it was ought out, whether or not the advertiser an available medium that is read by l people he desires to reach. If there s medium which really covers the field, the readers of that medium look to it c news and guidance in their buying, ln that method of advertising should ve more profitable than direct mail, said.

Marco Morrow, assistant publisher of l Capper publications, Topeka, spoke "Direct Mail from the Rural Standnt."

Miss Janet Olson, of Chicago, president the Chicago Direct Mail Advertising sociation, in an address on "Spending Letter Shop's Appropriation," said lt the ideal advertising appropriation a $10,000 shop is five per cent, and two a half to two and three-quarters per et for a shop of $50,000 and over.

Major Carroll J. Swan, commander of Sisscup-Pishon Post, American Legion, mposed of Boston newspaper and adverng men, led in the festivities at the quet and gambol on the second night the convention at the Copley-Plaza tel.

William F. Rogers, of the *Boston Transcript,* was a member of the executive committee of the convention; Richard Holland, *Boston Transcript,* and Clark den, Hartford (Conn.) Ad Club, press blicity committee.

STRACHEY PRAISES INGENUITY OF AMERICAN REPORTERS

Washington, Nov. 5.—Dictograph-equipped newspaper reporters may evolve from American ingenuity, in the opinion of J. St. Loe Strachey, editor of the *London Spectator,* who is staying at the Mayflower Hotel for a few days. Such a machine of vest pocket size, would make for accuracy of interviews he pointed out.

"I put nothing beyond the ingenuity of you Americans," he said. "Soon you will produce dictating machines small enough for the reporters to carry with him, and put into action whenever he needs it. I favor this way of recording interviews and the publication of practically the entire conversation between reporter and the man interviewed."

IOWA DAILIES VOTE $50,000 AD FUND

$15,000 in Cash Raised at Des Moines Meeting and $35,000 in Space Pledged to Tell Merits of State as a Market

DES MOINES, Ia., Nov. 2.—The state and nation will be reminded of Iowa's wealth and purchasing power through the medium of a $50,000 advertising campaign launched yesterday by the advertising committee of the Iowa Daily Newspaper Association.

Fifteen thousand dollars in cash was appropriated by the committee in addition to contributions of space valued at $35,000 by members of the association. The expense of the campaign will be met by members of the association. Last year over $100,000 was spent by the association for the same purpose.

Two full pages were ordered in the *New York Times* and the *Chicago Tribune.* A full page each week for a year also was taken in EDITOR & PUBLISHER, to emphasize the advantages of the state as a market.

This is the second year such a campaign has been made by the daily newspapers of Iowa to promote the value of the state. All of the advertising run in the New York Times and the Chicago Tribune will be carried in all of the daily newspapers participating in the campaign.

The meeting was called by John F. D. Aue, publisher of the *Burlington Hawk-Eye* president of the Iowa Daily Newspapers Association. Robert R. O'Brien manager of the *Council Bluffs Nonpareil* resigned as chairman of the advertising committee and was succeeded by Frank D. Throop publisher of the *Davenport Democrat.* Other members in attendance were: George Thayer, manager of the *Marshalltown Times Republican,* H. T. Watts, business manager of the *Des Moines Register and Tribune News* and Lafe Young, Jr. general manager of the *Des Moines Capital.*

SAYS INSURANCE NEEDS BETTER ADVERTISING

Subject Has Never Been Interpreted in Copy as It Should Be, Gardner Osborn Tells Boston Advertising Conference

The need of insurance companies advertising in newspapers, periodicals and by direct mail, was strongly advocated by Gardner Osborn, vice-president of Reimers & Osborn, Inc., New York, in an address before the Insurance Advertising Conference held last week in Boston. He declared that insurance never has been interpreted as it should be interpreted, and that any means which would properly educate the public on insurance matters should be used to prepare the way for the agent who solicits business.

G. C. Parlin of the Curtis Publishing Company, Philadelphia, said that no salesman in any business need fear that the advertising that his company does will ever take the place of his services.

Ralph E. Morrow, manager of the Rough Notes Publishing Company, declared that in his opinion the insurance companies should play up the name of the agent in as large type as that of the company.

Another advocate of insurance advertising was Walter C. Hill of Atlanta, Ga., who stated that there is a big field for obtaining new insurance business, and advised that the companies give practical information. He declared that there was danger of creating losses rather than new business by some kinds of copy in insurance advertising. The advertisement that shows a thief stealing an automobile suggests the ease with which this may be accomplished, he said, but it suggests quite as strongly to the potential thief as it does to the automobile owner. The automobile burning by the lonely roadside suggests the possibility of cashing in on an insurance policy by a fire, without witnesses, in such a spot. Fire insurance companies can do much in the way of fire prevention advertising, while much can be done in the way of teaching theft prevention.

Springfield to Advertise

An advertising campaign to make Springfield, Mass., a shopping center will be conducted wholly through the local newspapers, the Retail Merchants' Association has decided. The campaign will start the first week in November, continuing until the second week of December.

Putnam Joins N. Y. Journal

FORD'S MAN SPEAKS UNABASHED

FORM 332

Ford Motor Company

Manufacturers of Automobiles, Trucks and Tractors

DALLAS, TEXAS

IN REPLYING REFER TO

TO ALL MANAGING EDITORS: Oct 28 1925

ALL STATEMENTS OR AGREEMENTS CONTAINED IN THIS LETTER ARE CONTINGENT ON STRIKES, ACCIDENTS, FIRES, OR ANY OTHER CAUSES BEYOND OUR CONTROL AND ALL CONTRACTS ARE SUBJECT TO APPROVAL BY THE SIGNATURE OF A DULY AUTHORIZED EXECUTIVE OFFICER OF THIS COMPANY. CLERICAL ERRORS SUBJECT TO CORRECTION.

Inclosed please find publicity items and news stories that are for immediate release.

It is our earnest desire that you publish these stories sent you from time to time, or as many of them as possible in the interest of the local Ford dealer in your city, as well as the FORD MOTOR COMPANY, ourselves. You surely realize the news value of such data to your subscribers, for anything pertaining to Mr. Ford and his organization is at all times of interest to the general public.

If you have not already placed the Ford Motor Company at Dallas on your mailing list, please do so at once as we are keeping a card record on the items and stories which each of the various publications throughout our territory are running in comparison to the amount of copy for advertising they are receiving, and such a record is furnishing us valuable information as to the cooperative papers we are using and consequently will have a wonderful bearing in the preparing of our schedule contracts for the coming year.

Yours very truly,
FORD MOTOR COMPANY
Advertising Department

S. BM

The above facsimile of a letter being broadcast in various localities to newspaper editors, evidently on orders from Detroit headquarters, speaks eloquently of Henry Ford's opinion that a dollar spent for advertising space should also purchase editorial space both for Ford himself and his good little car.
If you should ask a Ford agent when you buy a Lizzie, to throw in four extra tires, a spare head light, a barrel of "gas," a few extra parts and a nice $50 kit of tools, all in consideration of the fact that you consent to use a Ford, he would ring a bell to call out the police reserves. But Mr. Atwell, in diplomatic parlance, tells managing editors: "If you don't print my stuff about Ford and his car, well—it will have a *wonderful bearing* on our selection of advertising media." Stand your ground, managing editors. No press agent can bluff his way by the press of this country, by promise or threat, real or implied!

Van Camp's Test Campaign

Van Camp's of Indianapolis is undertaking a test campaign for its tomato soup in newspapers in 11 cities. The copy appeal is based upon seven improvements in the soup that are discussed in the first person. The campaign was developed by Albert L. Fessler, advertising manager, and William Douglas McAdams, advertising agency executive of Chicago. The drive will run 20 weeks, at the expiration of which plans for future advertising will be considered.

Amateurs Writing Ads For Prizes

The *Decatur Herald* is running a $3,000 amateur ad writer prize contest in which contestants are required to submit copy ideas for each of the 20 business firms backing the stunt. One hundred and one cash prizes are offered.

Prizes for Best Office Ads

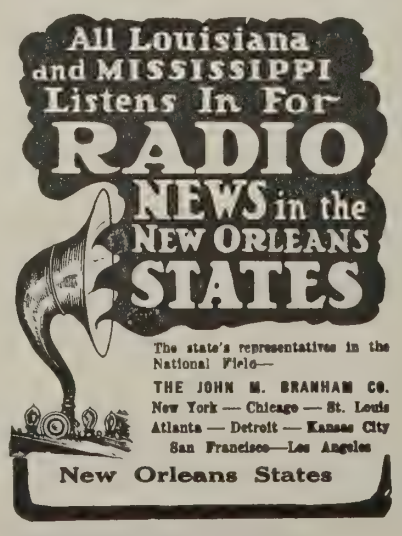
The *Richmond News-Leader* has announced a prize contest for the best page or half-page advertisement written to advertise the News-Leader's advantages as an advertising medium. The first prize will be $100, the second $75 and the third $25.

George H. McAdam Dead

George H. McAdam, 71, for 10 years on the staff of the World Almanac died Nov. 2.

LETTERS FROM READERS

Mr. Edwards' Articles



To Editor & Publisher: I am glad to see Editor & Publisher tackle one of the greatest wastes of newspaper publishing—i. e., mutilated and poorly edited copy.

The exhibits shown are familiar to every newspaper man and might have come from any one of our offices.

And yet there are publishers—lots of 'em—who loudly proclaim that the composing room does not produce! Did they ever stop to consider why?

The articles that you are printing ought to enlighten some of them. We need more of the same kind.

ELVERSON LAUNCHES CAMDEN INQUIRER

Publisher of Philadelphia Inquirer Starts Publication on new New Jersey Edition—Two Papers Sold for Price of One

The *Philadelphia Inquirer* began publication Nov. 3, of a Camden, N. J., edition. James Elverson, Jr., is publisher of the Inquirer.

The new edition is an eight-page extra supplement, but is announced as a "unit in itself," sold with the Philadelphia Inquirer, "two newspapers delivered at the price of one."

Special headquarters for the new edition have been established in Camden, housing a staff of special writers and reporters.

"The Camden Inquirer is to be a complete newspaper that will keep its readers in close touch with everything concerning New Jersey in which they are vitally interested," the announcement printed in the first issue read.

"While the Camden Inquirer is to be a unit in itself, it will appear in company with the Philadelphia Inquirer. That is to say, subscribers to the Camden newspaper will also receive the Philadelphia Inquirer. Thus they will be given two papers at the price of one—two cents.

"This means, of course, that they will be furnished with the dispatches of the Associated Press and of the Inquirer's special correspondents; with cables from foreign lands; with the news of the world. And in addition to every feature of the Philadelphia Inquirer they will have the Camden Inquirer at their breakfast tables carrying careful and accurate reports, written specially for it, of all the local happenings—two newspapers delivered together.

"We have great faith in the future of Camden. It is a mighty lively and enterprising sister of the city across the Delaware. Its industries are increasing. Its population is swelling. It is building houses with remarkable speed. The aware river bridge unquestionably prove of very material benefit to it."

Circulators Elect R. D. M. Decke

R. D. M. Decker, circulation mana of the *Rochester* (N. Y.) *Democrat Chronicle,* was recently elected first president of the New York State Circ tion Managers' Association. Editor Publisher's report of the meeting st E. E. Decker of the *Middletown* (N. *Times-Press* had received that office.

Curtis Presents Camp Site

Cyrus H. K. Curtis, Philadelphia New York publisher, and a summer dent at Camden, Me., has presente St. Thomas Episcopal Church in town a tract of land at Lake Meg cook for use as a camp site for y people's work.

It's unanimous! The New Shop-o-scope is the best of all Holiday Campaigns!

EDITOR & PUBLISHER

CANADA'S OLDEST PAPER COMPLETES NEW FIVE-STORY HOME

Montreal Gazette, Founded in 1778 By Benjamin Franklin, Has Published Continuously for 147 Years— New Presses Installed

SOME time next month the *Montreal Gazette,* oldest newspaper of the Canadian metropolis, will move into a new home. For the past 18 years it has occupied the premises at 38 St. Antoine street, in the heart of what was in earlier times the residential district of Montreal. In December it will remove a short distance further west on St. Antoine street, to the intersection of Cathedral and Ste. Cecile streets, where it will take up its new residence in one of the most modern structures of its kind in the Dominion.

The new building of five stories and basement presents a strong contrast to the first home of the Gazette, which was in the famous Chateau de Ramezay, on Notre Dame street East. This picturesque old stone structure, built on the French colonial style of architecture with its old cannon and its row of slender lombardy poplars in front, is well known to American tourists in Montreal. It was in the basement of this Chateau that the press was set up which was destined to print Montreal's first newspaper. It made its first appearance in the year 1778.

The circumstances of the paper's publication were somewhat unusual. The leaders of the American Revolution believed that a section of public opinion in Canada was favorable to their movement, and with the idea of obtaining adherents a commission composed of Benjamin Franklin, Samuel Chase and the Rev. Charles Carrol arrived in Montreal on April 29, 1776, bringing with them a French printer by the name of Fleury Mesplet. They soon discovered, however, that there was no anti-British sentiment among the French-Canadians, and in May, two months before the signing of the Declaration of Independence at Philadelphia, they departed. Mesplet, however, decided to remain, and setting up his press in the chateau, printed several books, and followed this up with the issuing of No. I, Vol. I, *Gazette du Commerce et Litteraire pour le Ville et District de Montreal.* It was printed entirely in French, and consisted of four quarto pages. In it the editor announced that he would eschew references to religion, government or current affairs, except such as were authorized by the government, and proceeded to state that subscriptions would be "2½ Spanish dollars," advertisements "1½ Spanish dollars" to non-subscribers, and "1 Spanish dollar" to subscribers. Single copies were to be sold for "10 coppers."

The other matter in the first issue was entirely literary and anecdotal, the publisher explaining that no advertisements had been secured and observing that his readers knew as much about commerical matters as he could tell them.

The advertising picked up in the subsequent issues, including announcements of slaves for sale, and offers of rewards for runaway slaves and indentured apprentices. The paper appeared every Wednesday.

It was not long before crime news made its appearance, and one of the early issues carried a three-line report of the execution of one Nicholas Thibault for the murder of a slave on Lake Huron.

The departure of Governor Sir Guy Carlton and the arrival of his successor, General Haldimand, were used by the editor as occasions which could be described freely and in complimentary guise without offending the powers. The paper failed to appear the week following Governor Haldimand's arrival, however, and in the next issue Mesplet acknowledged his indebtedness to the citizens who had secured the gubernatorial permission for the resumption of the publication.

In 1788 the paper was enlarged from quarto to foolscap size and composed four pages, printed in both French and English in double columns. Foreign news began to make its appearance about this time and the literary features of the paper included several poems by Robert Burns, a young man at that time and just rising to fame in his native Scotland.

The Gazette bore Mesplet's imprint up until 1789, but then began a series of changes which continued up until 1867, when the Montreal Printing and Publishing Company was formed to acquire ownership of the Gazette, with John Lowe as managing editor. Mr. Lowe retired from the company in 1870 and the newspaper and plant were purchased by the firm of T. and R. White. Both members of the firm were born in Montreal, and had embarked upon their newspaper publishing experiences in Peterborough, and had owned the *Hamilton Spectator* before buying the Gazette. Thus began a family ownership of the Gazette which still exists.

Mr. Richard White became business manager, and Mr., later the Honorable, Thomas White was editor-in-chief. Today their two sons occupy these respective posts, Senator Smeaton White being president of the company and directing the business policy and Robert S. White being editor-in-chief.

The new Gazette building, which takes up an entire block, is designed for eight stories. At present it contains five stories and basement, the three additional stories to be added as the requirements of the business demand. The frame of the building is of structural steel with reinforced concrete floors and roof, the outer walls being of cut stone and brick, all windows, sashes and frames being copper-covered, fitted with wire glass. All steel beams and other structural work is imbedded in concrete, the whole constituting an absolutely fire-proof structure.

The building is, of course, primarily designed for the newspaper, and in connection with this, on the first floor there will be installed a new six-unit Hoe press of the latest type, equipped with electrical drive and controllers, everything being of the latest and best design and manufacture. Provision has been made in the pressroom for an additional 15 units, making the capacity of the room 21 units.

The equipment for the news room will be largely entirely new. Adequate provision has been made for the editorial, news, telegraph and business staff, with specially designed mailing and shipping room.

WEEK'S AD TIPS

Austin F. Bement, Incorporated, General Motors Building, Detroit. Now handling account of the Bijur Lubricating Corporation of New York City, manufacturers of the Bijur System of Central Point Chassis Lubrication.

Campbell-Ewald Company, General Motors Building, Detroit. Has secured account of the Apex Electric Manufacturing Company, Cleveland.

William H. Denny, 1 Madison avenue, New York. Has secured account of the Bermudiana Hotel Company, Hamilton, Bermuda.

John H. Dunham Company, 431 North Michigan avenue, Chicago. Sending out orders on the Andrews Radio Corporation.

Fox & MacKenzie, 1214 Locust street, Philadelphia. Placing orders in a few selected sections for the Sterling Range & Furnace Corporation, Rochester, N. Y.

Finley H. Greene Agency, Parsons Building, Buffalo, N. Y. Has secured the accounts of the Niagara Water Heater Company, "Birtch" heater, Buffalo, N. Y., and the Sunset Inn, St. Petersburg, Fla.

H. B. Humphrey Company, 581 Boylston street, Boston. Reported to have secured account of Kibbe Bros., "Kibbe Social Whirls Candy," Springfield, Mass.

H. W. Kastor and Sons Company, 14 East Jackson boulevard, Chicago. Placing orders on Anti-Kamni Remedy Company of Chicago, Ill.

Klau-Van Pietersen Dunlap-Younggreen, Inc., 417 Sycamore street, Milwaukee. Has secured account of the Milwaukee Electric Railway and Light Company, Milwaukee.

Thomas F. Logan, Inc., 680 Fifth avenue, New York. Making contracts with newspapers generally for the Dubilier Condenser and Radio Corporation, New York. Also placing orders with some Western newspapers for C. Brandes, Inc., radio, New York.

Harry C. Michaels Company, 113 Lexington avenue, New York. Placing orders with some Western newspapers for Vital Foods, Inc., Teco Pancake Flour, Cortland, N. Y.

Porter, Eastman & Byrne Company, 22 West Monroe street, Chicago. Placing orders with some Western newspapers for the Fuji Trading Company, oriental food dishes, Chicago.

Sheridan, Shawhan & Sheridan, 366 Madison avenue, New York. Placing orders with newspapers in various sections for the American Bosch Magneto Company, "Bosch Radio," Springfield, Mass.

United Advertising Agency, 339 Fifth avenue, New York. Again placing orders with newspapers in selected sections for the Interwoven Stocking Company, New Brunswick, N. J.

Frank B. White Company, 76 West Monroe street, Chicago. Has secured the accounts of the Manitowoc Fox & Fur Company, Manitowoc, Wisconsin and Albert Angell, Jr., Company, poultry feeds, Chicago.

C. C. Winningham, General Motors Building, Detroit. Reported to have secured account of Frederick H. Young Company, Victoria Cosmetics, Toledo, Ohio. Will place account of the General Necessities Corporation, Detroit, for their Absopure Frigerators.

Wood, Putnam & Wood Company, Oliver Ditson Building, Boston. Again placing orders with newspapers for the Nassau Development Board, Nassau, Bahamas, B. W. I.

Leadership of The New York Times

In ten months this year The New York Times published 22,812,512 agate lines of advertising, 8,677,122 lines more than the second New York newspaper and a gain over the corresponding period of last year of 1,244,238 lines. This great volume of advertising was attained despite the censorship of The Times, under which thousands of lines of advertisements were declined.

WHERE DO THE CHECKING COPIES GO, AD MANAGER ASKS AGENCIES

Lack of System Seems to Prevail Between Agency Departments as Repeated Requests Arrive for Copies Already Forwarded He Declares

By A. D. MANAGER

"CO-OPERATION" and "co-ordination" are so much emphasized in the advertising of the advertising agencies, it would not seem unreasonable to expect advertising agencies to be both highly co-operative and thoroughly co-ordinated.

Perhaps they are. But if anything like complete co-ordination is an outstanding characteristic of the average advertising agency, the writer's experiences as a foreign advertising manager on a daily newspaper and his earlier observations in magazine publishing have been unique.

The most glaring lack of co-ordination in the varied activities of the ordinary advertising agency seems to be between the checking department and the rest of the organization. The outsider, indeed, might well conclude that the interdepartmental slogan of the agencies is "Let not thy left hand know what thy right hand doeth."

It is fully understood that an agency handling a large numberof accounts faces something of a problem in checking all of the insertions in all of its schedules. The obvious solution, of course, is a carefully arranged system, backed by the co-operation of the publishers. If the latter can be obtained, the former need not be at all difficult.

The writer's experience points strongly to the lack of any such system in the offices of a good many of the foremost agencies, for the publisher's co-operation has been provided by him in the greatest possible degree.

In the first place, every agency running copy three more times a week is placed on the regular mailing list and is sent a paper every day. In the second place, those agencies running copy regularly, but less frequently than three times a week, and those which run copy irregularly are sent special copies of those issues in which their advertising appears.

This special mailing is taken care of by the chief subscription clerk who has at her desk a card index of every foreign ad carried by the paper. Each afternoon she obtains from the makeup man his schedule of the day's foreign advertising. She notes each ad and by reference to her index ascertains to whom a checking copy should be sent. She then addresses a wrapper on the typewriter and initials the ad in a space provided on the schedule card. The wrappers are sent to the mailing room along with the other "singles" and the card is sent to the writer, who checks it again.

In addition, tear sheets are sent with monthly bills, when requested, and the paper's New York and Chicago representatives are supplied with copies daily.

In spite of these efforts to put checking copies into the hands of the agencies, special requests for copies for checking purposes are received with a frequency that makes it certain that the post office can not be at fault in the matter.

A striking example of the utter lack of co-ordination that obtains in some agencies is afforded by a recent experience with one of the leading agencies of the country.

An advertisement was scheduled for insertion, but was omitted because the necesary mat did not arrive. On the afternoon of the day upon which the ad should have appeared the agency was sent a letter explaining the omission and asking for instructions for a make-good date.

Previous experience indicated that no reply would be received—and none was. But in a few days there came a request for a checking copy of the issue in which the ad should have been printed. Immediately upon its receipt a second letter was sent the agency, again explaining the cause of the omission. A week later a letter was received in which the second explanation was acknowledged and the statement was made that the agency had cancelled that insertion and did not desire a make-good.

With less knowledge of agency methods this might have been taken as closing the incident, but with previous experiences of a somewhat similar nature in mind there was no surprise in the office when three weeks later there came to the advertising department another request for a paper of the now well remembered date. Patiently another letter was written, in which not only was the whole matter explained for the third time, but reference was made to both of the previous efforts to make things clear.

So far as the advertising department of the paper was concerned that did end the matter; it was made to. But it didn't stop the influx of requests for checking copies. They continued to come in at intervals for several weeks, and were consigned to the waste-basket along with the daily grists of "publicity" and direct-mail advertising.

The foregoing is an extreme case, it is true. Yet it is typical. It is by no means unusual to send checking copies two, three and four times for the same advertisement. It is beyond the realms of probability that they are all lost in the mails. It is certain that they are not when—as is often the case—they are sent by registered first-class mail and a return receipt is demanded and obtained.

The agencies get the checking copies, without doubt. But what do they do with them?

TRAIL BLAZERS OF ADVERTISING

First Installment

(*Continued From Page 5*)

him. Being determined not to disappoint the audience Barnum blacked up and sang the songs advertised.

He pulled many bold advertising stunts in the old American Museum, such as the Niagara Falls in full flow, the Fejee Mermaid, which puzzled naturalists, General Tom Thumb, and his capitalization of the value of dwarfs. The Jenny Lind concert enterprise was the first big national advertising campaign in America that stirred the nation.

Perhaps the most spectacular advertising outside the big circus was the ruses, tricks and schemes to stir the imagination of the people. Barnum worked some of his best publicity stunts at the American Museum, where the public first smiled upon him. Here he had a collection of curiosities, such as stuffed monkeys, gander skins, and Chinese relics and such attractions as industrious fleas, educated dogs, automatons, ventriloquists, albinos, fat boys, dwarfs, Indians, giants, strange animals and weird novelties.

It was claimed that the "Fejee Mermaid" was a curiosity which Barnum had manufactured. This was not so. He did use stunts and schemes to bring it before the public. He was clever in arousing curiosity, then springing it on the public through sensational advertising. But the "Fejee Mermaid" really existed, although not as pictured on the sensational posters.

It was with his "side shows" or temporary enterprises, that Barnum was at his best in devising advertising schemes. He was constantly on the look-out for queer novelties with his advertising possibilities.

He once attempted to buy the home in which Shakespeare was born and ship it to America, but British pride killed that scheme.

Among other things was the purchase for $4,000 in Paris of Robert Houdin's ingenious automaton writer; the popular Panoramic Dioramia of the Funeral Obsequies of Napoleon was made to his order in Paris at a cost of $3,000. There was also the famous Panorama of the Crystal Palace, painted to Barnum's order by the celebrated De Lamano.

He engaged for its first American tour in 1844, the Swiss Bell Ringers. They were Scotch Highlanders, not Swiss, but as they never spoke no one was ever the wiser. The name had a good advertising sound.

A "side show" always had greater publicity material than the big show. It was in 1849 that Barnum first projected his great traveling museum, called "Barnum's Great Asiatic Caravan, Museum and Menageries." He chartered a ship and dispatched it to Ceylon for elephants. When the ship arrived with the elephants, he started operations under the patronage of General Tom Thumb, which had its publicity advantages.

The popularity of this exhibition attracted numerous "sideshows" by other parties, greatly to Barnums annoyance. In self-defence he fitted out a circus company, which performed on the same day and in the same neighborhood that the menagerie and museum exhibited. When an opposition show threatened to interfere with profits Barnum had only to connect his two companies and competition was killed immediately.

A few pennies may save your life!

YOU are exposed to tuberculosis germs every day. The only sure defense against tuberculosis is to stamp out the dread disease entirely. It can be done.

Today only one person dies from tuberculosis where two died before. The death rate from consumption has been cut in half by the organized warfare carried on by the tuberculosis crusade. This organized warfare to stamp out this dread disease is financed by the sale of Christmas Seals.

Buy Christmas Seals. Buy as many as you can. They cost but a penny apiece—but your dollars, added to other dollars, will save many lives and protect you and your family from the spread of tuberculosis.

Stamp Out Tuberculosis with this Christmas Seal

THE NATIONAL, STATE, AND LOCAL TUBERCULOSIS ASSOCIATIONS OF THE UNITED STATES

HOW EDITORIAL LAXITY NIBBLES PROFITS

(*Continued from page 9*)

uch affairs and usually will lay his cards n the table and give a square deal to ne looking for a solution. At least the oreman that will not do so is unfit for position of responsibility. Generally uch a conference will result in a more atisfactory understanding.

Every well-organized newspaper has its usiness council, editorial council, mehanical department council, etc., comosed of the heads of the various departents. These conferences are intended, f course, for the discussion of the varius policies and problems to be met and o bring about closer co-ordination beween the departments. With the possile exception of the editorial council, the urposes of these conferences are to peed-up, economize in time and money; o get the best product at the least outay, and to present to the public a highrade newspaper every day. Thus the o-operation of the heads of the departents is essential to the best results.

If this is true of the heads of departents, why would not the same principle ork to the advantage of the organization extended to the personnel of their deartments? If team-work is desirable as etween the heads, why not team-work etween the individual workers of the usiness office, the news room, the composing room, the pressroom, mailers, etc.?

It seems a safe assertion that the head f any department would agree that the limination of the real or fancied grievnce would be an advantage to his deartment. If this is true, why not devise ome means of giving a hearing to all uch complaints and adjudicating them as ne circumstances may justify? Likeise, why not invite and encourage sugestions by employes for betterments in eir departments?

Once it is well established that an emloye may, without prejudice, bring any uggestion or grievance before a just rbiter, a long step will have been taken o insure co-operation and harmony.

For the benefit of the apprentice and ne younger printer, it is suggested that ystem and neatness about the frame and ne machine are not only assets to the orkman but are indicative of his ambiion and thoroughness. There should be place for everything, and everything ut in its place when not in use.

An important essential in newspaper ork is dispatch. The systematic printer ill accomplish more with less exertion an the unsystematic workman. The mbitious one will give thought to his ork and seek the best way of performng it.

One thing that should be avoided, however, is falling into a rut. One should ot be satisfied with just one way to ccomplish a given end, but experiment, r there may be a better way than the miliar way. The printing business and ewspaper work constitute a lifelong ducational institution, and new ideas hould be sought continually.

It seems appropriate to apply to the ewspaper the simile of the phrasing of great educator in describing the *esprit e corps* of a university. To maintain ne individuality and energy of the members of the staff and at the same time nvisage the spirit of the whole is not ithout difficulties. It is illusive, but eal; intangible, but patent. As one passing through a forest may not see it for the trees, though fully aware of the beauty and great resource of the whole, so may a newspaper man, engrossed in the pursuit of his individual work, fail to see something with which he should have been impressed. He may have learned much, but may have failed to apply the valuable knowledge.

As a woodsman glories in the possibilities of a great forest, so also does the true newspaper man, whatever his station, take pride in his craft and profession.

V—THE SOLUTION

It is not necessary, of course, to point out to a foreman the advantages that would be gained if it were possible to have all the matter for the first edition read and corrected before being placed in the forms. It would not only mean a clean first edition but prevent an almost endless amount of correcting in the forms and avoid many errors in the rush to make the first and second editions.

As this is manifestly impossible with regard to matter coming into the composing room within a few minutes of edition time, the alternative is to have copy legible and well edited. This will insure speed by the operator and almost invariable accuracy, which means that it will occupy little of the proofreader's time and eliminate corrections in the forms.

Style books should be carefully worked out to cover the general style of the paper, giving samples of various departmental work for the guidance of the reporter, copyreader, operator and proofreader. To obtain the best results it is more essential and reasonable to have the copy prepared in accordance with the style than to expect the operator to change the copy as he goes along. A reporter is the source of supply of copy and should be expected to prepare his copy in accordance with the style book.

It is with a view to minimizing the number of errors and corrections and facilitating the work all along the line that the following plan is proposed:

In military affairs a liaison officer is often necessary to keep the various branches of the service in touch with each other.

It seems that such a man is necessary to co-ordinate the news room, the composing room and the proof room.

To have the copy properly prepared is half the battle. Especially is this true in a large office where strange operators are constantly coming and going.

The copyreaders should have copies of the style book for their general guidance in preparing the copy, and they should be kept posted as to changes of style, as hereinafter suggested. This duty would fall to the liaison man, who should be under the jurisdiction of the foreman of the composing room and have charge of the correction bank and the work pertaining thereto. For this position a trained proofreader would be best equipped.

He should consult the authorities of the three departments and disseminate information by means of bulletin boards or otherwise when necessary.

Bulletin boards should be provided for the copyreaders, the composing room and the proofroom, so arranged that all new orders or changes from the style book would be placed on a hook under the heading "Changes of Style" on each of the bulletin boards. Thus every department would have the same orders.

Another portion of the board should be devoted to "Spelling of Names," both proper and geographical, questions regarding which are constantly arising.

Another space should be used for "Miscellaneous Instructions."

Still another part of the board should be devoted to "exhibitions" of "Incorrect Markings" by the copyreaders, the proofreaders, or setting by the operators. These, of course, to be placed only in the departments where the errors occur.

It is no unusual thing to have copy reach the composing room marked contrary to the rules of the style book. In such cases, a new linotype operator is most likely to follow the markings of the copyreader. It should be marked correctly, and the operator naturally follows the errors of the copy.

When there is any doubt of the correctness of copy, the operator should consult the liaison man. If the copyreader has prepared the copy contrary to style, note should be made of the fact and posted on the bulletin board in the news room indicating the rule covering the case. In case the operator follows the incorrect copy, his attention should be called to same, pointing out the reason or rule covering same, not in the nature of a rebuke, but rather to assist him and in the interest of general efficiency. So, also, should the proofreader's attention be called to incorrect marks on proofsheets. These notices will tend to cause more heed to be given the rules and thus perfect and speed up the work.

When a change is made from the style given in the book, a copy should be prepared and filed for insertion in the style book when a revision of the same occurs. By keeping the matter standing, such corrections can be made at convenient times, say, quarterly, and at small expense.

To summarize the advantages that will accrue to an organization by the establishment of the foregoing plan, with strict enforcement in each of the departments, the following may be confidently expected:

1—Better co-operation between departments;

2—A more satisfied personnel;

3—An improved individual production in quantity and quality;

4—Prevention of at least fifty per cent of the errors that usually appear in early editions;

5—Speeding up of the work from writer to the forms;

6—More thorough instruction to apprentices and a better morale of the future printer;

7—A gradual improvement in literary style and typographical workmanship, which will be reflected upon the reading public, and

8—An appreciable saving in time and money.

This is the last of two articles by Mr. Edwards.

REPORTING MUST BE IMPROVED TO CLARIFY NEWS STREAM

Haphazard, Shoddy Stories Resulting from Neglect of Editorial Men, Who Look Forward to Better Jobs in Other Lines—Encourages Press Agentry

By PHILIP KINSLEY

CHARLES M. SCHWAB arose to deliver an address recently at an important conference on industry and education at the University of Chicago. The speech he was supposed to deliver had been sent out to newspapers and press associations in advance, subject to release in customary manner.

PHILIP KINSLEY

The steel king looked over his audience and had a new impulse. Thoughts came to him that had not occurred when he had indicated to his publicity expert, in another atmosphere, the line of ideas he wished to present.

And so he blithely tossed his prepared speech aside, informing his audience it had really been written by Ivy Lee, public relations man for the steel corporation, and they could read it in the morning papers. He proceeded to unbutton and give some of his own homespun ideas.

In the meantime, however, the speech had been released and printed and some of the papers never caught up with the truth of this situation. Mr. Lee had, in this writer's opinion, written a very able address, better in some respects than the one actually delivered.

The point is where do the reporters come in, and why has this method of getting out "news" come about?

One reason, of course, is the mechanical and haste demands of the papers, but there is another.

The same situation was presented at the annual banquet of the Audit Bureau of Circulations in Chicago a few weeks ago. At least two speeches went out from there which never were delivered, and were printed in part as having been delivered.

Has it come about that men of affairs, whose words are golden, do not trust reporters to report?

It happens that reporters were present at both of these affairs and what happened was reported, but they might have taken the advanced "canned" material for fact, never gone near the meetings and nothing odd been thought of it.

This has happened on other occasions. Between the public and many leaders of industry and thought a barrier has been built. The public consumption thought has been guided and prepared by ex-reporters, now press relations employes of great corporations.

This is partly due to the recognition of the group of the growing power of newspapers. There are fewer, bigger papers in the field, and their columns as a medium of reaching the springs of common thought are more important than ever.

The late William Jennings Bryan was well liked by reporters. He always had news for them. He was genial and democratic. He would talk freely to reporters. But when it came to publication he never permitted himself to be quoted unless he had written the statement. There was an element of distrust there.

The late Levy Mayer, great Chicago lawyer, had the same rule. Every word he was to say in print had to be submitted to him first.

This element of distrust is worthy of study.

When, if ever, does the agenda of editors or publishers' conference contain an important section devoted to consideration of reporting?

Is not this caution on the part of public men, this growth of the public relations department, due in part to this neglect, the old idea that reporters can be picked up anywhere at any time?

If the reporter follows the line of least resistance, if he does not see big men and probe their ideas, if he does not appreciate them when he does get them, what is the public to get from its news columns but inspired, shoddy, haphazard stuff?

There are schools of journalism but their effect is not yet felt in big newspaper offices.

The reporting job is still handled unscientifically.

The reporter carries with him more prestige than ever before and he is, on the whole, a more alert, intelligent, business like type than in the old days of the genius and classic drunkard.

The old sense of this as inferior job, which was and still is inspired by the fact that it is not a "real money" job, and that it has uncertain, limited future, is lessening somewhat.

Men demand a feeling of security in their work, an outlet that is not too limited, a sound basis for happiness in their work.

The newspaper situation calls for sounder reporting, yet it lacks the appeal to attract and hold men of unusual ability.

There are long waiting lists, yes. The market is easy. But the turnover is too great. To many it is still only a stepping stone to "more money." They may have a better future in some cases in this very public relations work of which I have spoken. Through this field many have gone into executive positions with big corporations. The reporting job looks small and far away to them.

The need here as everywhere else is for intelligence.

News has to be observed and written. That, after all, is the function of a newspaper.

Quick appreciation of a situation, ability to readjust and coordinate under varied and difficult conditions to inspire confidence, translate into clear American the profound and technical presentations of specialists—these are the desired qualities in reporting that are too often lacking. And in the lack, perhaps, is part of the explanation of the phenomena noted above. Big business is not haphazard. They do not make publicity appropriations year after year for amusement or for the sole benefit of the public.

To clarify the news stream the reporting medium must be improved.

Getting back to Mr. Schwab, he gave this recipe for success in any business—take each detail and study it to finality, until you are certain it cannot be improved.

This advice might go for the often neglected reporting detail of the newspaper business.

There are many reporters at work today who remain against their own financial interests because they love the work.

Mr. Chesterton writes somewhere:

"If a man really loved Clapham, as man loves woman, so that its meanest lamp posts were a delightfully fascination, Clapham would arise in towering pinnacles of beauty."

The newspaper office often seems a hard, cold, semi-military institution in matters of discipline, a machine that takes little thought for the individual, yet there is passion for service, ideals of duty, often tucked away there. Under the cynicism and the sophistication lies this vein of gold, the desire for good work.

Why not mine away at this for a time, Mr. Publisher, instead of canned features and premiums? Many newspapers today might be compared with the newest drug stores, the original purpose lost in a maze of accessories and fancies.

The need for good reporting will not grow less. It is, as every city editor knows, very urgent at times. In emergencies they must know their material to the last reaction. This base can only be made more firm by making it well worthwhile for a man to prepare properly and to remain in it.

It is true that one cannot prepare for everything, and that is about the field of the good general assignment man. The newspapers recognize this in their department men, their experts.

But men can be trained to think, and their minds can be stored with information that may give background and richness to the way in which they approach a subject.

And they can be open minded and unprejudiced in a narrow way.

In other words they can be educated instead of ignorant, informed instead of provincial, and they may have, hand in hand with the growing prestige that their paper gives them, a sense of responsibility not only to their paper but to this evolving civilization.

REPORTER'S BEAT SENT SHERIFF TO JAIL

Sleuthing of Theodore Tod, Chicago American, Showed County Prison Being Used as Country Club By Beer Barons

A story that broke a reporter's nose and nocked the lid off of Cook county politics s still one of Chicago's best contributions o the year's journalism but the one who erreted it out has almost been lost in the cramble for recognition and cover.

He is Theodore Tod, of the *Chicago American.*

Since last June it had been common gossip that Terrence Druggan, wealthy eer peddler, and his partner, Frankie ake were being allowed extraordinary rivileges by the keepers of the county ail to which they had been committed by ederal Judge James H. Wilkerson for ontempt of court. Reporters heard the eports and tried to get an investigation aunched but official interest was lacking, nd reportorial instinct which told them story was there was suppressed.

Possibly a more sensitive conscience nan others, Tod decided to delve a little ore in the matter before dropping it and ne more he investigated the more startlng it became.

The beer runners, he found, had been llowed to leave the jail at will with bus oys as jail guards, presumably to visit ne offices of their dentist, but actually to ttend cabarets, go to Druggan's apartent and to his estate in Lake Zurich, Vis. They had not occupied cells; they ere kept in the clean comfortable hosital and Druggan operated at least one of is chain of breweries by means of letters nd the jail telephones.

Tod, a native of Chicago, succeeded in ailing the prisoners socially on one of eir nights out. He listened as admirers f the beer barons told him how much ney had paid to turn the jail into rest resort.

All this was done on his own time and n his own initiative. When he reported the city editor he had the facts.

The first story was printed Aug. 25. wo weeks later in a continuance of the eries of stories Tod said Druggan had een out of jail the previous night. F. J. overing a reporter for the Journal, was nt to the jail to verify the report. erry, who had been hustled back to il to meet him, broke the Journal reorter's nose, mistaking him for the merican representative.

As a result of the exposé, Sheriff Peter [. Hoffman has been fined $1,000 and entenced to jail for a month. The arden has been committed for four onths. Eleven others who confessed rticipating in a bribery plot, including ruggan and Lake, are awaiting judgent for contempt of court and action of e grand jury on other aspects of the se.

Saves Family from Flames

"ADVERTISERS ARE ROMANTIC"

Declares Sherwood Anderson Who Wrote Ad Copy for Them

Sherwood Anderson, novelist, characterized advertisers as "romantic fellows" this week in an interview with a *New York Evening Post* reporter, during which he admitted he got his start as an author writing advertising copy.

"I could make a hundred dollars a week writing ads," he said.

"Then I published a novel or so, and advertisers got so they wanted me to write their ads, even unsigned. They thought there was something mysterious in the way I handled words or something. I got so I didn't care to write ads much and that made them all the more anxious.

"So I'd say to them, 'It would be a shock how much I'm going to charge you for writing this little thing.' 'How much?' they'd ask. 'Five hundred dollars,' I'd answer. Then they'd take me out to lunch, and just before coffee, they'd burst out, 'Say, I thought you was going to ask $800!'

"Business men are romantic fellows. It made them feel good to have their stuff written by a novelist. At least, that's what a fellow said, who handled my stuff. He didn't care what he asked them. Of course, he got his split. 'They talk about how Sherwood Anderson writes their ads at their clubs,' he told me. 'That's where they get their money's worth out of it.'"

Trade Commission Approves "Rayon"

The Federal Trade Commission by an official resolution has placed the stamp of its approval on the use of the word "Rayon" as properly designating artificial silk products, the basis and chief ingredient of which is cellulose. There have been before the Commission a number of cases involving the misbranding of textiles which have artificially been given the appearance of silk, and have been sold under trade names containing the word "silk" or a modification of the word "silk." In deciding these cases the Commission has consistently held that hosiery or other products which simulate silk but are not the product of the cocoon of the silk worm should be branded with the words "artificial silk" or other words which correctly describe the materials composing the article branded. The word "Rayon" has been adopted by many associations of manufacturers as a proper one for artificial silk products and the term has been extensively advertised to the public.

He'll Get a Beat

Edgar N. Butler, former police reporter for the *Columbus Ohio State Journal,* has passed the civil service examination for patrolman in the Columbus Police Department, with the highest grade, 94.8. Butler is now publicity director for the State Industrial Commission.

NEWSPAPER A COLLEGE SAYS GLENN FRANK

Wisconsin U. President Favors a Class With Daily Paper as Only Textbook for Well Rounded Education

"The newspaper is a college; the good paper, a university."

That is the view of Dr. Glenn Frank, president of the University of Wisconsin, as expressed in a recent interview in Madison, Wis.

Graduation from your daily newspaper is one good way of acquiring a worthwhile general education, according to Dr. Frank. However, this education, commensurate with a college training, can be acquired only if a vigilant inquiry be made back into the sources of knowledge that newspaper information may lead one to.

"The newspaper touches varied fields of knowledge," said President Frank. "And if the reader really seeks to understand things to which the daily dispatches point, he will educate himself.

"If, as readers, we know how to use our newspapers, we might make the reading of any good newspaper the ideal point of departure for a liberal education," Mr. Frank said. "Almost any news report has implications that run back into several fields of knowledge.

"This morning I read a five line item from Mexico which immediately demanded that my mind dip into geography, chemistry, education, and politics in order to see the meaning of this news item. Our minds nominally think from particular instances to general ideas. We rarely think from general ideas to particular instances.

"I should like to see an educational experiment made in which the only textbook used in the education of a group of students would be a good daily newspaper, with widely informed and alert minded teachers simply reading over the newspaper with the students, and attempting each day to ferret out the background information necessary for a real understanding of the news.

"Granted an adequate degree of intelligence in the students and teachers, I venture that in four years or less we could produce a more thoroughly educated and more broadly informed type of graduate than by the more or less helter-skelter process of an extreme elective system under which a student may learn a great deal about a great many things without ever relating his knowledge to current human affairs or seeing the present-day society as a coherent whole."

Masons Launch Printing Course

Joseph Shaw, a practical printer, has been placed in charge of the printing plant just installed in the Virginia Masonic Home, Richmond. There are 93 boys in the Masonic Home and establishment of the printing plant is expected to prove of great educational value in equipping them with a trade.

More than a comic strip

BOUND TO WIN

By EDWIN ALGER

The Most Novel Strip Idea Offered Editors and Publishers in the Last Ten Years.

A definite appeal to a significant segment of circulation—youth, between the ages of twelve and eighteen—if your paper wins the youthful reader its chance of retaining his subscription in later years is more than ninety per cent realized.

FIVE TEXAS NEWS MEN AT MITCHELL TRIAL

Called to Verify Colonel's Statements on Shenandoah Disaster—Allowed $1.50 Per Day Expenses in Washington

Five Texas newspapermen were invited to spend this week at Washington as the guests of the United States Government.

The invitation might have proven more acceptable had not Governmental red tape restricted the Texans to $1.50 per day for expenses.

The Texas newsmen were subpœnaed by the Government in connection with the court martial of Col. William Mitchell. They were Lloyd Gregory, Texas state editor, Associated Press; Kenneth McCalla, of the *Houston Press* and the United Press; Harry McCleary, of the *San Antonio Evening News;* A. H. Yeager, *San Antonio Light,* and Louis Felipe Recinos, *San Antonio La Presna.*

They were called to establish the identity of Col. Mitchell's original statement regarding the Shenandoah and other aircraft disasters. They agreed that Mitchell had issued the statement, at Ft. Sam Houston, San Antonio, which is the basis of the court martial proceedings. The Texas newspapers carrying the statement were admitted as evidence after Col. Mitchell's counsel objected strenuously. Henry S. Parsons, chief of the Periodical Division of the Library of Congress, helped to identify some of the newspapers in which the statement was printed.

The Mitchell court martial attracted 50 or more newspaper correspondents to the dismal old Emory Building in a remote corner of Washington where the proceedings are being held. War Department orders were to the effect that the court martial must not be turned into a "show," with the result that the newspaper men assigned to cover the proceedings found themselves in cramped and narrow quarters.

Through the efforts of "Jim" Preston and "Billy" Donaldson, who have charge of the Senate and House Press Galleries, arrangements were made with the Department whereby one third of the available space was given up to the newspaper correspondents.

The news services were reinforced by such seasoned veterans as Stephen T. Early, of the Associated Press; William K. Hutchinson, International News Service; William J. McAvoy, United Press; James R. Nourse, Universal Service; Robert T. Small, Consolidated Press; Carter Field, *New York Herald Tribune;* Paul J. McGahan, *Philidalphia Inquirer;* Theodore Tiller, *Baltimore Sun;* Leland C. Spears, *New York Times;* Ahmun N. Brown, Providence *Journal;* Roy A. Roberts, *Kansas City Star;* Leroy T. Vernon, *Chicago Daily News;* and Walker S. Buel, *Cleveland Plain Dealer.*

New Leavenworth Semi-Weekly

DOLLAR $$ $$ PULLERS

ONE DOLLAR WILL BE PAID FOR EACH IDEA PUBLISHED

BUSINESS TICKLERS

THE *Waupun* (Wis.) *Leader* ran a full page of ads written in the form of letters to Santa Claus. The novelty and interest to readers immediately appealed to advertisers.— E. W. Neese, Waupun, Wis.

Horseback riding is one of the most popular outdoor sports of the fall. Why not run a page devoted to news of horses, horse fairs, etc., and get ads from dealers in riding clothes, saddlers, riding schools, harness makers, and horse show events etc. The *Boston Transcript* has worked up a very clever and popular page in this way.—C. E. Pellissier, Boston, Mass.

This is the time of the year when anti-freeze solutions for the radiators of automobiles are of great importance to motorists. Where can they get such solutions in your city? A directory of such places to run every now and then under an appropriate heading might be sold.—Frank H. Williams.

Excitement ran high in Milwaukee when the *Milwaukee* (Wis.) *Sentinel* started a "Gold Rush," burying "nuggets," $15 in gold, in four widely separated spots of the city each day for a number of weeks, and publishing pictures of the areas where the "nuggets" were buried. Finders brought the "nuggets" to the Sentinel office for the $15 reward.—Ruben Levin.

Are you using standing casts of heads, etc? If so, no doubt you find you have to recast them every two or three weeks to keep the paper looking clean. Use of the original zinc will not only maintain a clean appearance but reduce the cost a thousand per cent in a year. This was proved out on one mid-western newspaper.—B. A. T.

The *Long Beach* (Cal.) *Sun* is getting additional advertising for a page captioned: "Serving Better Because We Specialize in Our Line." A typical page contains ten advertisements of various sizes, all of specialty shops, and a boxed-story on local shops.—Harold J. Ashe, Long Beach, Cal.

Thanksgiving time is a good time to pull business from insurance companies in your city. Des Moines papers get out an insurance edition every Thanksgiving. They make up the ordinary loss expected upon that day and in addition put over a profitable edition.—E. R. Appel.

The advertising manager of an eastern Canadian daily, arranged what was designated, "Talking Machine and Record Week." He landed sufficient advertising to fill a page, the surplus making an additional half page. The move was made because of a singular apathy toward newspaper advertising on the part of dealers in talking machines and records in that city, and vicinity.—W. McNulty, St. John, N. B., Can.

"COME TO NEW ENGLAND"

Hotel Men Plan $3,000,000 Three Year Advertising Campaign

A "Come to New England" movement to extend over a period of three years and to include the expenditure of $3,000,000 for advertising was launched last week at the annual meeting of the New England Hotel Association held at Manchester, N. H.

Chester I. Campbell, Boston publicity man and industrial exhibit promoter, in an address told the association that "Beautiful New England" must be linked up with "Industrial New England."

HUNCHES

ONE DOLLAR WILL BE PAID FOR EACH "HUNCH" PUBLISHED

TO arouse public interest in the business enterprises of Houston women, and incidentally to interest Houston business women in the *Houston Post Dispatch,* that paper is devoting a page of its society section each Sunday to the pictures of leading business women of the city. Twelve pictures are printed on the page and beneath each picture space is left for filling in the name, the business in which engaged, in what capacity, business address and telephone number. Awards of $10.00, $5.00 and $3.00 are given respectively for the first three correct sets of answers.—W. H. M., Austin, Texas.

It has been said that the American school system is producing too many "white collar men." A round-up of the upper classes in the high school of your city will give some pretty good ideas of what the boys plan on becoming. Then see some of the so-called white collar boys and find out if they wished they had gone in for some trade. Who has the best chance for promotion, the white collar man or the one who works his eight hours straight?—A. C. Regli, Chippewa Falls, Wis.

The *Stockton* (Cal.) *Record* recently ran a weekly feature showing early day scenes and pictures under the heading "Do you remember when Stockton looked like this....." Just a few pictures are needed to start such a series as the publication of the names of the people who loaned the first ones brought forth a flock of others.—Wm. J. Rogers.

The *Boston Sunday Globe* watches carefully for books which will furnish the basis for feature articles. Instead of being reviewed, these books are summarized with substantial quotations; usually a cut of the author is run with the article. Books like Robinson's "The Mind in the Making" and Myerson's, "The Nervous Housewife" have furnished excellent articles.—R. L. Lurie.

In order to stimulate civic progress in Seattle, the *Seattle Times* is giving many weekly prizes, of which $25 is the chief, with a grand prize of $300 at the close of the contest for the best letter that will indicate what is for the greatest good of the city. The general points include (a) what will make Seattle a better city in which to live, and (b) what will make Seattle a better business city? —C. M. L.

Some men think women should not be allowed to drive automobiles. Ask the traffic policemen in your city and s what they think about it. And possit they can tell you something about t relative driving ability of blondes a brunettes and even red haired wome Temperament must have some effect a person's driving ability.—R. R. Voc hees.

The *Rensselaer* (N. Y.) *Independe* has started a practice particularly inte esting to small town publications. Und the head of "In Rensselaer Store Wi dows" a reporter each week writes some window display by a local mercha striking enough to draw his attentic The write-up is not in matter-of-fa form, but each window is treated like little story, and only in some part of t story is the owner of the establishme mentioned.—T. H. Ladd.

"How did they get their start?" timely anytime. Start off with Roc feller, Ford, etc. and wind up with local celebrities.—B. A. T.

A BIG PRODUCER,
New York State
IS A BIG PURCHASING POWER

The industrial and agricultural leadership of New York State is well known to manufacturers who have surveyed this territory for merchandising distribution and sales promotion.

Factory output, diversity of manufactures, the number of industrial workers, average of earnings and consumer demand have been computed from all angles.

Records show the value of farm lands and crops and the quantity production of the various fruits, grain, vegetables and live stock.

As a dairy State, New York continues to hold a prominent place with a total production of milk for 1924 of 6,900,000,000 pounds.

The commerce flowing through the New York State Barge Canals, and through the ports of Buffalo and Oswego runs into the millions of tons.

Total resources of all financial and banking institutions, State and National, exceed $13,000,000,000. In 148 savings banks of the State 4,311,954 depositors had on July 1, 1924—$3,273,854,200. Hundreds of thousands of transient travellers are constantly visiting the cities of the Empire State.

New York State also possesses leadership in quality and quantity of daily newspaper circulation. The papers listed below offer, to the national advertiser, marketing and sales promotion cooperation that can sell your product through the local merchant.

Eleven Billion Dollars Worth of Reader-Interest

NEARLY eleven billion dollars of American money is invested abroad.

This does not include loans to governments whose every act is watched by a thousand eyes, but investments in private enterprises whose stability can only be gauged by accurate general information on conditions in their immediate surroundings.

The safety of these eleven billions is interwoven with the daily life of the communities which are spending it.

The best picture of these communities is the "slice of life" recorded by the well-informed, interpretative writers of the Chicago Daily News Foreign Service.

These "slices of life" are a part of the World News of Human Interest distributed by The Consolidated Press Association which furnishes 100% exclusive, supplemental news for each department in a newspaper.

Where Local Advertisers Lead Others May Profitably Follow

THAT local display advertisers buy space in proportion to the direct results obtained, is a principle of business generally accepted by experienced and successful advertisers, both local and national.

In Chicago the "results obtained" are indicated by the figures supplied by the Advertising Record Co. for the first nine months of 1925. According to these authoritative figures, The Daily News in that period published 9,072,494 agate lines of local display advertising, as against 6,488,828 agate lines published by its nearest competitor in the six-day field—a morning newspaper.

Expecting a letter?

¶ Ever waited anxiously, glancing out of the window, impatient for the coming of the letter-carrier to find out whether you got the job or the girl or the pardon or whatever it might be?

¶ Then you know how vitally important to us all the letter-carrier is—what a great role he plays in this modern world of business and pleasure.

¶ Would it surprise you to learn that in Baltimore he is only half as important as the Sun Carrier?

¶ There are 589 regular letter-carriers in Baltimore—but there are almost twice that many Sun carriers, delivering the Sunpapers to homes scattered through Baltimore's 93 square miles.

¶ Which simply means that Baltimoreans give a great deal more attention to their Sunpapers than to their mail. Which, again, explains all the letters that the advertiser receives when he uses space in the Sunpapers.

THE EVENING BULLETIN—PHILADELPHIA, TUESDAY, OCTOBER 27, 1925

A Greater Philadelphia *is in the making!*

PHILADELPHIA stands today as one of the greatest cities of the world. Founded by a Quaker, it has, through all its steady growth, kept the sterling characteristics of the Quaker—judgment, foresight, thrift, square-dealing. These four attributes make cities great as well as men—for a city is but the lengthened shadow of its citizens.

Philadelphia is known throughout the world as the City of Homes. We have here a magnificent harbor of world-wide importance—we are the greatest manufacturing city in the United States—our transportation facilities are unequaled—our Parks and Boulevards the envy of the country. One of the biggest bridges in the world is now being completed—a new, mammoth railroad terminal is being constructed—miles of new subways—massive new public buildings. In this wonderful city, founded by Penn, one thousand million of dollars are being spent right now for improvements.

Ten years ago such figures would have been staggering—even today their magnitude is breath-taking. But they illustrate the tremendous progress this wonderful city has taken in a decade. Its glorious past, as the greatest of old American cities, is overshadowed by its still more glorious present. It is not living on its past traditions, but is building now—and building mightily—for the Future.

Let its active, untiring, virile present forecast its magnificent Future. Compare what Philadelphia was ten years ago to the Philadelphia of today, and it may faintly—but only faintly—vision to you what Philadelphia will be ten years from now.

All of its dreams of yesterday have come true today—and today's dreams will come true tomorrow. Philadelphia is going forward with giant strides to fulfill its destiny, and to hold its rightful place among the big, beautiful, worthwhile cities of the world. You, its citizens, have made it big—it is for you to make it bigger, better and more beautiful by having Faith in it—for it is worthy of your Faith.

Believe in . . Invest in . . PHILADELPHIA

Philadelphia Real Estate Board

The circulation of The Evening Bulletin is larger than that of any other Philadelphia newspaper and is one of the largest in the United States.

A. N. P. A. Lays Ground Work for Great Expansion of Membership Services

Delegates to First Fall Convention Unanimously Adopt Special Committee Recommendations for Revamping Revenue Structure Permitting Broader Association Activities

By PHILIP SCHUYLER

(*By Telegraph to* EDITOR & PUBLISHER)

WHITE SULPHUR SPRINGS, W. Va., Nov. 12.—A greater association has emerged from this, the first fall convention of the American Newspaper Publishers' Association, which opened here Nov. 10 and closed today.

At Wednesday's morning business session, the more than 100 delegates attending unanimously adopted a resolution, accepting in principle the recommendations of the board of directors and a special expansion committee that the organization's financial structure be revamped to permit the carrying out of plans for broadening the services offered to members by the A. N. P. A.

The recommendations were presented delegates by John Stewart Bryan, of the *Richmond* (Va.) *News Leader,* and chairman of the special expansion committee.

In brief they were:

That membership dues of smaller newspapers be decreased and those of larger newspapers be materially increased, with the net result that more funds will be forthcoming annually for conduct of association activities.

Added funds thus made available will be used in various ways now being studied by the board of directors and the membership in general.

The board of directors it is understood is contemplating possible additions to its membership service departments of:

1. A mechanical bureau, in charge of a thoroughly competent mechanical superintendent, who will work for the standardization of press room equipment; issue regular weekly bulletins, informing the membership of the latest mechanical devices and the newest methods developed for preventing press room waste; and regularly visit member newspapers to advise them on mechanical problems.

2. A traffic department to assist members in solving their traffic difficulties.

3. An accounting department, in charge of an expert, who would be of obvious assistance to all association members.

Opportunities for expansion, it was brought out, were without limit in the newspaper field for an organization like the A. N. P. A., national in its scope. And since the details of possible expansion are of interest to the entire membership, they will be worked out gradually, offering chances for suggestion and aid from every one concerned.

By virtue of Wednesday's action, the board of directors has authority now to put the proposed change in membership dues and the concomitant expansion plans into immediate operation. Whether this will be done, however, has not yet been definitely decided.

The directors, it is reliably stated, will probably reach the opinion that the program adopted in principle at this fall meeting will be held over for further consideration before the regular annual association convention in New York next April. Another course being discussed is that a mail referendum will be carried out, to insure a representative vote of the entire membership of 500 newspapers.

Lafayette Young, Jr., *Des Moines Capital,* drives from the first tee, leading the players in the presidential foursome. In the background are (left to right): Fleming Newbold, *Washington Star;* E. H. Butler, *Buffalo Evening News;* and President S. E. Thomason, *Chicago Tribune.*

Mr. Bryan presented the expansion program in an able manner. He pointed out first that plans for increasing A. N. P. A. service for members had been a subject of serious consideration for the board of directors for the past several years.

The smaller newspapers, he said, had been paying a disproportionate share of the association's operation cost. The membership dues were $75 a year, and this sum held for a newspaper, whether it's circulation was 2,100 or 1,000,000. The only variation in this charge to members was that extra dues were required from newspapers according to the number of machines they operated.

Mr. Bryan declared the directors and special committee had reached the conclusion that this method of regulating dues was unfair as operated at present.

Now, leaving the machine charge as it stands, it is proposed to reduce the membership dues to small newspapers from $75 to $50, for all newspapers under 10,000 circulation, allow the $75 to remain intact for newspapers of from 10,000 to 20,000, and materially increase the dues to newspapers in groups above 200,000 circulation.

Present activities of the A.N.P.A. were brought forward to show what had been accomplished with the limited funds available.

The departments particularly stressed as aids to the entire membership were: the labor department, both union and open shop; the postal committee; support of printing trade schools; newsprint; credits, collections, legislation, and the bureau of advertising. The most recent additions to A.N.P.A. service, it was said, was the start of the open shop division, the Bureau of Advertising, and support of the printing trade schools.

Mr. Bryan's presentation of the plan was supported by S. E. Thomason, association president, who, in a speech declared he felt the larger newspapers were in accord with the views of the board of directors and the expansion committee.

"There has been a strong sentiment among many of the members," he said, "that the association should extend the scope of its work, and these members have expressed the hope that others with vision would join with them in providing the necessary revenue to make the expansion possible."

Mr. Thomason was followed on the floor by Louis Wiley, business manager of the *New York Times.*

"I am convinced that the work of the A.N.P.A. should be extended," Mr. Wiley declared. "The various new bureaus proposed would be of material benefit to the entire membership in preventing waste and lost motion, in the newspaper business. I also favor that the burden now being borne in support of the A.N.P.A. by the smaller newspapers be reduced, and those of the large city newspapers greatly increased."

The resolution subsequently drawn up accepting the expansion program in principle was unanimously passed.

Mr. Bryan's address threw a new significance on the keynote selected for the convention "Lost Motion and Waste in the Newspaper Business."

It was brought out that the contemplated expansion of the A.N.P.A. would stop up many a leak in the pocketbooks of publishers. The added cost to the larger newspapers would be repaid many times through benefits obtained by the establishment and operation of the proposed new service departments.

The address of Charles R. Hart, mechanical superintendent of the *New York Times,* delivered just prior to Mr. Bryan's presentation of the expansion program, disclosed the necessity in the newspaper field of a mechanical department such as was suggested.

"Too few publishers," Mr. Hart declared, "look upon their business as a manufacturing business, yet that is exactly what it is. Newspaper publishers take no steps in standardization of press room equipment, for instance, while if a disordered condition such as at present exists in our field obtained in any other manufacturing line, it would be corrected immediately, as the first step to cheapen cost of production and increase efficiency."

With a warm, bright sun tugging golfers to the course, the convention got under way promptly on time at 10 o'clock Tuesday morning. A half a dozen delegates were furnished with special red badges to act as constables and hurry the reluctant into the Grand Ballroom of this castle-like hotel. Other means were also resorted to, in efforts to speed business off the map and make room for pleasure.

President Thomason wasted no time in his address of welcome. Southern hospitality had helped him out. Negroes bow your every step, and each guest is introduced to Harry M. Tait, hotel manager, as he signs the book.

Before the gavel was turned over to W. B. Bryant, *Paterson* (N. J.) *Press-Guardian,* chairman of the program committee, Frank B. Noyes, publisher of the *Washington Star,* and president of the Associated Press, was called upon to pay tribute to the late Victor F. Lawson, publisher of the *Chicago Daily News.*

Then this first session went down into newspaper pressrooms and paper storage quarters. Traffic problems of newspapers were probed by E. M. Antrim, *Chicago Tribune.* George M. Rogers, *Cleveland Plain Dealer,* told publishers where waste could be curbed in their press rooms; while Charles F. Hart, *New York Times,* took the whole mechanical department as his province and covered it as only a man of his long experience could. These three speeches are reported extensively elsewhere in this issue.

Decks had been cleared for action on these speeches. The members of the board

FOOTNOTES FROM A. N. P. A.'S FALL MEET

Publishers Outside Convention Hall Discuss Their Plants, Specials, Newsprint, National Advertising, Classified Pages, Mechanical Equipment and Other Inside Topics

INSIDE newspaper stories are told outside, as well as in the convention hall.

Publishers, not shadowed by meeting-house seriousness, discuss their plants, special representatives, printers, newsprint, mechanical equipment, the volume of business they are doing, the ways they have found to cut expenses, other conventions they have attended, and golf, of course.

Outside convention room doors lies the graduate school of newspaper making.

* * *

"Seen the new press equipment of the *New York World?*" one overhears. "The presses are put on steel superstructures off the concrete floor, allowing for underneath feed. Good idea, don't you think? Roll the paper right in—a money-saver."

* * *

"How about a housewarming in that new plant of yours? Better invite us all over to see it."

This addressed to Walter Dear, publisher of the *Jersey City Jersey Journal,* who opened a remarkably fine new building last February. He now replies:

"I've been meaning to, really. But believe me, opening a new plant is not all a bed of roses. We're just beginning to get adjusted."

Here is one publisher who enjoys talking about football games. Mr. Dear saw Princeton romp away from Harvard, and on Nov. 14, he will be in the Bowl at New Haven, watching Alma Mater play Yale. He graduated from Princeton 20 years ago.

* * *

When it comes to plants, Victor Ridder, of the *New Yorker Staats-Zeitung-Herold,* has some interior decorating to talk about. His suite of private offices in his building off Park Row, is one of Manhattan's newspaper show places.

Joseph Ridder, his brother, planned the suite. Worth your while to drop in and look it over, next time you're in New York. The woodwork is particularly attractive.

"There's a secret in that not many people know about," says Mr. Ridder. "The wood is American walnut, but the light effect it gives comes from rubbing down with banana oil, instead of varnish. An old German cabinet maker told us how to do it, and the result is certainly pleasing."

The Ridder family, publishers of the New York German language papers, has lived in America for 100 years. The Staats-Zeitung was established 91 years ago.

"We are beginning to plan our 100th anniversary," Mr. Ridder said.

Mr. Ridder is chuckling about a $100 bet he willingly lost. He bet his advertising manager the paper wouldn't do $100,000 worth of business this year. That figure has already been passed.

* * *

"The worst habit a newspaper publisher can get is writing off bad bills," someone sighs.

"The classified department is where they spawn. People telephone them in, and its worth your life to collect."

"We stopped that this year," a colleague tells.

"The ad-taker asks each person if he has an account with the newspapers. If not, he is told that the ad must be sent down with cash by a messenger or put in the mail with check in order to be inserted the next day.

* * *

"Speaking about the classified page," remarks J. L. Kinmonth of the *Asbury Park* (N. J.) *Press,* "the mass psychology, when it comes to round numbers, is worth any publisher's study."

"How's that?"

"Well," he explains, "we were charging $1.00 for six insertions of 20 words each. We print a Sunday paper and the cost for seven days' insertion was $1.15."

"Surprising thing was, virtually everybody paid down $1.00, and let it go at that. We had a weak classified page on Sundays."

"Then we raised the rate, and offered seven 20-word insertions for $1.50. We immediately began printing a full page of classified on Sundays and have kept it up ever since.

"It just seems to show that people think easiest in round numbers."

* * *

For several weeks, R. E. Lent, publisher of the *Passaic* (N. J.) *News,* has been working an extra night shift. "Business is better than ever. Prospects are bright for holiday linage," he says.

Mr. Lent is a former president of the New Jersey Press Association, and has made many a sparkling talk before that group.

W. B. Bryant, of the *Paterson* (N. J.) *Press-Guardian,* chairman of the program committee, knew what he was doing when he assigned Mr. Lent to address the A. N. P. A.

* * *

Publishers were discussing the action of the Vasco Products Company, Inc., of Norfolk, Va. Through the Virginia Advertising Service Company, this concern is seeking to sign 8 months contracts with newspapers for 15,000 lines, offering to pay four months by cash and the remainder in preferred stock. Some are accepting: majority say they refused.

* * *

The talk was on the unions, and one delegate told this story:

"We have a four o'clock edition, with a deadline at 3.35 to allow plenty of leeway for the composing room and stereotypers.

"The other day, the composing room, in speeding the make-up of a page, shifted a head from one story to another. Four hundred papers were printed before the error was caught in the editorial room. The stereotypers were kept working until a few minutes after four and the foreman telephoned me there would be an hour's overtime to pay.

"'To h.... with it,' I said, 'I'm not going to pay you overtime for a composing room mistake. You collect from them.'

"Nothing more was said until pay day, and the clerk was making up the roll with overtime pay for the stereotypers.

"Then the foreman called the cashier.

"'Never mind the overtime,'" he said.

"Hum," said a friend to whom the story was told. "Chapel meeting I suppose; box of cigars from composing room passed around."

* * *

Junius P. Fishburn, president and editor of the *Roanoke* (Va.) *Times,* had his paper delivered daily to the newspaper meeting in the neighbor state.

* * *

Frank E. Tripp, of the Empire State Group of newspapers, who signs himself as representing the *Elmira* (N. Y.) *Star-Gazette,* motored the 500 miles here. The last 27 miles were the hardest, he said. Few bridges, still fords, across rivers, in this state.

* * *

F. J. Burd, of the *Vancouver* (B. C.) *Daily Province,* traveled furthest to hear A. N. P. A. orations and to play golf.

"We have four tourist seasons in Vancouver now," was his comment. "And the Americans visit us in all four. We have come to call them in our city the 'Volstead refugees.'"

Mr. Burd plans to attend a meeting of the board of directors of the Canadian Press in Montreal, Nov. 23.

* * *

Reminiscences aplenty on the trip given publishers recently by the International Paper Company to their new Three

(*Continued on page* 47)

Mrs. Rowe Stewart, wife of the general manager of the *Philadelphia Record,* and Mrs. Lafayette Young, wife of the *Des Moines Capital* publisher came in to the final green, with Mrs. Young (left), the winner.

Major Allen Potts, *Richmond News-Leader* (left), and L. B. Palmer, A. N. P. A. manager, discuss rules, prior to start of the tournament. Major Potts was chairman of the golf committee.

WILEY ON LOST MOTION AND WASTE IN ADVERTISING

Millions of Losses Annually a Tax on Society—Cites "Bogus" Composition, Odd Sizes, Week-end Traffic Jams, Late Copy, Unprofitable Agency Service, Circulation Duplication, Carelessness

By LOUIS WILEY
Business Manager, New York Times

(Address Delivered Before the American Newspaper Publishers' Association This Week at White Sulphur Springs.)

WASTE is a tax on society for which we pay out of the fruits of our labor. We have a moral duty to our fellowmen to reduce this burden. President Coolidge deserves our commendation for his unremitting efforts to promote economy, to eliminate waste in national affairs, and so to reduce our taxes. His is an example to follow. Americans abroad have a reputation for spendthrift waste. Economy is really the traditional American characteristic, born of the struggles of the early fathers.

We owe another obligation to do away with waste. That is our obligation to advertisng itself. American industry, thanks to its own ingenuity. is reducing waste in production. Secretary Hoover is directing his great knowledge and influence to that end in many ways. We are attacking more energetically than ever before the wastes in distribution. It is the immediate problem before us. Advertising efficiently used is the first agency for the accomplishment of distribution at less expense. Every step in distribution is now being studied in the light of its place in the machinery for putting goods in the hands of consumers. We owe it to the great profession and business of advertising to apply the surgeon's knife to waste.

Because we are all human we are far more likely to see how dreadfully wasteful the other man is and how impossible it is to correct our practices. In this audience, however, we have the representatives of that branch of our business charged with the greatest proportion of waste. That branch is management. In that penetrating study of waste made by the committee of the Federated American Engineering Societies more than 50 per cent of waste was laid at the door of management, less than 25 per cent was assayed against labor, and the amount charged to outside contracts with the public, trade relationships, etc., was least of all. One of the six industries studied was printing. The fact that the majority of shops examined were job plants does not destroy the value of the findings of the committee for newspaper publishers.

Mention of that report leads me to take up first the wastes in the mechanical branch of newspaper advertising. We can eliminate advertising waste by greater standardization of newspaper column and page sizes. It is interesting to note that the engineers' committee found a greater variation in magazines than in newspapers. There were eighteen variations in magazine width and seventy-six in length of page or column. Among newspapers there were sixteen in width and sixty-four in length. The variations in all classes of publications were estimated to cost the public not less than $100,000,000 a year. It was said that the standardization of newspaper columns to one size would mean a saving of from $3,000,000 to $5,000,000 a year on composition and plates alone. Here is one field of saving in newspaper advertising. By attacking this problem we can increase the general use of newspaper advertising. There would be other savings in consequence, in newsprint sizes, in composing room and pressroom machinery. Doubtless much of the money saved would be spent in increased advertising space. Although many publishers pray to be delivered from that.

A very considerable waste occurs in the composing rooms. Most inexcusable of all is the bogus setting rule which obtains in newspaper offices, whereby advertising received in plate or mat form, bearing a local address, must be reset in the composing room, merely to be thrown away.

A New York trio (left to right): Louis Wiley, *New York Times;* Edwin S. Friendly, *New York Sun;* and Charles F. Hart, *New York Times.*

It will doubtless astonish you to know the actual volume of this waste. In the thirteen weeks ending Nov 1 of this year the bogus set in The New York Times composing room totaled 708 pages, and the cost was $33,198.12. This indicates an annual waste in excess of $125,000 in one composing room. The annual total for all New York newspapers is estimated to be at least $1,000,000. I hesitate to think what future generations will think of a twentieth century society which permitted such a practice. I know of no waste chargeable against management which compares with that in sheer futility. Labor would gain more by voluntarily giving up this tax on society than it could possibly lose. It cannot profit labor to know that some of its workers live off such a tribute levied against industry.

The waste in typographical revisions is large. Newspaper practice varies in charging costs of such revisions. The New York Times allows for revisions in advertisements up to 25 per cent of the original composition. Many newspapers have no such limitation. A considerable saving can be accomplished by laying out advertisements right the first time. Imagine a master builder allowing free changes in a house up to a third or a half of the original construction. There is too much revision of proofs, too little disposition to think of such revision in terms of labor dollars.

Pittsburgh and points West, off for an automobile ride in West Virginia. (Left to right): Mrs. Zell Hart Deming, Warren (O.) *Tribune-Chronicle;* T. R. Williams, *Pittsburgh Chronicle-Telegraph;* Mrs. Louis H. Brush, East Liverpool (O.) *Review-Tribune;* and Mrs. L. K. Nicholson, wife of the president and editor of the *New Orleans Times-Picayune.*

Newspaper production can never approach the mere turning out of production units such as nails. Every day's edition is new and different. It is an industry which is subjected to sudden strains and stresses, to extraordinary peak loads, and which has a time element of vital importance. We can do much to eliminate some of the pressure. Probably every publisher here experiences two or three high volume days of advertising in daily editions regularly every week. The other days fall much below in volume. The plant must be maintained to take care of the peak load. We could accomplish a saving by evening up. Some advertising can be transferred, but one way out is to develop appropriate advertising for the other days —church advertising, markets and foods for Saturdays, and so on. A valuable symposium on that subject was printed by EDITOR & PUBLISHER last year.

The hours of every day in the newspaper plant are subject to undue peak loads. Advertisers can eliminate waste in newspaper offices and benefit themselves by the earlier delivery of copy. Advertising agencies frequently lose circulation for their clients by delivering copy so late as to miss an early edition.

If late copy causes the newspaper to miss trains and lose some circulation that is the advertiser's loss. Stronger efforts of newspaper managers and agencies to obtain more copy earlier in the day would mean a saving. A greater part of composition could be done by men on the day scale instead of the night scale, and a saving could be made in overtime. Among the other wastes eliminated would be adjustments on bills for errors made in rush work.

In the domain of advertising waste we should not forget to mention the wasteful use of space in office advertising. Publishers are too likely to look upon space in their columns as costing nothing. Office advertisements are generally spendthrifts of white paper. It is a waste not to hold these announcements to small size and give the columns saved to news. Publishers, too, who would not think of allowing a display advertiser to disfigure the front page will readily allow unattractive space-wasting office advertisements to be strewn over the same page.

An expense to newspapers which could be reduced is that of special representation. There are few advertising managers who do not feel that something can be done to improve the system of representation. For the most part these representatives have no group of newspapers related in any way.

The solicitation cannot be effectively presented for a unified group. It is probable that the future will see more organized specialization in this branch of advertising. Most newspapers obtain their national advertising subject to a commission which would be smaller if the special representation were more efficiently organized.
